LAKE FOREST COLLEGE

2005-2007 CATALOG

Lake Forest College affirms that education ennobles the individual.

Our curriculum engages students in the breadth of the liberal arts and the depth of traditional disciplines. We encourage students to read critically, reason analytically, communicate persuasively, and, above all, to think for themselves.

We foster creative talent and independent research. We embrace cultural diversity. We honor achievement.

Our faculty of distinguished scholars takes pride in its commitment to teaching. We know our students by name and prepare them to become responsible citizens of the global community. We enable students, faculty, trustees, and administrators to solve problems in a civil manner, collectively. We maintain a secure residential campus of great beauty. We enrich our curriculum with the vibrant resources of Chicago.

Lake Forest College celebrates the personal growth that accompanies the quest for excellence.

— Lake Forest College Mission Statement
Approved by the Faculty and Trustees, May 1992.

Lake Forest College's nondiscrimination policies are based on federal laws and regulations, including Title IX and other relevant regulations, as well as on its institutional ideals.

It is the stated policy of Lake Forest College that appropriate qualifications for and performance of specific duties are the basic criteria for the employment and promotion of all College academic and nonacademic staff. Lake Forest College does not discriminate against any persons because of race, color, sex, religion, or national or ethnic origin in its education program, activities, or employment. In addition, Lake Forest College is required by Title IX and regulations promulgated thereunder not to discriminate on the basis of sex in educational programs, activities, and employment. Lake Forest College does not discriminate on the basis of handicap against any otherwise qualified person by denying participation in, or the benefits of, any College program or activity. Lake Forest College also does not discriminate on the basis of sexual orientation in its education programs, activities, or employment. For purpose of this policy, the term "sexual orientation" means the status or expression, whether actual or perceived, of heterosexuality, homosexuality, or bisexuality.

The campus coordinator for Title IX (prohibiting sex discrimination) is the Personnel Officer, to whom inquiries concerning Title IX may be referred. The campus coordinator for Section 504 of the Federal Rehabilitation Act of 1973 (prohibiting handicap discrimination) is Stephen D. Schutt, President.

GENERAL INFORMATION

LAKE FOREST COLLEGE: AN INTRODUCTION

Lake Forest College is a coeducational undergraduate institution offering students the opportunities and challenges of a liberal arts education in a community dedicated to learning. At the heart of Lake Forest is the close-knit community of teachers, scholars, students and staff representing cultures from around the globe who live and learn together in an environment of mutual respect and collaboration. Committed to teaching undergraduates, the distinguished faculty shares a fundamental goal of preparing students to become independent thinkers and responsible citizens of global communities. The curriculum, uniquely enriched by the extensive resources of nearby Chicago, challenges students to think critically and creatively and to communicate convincingly in a variety of ways, while providing many experiential opportunities for applying and further developing acquired concepts and methods. Undergraduate study at the College prepares students for a lifetime of intellectual growth and the exploration of new frontiers.

The College was founded in 1857 as Lind University by the same group of visionary Presbyterians who founded the town of Lake Forest (1861) and established its First Presbyterian Church (1859). The institution grew to include male and female academies, a coeducational undergraduate college, and graduate schools of medicine, dentistry, and law. The undergraduate college enrolled its first students in 1876 as Lake Forest University. During the early part of the twentieth century, the graduate schools were disassociated from the University and the academies became autonomous schools (continuing today as Lake Forest Academy). Full attention was thereafter devoted by Lake Forest University to its undergraduate college. Accordingly, the institution was formally renamed Lake Forest College in 1965.

Throughout its history, the College has continued to express many of the values cherished by its founders. Today the faculty, students, and staff come from diverse ethnic, racial, and religious backgrounds. The College is governed by an independent Board of Trustees, is accredited at the undergraduate and the master's degree levels by the North Central Association of Colleges and Schools, and is registered by the Board of Higher Education of the State of Illinois.

After more than a century of undergraduate education, the College offers a curriculum in the liberal arts that combines requirements for exposure to the humanities and natural and social sciences with many opportunities for interdisciplinary exploration, independent academic work, and substantial choice in designing one's course of study. The undergraduate academic programs are enhanced by cooperative degree programs with several other institutions of higher education, for-credit internship experiences in Chicago, other areas of the United States, and abroad, and a wide array of programs for international study. The College's graduate program in liberal studies, established in 1976, pursues a strongly interdisciplinary approach.

Intentionally small in size, Lake Forest College fosters regular, continuing interaction between students and faculty. As a result of its location near Chicago, students have exposure to the myriad cultural opportunities available only in one of the world's great cities. In its curriculum and its student life, Lake Forest's special qualities are best defined in a mission statement approved by the faculty and trustees in 1992, which is printed on the second page of this catalog.

LOCATION

Lake Forest College is located several blocks from Lake Michigan in the small city of Lake Forest, Illinois. One of the most beautiful suburbs on Chicago's North Shore, Lake Forest provides a quiet, secure, and supportive environment for the College. The campus is 25 miles northeast

of O'Hare Airport via the Tri-State Tollway (Interstate 294), 35 minutes by car and about an hour on the airport bus. Downtown Chicago, with its intellectual, cultural, and educational resources, is only 30 miles away. The superb commuter railroad takes less than an hour to reach the heart of the city, and the campus is a short walk or cab ride from the railroad station in Lake Forest. Students and faculty have access to the libraries of Northwestern University, the University of Chicago, the University of Illinois at Chicago, and the Chicago Historical Society as well as to the Newberry Library and the Chicago Public Library. The Chicago Symphony, the Lyric Opera, the Goodman Theatre, the Museum of Contemporary Art, and the Art Institute of Chicago are among the many cultural institutions that make Chicago a national center for music, drama, and art. The Museum of Science and Industry, the Field Museum of Natural History, the Adler Planetarium, the Shedd Aquarium, and Argonne National Laboratory are available to our students both informally and as sites for internships and for course work. The location of the College gives it the best of the suburban and urban worlds.

FACULTY

At the center of Lake Forest College stands its distinguished faculty. They are first and foremost teachers, and the College seeks out and retains faculty members principally because they enjoy and excel at teaching undergraduates. Faculty members, rather than graduate assistants, teach all courses and provide academic advising, and they are easily available to students. A student/faculty ratio of about 12:1 gives students ready access to their teachers and enables them to have informed counsel about their individual programs of study. Small class size and flexibility in instructional methods provide our students with regular opportunities for the give and take of classroom discussion.

The faculty's tradition of teaching excellence is matched and supported by its achievement in scholarly research. Approximately 98% of the full-time teaching faculty hold doctoral degrees. Many are recognized authorities in their fields and are actively involved as lecturers, consultants, journal editors, authors, and artists. In recent years faculty members have been awarded fellowships or other national awards by the American Council of Learned Societies, the Fulbright Commission, the German Marshall Fund, the Andrew W. Mellon Foundation, the National Endowment for the Humanities, the

Phi Beta Kappa Society, the Presidential Young Investigator Program of the National Science Foundation, ASCAP, the Rockefeller Foundation, and the Woodrow Wilson National Fellowship Foundation. Students at the College enjoy the benefits of studying with these nationally prominent scholars either by enrolling in courses that they teach or working with them on research projects.

STUDENTS

For many years the College has fostered diversity within the student body and commitment among its students to high standards of academic excellence and personal integrity. Virtually all states of the Union and more than 40 foreign countries are represented among the undergraduates. The diversity of the College community is seen in more than the geographical, educational, and racial and ethnic backgrounds of its students. It is also found in the broad range of personalities at the College. A student at Lake Forest is accepted as an individual with particular intellectual and personal talents and needs.

For each of these individuals, the College is a place to study, work, enjoy, and live. Students participate in a variety of activities. They join the faculty in the governing of the College through participation in governance committees. Students manage WMXM-FM, our radio station, the Stentor, our student newspaper, as well as a number of literary magazines, the chorus and instrumental ensembles, and theater groups. Honorary societies in biology, drama, economics, education, foreign languages, philosophy, politics, psychology, chemistry, and physics enjoy active student participation as do other special-interest clubs. The College provides physical education for interested students and maintains a comprehensive intramural and intercollegiate athletic program. There are five national sororities and one national fraternity, as well as one local fraternity, all housed within the residence halls. All students have equal opportunity to take advantage of the richness of the College's co-curricular programs.

ACADEMIC CALENDAR

Fall and Spring Semesters

The academic calendar of Lake Forest College is based on two 15-week semesters, from late August through mid-December and from mid-January to early May. Students normally take four course credits per semester (the equivalent of 16 semester hours). All courses run for 15

weeks, with the exception of the courses associated with the Lake Forest College Program in Greece and Turkey.

Summer Sessions

Two summer sessions offer a number of courses, the great majority being taught by regular members of the College's faculty. The first session, three weeks in length, runs from mid-May to early June, in which a student may enroll in a single course. The seven-week session extends from mid-June to late July, during which a student may enroll in a maximum of two courses.

RESEARCH AND LEARNING RESOURCES

Office of Library and Information Technology (LIT)

LIT is committed to providing resources and services that enable students to find, evaluate, and effectively use information in all formats. LIT plays a vital role in helping students acquire the information fluency skills that will help them succeed in their academic careers and in their lives after they leave Lake Forest College.

Facilities and Services

Library and information technology services at Lake Forest College have recently undergone an exciting transformation. An extensive renovation and expansion of the Donnelley and Lee Library was completed in the fall of 2004, resulting in the creation of the new 72,000-square-foot state-of-the-art Donnelley and Lee Library. This new facility houses the College Library's collection of 275,000 print volumes and offers a wide variety of individual and group study spaces. In addition, the Library features a 24-hour computer lab, a cybercafe, four smart classrooms, a Technology Resource Center, and an exclusive wireless network.

Donnelley and Lee Library has been designed to support LIT's strong programs of instruction. A variety of classes, workshops, and individually scheduled research appointments are offered on a regular basis and are designed for students who wish to hone their research skills and learn to use special technological applications such as digital video editing.

The College is a member of CARLI, a consortium of 65 academic libraries, whose combined holdings of more than 20 million volumes supplement strong local holdings. Lake Forest College students, faculty, and staff can easily

search the catalogs of these libraries and can issue requests to borrow items from any one of them. Most of the requested items are delivered to the campus within one week. The Library also offers traditional interlibrary loan service for materials not available within the consortium. In addition, Lake Forest College students and faculty may take advantage of other fine library collections in the Chicago area. For example, with prior arrangement, members of the College community have access to the libraries at the University of Chicago, Northwestern University, and the Chicago Historical Society.

The campus network consists of a fiber optic backbone that connects all campus buildings to the College's network. The network is available from all classrooms and residence hall rooms. An ever-expanding wireless network is also available from various locations on campus, including most residence halls. All students living in residence halls may connect their personally owned computers to the campus network and will be assisted in this process by LIT staff. A full T-3 line provides all members of the Lake Forest College community with high-speed access to the Internet.

All students are provided with e-mail accounts, network storage space on a file server, and space to create Web pages. All members of the Lake Forest College community are expected to adhere to the policies outlined in the College's Acceptable Use of Information Technology Resources at Lake Forest College.

LIT Quick Facts

Number of volumes (books and periodicals)	275,000
Number of volumes added per year	>4,000
Current periodical subscriptions (paper and electronic)	>1,300
Periodical databases	>85
Microform holdings	>103,500
Government documents	>109,000
Workstations in public computer labs	>120

The Writing Center

The Writing Center offers individual instruction and information on every aspect of writing for all members of the campus community. These services are available for students working in any discipline and wanting to improve their writing in assigned papers, creative work, laboratory reports, research, senior theses, and other exercises. Staffed by the Director of Writing Programs, the Assistant Director of the Writing Center, and student tutors, the Writing Center provides assistance to students at all levels of writing competency. The Center also promotes professional interest in writing by organizing workshops for faculty and by supporting discussion, consultation, and informal meetings on issues of writing and pedagogy throughout the curriculum. The Writing Center plays a central role, therefore, in the College's development of the writing curriculum across the disciplines. The Center is located in Carnegie Hall and is open during the regular College term.

To encourage interest and excellence in writing, the Writing Center sponsors a First-Year Composition Contest and an annual Lake Forest College Writing Contest, both juried by faculty. Winning papers are published on the Writing Center's Web page.

The Learning and Teaching Center (LTC)

The goal of the Learning and Teaching Center is to enhance the learning process at Lake Forest College. The LTC helps students develop skills and strategies for learning throughout their college years and beyond. The LTC assists faculty in devising innovative techniques to help students read critically, reason analytically, communicate persuasively, and think independently. By encouraging and expanding interactions among student and faculty groups, the Learning and Teaching Center supports the enterprise of our learning community.

Among the specific services the LTC provides for students are the maintenance of a library of books and videotapes; coordination of the peer teaching and peer mentoring programs; training for departmental tutors; workshops for students writing senior theses; workshops for new students; workshops with faculty and students on learning issues; videotape practice sessions; and recordings for the blind and dyslexic.

Center for Chicago Programs

The Center for Chicago Programs helps facilitate engagement with Chicago both in the city and on campus. At the Center, the College community may obtain information about music, art, theater, and other cultural, social, and educational events in the city and suburbs, and also participate in a series of trips to a variety of major Chicago events ranging from Broadway musicals to national dance programs and professional sports events. The Center offers guidance on transportation to the city, and suggestions of neighborhoods and specific places to visit.

Central to its mission is also bringing Chicago to the campus. Toward this end the Center helps to bring noteworthy speakers, artists, and performers to the College. Lake Forest Lyrica, a series of chamber music concerts by Chicago area professional ensembles, held in Reid Chapel, is one such program. Another is the Literary Festival, which brings well known Chicago area writers to campus. Experts from Chicago in various fields including the social and natural sciences, are routinely invited to campus to give lectures as well.

STUDENT LIFE AND ACTIVITIES

Residence Life

The Office of Residence Life at Lake Forest College maintains a living and learning environment conducive to cognitive, social, and personal development. Residence Life aims to provide an atmosphere that fosters individual student development and growth and supports the educational mission of the College through programming and community building. The office attends to student needs individually and within the context of the larger residential community. Members of the Residence Life staff, the faculty, and the administration share in the responsibility for building and maintaining a sense of community that recognizes each student's need to learn and values each student's right to learn.

Ten residence halls provide options that include all-women's, coeducational, upperclass, predominantly first-year, alcohol-free, and smoke-free living environments. In addition, some students are affiliated with housing units based on a common interest or purpose. The residence halls contain their own lounges for study and recreational activities. There are also four apartments, housing 5 students each, that are available by application only to sophomores, juniors, and seniors.

Student residence hall staff includes Community Directors and Resident Assistants, who are supervised by a professional staff person. In each residence hall the Community Director and Resident Assistants are selected by Residence Life professional staff. The staff provides peer-based counseling that responds to individual needs, coordinates educational and social programming, and upholds College policies. The professional staff also provides counseling and supervision for the student staff.

Athletics

Athletics at the varsity, club, intramural, physical education, and recreational levels are important to student life at Lake Forest College. Over 65% of the student body participate in some aspect of athletic programming. The Athletic Department offers a broad range of programs addressing the diverse needs of the community for competition, sports instruction, and recreation at different levels of skill and commitment.

As a member of NCAA Division III, Lake Forest College competes in both the Midwest Conference and the Northern Collegiate Hockey Association. The College sponsors varsity competition in 17 sports (basketball, cross-country, football, handball, hockey, soccer, swimming/diving, and tennis for men; basketball, cross-country, handball, hockey, soccer, softball, swimming/diving, tennis, and volleyball for women). All of these programs have a tradition of excellence and many have experienced success at the conference or national level. The College expects team members to be students first. The coaches consistently challenge students to reach their potential as students and athletes, encouraging them to excel in both academics and athletic competition.

The College has an extensive club sport program. Club teams compete with local colleges and clubs both on and off the Lake Forest campus. Some of the sports offered at this level include rugby, sailing, women's lacrosse, men's volleyball, baseball, golf, fencing, track, water polo, and skydiving. The intramural program is strong throughout the year with basketball, volleyball, indoor soccer, and hockey being the most popular sports.

Students enjoy fitness classes such as aerobics and advanced conditioning, as well as instruction in lifetime sports such as golf, racquetball, tennis, scuba, lifeguarding, and swimming. These physical education courses do not receive academic credit at the College.

Music

In addition to offering a variety of courses in music history, theory, electronic music, world music, and applied music, the Music Department runs several performance ensembles: chorus, a cappella ensemble, chamber orchestra, concert band, jazz ensemble, flute choir, percussion ensemble, and other chamber ensembles, depending upon student interest. These groups perform on campus several times throughout the year. Professional music groups, including Chicago-area chamber ensembles and solo recitalists give concerts on campus. In addition, Lake Forest Lyrica, a series of chamber music concerts performed by some of Chicago's finest musicians, is held on campus and is free to students.

A nearby community orchestra, the North Suburban Symphony, presents four concert programs a year. Interested students are invited and encouraged to perform with this orchestra.

Theater

Lake Forest College students participate in an active campus theater program, highlighted by a flexible theater space and professional direction and design. The Allan Carr Theater in Hixon Hall is an intimate and unique venue for performing arts. This fully-equipped facility adapts to proscenium, thrust, and experimental staging configurations, and is a vibrant center for campus theater activity. A wide variety of classic, contemporary, and original productions, open to all students, offers experience in all aspects of theater: acting, directing, playwrighting, dramaturgy, design, costuming, lighting, stagecraft, and publicity. Under the guidance of the Director of Theater, the season is chosen, managed, and staffed by the Garrick Players, a student organization with a history of excellence for over 100 years. Students can achieve membership in Garrick Players with significant participation in at least one production. The group elects an Executive Board each spring to serve for the following year, working in cooperation with the Theater Department chairperson. Please visit the Garrick Players' Web site at <http://campus.lakeforest.edu/activities/garrick/> for information on past and current productions, as well as important updates on workshops and activities.

Art Galleries

The Sonnenschein Gallery and the adjacent Albright Room are located in Durand Institute on North Campus. Changing exhibitions are

mounted in Sonnenschein Gallery throughout the academic year, displaying both the work of the faculty and students and works held in the collection owned by the College or lent by other collections. Several times a year members of the faculty curate exhibitions of contemporary work with various themes. The College art collection emphasizes works on paper, including drawings, prints and photographs; we also hold an extensive group of Pre-Columbian and African objects.

College Publications

The Stentor, the College newspaper, was first published during the 1886-87 academic year and continues to serve as the students' weekly journal. The Leadership and Community Involvement Office publishes weekly information that includes campus events and official College announcements. *Spectrum*, the alumni magazine, is sent to alumni and families of current students. The fine arts magazine, *Tusitala*, is published annually and provides an outlet for student poets, prose writers, photographers, and artists. *Collage*, the foreign language literary magazine, includes original prose and poetry in foreign languages, as well as original artwork, by Lake Forest College students and faculty.

Campus Events

The College sponsors a variety of cultural, social, and educational events on campus and, through the new Center for Chicago Programs, encourages students to take advantage of opportunities in Chicago. At the Center, students can obtain information about music, art, sports, festivals, and theater in the city and suburbs, and also participate in a series of trips to a variety of major Chicago events ranging from Broadway musicals to national dance programs and professional sports events. The Friends of the Arts program accepts concert and other tickets from members of the community, which would not otherwise be available. As a result, many Lake Forest students are able to attend Chicago Symphony concerts and other events free of charge. Several student organizations on campus also sponsor events such as Semana Latina, Alcohol Awareness Week, Black History Month, and International Week.

Campus Entertainment Committee

The Campus Entertainment Committee is responsible for organizing all types of campus events including concerts, comedians, hypnotists, coffeehouse performances, films, lectures, dances, and many other entertaining and educational events. The committee also helps plan such traditional events as Homecoming and Family Weekend.

Volunteer Community Service

Lake Forest College students have many opportunities for involvement in volunteer community service work in nearby towns and cities, and the College strongly encourages such work. Service activities and groups are coordinated through the Leadership and Community Involvement Office. One of the most rewarding service opportunities available to students is the annual Alternative Spring Break Service Trip whereby students and staff travel to a selected region of the country to provide service for a community in need. Fraternities and sororities on campus and the Interfaith Center are also consistently involved in community service.

Religious Activities

Through the Lilace Reid Barnes Interfaith Center, the College continues its traditional relationship with the Presbyterian Church in a context of religious plurality and dialogue. A student steering committee suggests and implements programs to meet current campus needs. Activities sponsored include Sunday services, New Testament study, Sabbath celebrations, and afternoon meditations. The faculty coordinator serves as liaison with the Office of Student Affairs and with the student steering committee and also works with local clergy in facilitating their ministry to our religiously diverse student body.

ADVISING, GUIDANCE, AND SUPPORT

A comprehensive advising and guidance program at the College recognizes the need for supportive counseling both in the regular course of a college education and also in the case of special, individual matters of concern. Thus, counseling takes place in a variety of settings, with more or less formality depending on the circumstances, and at the several stages of progress throughout a college career.

Academic Advising

The advising system holds a central place in the academic program of Lake Forest College. Faculty advisors help students determine their academic needs and objectives, enhancing the freedom of choice available for designing an individual program of study for a given term and for an entire College career. Advisors also work with students to ensure that they receive a broad-based education while selecting appropriate majors and meeting graduation requirements. New students are assigned a faculty advisor at the outset who assists with overall program planning, course selection, registration, career choices, and other academic difficulties or personal problems as they may arise. First-year students are taught by their advisor in a First-Year Studies course during the fall term. First-year advisors serve in an advisory capacity for the entire first year. During the sophomore year, students may continue to be advised by their first-year advisor or may choose another faculty advisor.

Students must select a major field of study by the end of the sophomore year. Accordingly, during the sophomore year a student will choose an advisor from the faculty members in the relevant departmental or interdisciplinary major. Faculty advisors in the major assist students in drawing up a program of courses in their major field and other academic areas, and provide necessary guidance throughout students' undergraduate careers.

Co-Curricular Advising

In addition to the faculty advisor, each student new to the College is assigned a Co-Curricular Advisor (CCA) from among the professional Student Affairs staff at the College. The Co-Curricular Advisor program is designed to supplement the academic advising provided by faculty and to expand advising to include student life outside of the classroom.

Counseling Center

In addition to the Residence Life staff support, the College offers services through the Counseling Center, which helps students become more effective, self-directed individuals. Free of charge to all Lake Forest College students, the Counseling Center offers unlimited individual counseling on personal, social, or academic issues. Services are offered to help students benefit fully from the College experience. Group counseling is available to students who are seeking to enhance their own growth and development.

Career Advancement Center

The Career Advancement Center provides personalized attention to create your own individualized career plan. It assists with self-assessment tools, resume writing, cover letters, and employer research. It also offers mock interview sessions, distributes graduate school information and provides guidance for students who are undecided on a major. The job-seeking student is a highly marketable candidate through on-campus interviews, an annual job fair, and by networking through the Alumni Mentor Program (AMP). The AMP has been designed for students who wish to be matched up with alumni to speak individually concerning career opportunities and guidance. This network of contacts in the profit and nonprofit sectors in the Chicagoland area helps open doors for initial interviews and provides students with first-hand information about a wide variety of career opportunities. An experienced professional staff is available to accelerate the career search, teach lifelong skills, and bolster ongoing success.

Student Health Services

On-campus health services are provided for all resident and nonresident undergraduate students in a degree program, excluding Degree Candidacy Pending students. The semester fee of \$67 is mandatory and nonrefundable.

The College's health services program is administered by Lake Forest Hospital and provides a wide range of services. A nurse practitioner is available at the campus Student Health Center by appointment and for emergencies. Physicians' services are provided on campus once a week by the Medical Director of the Lake Forest Hospital Emergency Department. When the campus Student Health Center is closed, medical care is provided by the Emergency Physicians' Group at Lake Forest Hospital, located 1.5 miles west of the campus. These physicians treat students in the hospital's emergency room following referral from the nurse, Residence Life staff, Office of Student Affairs staff, or campus security. The Health Center is located in the Sports Center and is open from 8:30 a.m. to noon and from 1:00 p.m. to 4:30 p.m., Monday through Friday.

The basic fee covers the cost of some medical services offered at the Health Center that a personal physician may provide, such as physical examinations for sports, internships, and overseas study, education for self-care and wellness, some supplies, and some diagnostic testing. In addition, certain services are offered for a small

fee. Laboratory or X-ray fees and prescription costs are not covered but may be filed with insurance. When a student is referred to Lake Forest Hospital, the basic fee does not cover medical services rendered. The College requires that full-time resident students participate in its student health coverage plan unless evidence of equal or superior coverage is presented and an insurance waiver is completed. Students and their parents are urged to review the coverage offered, detailed in a brochure issued from the Business Office and routinely sent before enrollment. For more information, see the section titled Undergraduate Tuition and Expenses.

ADMISSION TO THE COLLEGE

ADMISSION TO THE UNDERGRADUATE PROGRAM BACHELOR OF ARTS

As the admissions staff evaluates applicants to Lake Forest College, it is primarily concerned with knowing the individual candidate. The criteria used for selection include assessment of a student's program of study, academic achievement, aptitude, intellectual curiosity, qualities of character and personality, and activities both in and out of school. Lake Forest College unequivocally selects its students without regard to social background, religious affiliation, race, national origin, gender, handicap, or financial position. This admission policy is manifest in the diverse nature of the student community—a diversity essential to the educational vitality of a liberal arts college. Candidates for undergraduate admission may obtain the required application forms by writing the Admissions Office, Lake Forest College, 555 North Sheridan Road, Lake Forest, Illinois 60045-2399 or calling 800-828-4751. The e-mail address is admissions@lakeforest.edu. The College will also accept the Common Application in lieu of its own form, and gives equal consideration to both. Students may obtain copies of the Common Application from their high schools.

Students making application for financial aid should refer to the section on Financial Assistance, which explains the application process and deadlines.

Secondary School Requirements

The depth and breadth of preparation is primary in the admission decision. Enrollment in honors courses, accelerated programs, and formal Advanced Placement or International Baccalaureate work is encouraged. As a rule, it is recommended that the candidate present at least the following:

- A minimum of four years of English;
- Three or more years of mathematics, including trigonometry;

- In-depth study in one or more foreign languages;
- Two to four years of work in both the social and natural sciences.

Examinations

All candidates are required to present the results of either the Scholastic Aptitude Test (SAT-I) of the College Entrance Examination Board (CEEB) or the American College Testing Program (ACT) test battery. The writing component is not required. These tests are used by Lake Forest College for purposes of admission, guidance, and placement. It is the applicant's responsibility to arrange with the CEEB or the ACT to have the test results forwarded to the College. These tests may be completed in the candidate's junior or senior year of secondary school. The admissions staff may require a candidate to submit the results of one or more subject achievement tests of the CEEB where such scores are judged to be beneficial to a student's candidacy.

Personal Interview

Although an interview is not required, the admissions staff welcomes and encourages visits to the campus by prospective candidates and their parents. A prearranged appointment is necessary. The Admissions Office is open for interviews and tours from 9 a.m. to 4:30 p.m. Monday through Friday, and Saturdays, 9 a.m. to 11:30 a.m. (except holidays).

Application Schedule

Early Action

Students applying under this program will receive an admission decision by January 20 if their application is submitted by December 1. This nonbinding program is intended to offer applicants an opportunity to hear from the College prior to the traditional March decision period. Candidates' reply may be made prior to or on May 1.

Early Decision

Students who decide that Lake Forest College is their first choice may apply under the Early Decision Program. The advantages are early notification of the admissions decision, guaranteed need-based financial aid, preferential placement for first-year housing, and preferential placement for work-study, if applicable. Students must apply for Early Decision before December 1. The admissions staff reviews Early Decision applications as soon as all of the required materials have been received, and candidates are notified of the decision by December 20. A nonrefundable matriculation deposit is due within two weeks of admission notification. It is understood that, if a candidate is notified that he or she has been admitted to Lake Forest College under the Early Decision Program, he or she will withdraw all other college applications. If the applicant is a candidate for financial aid, the commitment to attend Lake Forest is contingent on his or her acceptance of our financial aid offer.

Regular Application

We begin reviewing regular applications January 15 and notify candidates of admission and financial aid decisions by the latter part of March. Applications received after the March deadline may be considered, depending on an applicant's qualifications and other factors. Lake Forest subscribes to the Candidates' Reply Date Agreement, meaning that all regular candidates for admission will have until May 1 to notify Lake Forest of their decision to accept or decline the College's offer of admission. Those who accept must send in a nonrefundable matriculation deposit by May 1.

Deferred Admission

Questions and specific requests for deferred admission should be sent to the Vice President for Admissions and Career Services.

International Admission

International students who apply for admission to Lake Forest College as degree-seeking students must complete the same application procedure as found under the appropriate paragraph elsewhere in this section (Admission to the Undergraduate Program or Admission by Transfer). In addition, all international students must submit evidence of a minimum score of 220 on the computer-based TOEFL exam (550 on the paper-based).

Special Student Admission

Students may apply as special students but admission does not grant the student degree-seeking status. Special students may take courses on a part-time or full-time basis and their continued enrollment is conditional on attaining satisfactory progress. The Vice President for Admissions and Career Services will review their performance at the end of each semester. Students who demonstrate the ability to complete their coursework successfully may submit a change of status application to become fully matriculated students. Any eligible Lake Forest College credits earned as a special student are fully transferable. Students registered for one or two courses will be charged on a per-course basis. Students registered for three or more courses will be charged the full-time tuition rate and applicable fees. Traditional-age special students may request campus housing, but the Director of Transfer Admission and the Director of Residence Life must grant special permission. Adults who are 30 years of age or older should consult with the Vice President for Admissions and Career Services or the Community Education Office to determine how special student status would apply to them. Special student applications are available through the Admissions Office and the Community Education Office.

Admission by Transfer

Transfer students are admitted at the beginning of each semester. Generally, transfer applicants should have achieved an overall college average of at least C+ or its equivalent and be eligible to return to their previous institutions. At least six months must have elapsed before admission consideration will be given to students who are not eligible to return to their former institutions.

Graduates of accredited community colleges and recipients of the Associate of Arts (A.A.) degree in an applicable field will be granted full junior standing (16 Lake Forest College course credits) if they have earned grades of C- or better in all courses counting toward that degree. Some transfer courses earned for the A.A. degree may not meet the requirements for the student's declared major field at Lake Forest College.

When a transfer student is admitted to the College, the maximum credit accepted in transfer is two years of college work, that is, 60 semester hours (16 Lake Forest College credits). Up to that limit, all appropriate academic work, as determined by the Registrar, taken and passed

with a grade of C- or better at any former institution, will be accepted toward fulfillment of the B.A. degree at Lake Forest College.

University-level courses taken outside the United States must be evaluated for transfer credit by the College's Academic Appeals Board. No courses with D grades will be accepted in transfer. Plus and minus grades earned at another institution, with the exception of A+, are recorded on the student's Lake Forest College transcript. For further details concerning the College's credit and residence requirement, see the section titled Undergraduate Curriculum.

Students holding a completed B.A. may be considered for transfer admission. The maximum number of transfer credits granted is 16 Lake Forest College credits. The College's General Education Curriculum and major requirements must be met; for additional information see the section titled Undergraduate Curriculum. Twelve of the last 16 credits must be Lake Forest College credits.

All transfer students are required to submit the following credentials:

- Application for admission and application fee;
- Secondary school transcript;
- An official transcript from all prior institutions of all academic course work completed through the most recent term. A final transcript showing completion of courses in progress must be submitted by the end of the sixth week of classes in the term in which they matriculated.
- Recommendation
Applicants with more than 30 semester hours (44 quarter hours) are required to submit a letter of recommendation from the academic dean or a professor at their most recent college. Applicants who have completed fewer than 30 semester hours must submit the Secondary School Report and the Secondary School Teacher's Report included in the application.
- Tests
The results of the Scholastic Aptitude Test (SAT-1) and/or the American College Testing Program (ACT) battery and any achievement tests of the College Entrance Examination Board must be submitted. (These may be included on the applicant's secondary school report or high school transcript.)

- International students are required to submit a TOEFL score. We require a minimum score of 550 on the paper-based exam or 220 on the computer-based exam.

Students, including transfer students, will fulfill distributional requirements as outlined under the General Education Curriculum in the section titled Undergraduate Curriculum.

Credit by Examination

Students may apply to pass a regular course by special examination without prior enrollment. Consent of the instructor and approval of the Dean of the Faculty are required. Where appropriate the instructor may set requirements in addition to the examination itself. For credit to be awarded, a grade of C- or better must be earned on the examination, but the student's transcript will show only a CR (Credit).

Special examinations are not allowed for courses that are usually part of pre-college curricula (e.g., elementary languages or elementary mathematics) and are not normally allowed in courses previously audited or in which a student was enrolled. Under no circumstances does Lake Forest College take CLEP courses as transfer credit.

Advanced Placement

Students who have successfully completed Advanced Placement courses and the appropriate Advanced Placement examinations provided by the College Entrance Examination Board may apply for College credit for this work. Scores of 4 or 5 on the examinations entitle students to at least one course credit; scores of 1, 2, and, in most cases, 3 are not granted credit. Each department determines the specific amount of credit to be awarded. On occasion, individual departments may accept scores of 3 for credit in that department. A score of 3 or better on both the microeconomics and macroeconomics exams is required for one course credit in economics. Credit will not be granted for both Advanced Placement and International Baccalaureate program examinations in the same department.

International Baccalaureate

Students who have successfully completed International Baccalaureate courses and taken the higher-level examinations provided by the International Baccalaureate Program may apply for college credit for this work. Grades of 4, 5, 6, or 7 on the higher-level examinations entitle students to at least one course credit; grades of

1, 2, and 3 are not granted credit. Each department will determine the specific amount of credit to be awarded. Credit will not be granted for both Advanced Placement and International Baccalaureate program examinations in the same department.

ADMISSION TO THE GRADUATE PROGRAM MASTER OF LIBERAL STUDIES

The Graduate Program in Liberal Studies is primarily designed to serve the needs of mature students who are returning to college after an interval of several years. Candidates for admission must hold a bachelor's degree from an accredited college or university.

Applicants should submit transcript records of all college work with their application for admission. An application fee of \$20 is required. The application form requests a written essay stating briefly how applicants believe the graduate program in liberal studies will serve their needs.

PRIVACY STATEMENT

Notice to Persons Planning to Attend Lake Forest College

The College is obligated by law to communicate the following notice. The intent of the notice is to inform newly enrolled students of the College's intention to release certain information. Legislation identified below requires the College to give notice of its intent. The information noted is generally used in press releases, programs, directories, and other typical publications by the College. Any questions about this notice should be directed to the Dean of Students at 847-735-5200.

Notice of Intent to Publish Certain Personally Identifiable Information

Pursuant to requirements noted in the Family Educational Rights and Privacy Act, and Federal Regulations related thereto, notice is hereby given that Lake Forest College, Lake Forest, Illinois, proposes to publish at its discretion the following categories of information with respect to each person presently or previously attending said College: the student's name, address, telephone listing, date and place of birth, major field of study, faculty advisor, classes, parents, participation in officially recognized activities and sports, weight and height of members of athletic teams, dates of attendance, degrees and awards received, and the most pre-

vious educational agency or institution attended by the student.

Any student affected by the above proposal who desires that such information as described above not be released without his/her prior consent is hereby requested to inform the Office of Student Affairs in writing by August 1.

In addition, the College will publish to parents or guardians of dependent students information relative to the student's performance, progress toward graduation, any indebtedness, and involvement in matters which may lead to dismissal. The right of Lake Forest College to publish such information to parents or guardians is provided in the Act and Regulations referenced heretofore.

UNDERGRADUATE TUITION AND EXPENSES 2005-2006

Full-Time Students	Semester	Full Year
Tuition and Fees		
Tuition	\$13,500	\$27,000
Activity Fee	100	200
Health Center fee	67	134
Subtotal	\$13,667	\$27,334
On-Campus Residential Charges		
Room (for residence hall non-singles)	\$1,728	\$3,456
Board	\$1,535	\$3,070
Subtotal	\$3,263	\$6,526
Total Tuition and Charges	\$16,930	\$33,860
Differential Charges for Single rooms and South Campus Duplexes		
Stairwell Singles	\$1,953	\$3,906
Halls: Roberts, McClure, Gregory, Moore	\$1,983	\$3,966
Halls: Lois, Cleveland-Young, Deerpath, Harlan		
Blackstone, Nollen	\$2,103	\$4,206
South Campus Singles	\$1,983	\$3,966
South Campus Duplexes	\$1,953	\$3,906
Other Tuition Charges		
Tuition per course (exam credit included)		\$3,375
Auditor tuition per course		\$400
Course overload tuition (for more than 4 1/2 credits)		
(per half course credit)		\$1,688
(per quarter course credit)		\$844

Masters of Liberal Studies		
Tuition per course		\$1,700
Billing deposit		\$200
Other Expenses		
Student health insurance (mandatory unless annual waiver is completed and accepted)		\$800
Full year (12 months)		\$540
Second semester only		\$100
Late Registration Fee		\$65
Senior Dues		

Financial Policies

The Board of Trustees has specified all tuition and fees are due 14 days before registration unless enrolled in a monthly payment plan. Registration will not be permitted if payments are not up to date. Any extensions granted due to pending financial aid awards or due to loans will expire 45 days after the first class day. Diplomas and official transcripts are withheld from students and alumni who have not met their financial obligations to the College. The College reserves the right to cancel registration and evict students from residence halls and the board plan if their accounts are in arrears and to exclude a student with significant financial obligations to the College from participating in graduation ceremonies.

Payment Procedures

Statements are issued in the student's name and mailed to the home address. Students may supply the Business Office with an additional billing address.

Two payment procedures are available:

Standard Plan

Full semester charges due 14 days before registration.

Forester Monthly Payment Plan

This monthly payment plan allows families to spread all or part of the annual expenses over 10 interest-free monthly payments. There is an annual enrollment fee and payments begin June 15. Students reenrolling on the payment plan may spread their payments over 12 months beginning April 15. Information on the payment plan is available in the Business Office. There is a 5-month plan for second-semester students beginning November 15.

Deposit

A \$200 deposit is required of all new students. This deposit will be refundable only after the student withdraws or graduates from the College, net any outstanding debts owed to the College.

Student Health Services Fee

On-campus health services are provided for all resident and nonresident undergraduate students in a degree program, excluding Degree Candidacy Pending students. The semester fee of \$67 is mandatory and nonrefundable.

Student Health Insurance Fees

Health insurance coverage is required of all undergraduate resident and nonresident students who are enrolled at least half time, excluding DCP students. The College provides a limited coverage plan for 12 months at a cost of \$800 (\$540 for second semester only). Brochures outlining the plan and the benefits are available from the Business Office or online.

All applicable students are automatically charged \$800 in the fall (\$540 in the spring) for the student health insurance coverage. Students may waive the plan if other coverage is carried. Waivers must be filed with the College's insurance broker over the Web by registration day for cancellation of charges. Foreign students who are not permanent U.S. residents must document comparable coverage through a U.S. insurance carrier.

Students studying abroad are required to have medical evacuation and repatriation coverage. Separate monthly foreign study plans are available through the College for students not covered by the College student health insurance plan including through the Council on International Educational Exchange (C.I.E.E.) International Identity Card.

Activity Fee and Senior Class Dues

The College collects an activity fee of \$100 per semester assessed by student government for its use. All resident and nonresident undergraduate students are charged the activity fee, which is mandatory and nonrefundable. Additionally, the College collects a one-time nonrefundable senior dues assessment billed the semester prior to graduation. The dues are used by the Senior Steering Committee for graduation activities. Senior dues are \$65.

Normal Course Load

A normal course load for undergraduate non-DCP students is four courses, but any combination of courses ranging from three to four and one-half credits is regarded as a full load and regular full-time tuition applies. There are no refunds for course load changes within this range of credits. Any reduction below three credits must be approved by the Office of Student Affairs.

Undergraduate students registering for fewer than three credits per term with the permission of the Office of Student Affairs will be charged at the per-course rate. The per-course rate will

also apply for special students who are not degree candidates or whose degree candidacy is pending for fewer than three credits.

Course Overload Charge

Students who are registered for an on-campus course load in excess of four and one half credits in a given semester will be charged for the additional credits or fractions of credits.

Students enrolled in Music 107, 108, 109, and 110 will be exempt from the quarter credit overload charge, if applicable.

Students who received Dean's List distinction at Lake Forest College during the previous year may take one extra course during the following year without charge, subject to certain limitations.

Other Charges and Fines

Students studying abroad will be charged applicable fees as determined by the individual program. See the Coordinator of Off-Campus Programs for the current per-program tuition rate. Regular refund policies apply to study-abroad programs. There is a non-refundable administrative fee of \$250 for students who are applying their financial aid to a program through a consortium agreement, in addition to any program fee or deposit required by the selected program.

Students will not be charged a fee for credit by examination (for a subject that is not covered by advanced placement tests) if such credit is established during the fall term of the first year.

Students will be billed for bookstore charges, library fines, on-campus traffic violations, and any damage they may cause to College property.

A student who changes residential status from resident to nonresident for fall semester, and notifies the Office of Student Affairs on or after June 1 and before July 1, will be charged \$200. Students notifying the Office of Student Affairs on or after July 1 will be charged \$500. For a change of residency status after the first day of fall classes, per diem charges for room and board will be applied to the student's account in addition to the fine. See the Office of Residence Life for more information.

Associated Colleges of the Midwest (ACM) Programs

Students accepted into off-campus ACM programs are billed the Lake Forest tuition rate by

the College for a normal course load. Course overloads and summer courses in ACM programs have different charge levels and policies. Program fees vary and are payable directly to the College. Required program deposits are paid directly to the ACM office. In addition to any ACM program fee or deposit, there is a Lake Forest College administrative deposit of \$250, which will be applied as payment toward program expenses upon participation. If the student withdraws from the program, the deposit may be forfeited if notification is not made by the required date.

Approved Program Leave Reimbursement (APL)

Students enrolling in program leave courses at other institutions will be required to pay the full comprehensive Lake Forest College fee on the regular due date. The other institution may require payment as well. Upon acceptance of the credit by Lake Forest College, and presentation of a paid bill, the student's account will be reimbursed by the College for actual tuition charged by the other institution, not to exceed the comparable course cost at Lake Forest College.

Interest Charges, Late Fees, and Collection Costs

Accounts not paid in full by the due date will be assessed a late fee. The College reserves the right to cancel the registration for students whose accounts are not paid in full or on time. All payment arrangements will be subject to the monthly payment plan fee. Past-due accounts may be assessed interest at the rate of 1% per month. Unpaid balances may be turned over to a collection agency and subject to collection costs as permitted by law on the unpaid balance if no suitable repayment arrangement is made.

Withdrawals and Refunds

All refunds are payable to the student. Withdrawals from the College are processed through the Office of Student Affairs. The official date of withdrawal is determined by that office only. There are no refunds for dismissal, suspension, or expulsion from the College and no room refunds for removal from campus housing due to judicial sanction.

Financial aid recipients who withdraw from the College after registration but still within a refund period are subject to the College's refund policy and federal regulations. All refunds for

federal financial aid are issued in accordance with current regulations. The Financial Aid Office and the Business Office will determine the appropriate resulting charges and financial aid.

Refund Policy

Prior to the start of the semester, refunds for tuition are computed at 100%, less a \$100 administrative fee. Once classes have begun, refunds for reduced course load or withdrawal from the College will be computed according to the schedule below, less a \$100 administrative fee.

First Semester	Second Semester	Refund
On or before:		
August 31, 2005	January 23, 2006	90%
September 7, 2005	January 30, 2006	80%
September 14, 2005	February 6, 2006	70%
September 21, 2005	February 13, 2006	60%
September 28, 2005	February 20, 2006	50%
October 5, 2005	February 27, 2006	40%
After:		
October 5, 2005	February 27, 2006	0%

Room and board charges are refunded on a per diem basis.

Due to federal regulations, this policy may be subject to change; all students will be notified if and when this policy changes.

FINANCIAL ASSISTANCE

Lake Forest College is committed to providing generous assistance to those students financially unable to pay the full cost of a college education. The College also recognizes outstanding academic achievement and/or special talents with several scholarship programs.

FINANCIAL AID PROGRAMS

Financial aid programs are generally classified under four types: grants, scholarships, student loans, and student employment. The following are brief descriptions of some of the major programs. For more detailed information about each program, contact the Financial Aid Office.

Lake Forest College Grant

This grant is awarded to full-time enrolled students who demonstrate financial need. Most students who qualify for financial aid may expect a substantial amount of their need to be met by a Lake Forest College Grant.

Federal Pell Grant

This federal grant is awarded to students with exceptional need. Application is made by completing a Free Application for Federal Student Aid (FAFSA). The application is acknowledged through a Student Aid Report (SAR).

Federal Supplemental Educational Opportunity Grant (FSEOG)

This program is also designed to provide grant assistance to students of exceptional need. First consideration is given to students who also receive a Federal Pell Grant. Students are automatically considered for this grant by completing the FAFSA.

Illinois Monetary Award Program Grant (MAP)

This program is awarded to Illinois students with financial need attending Illinois colleges or universities. The Illinois Student Assistance Commission (ISAC) administers this program and determines eligibility.

Residents of Alaska, Pennsylvania, Rhode Island, and Vermont

These grant programs are awarded to residents of these states who exhibit financial need. These state grants may be used at Lake Forest College. Eligibility is determined by each individual state.

Federal Perkins Loan

Loans under this program are awarded based on financial need and are funded jointly by the federal government and Lake Forest College. The interest rate is 5%. No interest or principal payments are due until you are no longer enrolled at least half time. The repayment period (up to 10 years) begins nine months after you are no longer enrolled at least half time. In some cases, this loan can be deferred and/or canceled.

Federal Stafford Loan

The subsidized Federal Stafford Loan program is available to students with financial need. The unsubsidized Federal Stafford Loan program is available to students who do not have financial need. The interest rate on both types of loans is variable, but is capped at 8.25%.

Undergraduates may borrow a combined maximum of \$2,625 for their first year of study, \$3,500 for their second year, and \$5,500 for subsequent years. The aggregate limit for an undergraduate is \$23,000.

Loan processing fees of up to 4% are charged by the lender and guarantee agency. As a result, the actual loan disbursement will be less than the amount for which the loan is approved. However, repayment of the entire approved amount is required.

Federal Work Study and Lake Forest College Work Study

Funding for the Work Study program is provided by the federal government and Lake Forest College. Typically, students' jobs are in administrative offices, academic departments, and other locations on campus. Students work about 10 hours a week and earn between \$500 and \$2,000. While on-campus employment is available to all students, preference in placement is given to Federal Work Study students and international students. Because of limited fund-

ing, the College cannot guarantee that a student will be placed in a position and/or earn the above amount. In addition to on-campus employment, opportunities exist for employment in the community. Since Lake Forest is a residential and academic town (rather than commercial), off-campus employment generally involves jobs in local restaurants and stores, tutoring, babysitting, gardening, or other such jobs.

Outside Sources of Funds

Students are encouraged to apply for national, state, and local scholarships for which they may be eligible and that may be used at the college of their choice. National Merit Scholarships, National Presbyterian College Scholarships, and other scholarships offered by local foundations, clubs, or business organizations are potential resources.

The ability of students to secure outside assistance is always advantageous. Even though the College may reduce the amount of Lake Forest College grant assistance awarded, since all awards must remain within the computed need figure, the total combined financial aid resources available to the student will be greater than the amount of grant provided by the College alone.

APPLICATION PROCESS

To apply for need-based financial aid, families must complete the Free Application for Federal Student Aid (FAFSA). It can be completed after January 1.

In some instances, federal tax returns may also be requested.

If a family has extenuating circumstances, families may also complete the CSS Financial Aid Profile. The Profile allows a family to list and highlight these circumstances. Examples include large changes to income, significant medical expenses, K-12 tuition expenses, and educational loan payments.

The Profile is required if you belong to one of the following groups and are applying for need-based financial aid: Early Decision and Early Notification applicants; Founders', Presidential, and Trustee Scholarship participants; those using our Estimate Service.

No funds may be committed to students until they have applied for and have been granted admission to the College. An application for financial aid does not hinder the student's

application for admission; the two applications are considered separately.

Financial aid awards at the College are made for a one-year period. If the student maintains an academic record consistent with the rules of the College and completes the necessary renewal applications, financial aid will be renewed each year at a level corresponding to demonstrated need.

COMPUTATION OF FINANCIAL AID ELIGIBILITY

In determining a student's financial aid eligibility, the College calculates the total resources of the family (parents and student) that can be used as a contribution toward college expenses. These calculations are based on several expectations.

Expectation from Parents

The College assumes that each family will provide the maximum amount of financial assistance possible. When determining parents' ability to contribute, a number of factors are considered, including income, assets, the number of dependents, the number of children in college, extraordinary medical expenses, certain types of debts, and any unusual circumstances.

Expectation from the Student

Students receiving financial aid are also expected to contribute toward the cost of their own education. An expectation of summer earnings is assumed when calculating a student's resources.

Minimum Standard of Academic Progress

To be in compliance with state and federal regulations related to student financial aid, all financial aid recipients must meet a standard of minimum academic progress. Satisfactory academic progress includes maintaining a minimum GPA as well as completing a minimum number of classes. If you fall below the minimum cumulative GPA or courses-completed criteria, satisfactory academic progress is not being made. Failing to maintain satisfactory academic progress will result in your financial aid being suspended. In addition, if you are receiving a Lake Forest College Grant and you fall behind in credits a term or more (that is, four or more credits), your Lake Forest College Grant will be suspended. You may reestablish your eligibility after earning the number of credits needed to make up failed or incomplete courses and/or

achieving and maintaining the required minimum cumulative GPA. If you feel you are having difficulties making satisfactory progress because of extenuating circumstances, you may appeal to the director of financial aid. Please call or visit the Financial Aid Office if you have any questions about this policy.

Students who do not meet the standard of satisfactory academic progress for financial aid recipients will be given a period of time, on a case-by-case review and basis, not to exceed two semesters, to achieve the required qualitative and quantitative requirements. During this period of time the student will be considered to be on "Financial Aid Probation." If a student does not meet the requirements at the end of the probationary period, financial aid will be terminated and will not be reinstated until the requirements are met.

Students denied financial aid because they failed to meet the standard of minimum academic progress may appeal this decision. The appeal must be in writing, directed to the director of financial aid, and should describe in detail the reasons for failing to complete the required number of courses and/or failing to achieve the required cumulative GPA.

Lake Forest College has adopted the following criteria to determine the standard of minimum academic progress:

- First-year students and transfer students in their first term at the College are automatically considered to be meeting academic progress standards;
- A normal course load is four courses per semester, but a student will be considered to be full time if enrolled for three course credits per semester;
- A minimum of 32 courses is required for graduation.

The quantitative and qualitative result of this standard for minimum academic progress toward a degree is represented in the following table:

Semesters Completed	GPA Required	Courses Completed
2 semesters	1.5	and 5
4 semesters	1.8	and 12
6 semesters	2.0	and 19
8 semesters	2.0	and 26
10 semesters	2.0	and 32

TOTAL COURSE CREDITS ALLOWED

Generally, for students who enter the College as first-year students, the College will normally provide support for a total of 32 classes or eight semesters (whichever comes first). Students entering the College at a sophomore, junior, or senior academic level will receive support on a pro rated basis. Courses failed or withdrawn from are included in the above support calculation. If a student has earned college credit outside of Lake Forest College, this credit may or may not have an effect on the student's remaining length of financial aid eligibility, depending on the type of college credit earned as follows:

- Advanced Placement (AP), International Baccalaureate (IB), and other college credit earned by a student while enrolled in secondary school (for example, simultaneous enrollment in secondary and post-secondary school, heretofore known as SE credit) will not be counted toward the eight semesters or 32 classes rule. A student in this situation will be allowed aid for 32 Lake Forest College credits in addition to any number of AP, IB, or SE credits. The registrar will document that the student is not considered to have earned a degree until after the eighth semester or until after earning Lake Forest College credit number 32. Each student in this situation will be counseled individually by the Financial Aid Office and the Registrar's Office.
- College credit earned by a student after graduating from secondary school will be treated as transfer credit, and will count toward the remaining number of semesters the student may receive aid. The student's remaining length of eligibility will be pro-rated, depending on the number of classes transferred into the College.
- The Registrar's Office will record any type of credit received by the College on the student's behalf and it will be reflected on the student's academic transcript.

LAKE FOREST COLLEGE SCHOLARSHIPS

Lake Forest College awards scholarships to students who meet specific academic requirements or exhibit talent in certain fields. These scholarships are given without regard to financial need. The application for admission is required for consideration for all scholarship programs. In addition, certain programs require an additional scholarship application, supporting documentation, and, in some cases, an interview.

Renewal requirements of the College's scholarships include academic and departmental review. Students are allowed to pursue two scholarships: one academic and one talent-based, or two talent-based scholarships.

Academic Scholarships

Applicants are assessed on an individual basis at the time of application. Qualifying applicants will be contacted directly by a member of the admissions staff. Students may be required to submit additional information at that time. Academic scholarships range from \$1,000 through full tuition. For further details, please contact a member of the admissions staff.

Activity-based Scholarships

The Deerpath Scholarship Program awards scholarships to students who have a talent in art, foreign languages, leadership, music, science (natural science, mathematics, or computer science), or writing. This program also awards the Alumni Legacy Scholarship. Scholarships offered by the Deerpath Program range from \$1,000 to \$5,000.

Forester Alumni Legacy Scholarship

This scholarship is open to children and grandchildren of Lake Forest alumni. In addition, first-year students must have a 3.3 GPA, or a rank within the top 25% of their class, and have an ACT composite of at least 25 (SAT of at least 1120). Transfer students must have a college GPA of 3.3 or above (4.0 scale).

Forester Art Scholarship

The Deerpath Art Scholarship Program is designed to recognize talented art students with an interest in either majoring in art or participating in art-related courses. Candidates for the art scholarship must complete the art scholarship application and submit a slide portfolio of their artwork that best represents their art talent.

Forester Foreign Language Scholarship

Candidates for the Deerpath Foreign Language Scholarship must have demonstrated ability to excel in foreign language study. Along with the foreign language scholarship application, students must submit an original essay in a language other than English in which applicants must outline their interest in studying a language other than English at the College, as well as in participating in a study-abroad program and/or various departmental or related international activities. The

essay must be accompanied by an English translation. International students must submit an essay in a non-native language (and not in English).

Forester Leadership Scholarship

Deerpath Leadership Scholarship candidates must complete an interview with a member of the Leadership and Community Involvement Office as well as submitting the leadership application, which demonstrates leadership credentials. Athletic participation is not a consideration for leadership awards. Students who plan to participate in the College's intercollegiate athletic program are only eligible to receive a leadership scholarship on the basis of qualifying for need-based financial aid. Non-athletic participants are eligible to receive the scholarship without regard to need.

Forester Music Scholarship

The Deerpath Music Program recognizes outstanding musicians who have an interest in either majoring in music or participating in one of the College's designated music ensembles. Candidates must complete the music scholarship application and audition with a member of the music faculty.

Forester Natural and Mathematical Sciences Scholarship

This scholarship is designed to recognize students who have performed well in math, science, or computer science courses. Applicants must complete the scholarship application and submit a recommendation from a teacher who has taught the applicant in a science or mathematics course. Qualifying applicants will be contacted directly by a member of the admissions staff.

Forester Theater Scholarship

Candidates who wish to be involved with the College's theater program may audition for a scholarship in theater. Interested students must complete the theater scholarship application and audition in person or submit stage or lighting design plans for a past or current production.

Forester Writing Scholarship

The Deerpath Writing Scholarship is awarded to candidates with strong writing skills. Candidates must submit the scholarship application, a portfolio of original prose, and a recommendation from an advisor or teacher who can attest to the candidate's writing prowess. Applicants are not required to major in English; however, scholarship recipients must remain involved

in at least one of the many organizations that display their writing talents. Please contact a member of the admissions staff for a complete list of these organizations.

Transfer Student Scholarships

Transfer students are eligible to apply for all of the scholarships offered in the Deerpath Scholarship Program. In addition, the following academic scholarships are offered to qualified transfer applicants.

Transfer Deerpath Academic Scholarship

This scholarship is awarded to applicants who have achieved a minimum 3.5 cumulative GPA at their present college. It is based on the GPA at the time of admission. Applicants must have completed a minimum of one semester of full-time enrollment. All applicants are assessed based upon the application for admission. Academic scholarships range from \$1,000 to \$9,000.

Phi Theta Kappa Scholarship

Students who hold current Phi Theta Kappa membership and who have received an Associate of Arts degree from an accredited community/junior college prior to enrolling at Lake Forest College are eligible for this scholarship. Applicants should provide proof of their Phi Theta Kappa membership. Phi Theta Kappa Scholarships are one-half tuition awards.

Common Requirements

Recipients of merit-based scholarships must be enrolled as full-time students at Lake Forest College and remain full time for the duration of the scholarship period. Funds may be used during the traditional academic year, and may not be used for periods of summer enrollment. Scholarships are renewable contingent on the student's continued full-time enrollment at Lake Forest College or an affiliated off-campus program, with duration of the scholarship limited to four years. Students must also remain in good standing with the College, as determined by the dean of students.

To renew an academic scholarship in subsequent years, recipients must demonstrate compliance with the GPA requirements as determined by the amount of the scholarship. Recipients of one-half tuition or full-tuition scholarships are to have a minimum GPA of 3.0. Recipients of scholarships in an amount less than one-half tuition must have a minimum GPA of 2.5 after the first year and a 2.75 GPA after the second

and subsequent years. The GPAs are cumulative and will be calculated at the conclusion of the spring semester each year.

To renew a nonacademic scholarship in subsequent years, recipients must agree to participate each year in the area(s) in which the scholarship is awarded. A scholarship renewal application must also be completed for the scholarships and the appropriate department chair will recommend renewal.

Off-Campus Study for Merit Scholarships

Recipients of a Lake Forest College Merit Scholarship (such as the Presidential, Deerpath, Transfer, Alumni, Founders', McGaw, or Grew) who wish to participate in an off-campus academic program will continue to receive this scholarship only if their off-campus program is offered by Lake Forest College or the Associated Colleges of the Midwest (ACM), or is American University's Washington Semester. In addition, the student must be accepted as a participant by the appropriate committee(s). Merit scholarship recipients may only participate in one one-semester ACM program or the American University Washington Semester during their academic career at Lake Forest College and receive their scholarship for this program. Only need-based scholarship recipients can apply their merit scholarship toward the costs of any off-campus program that requires an individual consortium agreement, if approved by the Consortium Committee.

Other Financing Options

In addition to the financial aid programs described above and the College's interest-free monthly payment plan, numerous alternative financing plans are available to parents to ease the cost of a college education. Further information and applications for these plans are available from the Financial Aid Office.

MASTER'S PROGRAM FINANCIAL ASSISTANCE

For full-time elementary and secondary school teachers enrolling in graduate courses, the College offers grants of up to 50% of the cost of tuition. In addition, through the generosity of friends and graduates of the Master of Liberal Studies program, the College has established a limited scholarship fund for a person demonstrating need for financial assistance. These grants may supplement any other payments provided by the teachers' school districts.

UNDERGRADUATE CURRICULUM

Lake Forest College recognizes that no two individuals have the same educational needs and goals, just as no two individuals have identical strengths, capacities, motivation, and preparation. At the same time, the College believes that all individuals benefit from breadth of education in the liberal arts combined with depth of study in traditional disciplines or interdisciplinary fields. Accordingly, the College provides each student with great freedom of choice in designing a program of study in consultation with a faculty advisor, while requiring the student to pursue a wide range of subjects and develop considerable expertise in one academic area. A graduate who represents the educational ideals of Lake Forest College will have studied a broad range of ideas; developed real competence in writing, speaking, and quantitative skills; learned how to gather, access, and present information, and gained significant experience in the humanities, the natural sciences and mathematics, and the social sciences while completing requirements for a major in an academic department or interdisciplinary program. The College's General Education Curriculum, its advising system, and the requirements of each major are designed to support these educational ideals, as are the many other academic programs in the undergraduate curriculum.

As they explore and take advantage of the rich curriculum at the College, students should keep in mind the requirements for graduation. In order to receive the Bachelor of Arts degree, students who enter the College as first-year students are expected to pass 32 courses, fulfill the general education requirements, attain a 2.00 overall grade-point average (without rounding up), and complete the requirements of a major. Important details concerning graduation requirements are listed in the Lake Forest College Student Handbook.

Not all courses listed in this catalog are taught every year.

GENERAL EDUCATION CURRICULUM

The General Education Curriculum (GEC) for the Bachelor of Arts degree establishes an integrated framework for the general education of undergraduate students across their four years of study at the College. The curriculum includes distributional requirements intended to ensure that students will receive breadth as well as depth in their education while continuing to allow them considerable latitude in designing their individual programs of study. Included also are requirements for writing and for cultural diversity. Fulfillment of the requirements for general education begins in the fall semester of the first year and continues to the senior year, in the following manner.

First-Year Studies

A course in the First-Year Studies Program. For a description of the program and courses, see First-Year Studies in the course listings. This course is required of all students entering the College with fewer than four credits and does not meet any GEC breadth or cultural diversity requirement.

First-Year Writing

One course (other than English 100) that includes a substantial amount of writing, to be taken during the first year. First-Year Studies courses satisfy this requirement. This writing-intensive course is required of all students entering the College with fewer than seven credits. Additional courses that fulfill the requirement are determined by the College's Curricular Policies Committee in conjunction with the director of writing programs. The list of courses will be maintained by the Registrar's Office.

Breadth: Academic Divisions

At a minimum, students must complete two credits from each of the three liberal arts areas: humanities, social sciences, and natural and mathematical sciences. Each of these six credits must come from a different department. These

credits must be completed by the end of the junior year. Of the four credits in humanities and social sciences, two must be cultural diversity courses.

For purposes of the General Education Curriculum breadth requirement, departments are classified into divisions as follows:

Humanities

Art
Communications
English
Foreign Languages and Literatures
History
Music
Philosophy
Religion
Theater

Social Sciences

Economics and Business
Education
Politics
Psychology
Sociology and Anthropology

Natural and Mathematical Sciences

Biology
Chemistry
Mathematics and Computer Science
Physics

Two introductory courses do not count toward the GEC breadth requirement: English 100 and Mathematics 105. These courses are noted in the class schedule. In addition, First-Year Studies and Senior Studies courses do not count toward the GEC breadth requirement.

Cultural Diversity

At least two courses from an approved list, to be taken by the end of the junior year; the two cultural diversity courses must come from different departments. (Please note: Only one course may be counted in Foreign Languages and Literatures. First-Year Studies courses do not fulfill the requirement.)

Below are courses in the curriculum that satisfy the requirement. Not all listed courses are offered in a given year.

Afam (All courses listed as African American Studies)

Amer 223 (The American Avant-Garde 1960-80)

Amer 224 (American Families)
Art 202 (Greece in the Bronze Age)

Senior Studies

A senior studies course acts as a culminating experience in the student's major. The course emphasizes writing and speaking and encourages integration of the methods and content explored in the major. Students must fulfill this requirement, for which courses are specially designated within their major department. Senior theses, research projects, and creative projects may also be used to fulfill the senior studies requirement with permission of the department chairperson. Seniors who do not pass this requirement may not graduate.

Students who have more than one major must satisfy the senior studies requirement in each of their majors. Students may complete two separate senior studies courses or choose from one of the following options: (1) an interdisciplinary two-credit senior thesis that is satisfactory to both departments or (2) any two-credit combination of a senior seminar, senior thesis, research project, and/or creative project.

Juniors may enroll in a senior studies course and fulfill the requirement with the permission of the instructor. This requirement may be not be completed during the first year or sophomore year.

PROGRAMS FOR FIRST-YEAR STUDENTS

The General Education Curriculum begins with the College's First-Year Studies Program, which was established to create a special, intellectually engaging atmosphere of close interaction between first-year students and their teachers. For a full description of this program, see First-Year Studies under course listings.

Special First-Year Courses

All departments in the College offer courses of an introductory nature that are intended primarily for first-year students and are listed and described under the various departments. All courses designated at the 100 level are recommended for first-year students, and many courses at the 200 level are open to first-year students without prerequisites or special permission. In addition, the College offers a number of courses or sections of courses that are open only to first-year students. Classes are smaller in size than most regular courses to allow for more concentrated instruction and to facilitate discussion. These courses have as their principal aim the development of basic skills in writing, critical reading, analysis, oral communication, and basic mathematics. The

College recognizes the importance of good communication skills. Accordingly, the College is committed to teaching writing as a central concern in a liberal arts education throughout the curriculum. Basic writing skills are the main topic in English 100 (English Composition). First-year writing skills are assessed to determine whether enrollment in this course is appropriate.

Richter Apprentice Scholar Program

The Richter Apprentice Scholar Program is designed to provide unusual intellectual opportunities to a small group of outstanding students early in their College lives. Begun in 1988 through a generous grant from the Evalyn Elizabeth Cook Richter and Paul K. Richter Memorial Funds, this program fosters a strong commitment to the life of the mind and encourages students to consider careers in research and teaching. Students' experiences have inspired participants to take full advantage of the enriching opportunities, ranging from independent study to senior theses, offered at Lake Forest. During the spring of their first academic year, students take a special interdisciplinary seminar, "Ways of Knowing," that explores how various academic disciplines in the social sciences, humanities, and natural sciences approach knowledge. Throughout the course, students are exposed to ideas found throughout a liberal arts education. In the summer between the first and second years, Richter scholars are employed for 10 weeks as apprentice scholars working one-on-one with a faculty member. The students act as junior collaborators, joining the faculty in its research. Through this work they develop the ability to do independent research in a particular field as well as an appreciation for its conceptual framework. As the Richter scholars live and work together, participating in a weekly faculty-student colloquium in addition to their individual research, they become a community of peers providing encouragement and support for each other's present and future intellectual and research endeavors. Students are selected through their applications to the program during the admissions process. Enrollment in the spring-semester Richter seminar and participation in summer research with faculty mentors are contingent on satisfactory fall-semester academic performance (normally a minimum GPA of 3.25). Those not initially selected but showing excellence in their first semester at the College may apply to join the program the fall semester.

FIELDS OF STUDY

Lake Forest College maintains major and minor fields of concentration in both traditional academic departments and interdisciplinary programs. Departmental majors and minors permit depth of study in particular disciplines, while interdisciplinary programs encourage students to draw connections among distinct bodies of knowledge and areas of inquiry. A major represents significant course work leading to substantial knowledge and competence in a given field; a minor entails less course work and is designed to produce basic knowledge and competence in a given field.

Students may declare up to two majors and one minor or up to one major and two minors. Students declaring a major and a minor must complete course requirements in both major and minor fields. Students who choose three major/minor areas may not select more than two in the same division. Upon successful completion of a minor, the student will have it recorded on his or her transcript. No student may receive more than 15 credits in any department.

The Major

Students may choose a major from 20 departmental fields or from a number of formal interdisciplinary majors designed by the College and supervised by faculty committees. In all cases, students are expected to declare a major by the end of the sophomore year and to make significant progress toward the completion of that major during the junior year. Every major will also include a culminating senior studies requirement, ordinarily a senior seminar or a senior thesis. Students declaring a double major must complete course requirements in both major fields. It is possible for some courses to be counted toward both majors. However, the second major must consist of at least five separate courses, ones that do not double count, and at least three of these five must be at the 300 or 400 level. Majors may be pursued in the following departments and interdisciplinary programs (noted with an asterisk).

- * American Studies
- * Area Studies
- Art
- * Asian Studies
- Biology
- Business
- Chemistry
- Communications
- Computer Science

- Economics
- Education
- English
- * Environmental Studies
- French
- History
- * Independent Scholar
- * International Relations
- * Latin American Studies
- Mathematics
- Music
- Philosophy
- Physics
- Politics
- Psychology
- Sociology and Anthropology
- Spanish
- Theater

The Minor

Students may declare a minor any time before they graduate but are not required to declare a minor for graduation. The minor must consist of at least four separate courses, ones that do not double count. Minors are offered in the following departments and interdisciplinary programs (noted with an asterisk).

- * African American Studies
- * American Studies
- * Area Studies
- Art
- * Asian Studies
- Biology
- Business
- Chemistry
- Classical Studies
- Communications
- Computer Science
- Economics
- English
- French
- German
- History
- * International Relations
- * Latin American Studies
- Mathematics
- * Metropolitan Studies
- Music
- Philosophy
- Physics
- Politics
- Psychology
- Religion
- Sociology and Anthropology
- Spanish
- Theater
- * Women's and Gender Studies

Interdisciplinary Studies

The College encourages interdisciplinary approaches to knowledge and supports majors and minors that seek to draw connections among traditional academic disciplines. Typically, interdisciplinary majors and minors permit more flexibility in course selection while challenging students to assume greater responsibility for course selection and the integration of knowledge.

Interdisciplinary majors are available in American Studies, Area Studies, Asian Studies, Environmental Studies, Independent Scholar, International Relations, and Latin American Studies. Interdisciplinary minors are possible in African American Studies, American Studies, Area Studies, Asian Studies, Communications, International Relations, Latin American Studies, Metropolitan Studies, and Women's and Gender Studies.

EXPERIENTIAL LEARNING

As part of its mission to prepare students "to become responsible citizens of the global community," Lake Forest College encourages and enables its students to participate in a significant learning experience that connects academic work with the world beyond the campus. The College aims to provide its students both with a sound education in the basic liberal arts emphasizing the crucial skills of critical thinking, reading, writing, and speaking and with the opportunities to apply these skills in real-life situations. This experience can take several forms including, but not exclusively restricted to, study in an off-campus program (either domestic or international), work on an internship, and a service learning exercise that is part of the assigned work of a Lake Forest College course.

INDEPENDENT SCHOLAR PROGRAM

An independent study experience is the primary component of the Independent Scholar Program, which enables qualified and motivated students to design and pursue an individual degree program in the junior and senior years, focusing on a particular topic or theme rather than on a single academic discipline.

Independent Scholars may have unique interdisciplinary majors or traditional ones (or a combination). Among the topics that Independent Scholars at Lake Forest College have examined in recent years are contemporary performance practices, the theology and philosophy of Nikos Kazantzakis, advertising in the arts, psychoneuroimmunology, experimental theater, aesthetics, Greek ideas of law and justice, an analysis of contemporary values, religion and environmental thought, and language and ethics.

The Independent Scholar Program emphasizes self-determination for its students. The responsibility for initiative in the program lies with students, beginning with presentation of their case for admission to the program. Applications are accepted from second-semester sophomores or first-semester juniors.

The Independent Scholar Program is a program for outstanding students; all students must complete a senior thesis or project and an examination in the major. Not subject to the normal limitations for tutorials and research projects, Independent Scholars are encouraged to include extensive independent study in their major. They are expected as well to fulfill the ideals of a liberal arts education. Their program advisors do not need to be members of the Independent Scholar Committee.

INDEPENDENT STUDY

Independent study, under the guidance and supervision of faculty members, offers challenging opportunities for investigating areas beyond the limits of regular courses. A student may engage in independent study for credit, given the availability and approval of a faculty member competent in the chosen subject matter.

A total of seven independent study credits, including internships, may count toward graduation. Students are expected to arrange each independent study program before the end of the previous semester. A written proposal signed by the relevant faculty member is submitted to the dean of the faculty for review. Proposal forms and detailed information may be obtained from the Registrar's Office. The following are four basic types of independent study: tutorial, research project, senior thesis, and creative project.

Tutorial

A tutorial is a directed reading course on a special topic not covered in a regularly offered course. Students meet regularly with the faculty supervisor to discuss the readings and are normally assigned a number of short papers. Recent tutorials have dealt with such topics as advanced Intermediate Japanese, New Testament Greek, advanced Chinese, mysticism, European industrial revolution, recent bioethical issues, song writing. Students may take one tutorial a year beginning with the second semester of the first year, for a total of four tutorials.

Research Project

A research project is more specialized and usually more advanced than a tutorial, requiring greater independence and originality on the part of the student. Students conduct scholarly research with a view to producing substantial work in the form of a term paper or report. Among recent projects undertaken were studies involving ethical issues on intellectual property, Weblogs: the new intellectuals, cultural values and global business, U.S. Social Security system, metastable hydrogen atom collisions. Juniors and seniors are eligible to undertake research projects. A maximum of four research project course credits is allowed toward graduation, no more than two in a semester and no more than three in a year.

Senior Thesis

A senior thesis is original scholarly research undertaken in the student's senior year, usually over two terms. The research culminates in a formal written dissertation and oral examination that is evaluated by a faculty committee. Outstanding theses are awarded distinction at graduation. Senior theses may be undertaken for one or two course credits; normally two course credits will not be awarded in the same semester.

Creative Project

A creative project is an independent course of work, under faculty supervision, in a creative medium such as painting, fiction, sculpture, poetry, photography, or music. Creative project credits are limited in the same way as tutorials; senior projects in studio art may be approved for a maximum of two course credits.

SUMMER SESSION

Director: George Speros

The Lake Forest College Summer Session is open to college students, advanced high school students, and community residents. Nearly all courses are taught by regular Lake Forest College faculty. Two summer school terms are offered. Session I, a three-week term, begins in mid-May. Session II, a seven-week term, begins in early June. Schedules and registration forms for the course offerings may be obtained in the Registrar's Office.

All students must complete a Summer Session application and registration form and make a deposit for each course for which they register. Currently enrolled students must obtain an advisor's signature on their registration forms. Community residents or students enrolled at other institutions may apply to the Summer Session by completing a Summer Session application, making the required deposit, and sending an official transcript or letter of good standing from a current academic institution. Advanced high school students must complete a Summer Session application, make the required deposit, and arrange for a high school counselor to submit a letter confirming that the applicant is capable of college-level course work. Admission to the Summer Session does not constitute admission to the regular program at the College.

Independent study during the summer is normally restricted to internships. In order to have a summer internship, a student must submit a preliminary application to the director of summer internships no later than the Friday one week prior to commencement. Other independent studies (e.g., tutorials or research projects) may be approved in exceptional cases, but only if it can be demonstrated that a student's academic program makes that work a necessity. Such requests are to be submitted to the Registrar's Office for approval by the dean of the faculty before the end of the spring semester.

COMMUNITY EDUCATION FOR ADULTS

Director: Carol Gayle

Lake Forest College takes a special interest in serving the adult community of the North Shore through the Community Education Office. Regular course offerings of the College are open to members of the community for credit and many may be audited. The College provides special academic counseling for adult students. People who meet the established

admission requirements may take courses for college credit in individually tailored programs on a part-time or full-time basis.

Adults who already have a bachelor's degree may be interested in the College's Graduate Program in Liberal Studies (see the separate listing for this program in the printed catalog or at www.lakeforest.edu/graduateprogram on the Web.

In addition, the College welcomes adults from the community onto its campus for the stimulating lectures, plays, discussions, and concerts that are a part of the rich, cultural environment provided for students.

For more information regarding College courses, including tuition, registration, and schedules, please call or visit the Community Education Office in Young Hall 222, 847-735-5083.

PRE-PROFESSIONAL AND CAREER PREPARATION

Lake Forest College recognizes the advantages of joining the ideals of a liberal arts education with pre-professional and career preparation. The College therefore offers its students a number of pre-professional opportunities.

Cooperative Degree Program

Professional schools recognize the importance of the liberal arts tradition. Students specializing in narrow fields can bring to their studies not only a fundamental knowledge of the subject but also a sense of broader ethical concerns and a flexibility of mind that the liberal arts college fosters. With these goals in mind, the School of Engineering of Washington University (St. Louis) set up a cooperative degree program with Lake Forest College. In this program, students spend their first three years of college studies at Lake Forest and then go on to Washington University for a further two years to complete training. Students must complete all of the General Education Curriculum requirements of Lake Forest College except the senior studies requirement.

Dual-Degree Program in Engineering

Advisor: Michael Kash

Lake Forest cooperates with the Sever Institute of Technology at Washington University (St. Louis), in a program designed for students who plan to become professional engineers but who also desire a rigorous liberal arts education.

With an enhanced background in the social sciences and humanities, the prospective engineer is better prepared to assume the responsibilities of leadership in contemporary society.

The program requires each participating student to complete at least 24 course credits (at least 20 taken at Lake Forest College) before going on to the Sever Institute of Technology in the School of Engineering and Applied Science at Washington University for the final two years of study. Admission to the final two years of the program is at the discretion of Washington University.

Students accepted into the engineering dual-degree program must complete an Approved Program Withdrawal form in the Office of Student Affairs before leaving the Lake Forest campus to enter Washington University.

The student will receive a Bachelor of Arts degree from Lake Forest after earning a Bachelor of Science degree from Washington University. The Lake Forest College degree will be a B.A. with no major specified, unless all requirements for the major (including the senior studies requirement) have been met at Lake Forest College.

The exact selection, combination, and sequence of courses to be taken at Lake Forest College, both in the natural sciences and in the social sciences and humanities, depends on the type of engineering to be pursued at Washington University. While at the College the student must register as a major in mathematics, computer science, or one of the natural sciences. The chairperson of the major department must certify that the student has completed at least three-fourths of the major requirements at the College.

The minimum requirements are a B average, with no transfer of credit for courses with grades lower than C-, and a formal recommendation from Lake Forest College. For further details regarding requirements, options, and course work at Washington University, students should consult with the program advisor at Lake Forest College.

Early consultation with the program advisor is vital in order to formulate and undertake the most appropriate course schedule. The recommended core of courses include the following: Math 110, 111, 210, and 214 (Calculus, Multivariable Calculus, and Differential Equations); Chemistry 110, 111 or Chemistry

120, 121 (General Chemistry or Principles of Chemistry and Introduction to Laboratory Research); Physics 120, 121 (General Physics); and Computer Science 112 (Object-Oriented Programming and Design). The Biomedical Engineering program requires Biology 120, 221, and 340 (Organismal Biology, Cellular and Molecular Biology, and Animal Physiology) in addition to those courses listed above.

Five courses in the humanities and social sciences, including two in one field, with at least one at the 300 or 400 level and no more than two courses in performing or studio art are required.

The remaining courses are to be selected from the sciences, humanities, and social sciences at the discretion of the student and the advisor. The GEC and Cultural Diversity requirements must also be completed.

Education

Advisor: Dawn Abt-Perkins (Chair)

Lake Forest College prepares students for careers in teaching at the elementary, middle school/junior high, and high school levels. Courses leading to Initial Elementary and Secondary Certification in Illinois are offered. A major in education is available only in conjunction with another major. Details are given in the course listings.

Law

Advisors: David Boden (Chair), Richard Fisher, and Debra Lewis

The Pre-Law Advising Program supports students who are considering the field of law as a career and assists them in the process of applying to law schools. Students receive close personal attention and advice and have the opportunity to participate in events related to the law professions. Faculty on the Pre-Law Advising Committee offer counsel on the range of law schools most suitable for each student and on all phases of the application process. There is no specific pattern of pre-law course work at Lake Forest College; a well-rounded, challenging four-year course of study in the liberal arts and all major undergraduate fields are appropriate training for future lawyers. A pre-law society visits area law schools, participates in regional and national mock trial tournaments, hosts visits by law professionals and law school officials, provides support for students taking the LSAT, and engages in other activities related to careers in law. Most students take the Law School Admission Test

(LSAT) in the summer or fall after the junior year, and complete the process of law school applications during the fall semester of the senior year. Increasingly, students nationwide engage in pre-professional or volunteer work before commencing the study of law, so that students may consider applying to law schools at any phase during their post-collegiate careers.

Medicine

Advisors: Lori Del Negro (Chair), Robert Glassman, Douglas Light, and Edward Packer
Students preparing for careers in medicine, dentistry, veterinary medicine, or other related health professions may major in any academic field, provided that their courses of study include the necessary science classes to ensure adequate preparation for the professional schools of their choice. Generally, these required science courses include a minimum of three courses in biology, four in chemistry, two in physics, and one or two courses in mathematics. Additional areas of study to be considered are English, ethics, logic, and the social sciences. In addition to each student's chosen academic advisor, members of the Health Professions Advisory Committee (HPAC) are available to provide advice and information relevant to students interested in pursuing advanced study in the health professions. Students should inform the HPAC of their interest in the health professions as early in their academic career as possible. Further information about extracurricular professional experiences, the professional school application process, required standardized testing, and other important considerations are available through the HPAC.

INTERNSHIPS AND OTHER OFF-CAMPUS STUDY OPPORTUNITIES

Study opportunities in off-campus settings have enriched the curricular and extracurricular options of Lake Forest students for many years. Students who have taken advantage of such opportunities have gained new perspectives and fresh ideas. Off-campus study may take a student abroad, to other parts of the United States, or no farther than the City of Lake Forest. The College directly operates some of the programs described below. In most of the other programs the College is a sponsoring institution.

Off-Campus Study in the United States

Internship and practicum opportunities for off-campus study in the Chicago area and elsewhere in the United States are plentiful. Nearly half of all graduating students earn credit for an internship or practicum through a well-established program that takes advantage of the College's location near a great metropolis. The Associated Colleges of the Midwest, a consortium of 14 distinguished liberal arts colleges to which Lake Forest College belongs, operates five domestic programs in the humanities, social sciences, and natural sciences as well as a large number of study-abroad programs. The College cooperates with American University in offering a Washington Semester Program.

Internships and Practicums

Internships taken for credit at Lake Forest College are off-campus learning experiences integrated into the academic program. Although the specific nature of internship experiences will vary, internships should clarify for students the relationship between traditional liberal arts study and the use or expansion of knowledge in nonacademic settings. Students are eligible to apply for an internship following the completion of two years of course work. Under the internship program, students work for academic credit in businesses, social and governmental agencies, and other institutions both in the Chicago area and elsewhere during either semester of the academic year and during the summer term. A description of the program, Guidelines to Internships and Practicums, is available from the Registrar's Office.

Most internships and practicums have been developed under the auspices of the departments of economics and business and politics. The departments of psychology, sociology and anthropology, art, mathematics and computer science, biology, chemistry, history, English, philosophy, and theater have also participated significantly in the internship program. Students interested in pursuing an internship should contact the departmental internship liaison of the pertinent department and the director of college internships to begin the application process. Each academic department may establish its own application deadline. In order to have a summer internship, a student must submit a preliminary application to the director of summer internships no later than the Friday one week prior to commencement.

Students may count up to 3 internship credits toward graduation, not including foreign internship credit. A maximum of 2 credits will be awarded for each internship and will count toward the maximum of 15 credits allowed in any discipline. These courses are graded only on a Credit/D/Fail basis. In order to participate in an internship, a student must have a C average in all prerequisite courses and may not be on academic probation.

In recent years, students have worked and studied for the Chicago Historical Society, Northern Illinois Police Crime Lab, New England Financial, Chicago Medical School, Illinois Attorney General, Obama Senate Campaign, Edelman Communications, Chicago Board of Education, Chicago City Council, Chicago Blackhawks, Victory Gardens Theater, International Latino Cultural Center, UBS PaineWebber, Children's Memorial Hospital, Morgan Stanley, NBC 5 Chicago, and the Art Institute of Chicago, among many other organizations.

Program Leaves

A student may enroll during the fall or spring semester for one course at another institution while remaining registered for three courses at Lake Forest for that term. If approved by the student's advisor, the program must be checked with the registrar to assure transferability of the work. If the work is satisfactorily completed with a grade of C- or better in each course, and the credits are transferred to Lake Forest College, the student will be reimbursed for the per-course cost of the tuition at the other institution up to the per-course cost of tuition at Lake Forest College for the same period.

Cooperation with American University: The Washington Semester Program

Advisor: Paul Fischer

For qualified junior and senior students, this program is offered in cooperation with American University in Washington, D.C. The program, available in either fall or spring, provides an opportunity to learn from Washington's many resources, including the nation's policy makers. Washington Semester students earn a full semester of credit by participating in an internship (two credits), writing a research paper or taking an elective course (one credit), and attending a seminar in one of these areas (one credit): national government, public law, economic policy, foreign policy, international business and trade, international environment and develop-

ment, journalism, justice, museum studies and the arts, and peace and conflict resolution. Internship placements are with Congress, executive-branch agencies, the media, interest groups, research organizations, or museums. Students have seminars with government officials and political party leaders and attend sessions of Congress and committee hearings.

Because the program is intended to enhance students' college education, participating in it and selecting among its options must make sense within a student's concrete educational objectives. Since most of the work takes place outside of the classroom, applicants must demonstrate a high ability to perform consistently and responsibly in situations that demand that they work on their own initiative. The minimum GPA for applicants is 2.5. An essay and two faculty recommendations are required as part of the application. The application deadline is February 1. For purposes of graduation requirements, academic probation, and academic suspension, the Washington Semester Program counts as transfer credit and does not count toward the GPA.

ACM PROGRAMS IN THE UNITED STATES

Lake Forest College is a member of the Associated Colleges of the Midwest (ACM), a consortium of 14 distinguished colleges in five states: Beloit, Carleton, Coe, Colorado, Cornell, Grinnell, Knox, Lake Forest, Lawrence, Macalester, Monmouth, Ripon, St. Olaf, and the College of the University of Chicago. By working together these colleges have greatly expanded the off-campus study opportunities available to their students in the United States. Most Lake Forest students who participate in these programs do so during their junior year.

These programs are intended to enhance the collegiate experience and should make sense in terms of students' overall educational objectives. Because most are conducted outside the traditional classroom format, applicants must demonstrate an ability to perform consistently and responsibly in situations that demand that they work on their own initiative. Students on academic probation normally are ineligible and students who have displayed a pattern of disregard for College regulations may be ineligible.

Each ACM program is represented by an on-campus faculty advisor. A list of these advisors is available in the Dean of the Faculty Office

and from the study-abroad coordinator. Students may obtain applications for an ACM program from the appropriate advisor. These applications must first be submitted to the Lake Forest College ACM/Consortium Committee for an initial selection process. If approved at this stage, they will be forwarded to ACM for consideration. Since these programs are intended to complement on-campus programs, the College committee reserves the right to limit their availability in order to maintain the integrity of on-campus programs. Funding restrictions also apply. Although rising sophomores may be eligible to apply, qualified juniors and first-semester seniors will receive priority in the selection process. The application deadline for all programs is November 15 unless earlier as indicated. Applications will not be accepted after that date. For purposes of graduation requirements, academic probation, and academic suspension, ACM credit counts as Lake Forest College credit.

Chicago Arts Program

Advisor: Karen Lebergett

The Chicago Arts Program is a 15-week semester of urban art immersion during which students explore the arts through practical, creative, and scholarly activity. While living in Chicago, in addition to attending a wide range of cultural events, students meet and work with local artists and arts professionals in part-time internships, on independent study projects, and in two courses: the core seminar, Negotiating Chicago's Artworld, and an elective studio-based special topics workshop. Possible internship placements include but are not limited to museums and galleries, artists' studios, theater and dance companies, recording studios and popular music venues, literary organizations and publications, film and video production companies, architecture firms, arts education and community outreach organizations, and graphic and interior designers. Not limited to arts majors, the program benefits all students who have strong career interests or graduate school aspirations in the arts and humanities. Length of program: late August to mid-December, or late January to mid-May. Enrollment: 30 students (fall), 20 students (spring). Eligibility: Advanced sophomores, juniors, and seniors. Credit: 16 semester hours. Application deadline: November 15.

Newberry Library in the Humanities

Advisor: Benjamin Goluboff

Students in the Newberry Seminar do advanced independent research at one of the world's great research libraries. They join ACM and GLCA faculty members in close reading and discussion centered on a common theme, and then write a major paper on a topic of their choice, using the Newberry Library's rich collections of primary documents. The fall seminar runs for a full semester; the spring seminars are month-long. Students live in Chicago apartments and take advantage of the city's rich resources. The Newberry Seminar is for students looking for an academic challenge, interested in a chance to do independent work, and possibly considering graduate school. The seminar is administered by ACM and recognized by the Great Lakes Colleges Association, Inc. Length of program: late August to early December (fall seminar), one month (January to May short-term seminars). Enrollment: 15 to 25 students (fall seminar), 8 to 15 students (short-term seminars). Eligibility: Exceptionally qualified juniors, and seniors. Credit: 16 semester hours (fall seminar); equivalent of one course (short-term seminars). Application deadline: November 15.

Oak Ridge Science Semester

Advisor: Robert Glassman

The Oak Ridge Science Semester is designed to enable qualified undergraduates to study and conduct research in a prestigious and challenging scientific environment. As members of a research team working at the frontiers of knowledge, participants engage in long-range investigations using the facilities of the Oak Ridge National Laboratory (ORNL) near Knoxville, Tennessee. The majority of a student's time is spent in research with an advisor specializing in biology, engineering, mathematics, or the physical or social sciences. Students also participate in an interdisciplinary seminar designed to broaden their exposure to developments in their major field and related disciplines. In addition, each student chooses an elective from a variety of advanced courses. The academic program is enriched in informal ways by guest speakers, departmental colloquia, and the special interests and expertise of the ORNL staff. Administered by Denison University, the Oak Ridge Science Semester is recognized by both ACM and GLCA. Length of program: August to December. Enrollment: 20 students. Eligibility: Juniors and seniors in biology, chemistry, physics, geology, mathematics, or social sciences. Credit: 16 semester hours. Application deadline: November 15.

Urban Education

Advisor: Rachel Ragland

The Urban Education Program offers term or semester student teaching internships, a sequence of courses leading to bilingual or English as a Second Language (ESL) certification, and an intensive one-month course in May on multi-cultural and global awareness. Chicago offers exceptional opportunities for students interested in education and educational issues. The diversity of communities served by Chicago schools provides a rich setting in which interns learn from working with people who represent cultures and languages from all over the world. The variety of educational programs operating within the metropolitan area also enables students to work in virtually any kind of school.

Placements are made in public, private, or alternative schools, and students can work in traditional or progressive, city or suburban, multilingual or monolingual, regular or special education, magnet or neighborhood schools. Seminars focus on the social, political, and economic factors that influence systems as well as the impact of schools on students, teachers, and communities. Coaching and supervision emphasize collaborative approaches for developing effective teaching strategies.

The *Dimensions of Multiculture* course offered during May term explores the meaning of cultural identification and its impact on children's learning, and also serves candidates for bilingual certification, foreign students wanting to develop a deeper understanding of American cities, and a broad range of students interested in expanding their understanding of other cultures. Length of program: student teaching—semester, term, or multi-block; bilingual/ESL—semester or term (winter or spring term only); *Dimensions*—May term; Eligibility: Any currently enrolled student; those seeking certification are expected to have fulfilled their college's prerequisites for student teaching. As a ninth semester option, tuition for the ACM Urban Education Program for Lake Forest College students is one half the College's tuition for the semester. Permission of the Education Department is required for participation. Credit: Equal to an equivalent period on the home campus. Application deadline: November 15.

350 Foundations of Bilingual Education

Examination of the rationale, history, and issues surrounding bilingual education, along with issues of first and second language acquisition as related to bilingual education. Topics studied

include legal, historical, and social perspectives of bilingual education; principles of language development in the bilingual child; models of bilingual programs; U.S. minority cultures and the bilingual classroom; and bilingual learners in relationship to mainstream classrooms. Supervised field experience required.

351 Theoretical Foundations of Teaching English as a Second Language

Investigation of the impact of sociological, psychological, and cultural phenomena on language learning. Topics include hypotheses of first and second language acquisition, differences between children and adults in second language acquisition, and an examination of socio-cultural, linguistic, and psychoeducational variables that affect language learning and school performance. Supervised field experience required.

352 Methods and Materials for Teaching English as a Second Language

An introduction to the teaching of English as a Second Language. Survey of methods and materials that address reading, writing, listening, and speaking skills for elementary, secondary, and adult learners in ESL settings. Applications are made within language and content-area instruction. Topics include an historical overview of ESL techniques, Total Physical Response, storytelling, the role of grammar, teaching pronunciation, and the use of journals. Supervised field experience required.

353 Assessment: Oral and Literacy Skills Development

An introduction to assessment instruments and procedures used in bilingual and ESL programs. A study of the basic tenets of testing and assessment including review, evaluation, and administration of various testing instruments; examination of techniques of whole language evaluation; and informal and alternative assessments. Supervised field experience required.

354 Dimensions of Multiculture and Global Awareness

An exploration of the meaning of cultural identification and its impact on learning. Students participate in a series of workshops dealing with the histories and differences in cultural characteristics of specific groups of people from around the world and investigate a number of Chicago's ethnic neighborhoods with the assistance of knowledgeable resource persons. Topics include the development of culture consciousness,

effects of culture on teaching and learning, skills and tools of cultural analysis, comparison of immigrant and American mainstream cultural patterns and values, and current world issues and their relationship to cultural understanding. Supervised field experience required.

Urban Studies

Advisor: Michael Ebner

Chicago is a quintessential American city that was founded on economic exchange, grew with America's westward expansion, became the hub of Midwest economic and political power, and continues to illustrate the best and worst of American society. The Urban Studies Program immerses students in the life of Chicago while exploring both the historical and current forces that define urban life. Through supervised internships, seminars, a Core Course, and independent study, students experience the dynamics of a modern city while learning academic concepts to frame those experiences. Possible internship placements include legal, criminal justice, community and social justice organizations, historical and cultural institutions, educational, public relations, media facilities, political and philanthropic institutes, along with a host of other possible placements. Foremost, the Urban Studies Program develops the skills necessary for effective leadership in civic and political life by exposing students to effective models of action in light of the realities of urban America. Length of program: early September to mid-December, or late-January to mid-May. Enrollment: 40 to 50 students (fall); 25 to 35 students (spring). Eligibility: Sophomores, juniors, and seniors. Credit: 16 semester hours or the equivalent. Application deadline: November 15.

STUDY ABROAD

Lake Forest College believes deeply in the value of study abroad and many of its students pursue such study, especially during the junior year.

The College has several study-abroad programs of its own. The oldest of these permits students to spend half a semester in Greece and Turkey after a period of study on campus. Lake Forest College also sponsors International Internship/Study-Abroad Programs in Paris, France, and in Santiago, Chile (suspended for Fall 2005), and Beijing Program for Asian Studies, hosted at Peking University in Beijing, China. The College also offers a course-related spring-break study tour to Costa Rica for students enrolled in Biology 380 Tropical Ecology and Conservation.

The Associated Colleges of the Midwest, a consortium of 14 distinguished liberal arts colleges to which Lake Forest College belongs, operates a rich array of study-abroad programs on four continents for which Lake Forest students are eligible to be considered.

With prior permission of the Academic Appeals Board, students may also receive academic credit for study-abroad programs sponsored by other accredited institutions. See Program Leaves under Internships and Other Off-Campus Opportunities. The study-abroad coordinator, Ms. Jan Miller, makes available to students information about high-quality non-Lake Forest programs, and students interested in study abroad should consult her no later than the beginning of the spring term of the year preceding their proposed study.

Although most students go abroad for a single semester, a student may petition the Academic Appeals Board for permission to spend an entire junior year abroad. The board may grant such an appeal when the proposed program provides significant enhancement of the student's academic program and meets each of the following conditions: (1) It must be consistent with a liberal arts education; (2) it must provide academic opportunities clearly unavailable at the College; and (3) there must be good reason for thinking that the educational benefits will be significantly enhanced by a two-semester duration. Students must apply no later than the beginning of the spring term of the year preceding their proposed study.

Upon approval by the Committee on Off-Campus Programs, Lake Forest College enters into a limited number of consortium agreements with selected institutions in order to make it possible for qualified students on financial aid to retain their aid while studying off-campus. Students are urged to review "Procedures and Guidelines for Students Applying for an International Study Consortium Agreement," which is available on consultation with the study-abroad coordinator. While studying abroad, students are required to have health insurance levels that must include evacuation and repatriation coverage. A plan is available through the College. The application deadline is November 15.

For the purposes of graduation requirements, academic probation, and academic suspension, credits received through Lake Forest College-approved consortium agreements do not count toward the GPA.

Study-abroad programs meet the GEC breadth requirements when applicable and the GEC Cultural Diversity Requirement.

Lake Forest College Programs Abroad

Programs offered by Lake Forest College are planned and directed by members of the College faculty. Each program runs one semester and credit is awarded by the College.

A student becomes a participant in one of these programs on acceptance by the department or supervisory committee pertinent to the particular program and with the concurrence of the dean of the faculty. Principal considerations used in determining admissibility to a program include evidence of academic motivation and promise of satisfactory academic work; usually an average of B- (2.67 GPA) or better; reason to believe that the student will benefit from the program; and the applicant's major interest and reason given for wanting to join the program. Students on academic probation are normally ineligible and students who have displayed a pattern of disregard for College regulations may be ineligible.

Each applicant must present the following documents: completed application form including parental signature, waiver, and medical report; letters of recommendation from members of the teaching faculty who are familiar with the academic work of the applicant; and a letter of evidence of good academic and judicial standing from the Office of Student Affairs.

All parts of the application are due by the deadline indicated on the form. Forms for parental signature, waiver, and medical report may be obtained from the program director or from a member of the appropriate supervisory committee. No applicant will be accepted into a program until all of the conditions are met. Completed applications will be evaluated as they come in; decisions on late applications will therefore be made last. If the group of applicants is larger than the number who can be admitted, preference will be given to majors and juniors and seniors. First-year students and last-term seniors are ineligible. (Exceptions must be approved by the Academic Appeals Board.)

Students accepted into a Lake Forest College off-campus program may be required to confirm their acceptance by making a nonrefundable deposit.

Cost of participating in a program includes tuition at the regular Lake Forest College rate;

travel to and from the location of the program; an excursion fee for field trips when applicable; lodging and meals; and books and incidental expenses, including individual travel.

INTERNATIONAL INTERNSHIP / STUDY-ABROAD PROGRAM IN PARIS, FRANCE

Advisors: Brigitte Debord (Chair), and Jean-Luc Garneau

The Paris program aims to provide the student with in-depth exposure to French society and culture through a combination of work experience and classroom instruction. The program is scheduled for the fall semester each year pending sufficient enrollment. Students must be at the junior or senior level, demonstrate French language proficiency, and have a solid academic background in their major field(s). Students are normally expected to have a B-average (2.67 GPA). The 15-week program is composed of three parts: (1) a two-course-credit internship in a for-profit or not-for-profit organization or government agency (examples of past internships include management, marketing, finance, advertising, museology, education, personnel, public relations, government, and research); (2) a one-course-credit study of French language; and (3) a one-course-credit seminar in French society and culture. To enhance their exposure to another culture and develop fluency in French, students will normally live in French homes.

Careful advance planning is crucial. Students should discuss their interest in the program with their academic advisors and those listed above. The application deadline is November 15.

INTERNATIONAL INTERNSHIP / STUDY-ABROAD PROGRAM IN SANTIAGO, CHILE

(suspended for Fall 2005)

Advisors: Lois Barr, David George, Gizelle Meneses, and George Speros (Chair)

The program in Santiago, Chile, aims to provide the student with in-depth exposure to Chilean society and culture through a combination of instruction at a local university and work experience. The program is scheduled for the fall semester pending sufficient enrollment with classes being offered for Lake Forest College students at the Universidad Diego Portales (UDP) in Santiago. Students must be at the junior or senior level, demonstrate Spanish language proficiency, and have a solid academic background in their major field(s). Students are normally expected to have a B-

average (2.67 GPA). The 15-week program is composed of three parts, two at UDP, (1) a one-course-credit study of Spanish language and (2) a one-course-credit study of Chile in the twentieth century; part (3) is a two-course-credit internship in a profit or nonprofit organization. In the past, internship opportunities for qualified applicants have been available in computer science, marketing, education, journalism, marine biology, chemistry, and research in government agencies and nongovernmental organizations (NGOs). Additional opportunities are sought when students' preparation and interests so warrant. To enhance their exposure to another culture and to develop fluency in Spanish, students will normally live with Chilean families.

Students who would like to apply should see the advisors listed above for application forms. Likewise, students should discuss their interest in participating in the program with their advisors. Careful planning is crucial.

PROGRAM IN GREECE AND TURKEY

Advisory Committee: Richard Fisher, Linda Horwitz, Anna Trumbore Jones, Rita Koller, and Louis Lombardi (Chair)

Since 1970 the College has offered an interdisciplinary humanities program in Greece and Aegean Turkey designed to provide sophomore and junior students, regardless of major, with an opportunity to live and study in a foreign culture.

The information below reflects recent programs. Travel plans are subject to change, for logistical and financial reasons as well as in response to local conditions.

Offered in the spring, pending sufficient enrollment, the program in Greece and Turkey incorporates three sequential four-week courses that use historical and archeological sites and museums as classrooms to study the ancient Aegean world from the Minoan to the Byzantine periods. A prerequisite course (Greek Civilizations 201) is offered in January and February prior to the on-site courses. Thus students can earn up to four credits. To be eligible for acceptance in the program, students must have at least sophomore standing, good academic records (normally B- or better), and references and have completed Greek Civilizations 201 or at least two courses in the combination of art history and ancient history or classical literature.

Interested students are encouraged to submit an application form by May 1 so that it can be considered in an early review. The final deadline for application is October 31. Application forms are available from the advisors listed above.

201 Ancient Greece: Life, Thought, and the Arts

Spring (January-February)
(7.5-week intensive course)

An interdisciplinary introduction to the legacy of ancient Greece from the Homeric Age through the Classical Period. Class discussion of selections from Greek poets, playwrights, historians, and philosophers is integrated with slide lectures examining art and archeological remains in historical context. Since this course runs for 7.5 weeks during the first half of the spring semester, the periods during which withdrawals are permitted and refunds are given are each half of the corresponding periods for 15-week courses. A student may take no more than three course credits in other courses while enrolled in this class. (Cross-listed as Sociology and Anthropology 201.)

202 Greece in the Bronze Age

Spring (March)

The Minoan and Mycenaean cultures studied through archeological sites and museum materials on Crete and in the Peloponnese. Periods of study based in Herakleion and Návplion, alternated with periods of group travel-study at Minoan sites on Crete and Santorini and Mycenaean sites in the Argolis. (Cross-listed as Art 202 and Sociology and Anthropology 202.)

203 Greece in the Classical-Roman Ages

Spring (April)

Periods of study in Athens, Delphi, Corinth, Epidaurus, the island of Delos, and the Aegean coast of Turkey. (Cross-listed as Art 203 and Sociology and Anthropology 203.)

204 Greece in the Byzantine-Medieval Ages

Spring (May)

Periods of study in locations such as central Greece (Osios Loukas, Daphni, Meteora, Athens), the Peloponnese (Nauplion, Mistra, Monomvasia), northern Greece (Thessaloniki), and Turkey (Ephesus, Istanbul). Please note that on occasion, when the political situation in Turkey has so warranted, the College has cancelled travel to sites there and would do so again if deemed necessary. (Cross-listed as Art 204 and Sociology and Anthropology 204.)

TROPICAL ECOLOGY AND CONSERVATION

(Offered in alternate years. Not offered in 2005-2006)

The Biology Department will be offering a tropical ecology and conservation course in the spring that includes a visit to a field site in the tropics during spring break.

380 Tropical Ecology and Conservation

In this course we will survey basic ecological dynamics and concepts characteristic of tropical terrestrial ecosystems, and will also examine the complex socio-political, economic, and biological issues associated with the major threats to these ecosystems. The course will revolve around a required spring break trip to a field site in the tropics (e.g., Costa Rica) at which research projects will be conducted. Class periods will consist of discussions and lectures with associated readings and short written assignments. Lab will center on the spring break trip, emphasizing study design and preparation for field projects, and examination of collected specimens/data analysis afterward. Students will prepare posters and oral presentations of field projects at the end of the semester.

Application and additional fee required to cover expenses associated with field trip.

Prerequisite: Biology 220. (Cross-listed as Environmental Studies 380 and Latin American Studies 381.)

ASIAN STUDIES

274 Topics in Asian Studies: Global Engagement in Contemporary China

Spring 2006, on campus, with a three-week trip to China in May.

This course centers on East Asian civilization as a form of inquiry and aims to develop understanding of the complexity of human affairs by focusing on contemporary China. It will provide students with exposure to Chinese culture, history, religion, society, language, and economy through a combination of classroom instruction and field experience in China. The spring course consists of prerequisite on-campus study, which prepares students for their on-site experience, a three-week trip to China, beginning in mid-May. The College's Freeman Grant for East Asia Studies will provide students with the financial aid to cover major costs related to the trip. Students benefit not only from studying the concept of curricular cultural diversity on campus, but also from the opportunity to examine historical and archeological sites first-hand. They also study the

latest development of China's economic reform, thereby deepening their knowledge of a multiplicity of different cultural and political systems. This course is most suitable for those who are seriously interested in studying Asian Studies, East Asian languages, and international relations. Students intending to enroll in this course must consult with Professor Chen for information on applying to register for this course.

The Beijing Program of Asian Studies, Beijing, China

Advisors: Shiwei Chen (Fall); George Speros (Spring)

Fall or Spring Semester

The Beijing program of Asian Studies is sponsored by Lake Forest College and hosted by Peking University in Beijing, China, pending sufficient enrollment. It aims to expose students to Chinese language, culture, history, religion, economy, politics, and society through a combination of classroom instruction and internship. The program is scheduled for both the fall and spring semester. Students should be at the junior or senior level, demonstrate some Chinese language ability, and have a solid academic background in their major field(s) of study. Students are normally expected to have a B- average (2.67 GPA). The program is most suitable for those who are seriously interested in studying Asian Studies, East Asian languages, and international relations. Successful completion of this program earns Lake Forest College credit. Applications for the fall or spring semester in the Beijing Program of Asian Studies are due on November 15.

ACM PROGRAMS ABROAD

Lake Forest College is a member of the Associated Colleges of the Midwest (ACM), a consortium of 14 distinguished colleges in five states: Beloit, Carleton, Coe, Colorado, Cornell, Grinnell, Knox, Lake Forest, Lawrence, Macalester, Monmouth, Ripon, St. Olaf, and the College of the University of Chicago. By working together these colleges have greatly expanded the study-abroad opportunities available to their students. Most Lake Forest students who participate in these programs do so during their junior year.

These programs are intended to enhance the collegiate experience and should make sense in terms of students' overall educational objectives. Because most are conducted outside the traditional classroom format, applicants must demonstrate an ability to perform consistently

and responsibly in situations that demand that they work on their own initiative. Students on academic probation normally are ineligible and students who have displayed a pattern of disregard for College regulations may be ineligible.

Each ACM program is represented by an on-campus faculty advisor. A list of these advisors is available in the Dean of the Faculty Office and from the study-abroad coordinator. Students may obtain applications for an ACM program from the appropriate advisor. These applications must first be submitted to the Lake Forest College ACM/Consortium Committee. If approved at this stage, they will be forwarded to ACM for consideration. Since these programs are intended to complement on-campus programs, the College committee reserves the right to limit their availability in order to maintain the integrity of on-campus programs. Although rising sophomores may be eligible to apply, qualified juniors and first-semester seniors will receive priority in the selection process. Funding restrictions also apply. The application deadline for all programs is November 15 unless earlier as indicated. Applications will not normally be accepted after that date. For purposes of graduation requirements, academic probation, and academic suspension, ACM credit counts as Lake Forest College credit.

Central European Studies Program in the Czech Republic

Advisor: Carol Gayle

Combining its rich cultural heritage, the emerging revival of democracy, and a struggle for economic success, the Czech Republic mirrors much of East and Central Europe. The program is based at Palacky University in Olomouc, the historic capital of Moravia. Students from many disciplines can benefit from intensive language training, course work, field trips to major Central European cities, independent research, a three-week host family stay, and housing among Czech students in university dormitories. Courses cover Central European history, contemporary socio-political issues, and Czech literature and culture. Administered by ACM, Central European Studies is also recognized by GLCA. Length of program: mid-August to mid-December. Enrollment: 15 to 20 students. Eligibility: Juniors and seniors. Credit: 16 semester hours or the equivalent. Application deadline: November 15.

Costa Rica: Studies in Latin American Culture and Society

Advisor: Caleb Gordon

Studies in Latin American Culture and Society (fall only) is an interdisciplinary program for students seeking a comprehensive understanding of life in Latin America and wishing to develop fluency in Spanish. This program, which focuses on the humanities and social sciences, is designed to take full advantage of its Costa Rican setting. Language study is stressed as the key to understanding the culture. Course work in language, literature, geography, anthropology, politics, and culture enables students to develop insights which are reinforced by field trips and two weeks of field work in rural areas. In San José and its environs, students live with families both to improve their language ability and to enjoy personal involvement in the daily life of a Latin American community. Length of program: late August to December. Enrollment: 25 to 30 students. Eligibility: Sophomores, juniors, and seniors, with at least two years of college-level Spanish or the equivalent. Credit: 16 semester hours. Application Deadline: November 15.

Costa Rica: Tropical Field Research

Advisor: Caleb Gordon

The Tropical Field Research Program (spring only) is designed for advanced work in all disciplines. Costa Rica supports an extraordinary variety of plant and animal life and provides rich research opportunities for students of tropical biology and ecology. An equally broad range of research topics is available for students of anthropology, archaeology, economics, geography, geology, history, political science, literature, fine arts, and sociology. Students prepare for their research during a month-long orientation which includes intensive language training and a review of field work methodology. Their field study may be integrated with an ongoing project or undertaken independently under the supervision of a faculty advisor. Length of program: late January to May. Enrollment: 24 to 27 students. Eligibility: Juniors and seniors with prior course work in the discipline in which they propose to do research, plus at least one year of college Spanish (two years are strongly recommended). Credit: 16 semester hours. Application deadline: November 15.

Florence

Advisor: Richard Mallette

The Florence Program provides an excellent opportunity to study Renaissance painting, sculpture, architecture, history, and literature for students interested in art, history, Romance languages, and the humanities. Italian language instruction, a studio art course, and courses providing a broad perspective on Italian contributions to world civilization facilitate the study of Florentine artistic and cultural heritage. Visits to museums and galleries, short field trips to other cities throughout Italy, and discussions with local scholars supplement this course work. Staying with Italian host families enriches participants' awareness of modern Italian life as well as the academic study of Italian Renaissance culture. Length of program: late August to December. Enrollment: 25 to 30 students. Eligibility: Juniors and seniors. Prior Italian language recommended. Credit: 16 semester hours or the equivalent. Application deadline: November 15.

India Studies

Advisor: Catherine Benton

The Indian subcontinent provides a rich and complex background for the study of a non-Western civilization. India Studies program participants live with Indian host families in Pune, a city that is at once both traditional and highly industrialized. This offers students an excellent opportunity to observe the interaction of tradition and modernity that characterizes contemporary India. While there, students enroll at Tilak Maharashtra Vidyapeeth for an academic session, where they have language instruction, choose four other courses, and complete their independent study projects. Additionally, students enjoy field trips, which can include nearby cultural sites such as the Ajanta and Ellora caves. A variety of extracurricular activities, such as dance, yoga, weaving, and batik, can be arranged. Length of program: mid-July to mid-December. Enrollment: 20 students. Eligibility: Any currently enrolled student may apply, though priority is given to rising juniors or seniors. Credit: Equivalent to one extended semester of work on the home campus (18 credits). Application deadline: November 15.

Japan Study

Advisor: George Speros

Students study at Waseda University's School of International Liberal Studies in Tokyo after a brief orientation providing intensive language practice and cultural discussions. In addition to required language study, electives may be chosen from a wide range of Asian Studies courses taught in English. A family living experience in Tokyo provides an informal education in Japanese culture and is in many ways the dominant feature of the program, offering total immersion in the Japanese way of life. The program is recommended for a full year of study, although a term or semester option is also available. The full year program includes a month-long cultural practicum or internship in another region of Japan, usually in February or March. Administered by Earlham College, Japan Study is recognized by both ACM and GLCA. Length of program: early-September to late June (academic year), early-September to late December (autumn term), early-September to early February (fall semester), early-September to Mid-March (fall semester with cultural practicum). Eligibility: Sophomores, juniors, and seniors with a minimum 3.0 GPA. No Japanese language study is required for acceptance, but at least one semester or term of Japanese must be completed before departure. Credit: Equal to an equivalent period on the home campus. Application deadline: November 15.

London and Florence: Arts in Context

Advisor: Richard Mallette

The London and Florence Program compares the artistic achievements of two historically prominent cities. Participants study the historical and political context of art, architecture, literature, and theater as well as Italian language. Visits to museums, galleries, theaters, short trips to other areas of England and Italy, and discussions with local scholars supplement this course work. Students spend eight weeks in each city and enjoy a week-long mid-semester break. An optional intensive course in Italian language is offered every January in Florence (3 semester credits). For Lake Forest College students, the extra cost of this course overload is approximately one-ninth of the Lake Forest College tuition. This fee is the responsibility of the participant. The policy that allows students on the Dean's List to take a fifth course without additional charges does not apply to ACM courses. In addition, a pilot program running from January through March based in Florence

is available for a small number of students, particularly those from colleges with term calendars. Length of program: late January to May. Enrollment: 50 students (25 begin in London, 25 in Florence). Eligibility: Sophomores, juniors, and seniors. Credit: 16 semester hours. Application deadline: November 15.

Russia

Advisor: Carol Gayle

The enormous political, social, and economic changes taking place in Russia provide a fascinating context for this program, and the Kuban/Black Sea region program site provides a particularly rich environment for understanding the changing nature of Russian life and the issues of national identity which accompany these changes. The program combines intensive study of the Russian language with a course on Russian society and special courses on focused topics. Students live with Russian families and the combination of home stays, field trips, and individual projects provide for maximum exposure to contemporary Russian life. The program is based at Kuban State University in Krasnodar, a regional center of one million people. The city's distinctively Russian atmosphere encourages a stronger cultural immersion than is usually found in Russia programs in more Westernized locations. In addition, little English is spoken in Krasnodar, providing students increased opportunity to develop their Russian language skills.

Administered by ACM, the Russia Program is also recognized by GLCA. Length of program: late August to mid-December. Enrollment: 20 students. Eligibility: One year Russian language. Credit: 16 semester hours. Application deadline: November 15.

Tanzania: Nation-Building and Development in Africa

Advisor: Ghada Talhami

Currently located on the University of Dar es Salaam campus in Tanzania, this interdisciplinary program addresses the challenges of building a modern independent nation and focuses on development issues in Africa. University of Dar es Salaam faculty members offer courses in culture and society, political and economic development, and Swahili language. Students also complete an independent field project under the guidance of program staff or university faculty. Family stays in Dar es Salaam offer students the opportunity to live with Tanzanians and participate in community life. The academic program is also enriched by

field trips and a rural stay. Length of program: early January to mid-May. Enrollment: 15 to 20 students. Eligibility: Advanced sophomores, juniors, and seniors. Credit: 16 semester hours of the equivalent. Application deadline: November 15.

Tanzania: Studies in Human Evolution and Ecology

Advisor: Ghada Talhami

The Tanzania program offers undergraduates a unique opportunity to conduct field work in some of the world's greatest paleoanthropological and ecological sites. Students divide their time between the University of Dar es Salaam and the Northern Region of Tanzania. At the University they take courses in intensive Swahili, human evolution, and the ecology of the Maasai Ecosystem while developing a field project. For the next six weeks, students live in field camps and pursue individual field projects in the Tarangire/Ngorongoro area before returning to the University for final work on their projects. The program is both physically and academically demanding. Length of program: late July to mid-December. Enrollment: 20 students. Eligibility: Juniors and seniors. Credit: 16 semester hours or the equivalent. Application deadline: November 15.

THE GRADUATE PROGRAM IN LIBERAL STUDIES

Dan LeMabieu, Director
Hotchkiss Presidential Professor of History

Carol Gayle, Associate Director
Associate Professor of History

Rosemary Cowler, Writing Advisor
Hotchkiss Presidential Professor of English,
Emerita

Seminars and electives are taught by the faculty of Lake Forest College. Faculty who have taught M/LS seminars include:

Bernice Gallagher
Lecturer in English

David S. George
Professor of Spanish

Robert B. Glassman
Professor of Psychology

Anne E. Houde
Associate Professor of Biology

Louis Lombardi
Professor of Philosophy

Richard Mallette
Distinguished Service Professor of English

James Marquardt
Assistant Professor of Politics

Ronald H. Miller
William R. Bross Professor of Religion

Richard Pettengill
Assistant Professor of English and Theater

Christopher G. Reed
Professor of Art

David Spadafora
Professor of History

The Graduate Program in Liberal Studies is designed for those who have completed a bachelor's degree and who want to enhance their ability to organize conceptually the social, scientific, and humanistic dimensions of topics that illuminate the world of the twenty-first

century. Interdisciplinary in nature, graduate education in the liberal arts is based on the assumption that beyond the technical competence required for certain tasks, people need the breadth and wisdom that have traditionally been fostered by the liberal arts. The program leads to a Master of Liberal Studies (M/LS) degree.

At the heart of the M/LS program is a series of interdisciplinary seminars, team-taught by faculty members representing different disciplines. The emphasis in these specially designed seminars is on bringing together the approaches of the three areas of the liberal arts curriculum, the social sciences, the physical sciences, and the humanities, rather than on acquiring specialized knowledge in one of them. The aim of the program, then, is to foster the ability to integrate knowledge from several fields and to deal with major questions in light of the wisdom afforded by a broad knowledge of the liberal arts.

Businesspeople have found that a graduate liberal arts program provides a perspective that helps them make better decisions and deal more effectively with the issues they face in a world that is rapidly changing.

Teachers enroll in graduate liberal studies programs as an attractive alternative to further graduate work in education or in a single academic discipline; they find that the broad concerns of a nondisciplinary master's program more closely match their needs.

Adults pursuing advanced study for their own enrichment and pleasure choose graduate liberal arts education as an alternative to a self-directed program of reading or to a series of unrelated adult education courses. These students find that they receive a carefully organized, coherent approach to further learning in association with other adults who share similar interests.

REQUIREMENTS FOR THE DEGREE OF MASTER OF LIBERAL STUDIES

For the Master of Liberal Studies (M/LS) degree, a student must complete nine course credits. After taking eight course units (normally four interdisciplinary seminars and four electives),

the student may choose between two options for the final, ninth credit: either a substantial master's project (a research or creative undertaking) or another, ninth, course and an expanded term paper, from that course or an earlier one. Candidates must earn a grade of B or higher in all elective courses to have them count toward the degree. While a grade of C is considered passing in the interdisciplinary seminars, a student who receives a C in the initial seminar must earn a B in another interdisciplinary seminar before undertaking elective courses. An overall average of B or higher is a requirement for the master's degree. Course work given a grade of incomplete by the instructor for appropriate reasons must be cleared within one year; after that, the grade will be recorded permanently as NC (No Credit), without affecting the student's grade point average. M/LS students are not required to take any minimum number of courses a year to remain in the program. Part-time students are encouraged. Since most of the participants in the M/LS program hold full-time jobs or have other responsibilities, graduate students typically take one course per semester during the regular school year, with the possibility of taking summer school courses as well. There is no penalty for not taking a course each term and there is no arbitrary limit on how long a person may take to finish the program.

Interdisciplinary Seminars

The interdisciplinary seminars at the core of the M/LS program center on important issues viewed from the perspectives of several scholarly disciplines. These seminars are team-taught by faculty typically representing the humanities, the social sciences, and/or the physical sciences, with additional faculty often brought in for their special expertise. Students enrolled in the M/LS program are expected to take one of the interdisciplinary seminars during their first term at the College. In a term when no interdisciplinary seminar is offered, the student may, with the permission of the M/LS Committee, begin the program with an elective course, but no student will be granted admission to candidacy until having successfully completed an interdisciplinary seminar. The seminars are taught as evening classes, meeting once a week for a semester (15 weeks), and carry four hours of graduate credit. Requirements for a seminar include participation in the weekly class discussions and a substantial research paper on a topic related to the subject of the seminar, chosen by the student in consultation with the instructors. Seminars currently in the curriculum are listed under Course

Descriptions. Seminars on new topics are frequently added.

Electives

Candidates for the M/LS degree are required normally to take four elective courses. These courses, chosen from the regular Lake Forest curriculum in consultation with the faculty advisor, should represent a number of different disciplines. Electives are selected on the basis of a student's previous academic background and current needs and interests. Only courses at an advanced level will be accepted for graduate credit. Students may, of course, take an introductory-level course to prepare themselves for further work in a particular field, but such a course will not count toward the M/LS degree. In some cases, a student may be asked to do some independent reading in order to prepare for an upper-level course.

In order for an elective course to earn graduate credit, students are required to do additional work beyond that required of undergraduates. The additional or alternative work, an intensification or expansion of the regular work of the course, is to be defined by the instructor according to guidelines established by the M/LS Committee. It is most often an advanced research paper or creative project, or an investigation of subjects beyond the regular syllabus; in either case emphasis should be on the relationship of the material of the course to other fields. Credit toward the M/LS degree will only be given for elective courses in which a student earns a B or higher grade.

Transfer Credit

Once a student is admitted to candidacy, the M/LS Committee may approve the transfer of graduate courses from an accredited college or university toward meeting the elective requirement. Only those courses in which the student has earned a grade of B or higher and that fit into the liberal arts definition of the M/LS program can be considered for acceptance in transfer. Normally, the Committee will accept in transfer no more than the equivalent of two Lake Forest College graduate courses.

Ninth Credit Options

1) Master's Thesis/Project

The Master's Thesis/Project is an independent interdisciplinary undertaking of some 75-100 pages in length. Whether a research study or a creative effort, its purpose is to demonstrate the

student's ability to read or to conceptualize, broadly and intelligently, from a number of different disciplines, to integrate this interdisciplinary understanding, and to draw independent conclusions or to create an artistically cohesive work. In contrast to a conventional master's thesis, the emphasis is not so much on original research in primary sources as on the mastery and integration of disparate materials. The M/LS Committee values the learning experience provided by the final project, regarding it as a capstone for a graduate liberal studies program, and encourages students to choose this option.

The Master's Thesis/Project is a single course unit encompassing both preparation for the work and its completion. During work on the project the student will meet regularly with a member of the faculty who serves as project advisor. Following a preparatory phase of the work, the student will submit a formal project proposal including an extended statement of the problem to be examined, an annotated bibliography, and a statement of how the student plans to proceed on the project. Approval of the prospectus by the M/LS Committee is required. At that time the Committee will appoint an examining committee broadly representative of the disciplines that bear on the topic and these faculty members may be consulted by the student as work on the project progresses. Included on the examining committee will be one of the Program directors and at least one individual from the faculty at large.

This final project should be completed in two years. If it is not completed in the allotted time, the student will be given a grade of PR. The student may later reregister (and pay tuition) for the project, with the earlier grade of PR removed from the transcript after successful completion of the project. If the work is not completed within five years after the student's original registration for the project, normally the grade of PR will automatically turn into a grade of NC.

When the project is completed, the members of the examining committee will read the project report and conduct an oral examination of the student. The committee may recommend that the project be accepted or rejected, or that the student do additional work to bring the report to an acceptable level.

2) Ninth Course and Course Paper/Project

This option requires the student to take a ninth course and in addition to prepare an expanded term paper (or creative project) of 35-50 pages. This project may be one done for the ninth

course or be an extended version of one prepared for an earlier course. As is true of all M/LS course work, this project should be interdisciplinary in scope. Normally it is to be completed during the semester following the ninth course and evaluated by two appropriate faculty members as well as one of the Program directors.

GRADUATE PROGRAM IN LIBERAL STUDIES

Recent M/LS Seminars

Team-taught, interdisciplinary seminars are at the heart of the Graduate Program in Liberal Studies. Each semester one graduate seminar is offered. M/LS students will take at least four seminars to complete the program. They choose seminars, guided by their own interests and seminar availability. M/LS seminars are always taught once a week in the evening, usually on Mondays, from 7:00 to 10:00 p.m. Below are course descriptions for the seminars currently in the M/LS curriculum.

510 Darwin: His Impact on His World and Ours

Darwin and Darwinism are studied not only by an examination of the scientific and social scientific concepts of evolution and the worldview that Darwinism replaced, but by such ramifications of this new perspective as the religious response to Darwin's theories; the ways in which social science and popular thinkers used the prestige of scientific theory to justify contemporary business practices; the impact of Darwinism on literature (realism and naturalism); scientific developments since Darwin and the manner in which the study of genetics has confirmed and modified Darwin's theories; and the new sociobiology, the genetic and cultural-evolutionary determination of human behavior.

514 Public Policy and the Environment

The seminar will examine: the historical background of current environmental issues; alternative ways of conceiving of the relationship of humankind and the natural world; the complex issues created by the need to reconcile environmental with other social goals such as economic growth and the development of energy resources; consideration of international law and organization as a means of protecting the ozone layer and preventing global warming; and analysis of the consequences of population growth.

516 The Idea of Law

Universal and crucial as is the idea of "law," the concept can mean different things in different contexts and applications. For example, is the term used the same way in the natural and social sciences? How does "natural" law differ from "positive" law? While literature does enlarge our understanding of law in these several senses, how do letters, as well as the other arts, themselves reflect their own "rules"? And do new theories of literary criticism along with chaos theory, so current, challenge older assumptions of order and meaning?

518 Intellectual Revolutions of the Turn of the Century

At the beginning of the new century, it is illuminating to look back at the intellectual revolutions associated with the turn of the previous century, which shaped so much of the culture of our time. In the unsettled years around 1900 new aesthetic visions emerged in the arts, while intellectuals and scientists developed radically new ways of thinking about the natural and social worlds and about human nature. These amounted to a series of profound intellectual revolutions that worked their way down into the general consciousness in the years after World War I. Against the background of fin de siècle intellectual malaise, we will examine the contributions of major thinkers who have had decisive influence on our worldview, including Freud, Einstein, social thinkers, and avant garde artists and writers who helped create the new sensibility of modernism.

520 The Mind and the Brain

The brain has been called an amazing "enchanted loom." Can our knowledge of the physical brain help us understand our thinking selves, our emotions, and other mental processes, and, conversely, can a good understanding of the human mind (rational, spiritual, and creative) illuminate our study of that physiological brain? How do personality and intellect develop over one's life? How does the brain develop, and how might this marvelous organ of consciousness have evolved? Will its capabilities ever be duplicated by computers? Do we have inborn "social instincts"?

522 The Eighteenth Century: Emergence of a New World View

The Scientific Revolution of the seventeenth century transformed the intellectual climate of European civilization. In the century that followed, many argued that the rational methods

of natural science could be applied to philosophy, religion, politics, aesthetics, and society. The impulse to Enlightenment was challenged by a generation of writers and satirists who, while often introducing new styles of poetry and prose, defended traditional humanistic values. From this tension between old and new, continuity and change, emerged a modern world view. This seminar will explore eighteenth-century culture in a variety of its manifestations, including science, literature, the arts, religion, and politics.

524 Ways of Knowing

We know many different things but we also know in many different ways. The poet and the biologist know nature in distinctive manners. What is the basis for scientific knowledge? How can we know the past? What kinds of knowledge are the province of literature and the arts? The seminar will explore several of the ways in which we know, concentrating on the scientific, the historical, and the literary.

530 War and Peace: Conflict and Human Nature

The seminar will provide insights into our complex attitudes toward war and peace as we consider such topics as heroic warfare in the Classical Age; patriotism and the warrior king; World War I in literature, history, and film; gender and war; genocide; the "banality of evil"; the contemporary "humor of despair"; and theories of conflict resolution.

532 Sex and Gender in Nature and Society

An interdisciplinary exploration of sex and gender, with emphasis on the perspectives of biology, history, literature, and the other arts. We will examine the biological bases for differences between males and females and how evolution shapes sex roles in animal societies. While science can tell us about sex, gender is a socially and culturally constructed category. We will consider the social and cultural differences between males and females and how gender and sex affect the social roles of men and women. How, if at all, have gender roles changed in the process of historical development? How does culture construct gender and in what ways can literature and art illuminate aspects of gender?

536 Meetings: East and West

Encounters between cultures play a significant role in world affairs. This course explores the complex and evolving inter-relationships among

East Asian cultures and Western societies. It focuses on how both Eastern and Western traditions and discourses encounter, resist, assimilate, and transform each other in unpredictable ways. The course will be strongly interdisciplinary and involve history, politics, art, philosophy, film, literature, and music.

538 Ethics and Life

Selected topics deal with the ethical dimension of human activities, institutions, and traditions. Topic for Fall 2005: International Relations. Considerations of the intersection between ethics and U.S. foreign policy, examining tensions and harmony between universal values and national interest. Examination of the extent ethics does, can, or should inform decisions about the U.S. role in international affairs.

540 Cinema and Society

Cinema exerts a powerful influence on society: It not only reflects and comments on social concerns but may actually create them. Through careful analysis of films—classic as well as recent—and related texts, the seminar will explore varying representations of such themes as nation, gender, class, and race from literary, socio-scientific, and artistic perspectives.

542 Images of Human Nature

Our understandings of ourselves—what we are and perhaps what we wish to be—are defined, consciously or unconsciously, by particular images of human nature. Such images and perspectives are themselves shaped by a range of influences from long-time cultural traditions to new ways of thinking created by intellectual "revolutions." Among the various models or definitions of human nature to be examined are the heroic, the mechanistic, the animalistic, and the irrational.

544 Building Chicago

Chicago's story can be traced by examining the unique relationship between its people and the city they built. In 1820, the site contained a fort, a few dwellings, a handful of people, and limited prospects. By 1900, Chicago was the home of the skyscraper and headquarters for many of the nation's largest businesses, with a population close to 2 million at the vital center of the continent. At the beginning of the twenty-first century, the Chicagoland area covers nearly 10,000 square miles, with a population close to 8 million and commercial interests that reach around the globe. By "reconstructing" Chicago and examining its unique architectural achieve-

ments, how the city expanded, and why it looks the way it does, the texture of the city's history and culture is revealed.

546 Religion: An Interdisciplinary Approach

Religion has been a cultural universal in the past, and remains a constant in our current societies. Some of the questions that this cross-disciplinary seminar aims to explore are as follows: What is religious experience? How does it interact with other facets of our psychological, sociological, economic, and cultural life? What was its role in traditional societies? What is its future? We shall look at religion from the perspectives of theologians, philosophers, psychologists, and social scientists.

548 Romanticism: Self and Society

The Romantic era (ca. 1780-1830) is often considered to be a period of revolution, not only in the realm of politics, but also in the realms of literature, music, the visual arts, and the sciences. This seminar examines the evolving relation of self and society through five of the most dramatic decades of modern European and American history. Discussions will include works by such luminaries as Goethe, Rousseau, Blake, Schiller, Byron, Emerson, and Mary Shelley as well as excursions into the fields of music, painting, and science.

550 Latin America: Economies and Cultures

An interdisciplinary study of the historical development of Latin American societies, highlighting the magisterial artistic achievements of Latin American writers and film directors and focusing on the links between economic change (e.g., modernization), socio-political events (e.g., dictatorship and democracy), and artistic production. Part of the focus will also be on economic issues directly bearing on literature and cinema, such as the economic crisis of the 1980s and the market reforms of the 1990s. Literary texts and films will be treated as complex aesthetic objects whose language does not merely photograph socio-historical reality, but transfigures it.

Admission

See under Admissions for information regarding admission to the Graduate Program.

Graduate Tuition and Expenses;**Tuition Grants**

Application Fee \$20.00

Tuition per Course \$1,700.00

Teacher Tuition for full-time elementary and high school teachers \$1,100.00

Refund Policy

When students withdraw from the M/LS seminar, refunds will be made according to the following schedule (less a \$100 nonrefundable fee).

Seminar Meetings Completed	Refund
1	90%
2	80%
3	70%
4	60%
5	50%
6	40%
7 or more	0%

When students withdraw from elective courses, refunds follow the prorated schedule for regular undergraduate courses. (See Undergraduate Tuition and Expenses.) All undergraduate courses are regarded as beginning on the first day of the term, and the amount refunded diminishes by 10% every week.

All financial policies detailed under Undergraduate Tuition and Expenses apply to the Graduate Program in Liberal Studies.

AFRICAN AMERICAN STUDIES

2005-2006 Committee Members:

Associate Professor of English Judy M. Dozier, Chair

Lecturer in English Tracy McCabe

Associated Faculty:

Professor of Politics Paul B. Fischer

Professor of History Steven J. Ross

Professor of Politics Gbada H. Talbami

Associate Professor of Politics Paul Orogun

Associate Professor of African American Studies and Communications Mark B. White

Lecturer in History Catherine S. Weidner

This interdisciplinary minor, undertaken in conjunction with a regular major, allows students to study the national and international aspects of African American experiences. In addition to the traditional disciplines of literature, history, music, and politics, the focus of this minor may also include the areas of biology, communications, economics, philosophy, psychology, or sociology.

The African American Studies minor provides important insights for students planning a career in communications, education, international studies, law, journalism, business, social work, and politics. In addition, this course of study offers the intellectual preparation for those planning to continue their education on the graduate level.

AFRICAN AMERICAN STUDIES MINOR

(No major is currently available.)

Minor Requirements:

African American Studies 110

Introduction to African American Studies

African American Studies 216

African American Literature I

Three electives selected from courses listed in the program

Independent Research Project to be approved by the African American Studies Committee or Afam 420 Senior Seminar

110 Introduction to African American Studies

This course provides an overview of African American history and culture. Topics include major events, persons, and issues spanning the period from the African heritage to contemporary times. Students survey the evolution of African American expressive culture in music, literature, film, art, and dance. The course includes lectures, discussions, and video presentations. (Meets GEC Cultural Diversity Requirement.)

216 African American Literature I

(Cross-listed as English 216. Meets GEC Cultural Diversity Requirement.)

Minor

Communications 280
(African American Communication)

English 217
(African American Literature II)

English 218
(Blues Women in African American Literature)

English 310
(Introduction to the African Novel in English)

English 325
(Black Literature of the 1960s)

English 351
(Junior Colloquium. Content varies depending on topic. Fulfills minor only when topic emphasizes African American experiences.)

French 401
(Special Studies: The Role of Women in African Literature of French Expression)

History 250
(The American Civil War)

History 254
(African American History)

History 255
(African American Autobiography)

History 256
(Race and Racism in America)

History 361
(Advanced Topics in African American History)

Music 110
(Jazz Ensemble)

Music 219
(African American Music)

Music 227
(History of Jazz)

Politics 212
(Politics of the Third World)

Politics 214
(The Politics of South Africa)

Politics 217
(African Politics)

Politics 223
(Urban and Suburban Politics)

Politics 318
(Topics in Comparative Politics: Women in the Third World)

Politics 328
(Topics in American Politics: Race)

Psychology 205
(Stereotypes, Prejudice, and Discrimination)

Sociology and Anthropology 361
(Cultural Anthropology)

Theater 336
(African American Theater)

AMERICAN STUDIES

2005-2006 Committee Members

Professor of Politics Paul B. Fischer

Professor of Religion Ronald H. Miller

Associate Professor of Music Donald C. Meyer

Lecturer in English Bernice E. Gallagher, Chair

Associated Faculty:

Associate Professor of English Benjamin Goluboff

American Studies, the oldest interdisciplinary major in American higher education, examines the relations among institutions, ideas, and the artistic imagination within the American experience. The student acquires a command of the history, literature, and political institutions of the United States and chooses, according to interest, additional studies among the allied fields of art, music, philosophy, religion, sociology, and economics. The aim of the program is not merely for the student to collect course offerings related to the United States from various departments, but to be able to synthesize the American experience through multiple methods of inquiry.

MAJOR REQUIREMENTS

The major consists of the following 12 courses:

At least one American Studies 200 (topics vary).

One course in American politics.

One course in American history.

One course in American literature.

One course in American art or music.

One additional course at the 300-level in American history, American literature, American politics, American art, or American music.

American Studies 480:

Senior Seminar (topics vary).

Five other courses, selected with advisor approval and emphasizing American Studies, including independent studies and senior theses when appropriate.

Two courses toward the major must deal with issues and materials related to African American studies.

MINOR REQUIREMENTS

The minor consists of the following seven-course sequence:

American Studies 200 (topics vary).

Two courses in American history; one must be at the 300 level.

Two courses in American literature; one must be at the 300 level.

Two other courses in American subjects at the 200 level or above, selected from American Studies, art, economics, English, history, music, philosophy, politics, religion, sociology and anthropology, or independent study.

One course toward the minor must deal with issues and materials related to African American studies.

200 Topics in American Studies

Topics vary from year to year.

480 Senior Seminar in American Studies

Topics vary from year to year.

225 and 480 The American Writer as Religious Thinker (Spring 2006)

This course examines nineteenth and twentieth century literature that articulates the experience of American Catholics, Jews, and Protestants. Topics for research and discussion will include religion and American identity, religious pluralism in American culture, and the influence of American religious history on a tradition of writers from Emily Dickinson to Thomas Merton.

PREVIOUS AMERICAN STUDIES COURSE TOPICS

American Families

This course is an interdisciplinary examination of American families, premised on the idea that families, as constituted in the United States, have been significantly different from those of other cultures. To a large extent, this is due to the great variety of family forms found throughout American history, and continuing well into the 21st century. Factors such as immigration, slavery, westward expansion, the subjugation of Native Americans, the fluidity of gender roles, economic instability, and the increasing protection of individual liberty have contributed to how a

family, as an institution of care, can be constituted in a number of ways beyond the biological, nuclear family. (American Studies 224 meets GEC Cultural Diversity Requirement.)

The American Avant-Garde: 1960-80

This course surveys the aesthetic progression of these tumultuous decades in terms of cultural production that was situated outside of the "mainstream." Combining perspectives from the worlds of art, music, and literature with the social history of the times, this seminar offers new insights into the place of the counterculture artist in American society. Topics include but are not be limited to underground publishing/graphics, jazz, Pop Art, the Black Arts movement, feminist art and literature, and the arts associated with resistance to the Vietnam War. (American Studies 223 meets GEC Cultural Diversity Requirement.)

America in the 1930s

This course is an interdisciplinary exploration of American culture and society in the 1930s. Among the topics discussed are political radicalism, federal arts projects, literary movements such as naturalism and modernism, popular culture, labor organizing, and period journals such as *The Partisan Review* and *The New Masses*.

America in the 1960s

This senior seminar is an examination of a critical period in American history from the multidisciplinary approach of American Studies, using such diverse materials as novels, poetry, biographies, art, music, and descriptions of social, political, and economic conditions. The principal topics covered will be the Civil Rights Movement, the Vietnam War, the counterculture, and the War on Poverty.

Building Chicago: Architecture and a City's Growth

No single approach can possibly encompass the immense scope or complex diversity that has marked the development of Chicago as an urban metropolis. It becomes feasible to reconstruct the story of the city, its different stages of growth and myriad of historical, political, literary, and economic influences. We do so by focusing on the city as a construct and using its architecture as a visible means to launch an examination of the various components of Chicago's constantly shifting profile.

Race and Racism in America

This course examines race and racism as subjects of controversy in American history from the interdisciplinary perspective of American Studies. How did the experience of slavery shape

American attitudes toward race? What was the legacy of slavery in the post-emancipation years? How have our political and judicial systems dealt with race and racism?

Realism and Modernism

This interdisciplinary course explores the traditions of realism and modernism in American literary and visual arts between 1865 and 1939. We examine, in their historical and cultural contexts, representations of American life in fiction, poetry, painting, photography, popular prints, and architecture. Methods of literary analysis and art history encourage students to think critically about the various capacities of texts, images, and the built environment to give focus to changing perceptions of modernity in America.

AREA STUDIES

2005-2006 Committee Members:

Professor of Politics Ghada H. Talbami

Associate Professor of History Carol Gayle, Chair

Associated Faculty:

Professor of French Cynthia T. Hahn

Professor of History David Spadafora

Professor of Politics W. Rand Smith

Associate Professor of German C. Richard Fisher

Associate Professor of Politics Paul Orogun

The Area Studies major offers the opportunity for close study of a region or country outside the United States—for example, Africa, Central Europe, the Middle East, or Russia and the countries of the former Soviet Union. The interdisciplinary approach allows the student to achieve a rich understanding of a society by study of its history, politics, economy, and culture. Students are attracted to the major by intellectual curiosity about other nations and cultures as well as by vocational interests such as careers in the foreign service, overseas business, international organizations, teaching, and governmental or paragonovernmental agencies concerned with ecology, health, population, or foreign trade.

AREA STUDIES MAJOR

Because of the wide range of possible concentrations within the major, each student works out an individual study plan in consultation with an Area Studies advisor. The study plan must include examination of the following aspects of the chosen area: history, social structure and social dynamics, economy, political system, and culture. Where instruction in the language appropriate to the area is offered on campus, proficiency in that language is required. Each major is required either to write a senior thesis or to complete an approved program of study abroad in the region of specialization. All concentrations within the major require a minimum of 11 course credits, and some require more. Some of these credits may be independent study (tutorials and research projects, including the senior thesis) or may be language courses at the intermediate level or above (beginning with

third-semester college-level courses). Study-abroad opportunities include Lake Forest College foreign programs and programs of the Associated Colleges of the Midwest as well as other approved programs. Students are encouraged to consult with members of the Area Studies Committee regarding appropriate study plans, courses, and foreign programs.

Examples of possible Area Studies concentrations:

African Studies

Combines courses in politics, economics, history, literature, sociology and anthropology, and religion.

European Studies

Combines work in a language (e.g., French, German, Spanish) with courses in history, politics, literature, art, economics, and philosophy.

Middle Eastern Studies

Combines courses in politics, economics, and religion with work in history and sociology and anthropology.

Russian and East European Studies

Combines courses in history, politics, economics, religion, and literature.

AREA STUDIES MINOR

An Area Studies minor requires the same range of courses covering a country or region as for the major, minus the thesis and foreign language requirements. A minor must include at least six courses on the history, social structure, economy, political system, and culture of the chosen area of study, such as Africa, the Middle East, or Western Europe. These six courses, as in the case of the major, may be taken as tutorials or programs of study abroad, but at least one course must be at the 300 level or above. The courses are to be chosen in consultation with members of the Area Studies Committee.

Professor Christopher Reed, Chair
Nineteenth- and Twentieth-Century Art History.

Professor Ann M. Roberts, Acting Chair
2005-2006
Ancient, Medieval, and Renaissance Art History

Associate Professor Karen Lebergott
Painting, Drawing.

Lecturer Cheryl Bachand
Architectural History

Lecturer Kate Biderbost
Ceramics

Lecturer Rebecca Goldberg
Art History

Lecturer Arthur Lazar
Photography.

Lecturer Martina Nebrling
Painting, Drawing.

Lecturer Michael Vari
Visual Communication.

The mission of the art department is to lead students to deeper awareness of the role of the visual arts in culture, both historically and today. Through courses in both art-making and art history, our curriculum fosters skills in critical reading and analysis, in the interpretation of and communication with visual forms, and in the clear expression of ideas through a variety of visual and verbal media. The art history classes investigate the art forms of diverse historical eras and topics, while the studio art classes encourage the thoughtful use of a broad range of techniques to express complex ideas.

Because the visual has been and remains such a central realm of human communication and self-expression, the study of art is an important component of the liberal arts education. Whether in the making of art or in the interpretation of the visual arts, the study of art has much in common with other humanistic disciplines. Art history is, at its core, a branch of history and shares the concerns and methodologies of that discipline, yet it also shares many of the concerns of literary studies in that it often focuses on the self-consciously creative manipulation of themes, symbols, and narrative. Studio art finds its closest parallels in writing courses, for both aim to develop students' creative faculties in relation to the history of the discipline. At the same time, the physical, material qualities of art bring its study and creation close to the procedures in the physical sciences, where knowledge is formed through experimentation with physical materials. This experimental quality in the making and study of art links it to the study of philosophy; indeed, art can be seen as the application of the theories of aesthetics that are the concern of many philosophers. Recognizing the fundamentally interdisciplinary nature of the study of art, the art department welcomes students from across the College to its courses and encourages its own students in interdisciplinary study.

ART MAJOR

Students may major in the department in one of two ways. They may major in art history by taking courses in that area with a minimum of two required courses in studio art, or they may choose to major in studio art, which equally entails the study of art history. The two possible tracks are designated art history and studio art.

Freshmen considering a major in art should sign up for either Art 110 or Art 130, as these are both entry-level courses required of all art majors. Art 130 is a prerequisite for all other studio art courses in the department, except for Art 131 and Art 132. Many upper level Art History courses have no prerequisites in order to allow majors from other departments to explore areas of particular interest. Majors in the department are advised to take Art 110 early in their programs, as this course offers conceptual and practical background for later courses.

Art History Track

A minimum of nine credits is required. Art 110 is the first course that students choosing the art history track should take. This course provides a general framework for study of the discipline of art history. It is required for majors. To gain exposure to the processes of visual thinking, students in the art history track must take at least two studio art courses, Art 130 and Art 131.

Courses numbered in the 200 range are usually period surveys, which do not carry prerequisites. These courses cover major periods of Western art history and also offer introductory coverage of non-Western cultures. Art history majors must pass at least three courses from this group.

Courses in the 300 range are more intensive studies of individual problems or topics; majors must pass at least one course at this level.

Art history majors planning to go on to graduate study are advised to acquire a reading knowledge of at least one foreign language, preferably French or German.

Art History majors will fulfill the Senior Studies requirement by taking Art 485. Exceptional students may also undertake a senior thesis in Art History, Art 494, directed by a member of the faculty.

Studio Art Track

A minimum of nine credits is required. Art 130 is the recommended first course for students choosing the studio art track; it is a requirement for studio art majors. Studio art majors also take Art 131 and three more studio art courses. Studio majors must also take Art 110 and two other art history courses, of which one must be either Art 218 or Art 360.

Studio majors will fulfill the Senior Studies requirement by taking Art 481. Exceptional students may also undertake a senior project in art, Art 492, directed by a member of the faculty.

ART MINOR

As with the major, the art department offers a minor in two tracks. The minor requires six courses. The art history minor requires Art 110, 130, one more studio art course, and three other art history courses; the studio minor requires Art 110, Art 130, one additional art history course, and three more studio art courses.

110 Introduction to the Visual Arts

This course introduces students to the subjects of art history and the questions and methods used in the discipline; the course considers basic issues, such as how one sees and interprets a work of art, but also explores how art is defined and how it works in culture. A principal aim of the course is to give students the opportunity to analyze and write about works of art. This is the recommended first course in art history and is required of majors.

112 Introduction to Visual Communication

This course examines forms of visual communication outside the traditional fine arts of painting and sculpture. It will concentrate primarily on the history and theory of graphic design, advertising, and propaganda, with consideration of both static and moving images.

130 Studio Art: Elements of Design

Introduction to basic design problems in various two- and three-dimensional techniques and media. A prerequisite for most other courses in studio art.

131 Studio Art: Drawing

This introductory course exposes the student to a variety of drawing tools and techniques. The course focuses on the development of observational skill and on hand-eye coordination. Students learn the basics of value, line, and composition. The course stresses the development of a visual vocabulary and critical skills to express ideas in extended drawings. All drawing will be done through observation of the real three-dimensional world. Emphasis will be on developing a drawing. Students will participate in group critiques and will be exposed to ideas and techniques through slide lectures.

132 Studio Art: Creative Photography

An introductory course in the techniques and aesthetics of photography, dealing with the fundamentals of camera and darkroom procedures and study of the expressive possibilities of the medium. (Not open to students who have taken Art 232.)

202 Greece in the Bronze Age

See Program in Greece and Turkey under Undergraduate Curriculum for course description. Offered only in Greece and Turkey. (Cross-listed as Classical Studies 202, Greek Civilizations 202, and Sociology and Anthropology 202. Meets GEC Cultural Diversity Requirement.)

203 Greece in the Classical-Roman Ages

See Program in Greece and Turkey under Undergraduate Curriculum for course description. Offered only in Greece and Turkey. (Cross-listed as Classical Studies 203, Greek Civilizations 203, and Sociology and Anthropology 203. Meets GEC Cultural Diversity Requirement.)

204 Greece in the Byzantine-Medieval Ages

See Program in Greece and Turkey under Undergraduate Curriculum for course description. Offered only in Greece and Turkey. (Cross-listed as Classical Studies 204, Greek Civilizations 204, and Sociology and Anthropology 204. Meets GEC Cultural Diversity Requirement.)

205 Japanese Art and Culture

The course focuses on the history of Japanese art from neolithic to modern times, with emphasis on the art forms of the major periods and their relationship to social, political, and religious developments. (Cross-listed as Asian Studies 205. Meets GEC Cultural Diversity Requirement.)

206 Chinese Art and Culture

This course examines the history of Chinese art from the Bronze Age to the present with emphasis on the major art forms and their relationship to contemporary social, political, and religious development. (Cross-listed as Asian Studies 206. Meets GEC Cultural Diversity Requirement.)

210 Ancient Art

Painting, sculpture, and architecture of ancient civilizations of Egypt, Mesopotamia, Greece, and Rome.

211 Medieval Art and Architecture

A survey of European art from the era of Constantine (ca. 400) through the Gothic period, about 1300.

212 Italian Renaissance Art

An introduction to Italian art from the late Gothic period until the Reformation, ca. 1300 to 1600.

215 European Art, 1600-1750

An introduction to European art during the seventeenth and eighteenth centuries.

217 Nineteenth-Century Art

Introduction to art and architecture in Europe and America from the neoclassicism associated

with the French and American revolutions to the Impressionist and Post-Impressionist avant-gardes. Course readings emphasize the relationship of art to other social movements. Students tie classroom study to the collections of area museums.

218 Twentieth-Century Art

Introduction to European and American art from Post-Impressionism to Postmodernism. Course readings reveal competing constructions of this history that is still in the making. Students tie classroom study to the collections of area museums.

219 American Art

The visual arts in North America, covering painting, sculpture, architecture, and the applied domestic arts, from the Colonial period to the present.

220 History of Architecture

Evolution of architectural style and thought from antiquity to the present.

221 Modern Architecture

This class examines the history of architecture from the late nineteenth century to the late twentieth century. Students will be introduced to architectural terminology and techniques for analyzing architecture. They will also study the major trends in architectural design in the twentieth century, the issues faced by architects, and the social and functional problems that architecture is designed to solve.

223 Northern Renaissance Art

Arts of the Netherlands, France, Germany, and Spain from ca. 1350 to ca. 1550.

224 The History of Prints

The graphic arts of the Western tradition, from about 1400 to the twentieth century.

225 History of Architecture in the American Landscape

Using the metropolitan landscape of Chicago, this course seeks to engage students with the design problems and cultural implications of planning, patronage, style, and technology that have characterized American architecture and the profession of architect from the seventeenth century to the present. Prerequisite: Art 110 or permission of the instructor.

226 Colonial Latin American Art

This course will consider the arts of Central and South America from the conquest to independence (ca. 1500-1850) and will explore the intersections among art, culture, and power in the specific conditions of Colonial Latin America. (Cross-listed as Latin American Studies 226. Meets GEC Cultural Diversity Requirement)

227 Theater History IV: Circus to Performance Art

(Cross-listed as English 233 and Theater 233.)

230 Studio Art: Painting

This course is designed for the beginning student in oil painting. The emphasis in this course is on the description and analysis of the world around us. Students will learn the basics of color theory, color mixing, how to prepare and stretch a canvas, how to use and mix paint, and different techniques for various effects using brushes, rags, and palette knives. Emphasis will be on value and depth and their relationship to color. Students must have experience in drawing with value. Students will participate in group critiques and will be exposed to ideas and techniques through slide lectures. Prerequisite: Art 131.

231 Studio Art: Figure Drawing

This course is designed to give advanced students an opportunity to develop their ability to draw and interpret the human form. Working from the model, students will explore a variety of techniques including gesture drawing, studies of volume and mass, and contour and cross-contour drawing. Prerequisite: Art 131 or permission of the instructor.

232 Studio Art: Photography

Intended for majors and students with background in design, this course introduces the aesthetics and techniques specific to photography, including fundamentals of camera and darkroom procedure and the study of the expressive possibilities of the medium. Prerequisite: Art 130 (not open to students who have taken Art 132).

233 Studio Art: Sculpture

This course explores the nature of sculptural space in contemporary society. Using materials such as clay, plaster, wood, and found materials, students will consider the formal and expressive possibilities of three-dimensional forms and their relationship to the spaces in which they are installed. Prerequisite: Art 130.

234 Studio Art: Landscape Painting (Offered Less Frequently)

An outdoor, landscape/nature course involving the student in the observation of nature, transcribed through perceptual data, and resulting in painting and drawing. Prerequisite: Art 131 or consent of instructor.

236 Studio Art: Ceramics I

This course offers an introduction to ceramic art, including wheel-work, hand-building, and glazing, on a college level. In addition to developing practical skills in ceramics, students will explore the history of the medium and the relationship of concept to visual form. Because this course is sited near the campus, students scheduling their courses must allow time between classes for transport. Cost of materials is not included in tuition; it will be billed upon enrollment and is not refundable. Prerequisite: Art 130.

237 Performance Art

(Cross-listed as Theater 224.)

242 Introduction to Computer Imaging

This course will survey and explore the basic concepts of two-dimensional image making in the electronic realm. Applications used include Adobe Photoshop, Adobe Illustrator, and QuarkXpress. An important theme will be the use of computer technology to generate visual points of view and to use this technology to express precise thoughts through image and text. Prerequisite: Art 130 and computer literacy.

315 Japonisme/Occidentalism

"Japonisme" is the term given by the French to the fashion for Japanese aesthetics in the West following the opening of Japan to trade with Europe in the 1860s; "Occidentalism" signifies the reciprocal fascination of Japanese artists and writers for Western art and literature. This course examines the interaction between these phenomena from the 1860s to the 1960s. (Cross-listed as Asian Studies 315. Meets GEC Cultural Diversity Requirement.)

320 Landscape and Representation

This course explores the many moments in human history when landscape is a subject for representation. Drawing from a wide range of chronological periods and cultures, the course will examine how the natural environment is depicted, for which audiences it is depicted, the artistic strategies by which landscapes are achieved, and the many meanings and associations that accompany the production of land-

scape imagery. Prerequisite: one art history course or permission of the instructor. (Cross-listed as Environmental Studies 320.)

322 Site, Sight, Insight

This course will explore the concept of the natural in the history of art and in contemporary art making. Students in the course will look at a variety of sites and analyze both verbal and visual responses to them. Topics will include landscape painting, earth art, urban design, landscape architecture, Native American land use, and many other issues having to do with landscape and human interactions with nature. The class will combine art making with evaluating texts and writing about the natural world. Short field trips to local sites and a long field trip over mid-semester break to the Southwest required. Prerequisite: one art course.

325 Women, Art, and Society

This course considers the contributions of women artists to the Western tradition of art making and examines the way art in the Western world has used the figure of woman to carry meaning and express notions of femininity in different periods. Prerequisite: one art history course. (Cross-listed as Women's and Gender Studies 325. Meets GEC Cultural Diversity Requirement.)

326 Gender, Identity, and Modern Art

From the Victorian Age to the current day, communities of artists and critics have defined themselves in opposition to the dominant norms of maleness and heterosexuality. This course examines two identities invented by the Victorians—"feminist" and "homosexual"—and traces their development in and influence on the visual arts. Prerequisite: one art history course. (Cross-listed as Women's and Gender Studies 326. Meets GEC Cultural Diversity Requirement.)

330 Studio Art: Painting

Advanced work in painted media. Prerequisite: Art 230.

331 Studio Art: Drawing

Advanced work in the media of drawing. Prerequisite: Art 231.

332 Studio Art: Advanced Photography

Advanced work with camera and darkroom. Prerequisite: Art 130 and Art 132 or 232 or permission of the instructor.

333 Studio Art: Sculpture

Advanced work in sculptural media. Prerequisite: Art 233.

335 Mixed Media/Materials and Techniques

This class will focus on the interaction of various media and their application in both two and three dimensions. The class will emphasize a variety of materials and techniques; students will use collage and various other techniques such as monoprinting, transfer techniques, and work with found objects. Emphasis will be on unorthodox methods. Students will work with a variety of materials while developing ideas and exploring visual methods to create formally and conceptually coherent works of art. Critiques and slide lectures will be included. Prerequisite: Art 131.

342 Advanced Computer Imaging

This course explores the computer as a tool to enhance the image-making process. While Art 341 focuses on issues of construction and representation in two-dimensional image manipulation, this course will allow students who are interested in a wide range of media to learn new approaches to art-making using time-based media. Utilizing applications such as Dreamweaver and Final Cut Pro, the class will consider the ways artists can manipulate images and craft projects in video and web formats. Students will design and produce videos that will be burned onto tape or DVD as well as active Web sites. Prerequisite: Art 242 and one other studio course.

343 Digital Media: Video, Photography, and Sound

This class will explore an array of approaches to making videos. Students in this class will be trained in the use of the video camera, and, using Final Cut Pro editing software, will make video narratives and constructions using multi-media as well as camera sources. They will use digital technology to combine video, still images, and sound into time-based artwork. They will scrutinize the relationship between imagery, music, and sound as illustrated in selected examples from video and film history, and investigate the potential for expression inherent in this relationship. They will survey the difference between documentary and fictional film and video, and navigate the expressive potential of both in their individual productions.

349 The Lake Forest College Campus as Cultural Landscape

The look of the Lake Forest College campus offers a case study in the relationship between the history of architecture and the history of higher education in the United States. This course will begin by examining our College's campus in relationship to other institutions of higher education, and culminate in the production of a guidebook to the campus appropriate for visitors and tours. (Cross-listed as History 349.)

350 Museum/Gallery Practicum

This course combines study of the history and theory of art exhibition with field trips to Chicago-area museums and galleries, and culminates with the practical experience of planning and installing an exhibition in the Sonnenschein Gallery. Prerequisite: Art 110.

360 Contemporary Art

Focuses on the art of the late twentieth century, from about 1950 until the present day, to trace the development of contemporary artistic movements and expression.

481 Senior Seminar in Studio Art

The aim of this course is to provide a "capstone" experience for students majoring in studio art. The course allows students to reflect on why one makes art and to develop their own conceptual basis for making art. The course will stress issues that confront the studio artist, including professional practices. Students will divide their time between off-campus visits to Chicago-area museums, galleries, and artists' studios and the classroom. Classroom work will focus on readings and discussions of art practices and issues confronting the contemporary artist as well as on making connections between visits to sites in Chicago and the readings. Students will devise artwork that reflects some of these concerns. Prerequisite: senior standing in the major or permission of the instructor.

485 Seminar: Means and Methods of Art Historians

In-depth consideration of special issues, fields, or topics with careful attention given to questions of methods of investigation and the reporting of research. An exploration of some of the principal methods used by art historians in their investigations of the visual arts including historiography, style and connoisseurship, iconography and iconology, social history, and other means of interpretation. Prerequisite: senior standing in the major or permission of the instructor.

490 Internship

492 Senior Project in Studio Art

A well-documented and well-executed senior project completed in the senior year may count as a senior thesis. (See Academic Regulations in the Student Handbook for details.) As with other theses, the final project will be reviewed by a thesis-examining committee consisting of three faculty, at least one from outside the Art Department. Students are encouraged to consult with members of this committee during the planning and execution of the project.

494 Senior Thesis in Art History

ASIAN STUDIES

2005-2006 Committee Members:

Professor of Art Christopher Reed, Chair (Spring)

Associate Professor of History Shiwei Chen, Chair (Fall)

Assistant Professor of Economics Ying Huang

Assistant Professor of Philosophy Rui Zhu

Lecturer in Religion Catherine Benton

The major in Asian Studies is designed so as to be both wide-ranging and focused on the geographical and topical area of your interest. The primary areas of focus, representative of the interests and fields of faculty, are the history, philosophy, politics, religion, sociology, anthropology, and the languages of China, Japan, and India. Work outside of these areas of concentration is also possible. The course of study for the major is individually tailored. It is therefore also a perfect double major for students considering careers in business, education, communications, international relations, and economics, as well as pursuing further studies at the graduate level.

The College's recent achievement of a Freeman Grant for Undergraduate Asian Studies Funding Initiative enabled the College to offer thirty different courses relating to Asian Studies. It also enabled the College to establish an Asia Center to organize various Asia Studies related activities on campus. Our Asian Studies faculty members serve as the advisors for the College's most active student club, the Asian Interest Group. Through Asian Studies faculty's professional connections, an academic network has been well established with the Chicago Council on Foreign Relations, the Chinese Consulate General in Chicago, University of Chicago, Northwestern University, Loyola University, and University of Illinois at Chicago.

Moreover, Asia Studies students are encouraged to study in Asia through a variety of study abroad programs. As a member of the Associated Colleges of the Midwest, Lake Forest College sends students to study abroad programs in India and Japan. The College also sponsors the Beijing Program of Asian Studies hosted at Peking University in Beijing, China, allowing students

to pursue study and internship opportunities in Beijing. Through our arrangements with other institutions, Asia Studies majors may also participate in a variety of study abroad programs throughout Asia. Successful completion of this program earns Lake Forest College credit, and all financial aid will apply.

ASIAN STUDIES MAJOR

The major requires nine courses, from the following, as well as the senior requirement (Senior Seminar, research project, or thesis).

Three Core Courses, to be chosen from the following list

One of: History 200 (Origins of East Asia) or History 201 (Modern East Asia)

One of: Sociology/Anthropology 212 (Introduction to Chinese Culture and Society) or 215 (Introduction to Japanese Thought and Society)

Religion 217 (Religions of Asia)

Philosophy 285/Religion 223 (Topics of Japanese Thought)

Two Language Courses

Two semesters of introductory Chinese/Japanese or other relevant Asian language. Note: students who plan to pursue Asian Studies at the graduate level are strongly encouraged to take their language studies through at least the intermediate level.

Four Elective Courses, to be chosen from the following list

(with at least one course at the 300-level or above)

Art 205 (Japanese Art and Culture)

Art 206 (Chinese Art and Culture)

Business 340 (Asian Business Culture and Trade Relations)

Economics 322 (Emerging Markets Analysis)

History 200/201 (Origins of East Asia/Modern East Asia) depending upon which is taken as core

History 282 (Modern China)

History 286 (Modern Japan)

History 288 (War & Revolution in Asia: China, Korea, Vietnam)

History 307 (Topics in East Asian History: China's Cultural Revolution)

History 309 (Problems in Modern Chinese History: Film and Reality)

History 310 (East Asia and the West)

Philosophy 110-4 (Introduction to Philosophy: Asian Thought)

Philosophy 275/Religion 223 (Topics in Japanese Thought)

Philosophy/Sociology/Anthropology/Women's and Gender Studies 282 (Visions of the Family: East and West)

Philosophy 305 (Comparative Philosophy: East and West)

Philosophy 410 (Major Philosophers) (when appropriate Asian content is included)

Philosophy 420 (Topics in Philosophy) (when appropriate Asian content is included)

Politics 212 (Politics of the Third World)

Politics 215 (Asian Politics)

Politics 318 (East Asian Political Economy in Comparative Perspective)

Psychology 195 (Cross-Cultural Psychology) (when appropriate Asian content is included)

Religion 217 (Religions of Asia)

Religion 222 (Asian Thought: Hindu and Islamic Traditions)

Religion 223/Philosophy 285 (Topics of Japanese Thought)

Religion 250 (Introduction to Islam)

Religion 276 (Female Religious Images in Asia)

Religion 278 (Introduction to Buddhism)

Religion 279 (Hinduism and Narrative)

Sociology/Anthropology 212 (Introduction to Chinese Culture and Society)

Sociology/Anthropology 215 (Introduction to Japanese Thought and Society)

Sociology/Anthropology 281 (Gender Issues in China and Taiwan)

Sociology/Anthropology 302 (Sexuality and Society)

Sociology/Anthropology 373 (Chinese and Japanese Religion in Practice)

Intermediate and advanced Asian language classes

Relevant study abroad course work (e.g. ACM India and Japan programs; Lake Forest College China program)

Courses that satisfy the elective requirement but are not listed here must be approved by the chair of the program in order to count toward the requirements of the major.

In addition to the nine required courses, majors will be required to complete either the Senior Seminar, a one-semester research project option, or a 1-2 credit senior thesis option, as described below.

Senior Requirement

Asian Studies 490: Senior Research Project
Independent research plus regular student-faculty discussions of that research. Open to senior majors and others with permission of the chair.

Asian Studies 491: Senior Thesis
Senior thesis for 1-2 credits. Open to senior majors.

Senior Seminar

ASIAN STUDIES MINOR

The minor requires six courses from the Asian Studies Curriculum listed above under the major requirements. These six must include two core courses and one course or independent project at the 300 level or above.

274 Topics in Asian Studies: Global Engagement in Contemporary China

This course aims to help students develop their comprehension of East Asian civilization as a form of inquiry and understanding of the complexity of human affairs by focusing on contemporary China. It will provide students with in-depth exposure to Chinese culture, language, history, religion, society, and economy through a combination of classroom instruction and field experience in the destination country. Students who take this course will be required to complete a prerequisite study on campus during the spring semester, which prepares them for their on-site experience. A three-week trip to China will take place after the spring commencement exercise in early May. The College's Freeman Grant for East Asia Studies will provide students with

financial aid to cover the major costs related with the trip to China. Students benefit not only from studying the concept of curricular cultural diversity on campus, but also from the opportunity to examine historical and archaeological sites first-hand. They will also study the latest development of China's economic reform, thereby deepening their knowledge of a multiplicity of different culture and political systems. The course is most suitable for those who are seriously interested in Asian Studies, East Asian languages, and international relations. Students intending to enroll in this course should consult with the course instructor before registration. (Cross-listed as History 274 and Philosophy 274. Meets GEC Cultural Diversity Requirement.)

315 Japonisme/Occidentalism
(Cross-listed as Art 315.)

490 Senior Research Project

Independent research plus regular discussions of that research in meetings of students and faculty. (Students registering for a research project over two semesters would register for regular research project credit in the semester without the colloquium.) Open to senior majors and others with permission of the chair.

491 Senior Thesis and Colloquium

Senior thesis project plus regular discussions of that research in meetings of students and faculty. (Students writing a thesis over two semesters would register for regular thesis credit in the semester without the colloquium.) Open to senior majors.

BIOLOGY

Professor Douglas B. Light, Chair
Animal and Human Physiology. Cell Physiology. Neurophysiology.

Associate Professor Anne E. Houde
Behavior. Evolution. Ecology.

Associate Professor Karen E. Kirk
Molecular Genetics. Microbiology. Cell Biology.

Assistant Professor Shubbik DebBurman
Cell Biology. Molecular Biology. Neurobiology.

Assistant Professor Caleb E. Gordon
Ecology. Ornithology. Conservation Biology.

Assistant Professor Nicole Sleiter
Reproductive Biology/Neuroendocrinology.

Lecturer Ann B. Maine
Molecular Genetics. Cell Biology.

Lecturer Lynn C. Westley
Physiological Ecology of Plants.

Lecturer Raymond Wiggers
Physical Geography. Historical Geology.

Associate Professor Emeritus Kenneth L. Weik
Botany. Freshwater Ecology. Marine Biology. Electron Microscopy.

Laboratory Supervisor Beth Herbert

The Department of Biology offers a broad background in modern biology while encouraging in-depth study in specific areas. A foundation of core courses—organismal biology, a first-year biology seminar, ecology and evolution, and cellular and molecular biology—prepares our majors for advanced courses in these primary areas. Intermediate and advanced course work, including senior thesis research and senior seminars, encourages intensive study in specialized aspects of biology. Department faculty members use modern instrumentation and molecular methods in teaching and research. The active laboratory and field research programs of the faculty involve students as collaborators and positively influence the quality of instruction. The rigorous training in modern biology offered by the department is excellent preparation for postgraduate studies at medical, dental, and veterinary colleges and for graduate programs in the biological sciences.

Beginning with the core courses, the department faculty members encourage independent learning by providing interactive classroom and laboratory experiences in an innovative curriculum. Student independence in learning is fostered by encouraging careful and critical reading of textbooks and journal articles, followed by discussion, debate, lectures, and analytical problem solving. Laboratory experiences are project-based and involve modern laboratory methods.

Biology majors are invited to become involved in research early in their undergraduate careers, beginning with investigative laboratories in the core courses. Advanced students are encouraged to participate in summer and academic-year research with faculty mentors, which often leads to student coauthorship of articles published in international scientific journals. Summer research opportunities are also available for Richter Apprentice Scholars and advanced students. Student-faculty research is presently supported by funds from the College and grants from the National Science Foundation and National Institutes of Health.

BIOLOGY MAJOR

The minimum requirements for a major in biology are eight biology courses, two semesters of general chemistry, one semester of mathematics, and a minimum cumulative grade average of C in those courses counted toward the major. Details follow.

Four core courses in biology, normally taken in the following order:

Biology 120: Organismal Biology

One of the Biology Core Seminars
(Biology 130-136)

Biology 220: Ecology and Evolution

Biology 221: Cellular and Molecular Biology

Students with AP, transfer, or other credit should consult their advisors about the appropriate sequence of core courses.

Three 300-level courses in biology from at least two of the three subject areas: cellular and molecular biology (320, 322, 324, 340, 346, 352), organismal biology (340, 342, 346, 347, 348,

384), and ecology and evolution (344, 370, 375, 380, 384, 389). Two of the three courses must include a laboratory component.

A senior studies course. For non-thesis students: either a senior seminar (topics change each semester) or Biology 492, Independent Research Colloquium. For students engaged in senior thesis research: one course credit of Biology 492, Independent Research Colloquium, and one course credit of Biology 494, Senior Thesis. Two semesters of general chemistry with laboratory (Chemistry 110, 111 or 120, 121) to be taken concurrently with the organismal biology core course (120) and a core seminar (130-136) and to be completed by the end of the sophomore year.

One course in mathematics; either Mathematics 110 or 150 is required and must be completed by the end of the sophomore year.

In courses to be counted toward the major (biology, chemistry, and mathematics), students must maintain a minimum cumulative grade average of C to qualify for a degree in biology.

Credit may also be earned toward the major by participating in the ACM field biology programs in Costa Rica and Tanzania and other approved off-campus programs.

Additional courses in organic chemistry, calculus or statistics, and physics are strongly recommended for biology majors, particularly for those who anticipate applying to medical and graduate schools.

Concentrations in the Major

Students interested in a concentration in cellular and molecular biology are encouraged to select the following courses in addition to the biology core: 320, 322, or 324; 340, 342, 346, or 352; plus an appropriate 400-level senior seminar, Biology 492 and/or a senior thesis research topic. Organic chemistry (Chemistry 220, 221), and biochemistry (Chemistry 300) are highly recommended.

Students interested in a concentration in ecology and evolution should select from the following courses in addition to the biology core: 340, 344, 370, 375, 380, 384, or 389, plus an appropriate 400-level senior seminar, Biology 492 and/or a senior thesis research topic.

MINOR

The biology minor consists of the following requirements: 120, a Biology Core Seminar (130-136), 220, 221, and two 300-level biology courses. Note that Chemistry 110 and 111 are corequisites for the Organismal Biology core course (120) and the Biology Core Seminars (130-136), respectively.

COURSES FOR NON-MAJORS

Courses in the series 100-109 and 209 are appropriate for all students and count toward the GEC in natural sciences. Students are urged to consult the latest online catalog for new titles. Not applicable toward the major or minor. Prerequisites: none.

102 People and the World of Plants

This course introduces students to the fascinating world of the botanical sciences, and to the long legacy of plant-human interaction. We will study traditional modes of herbal healing found in different cultures, explore the origins and development of world agriculture, and consider the effects of stimulant, depressive, and psychotropic plants on the human mind. Field trips to the Chicago Botanic Garden and local prairie and woodland restoration projects will be an important component of this course. (Meets GEC Cultural Diversity Requirement.)

103 Human Biology

This course examines the structure and function of many of the major organ systems of the human body. In so doing, it will introduce students to a range of important topics related to human beings. These will include the nature of science as a discipline, and the biological basis of health, disease, nutrition, exercise, sensation, and reproduction.

104 Human Genetics

An introduction to the inheritance of human characteristics. The nature of the genes, structure and function of chromosomes, developmental genetics, and the relationship between genes and human disease are discussed. Cloning, genetic engineering, and gene therapy are also covered. Three hours per week.

105 Public Health

Food poisoning outbreaks, strains of antibiotic-resistant bacteria, and the rise of infectious diseases including AIDS and TB have brought new awareness and the realization that public health is not just a concern of Third World countries. These and other topics including

environmental factors that influence health, vaccine schedules, and how antibiotics work will be covered. Lectures, discussion, and student group projects. Three hours per week.

106 Food

American culture is obsessed with food, but what do we really know about food? This course will explore multiple biological aspects of food. The course will begin with basic nutrition and then study diets, vitamins, and other supplements to determine if they really work. The biological, genetic, and environmental aspects of disorders such as obesity, anorexia, diabetes, heart disease, and cancer will be examined. The safety of food has become a greater concern in society due to genetic engineering, irradiation of food, use of pesticides, and food-borne illness such as "mad cow" and *E. coli*. These risks will be studied. The course will conclude with an exploration of the effects of meat- or grain-based diets on the environment.

108 Environmental Worldviews

An introduction to a range of topics in environmental biology including, but not limited to, global climate change, endangered species, ozone depletion, population biology, and acid rain, from an international point of view. The course will include independent student research projects, interviews, videos, and an international panel of guest speakers. The class will consist of discussions, debates, and mini-lectures; some field trips are possible. Two meetings per week. (Meets GEC Cultural Diversity Requirement.)

209 Learning About the Living World

(Cross-listed as Education 209.)

MAJOR/MINOR COURSES

These courses are intended for students who are pursuing a major or minor in biology as specified in a previous section.

BIOLOGY CORE COURSES

Biology 120, one of the core seminars (130-136), 220, and 221 make up a core sequence in general biology for students pursuing the major or minor in biology.

120 Organismal Biology

This course will address the organization and function of multicellular organisms. Although focused primarily on plants and animals, other kinds of organisms will be discussed. Regulation, homeostasis, and integration of function; nutrient acquisition, processing, and assimilation; photo-

synthesis; gas exchange; reproductive patterns; and development are all topics that are included in this course. Readings from an introductory text and the secondary and primary scientific literature will be required. Corequisite: Chemistry 110.

BIOLOGY CORE SEMINARS

The Biology Core Seminar is the second course in the sequence of required courses for the major and minor. Students select one seminar to satisfy the Biology Core Seminar requirement. The seminar format of these courses encourages active participation and informed discussion. Although the topics may change from year to year, the basic emphases in each seminar remain the same: study skills, information retrieval and use of technology, oral and written communication, scientific method, introduction to primary research literature, and critical thinking. Students should consult the most recent catalog supplement for available titles. Three to four hours per week; satisfies First-Year Writing Requirement. Prerequisites for all seminars: Biology 120, Chemistry 110.

130 Biology Core Seminar: Bird Biology

Colorful and musical cohabitants of our world and one of only four groups of animals ever to have evolved powered flight, birds have captivated the fascination of people for millennia. Students in this course will explore ecological, evolutionary, and physiological topics in bird biology to gain a deeper understanding of these living descendants of the dinosaurs. Many class periods will include field trips. Prerequisites: Biology 120, Chemistry 110.

131 Biology Core Seminar: Biology of Sex and Gender

An examination of the biology of sex and gender, including topics such as the evolution of sex, sex determination and differentiation, parthenogenesis, sex ratios, sex change, sexual selection, and mate choice. Prerequisites: Biology 120, Chemistry 110.

133 Biology Core Seminar: Tropical Rain Forests

Much of the diversity of life is all but out of sight in the treetops. From the cathedrals of old-growth conifers of the Pacific Northwest to the rich mosaic of the Amazon rain forest, crowns of trees rooted in the earth capture energy, create organic matter, make oxygen, and fashion natural toxins that we use as medicines. But treetops also are home for a myriad of ferns and birds,

bromeliads and bats, and orchids and insects, and exist as one of the last ecological frontiers on Earth. The course includes local field trips. Prerequisites: Biology 120, Chemistry 110.

134 Biology Core Seminar: Emerging World Diseases

In this age of antibiotics and vaccines, why do millions die each year from infectious diseases worldwide? With new viruses and pathogens continually emerging, can we ever hope to win the battle? This course will address the biological mechanism of infectious disease and the socio-economic and ecological factors that influence the outbreak of disease in various world populations. Emerging (e.g. SARS, Ebola, West Nile) and re-emerging (e.g. tuberculosis) diseases will be studied, as well as other major threats to global public health (e.g. malaria, anthrax). Discussion, lecture, student presentations, and laboratory sessions. Prerequisites: Biology 120, Chemistry 110. (Meets GEC Cultural Diversity Requirement.)

135 Biology Core Seminar: The Biology of Food, Nutrition, and Weight Regulation

Why am I getting fat? How does the brain know when I need to eat? How does energy availability affect other physiological processes in the body? What scientific evidence supports the development of low carbohydrate diets? How do nutrient requirements change during one's lifetime? In this course, students will explore the answers to these questions about food and nutrition through the reading of primary literature, writing assignments, oral presentations, and laboratory work. Two discussion/lecture and two laboratory hours per week. Prerequisites: Biology 120, Chemistry 110.

136 Biology Core Seminar: Sensing the Environment

Virtually everything an animal does depends on receiving and correctly interpreting information from its external and internal environments. This course will examine the nature of different stimuli and the general properties of sensory reception. Specific biological examples will be chosen by students, and could include topics such as photoreception, chemoreception, mechanoreception, electroreception, thermoreception, magnetoreception, and nociception. Two discussion/lecture and two laboratory hours per week. Prerequisites: Biology 120, Chemistry 110.

220 Ecology and Evolution

The roles of ecological and evolutionary processes in shaping life's diversity are examined. Specific topics may include adaptive evolution, origins of species, reconstruction of evolutionary history, population dynamics and extinction, species interactions, community processes, ecosystem functioning, and conservation. Lab will include a combination of field research projects and field and laboratory activities. Prerequisites: Biology 120 or a previous college science course.

221 Cellular and Molecular Biology

This course will examine cells as the fundamental units of life. Topics will include the structure and function of the cell and its molecular constituents; energy relationships at the cellular level; and an introduction to the nature and organization of the genetic material. Laboratory sessions will emphasize student-designed projects. Classroom sessions will involve group work, discussions, seminars, problem-solving sessions, and lectures. Three lecture and four laboratory hours per week. Prerequisites: Biology 220, Chemistry 111.

ADVANCED, SUBJECT-AREA COURSES

Majors in biology are required to choose three 300-level courses (two or three for minors) from at least two of the three subject areas: cellular and molecular biology (320, 322, 324, 340, 346, 352), organismal biology (340, 342, 346, 348), and ecology and evolution (344, 370, 375, 380, 384, 389).

320 Microbiology and Immunology

This course will focus on the biology of single-celled organisms, with emphasis on bacteria and infectious disease. Topics include antibiotic mechanisms and resistance, bacterial gene swapping, epidemiology, host-microbe interactions, and the immune response. Several weeks of independent study will allow the student to isolate, research, and identify three bacterial species. Three lecture and four laboratory hours per week. Prerequisites: Biology 221, Chemistry 111.

322 Molecular Biology

The structure and function of nucleic acids and proteins in prokaryotic and eukaryotic cells: DNA replication, transcription, translation, and regulation. Laboratories will apply current molecular techniques to an open-ended research problem. Three lecture and four laboratory hours per week. Prerequisites: Biology 221, Chemistry 111.

324 Advanced Cell Biology

The structure and function of the cell and its organelles, with emphasis on membrane-related processes including transport, energetics, cell-to-cell signaling, and nerve and muscle cell function. Research reports will include extensive library and Internet exploration and analysis. Three lecture and four laboratory hours per week. Prerequisites: Biology 221, Chemistry 111.

340 Animal Physiology

This course will focus on mechanisms of homeostasis in vertebrates and invertebrates. A particular emphasis will be placed on examining specific adaptations (functional, morphological, and behavioral) to different environmental conditions, as well as problems associated with physical size. Topics will include integration and response to stimuli, gas exchange, circulation, movement, buoyancy, metabolism, thermal regulation, osmoregulation, and excretion. Three lecture and four laboratory hours per week. Prerequisites: Biology 221, Chemistry 111.

342 Developmental Biology

The processes of embryological development in a variety of organisms and the experimental methods revealing them will be emphasized. Molecular, cellular, and morphological changes during development will be discussed. Laboratory exercises will feature student-designed experiments on sea urchin, frog, and avian embryos aimed at revealing processes of fertilization, growth, gastrulation, and morphogenesis. Three discussion and four laboratory hours per week. Prerequisites: Biology 221, Chemistry 111.

344 Animal Behavior

A study of current ideas about the biological basis and evolution of animal behavior. Topics will include molecular, hormonal, and genetic bases of behavior; adaptive behavior patterns; mating systems and reproductive behavior; and evolution of altruism and helping behavior. Three lecture and four laboratory hours per week. Prerequisites: Biology 221, Chemistry 111.

346 Molecular Neuroscience

Neurobiology associated with brain function (perception, movement, homeostasis, affect, and cognition), neurological and psychiatric illnesses, and brain injury. A reading- and writing-intensive course with a problem-based learning approach that comprehensively explores the breadth of neurobiology (molecular, cellular, anatomical, physiological, behavioral, and med-

ical). Laboratory exercises emphasize neuroanatomy and neuronal cell biology. Several experimental projects complement lecture and laboratory learning. Six hours per week. Prerequisites: Biology 221, Chemistry 111.

347 Vertebrate Endocrinology

The endocrine system is responsible for maintaining homeostatic set points within the human body. These set points impact a number of processes including the regulation of metabolism, reproduction, and how the body responds to stressful stimuli. This course will focus on the following questions: What organs and tissues regulate homeostasis? What biological compounds communicate changes within the body providing feedback about the regulation of metabolism, reproduction, and stressful stimuli? What experimental tools have been developed to answer questions about how the endocrine system functions? What are the clinical characteristics of the different disease states that result when the control of these set points is lost? Three lecture and four laboratory hours per week. Prerequisites: Biology 221, Chemistry 111.

352 Molecular Genetics

A study of the molecular basis for inheritance, particularly with respect to human traits and disorders. Topics include the structure, expression, and segregation of genes and chromosomes, use of model organisms in the study of human disease, genetic engineering and gene therapy, and principles of genome science. Laboratory will apply current molecular techniques to an original research problem. Three lecture and four laboratory hours per week. Prerequisites: Biology 221, Chemistry 111.

370 Ecology

This course examines current concepts and research in ecology at the levels of populations, communities, landscapes, ecosystems, and global processes. Emphasis will be placed on field research methods and reading of the primary literature. Lectures, discussions, and other classroom activities will be combined with field and laboratory exercises. Three classroom and four laboratory/field hours per week. Prerequisite: Biology 220. (Cross-listed as Environmental Studies 370.)

375 Conservation Biology

This course will examine how biological principles and information can be applied to conservation of species, ecosystems, and natural resources. Topics may include endangered

species, conservation genetics, landscape and ecosystem-level conservation, restoration, biodiversity in human-influenced systems, and others. This course is scheduled to allow extended field trips and will also include lecture, discussion, and other classroom and laboratory activities. Prerequisite: Biology 220. (Cross-listed as Environmental Studies 375.)

380 Tropical Ecology and Conservation

In this course we will survey basic ecological dynamics and concepts characteristic of tropical terrestrial ecosystems, and will also examine the complex socio-political, economic and biological issues associated with the major threats to these ecosystems. The course will revolve around a required spring break trip to a field site in the tropics (e.g., Costa Rica) at which research projects will be conducted. Class periods will consist of discussions and lectures with associated readings and short written assignments. Lab will center around the spring break trip, emphasizing study design and preparation for field projects and examination of collected specimens/data analysis afterward. Students will prepare posters and oral presentations of field projects at the end of the semester. Application and additional fee required to cover expenses associated with field trip. Prerequisite: Biology 220. (Cross-listed as Environmental Studies 380 and Latin American Studies 381.)

384 Plant Biology

This course aims to provide a thorough knowledge and understanding of land and aquatic plants, photosynthetic protists and fungi, including: molecular biology; chemical organization and genetics; structures and functions of plant cells, tissues, and organs; principles of systematic botany, nomenclature, and classification; evolutionary relationships among the major groups; and the relationship between plants and their environments. An emphasis on hands-on experimentation will allow students to design experiments, analyze data, and present their results. Three 50-minute lectures and one 3-hour lab per week are required. Prerequisite: Biology 220. (Cross-listed as Environmental Studies 384.)

389 Evolution

This course will focus on the mechanisms of evolutionary change, ranging from short-term microevolutionary processes within populations to the origins of new species. Students will conduct projects based on work done over several weeks at the Field Museum of Natural History in Chicago. Classroom sessions will consist of lectures, discussions, and student presentations.

Three lecture and four laboratory hours per week (including Field Museum trips). Prerequisites: Biology 221, Chemistry 111.

SENIOR STUDIES REQUIREMENT

Students majoring in biology are required to fulfill the College's Senior Studies Requirement. This may be accomplished by enrolling in a senior seminar or Biology 492, Independent Research Colloquium. The requirement may also be satisfied through successful completion of a senior thesis. Seminar titles change every year. Students should consult the online catalog for available titles. Biology 492, Independent Research Colloquium, is offered each fall and a senior seminar is offered each spring.

483 Senior Seminar: Plant and Animal Interactions

This course will examine the ecological and evolutionary relationships between plants and the animals that eat them, defend them, or carry their pollen or seeds. The course will address plant defenses against animals, ecological interactions among plants and animals, and relationships in a community context, using examples from tropical and marine ecosystems as well as those of North America and Europe. Particular attention will be given to changes over geological time and the central importance of these relationships in maintaining food production and conservation of biological diversity. Open to senior biology majors or by permission of instructor. Three hours per week.

488 Senior Seminar: Sex and Evolution

An application of evolutionary principles to understanding phenomena related to sexual reproduction. This seminar will emphasize theory and empirical tests of theory reported in the primary literature in evolution, behavior, and genetics. Exact topics will depend on student interests. Classes will involve discussions, student presentations, and short lectures. Open to senior biology majors or by permission of the instructor. Two 80-minute meetings per week.

492 Independent Research Colloquium

This course fulfills a portion of the Senior Studies Requirement for students engaged in senior thesis research and is equivalent to Senior Seminar for non-thesis students. It is a workshop intended to help students develop their skills in scientific communication as they enter the world of professional scientists. The emphasis of the course will be the improvement of student oral and written communication skills through the

development of a thesis, research report, or a review paper on a topic of their own choosing and the presentation of a public seminar. Students also will engage in formal peer review. Depending on the status of the laboratory or library research project, students will also have the opportunity to present their work at a regional student research symposium (fall) and/or at the collegewide Student Symposium (spring). This course fulfills the Senior Studies requirement. Senior thesis students are expected to enroll in Biology 492 in the fall semester and in Biology 494 (Senior Thesis) in the spring semester of their senior year. Attendance at department seminars and written critiques of the seminar are required. Prerequisite: Biology major with senior standing or permission of the instructor.

494 Senior Thesis

Research guided by a departmental faculty member culminating in a senior thesis, fulfilling the College's Senior Studies Requirement. Consult any member of the department for further information.

INDEPENDENT STUDY, INTERNSHIPS

The following study options may be used to enrich the individual student's experience in the biological sciences. Although credits earned under these options count toward graduation, they are not applicable toward the major or minor.

490 Internship

Off-campus research experience supervised by a departmental faculty member. Consult the faculty member designated as the department's internship liaison for application information.

493 Independent Study

Research in collaboration with a departmental faculty member. Consult with any member of the department for application information.

CHEMISTRY

Professor William B. Martin
Organic Chemistry. Synthesis. Biochemistry.
Enzyme Inhibition.

Associate Professor Jason A. Cody, Chair
Inorganic Chemistry. Solid State Chemistry.

Associate Professor Laura J. Kateley
Organic Chemistry. Synthesis.
Chromatographic and Spectroscopic
Applications.

Associate Professor Dawn C. Wiser
Physical Chemistry. Computational Chemistry.
Organometallic Mechanisms.

Assistant Professor Lori A. Del Negro
Analytical Chemistry, Environmental
Chemistry

Lecturer Amy Abe
NMR Consultant

Lecturer Elizabeth W. Fischer
Natural Science. Organic Chemistry.
Biochemistry.

Lecturer Melanie M. Werst
Physical Biochemistry

The Department of Chemistry offers students a curriculum designed to develop both depth and breadth in understanding the central principles and theories in the major areas of modern chemistry.

Chemistry majors are provided with a foundation in inorganic, organic, analytical, and physical chemistry. A biochemistry concentration is offered with upper-level course work and research experiences available. An essential feature of chemistry course work is the laboratory experience. The laboratory sections are small and emphasize individual work as well as collaborative problem solving and hands-on use of modern instrumentation.

Students majoring in areas outside the sciences may take any of the courses for which they have the necessary prerequisites. There are some courses especially intended for non-science majors that require no previous chemistry and are desirable for students in the humanities and social sciences.

The department facilities include four laboratories for teaching and research training as well as five laboratories devoted to instrumentation and six laboratories for student-faculty research. Chemical books and periodicals are in the Freeman Science Library in the same building with the teaching and research laboratories to facilitate an integrated approach to library and laboratory research. Instrumentation includes Fourier transform infrared spectrophotometers, nuclear magnetic resonance spectrometers (a multinuclear FT 400 MHz and a multinuclear FT 60 MHz instrument), a GC mass spectrometer, capillary gas chromatographs, high-performance liquid chromatographs, a potentiostat/galvanostat, X-ray crystallographic equipment with diffraction cameras and a single-crystal diffractometer, an inert-atmosphere glove box, laser spectrometer, a fluorometer, and diode array visible and ultraviolet spectrophotometers.

Computers are an integral part of the chemistry curriculum and research activities; Macintosh, PC, and Silicon Graphics workstations are used for instrument interfacing, plotting, spreadsheets, color graphics, and molecular modeling.

The department is on the approved list of the American Chemical Society and has an active chapter of Student Affiliates. This student organization sponsors a variety of activities related to science, including a guest speaker program. Chemistry majors may graduate with American Chemical Society Certification by taking the six core courses described below for the major and a minimum of three other chemistry courses at the 300 level or higher (one of which can be Chemistry 450 or 490). Chemistry students who have participated in research may be nominated by the department for election to Sigma Xi, a national science honorary society with a chapter at the College.

Chemistry majors are prepared to go directly into careers in chemistry. Many pursue graduate studies leading to the M.S. or Ph.D. degree in chemistry or biochemistry. A major in chemistry also provides ideal preparation for medical and dental school as well as other types of science-related professional studies. Students who major in areas other than chemistry but are pursuing interests in medicine or biological sciences with

a goal of professional school or graduate study typically take four or more courses in the department. Premedical students are required to take one year of general chemistry and one year of organic chemistry. Students planning graduate studies in chemistry or related fields are encouraged to participate in summer research as well as research during the senior year, culminating in the writing of a senior thesis.

CHEMISTRY MAJOR

The major requires a minimum of eight courses; these include the following six chemistry courses: Chemistry 110 and 111, 220 and 221, 320 and 321.

The remaining two courses must be at the 300 level or above and one of these courses must meet the Senior Studies Requirement. The Senior Studies Requirement may be satisfied by Chemistry 410, Instrumental Analysis, or Chemistry 490, Senior Thesis in Chemistry. Under unusual circumstances, the department may approve some other senior studies option.

The chemistry major also requires the following courses:

Mathematics 110 and 111 (Calculus) or

Physics 110 and 111 (Introductory Physics) or

Physics 120 and 121 (General Physics).

Biochemistry Concentration

Students interested in the biochemistry concentration would take the following courses:

Chemistry 110 and 111.

Chemistry 220 and 221.

Chemistry 300.

Chemistry 320 and 321.

Chemistry 415.

Additional courses required for the biochemistry concentration include:

Mathematics 110 and 111 (Calculus) or

Mathematics 115 and 116 (Honors Calculus).

Biology 352 (Molecular Genetics).

Physics 110 and 111 (Introductory Physics) or

Physics 120 and 121 (General Physics).

CHEMISTRY MINOR

The minor consists of five chemistry courses; these include the following four courses:

Chemistry 110 and 111.

Chemistry 220 and 221.

The fifth course must be at the 300 level or higher. Note: All such courses have prerequisites outside the department's offerings.

NON-MAJOR COURSES

Chemistry courses numbered below 110 are intended for students majoring in humanities or social sciences. These courses will fulfill the General Education requirements. Chemistry 110 also is suitable toward fulfillment of GEC requirements. Students with credit in chemistry courses numbered 110 or higher (or the equivalent in transfer credit from another college or university) may not receive credit in courses numbered 100 through 109.

102 Chemistry and the Environment

Explore chemical phenomena in the world around you. Learn about the chemical cycles present throughout nature. Understand the chemistry behind current environmental issues such as air pollution, ozone depletion, global warming, acid rain, and energy sources (fossil fuels, nuclear, renewable). The relevant scientific background will be developed as needed to explain these particular topics. Lectures, discussions, and demonstrations. Not applicable toward the major or minor.

103 Our Chemical World

This course is a descriptive examination of modern chemistry that will emphasize aspects important for students in the humanities and social sciences. Among the topics to be examined: the impact of science and technology on society; chemical change; nuclear chemistry; consumer chemistry; acids and bases; and plastics and polymers. Demonstrations and some experiments with group participation. Not applicable toward the major or minor.

108 Shape, Structure, and Matter

Understand and appreciate the submicroscopic world of the molecules of carbon. Explore the nature of plastics and polymers, of nutrients and medicinals, of fuels and other petrochemicals. Investigate ideas of structure and consider how small, simple molecules can be pieced together into larger, more complex natural and synthetic molecules. Not applicable toward the major or minor.

110 General Chemistry I

An introduction to and study of the fundamental concepts and principles of chemistry. Atomic and molecular structure, periodic relationships,

chemical bonding, stoichiometry. Properties and theories of gases, liquids, and solids. Laboratory introduces quantitative measurements and computer applications. Three class meetings, one laboratory per week. (One laboratory section is cross-listed as First-Year Studies 101.)

111 General Chemistry II

Thermodynamics and kinetics; chemical equilibria; acids, bases, and buffers; coordination compounds; descriptive chemistry of metals and nonmetals. Laboratory is both quantitative and descriptive and uses much instrumentation. Three class meetings, one laboratory per week. Prerequisite: Chemistry 110.

220 Organic Chemistry I

Introduction to functional groups; nomenclature; resonance; inductive and steric effects; stereochemistry; carbonyl chemistry; nature of organic reactions. Laboratory focuses on microscale synthetic techniques, gas chromatography, and infrared and nuclear magnetic resonance spectroscopy. Three class meetings, one laboratory per week. Prerequisite: Chemistry 111 or 121 or permission of the instructor.

221 Organic Chemistry II

Addition, substitution, and elimination reactions; molecular rearrangements; aromaticity; carbohydrates and heterocyclic chemistry. Laboratory focuses on microscale organic synthesis, infrared and nuclear magnetic resonance spectroscopy, and GC/MS. Three class meetings, one laboratory per week. Prerequisite: Chemistry 220 or permission of the instructor.

300 Biochemistry

Introduction to biochemistry at the cellular and chemical levels. Emphasis on protein structure and function, enzymes, bioenergetics, intermediary metabolism, carbohydrates, and other biological molecules. Three class meetings, one laboratory per week. Prerequisite: Chemistry 221, Biology 220, or permission of the instructor.

320 Physical Chemistry I

Quantum mechanics and the nature of the chemical bond. Emphasis on understanding atomic orbitals, atomic and molecular energy, and the chemical bond. Applications of molecular quantum mechanics; spectroscopy and computational chemistry. Laboratory focuses on experiments that led to the development of

quantum mechanics, molecular modeling, and spectroscopy. Three class meetings, one laboratory per week. Prerequisites: Chemistry 221, Mathematics 111 or 116; prerequisite or corequisite: Physics 110 or 120.

321 Physical Chemistry II

The energy and dynamic behavior of groups of molecules. Emphasis on non-ideal gases, statistical mechanics, thermodynamics, chemical kinetics, and reaction-rate theory. Laboratory focuses on kinetics and thermodynamics with a culminating independent project-based experience. Prerequisite: Chemistry 320; prerequisite or corequisite: Physics 111 or 121.

340 Inorganic Chemistry

Relationship among structure, properties, and chemical reactivity of elements from the entire periodic table. Molecular bonding theories, molecular symmetry and group theory, solid-state materials, transition-metal complexes, catalysts, and bioinorganic molecules. Laboratory work includes synthesis, spectroscopy, X-ray diffraction, and inert-atmosphere techniques. Two class meetings and one laboratory per week. Prerequisite or corequisite: Chemistry 321.

410 Instrumental Analysis

Theory and techniques of instrumentation used in modern chemical analysis. Optical spectroscopy (UV-Vis, fluorescence, FT-IR, Raman), NMR, mass spectrometry, electroanalytical chemistry, and modern separation techniques (GC, HPLC, and electrophoresis). Laboratory experiments will include most modern instrumental methods and culminate in an independent project. Three class meetings, one laboratory per week. Satisfies the Senior Studies Requirement. Prerequisite (or corequisite, with permission of the instructor): Chemistry 320.

415 Topics in Biochemistry

Application of chemistry to biological molecules. Topics selected from the following: X-ray crystallography; NMR spectroscopy; molecular modeling; computational methods in biochemical systems; protein-DNA interactions; photobiophysics; enzyme catalysis and mechanisms; and DNA chemistry. Four class meetings, no laboratory. Prerequisites: Chemistry 300 and 321 or permission of the instructor.

430 Advanced Organic Chemistry

Extended treatment of familiar topics of

organic chemistry. Emphasis on stereochemistry, radical chemistry, and reactions used in modern organic synthesis. Laboratory is oriented toward synthesis, structural analysis, and the use of chromatographic and spectroscopic methods. Three class meetings, one laboratory per week. Prerequisites: Chemistry 221 and 321.

450 Research in Chemistry

Independent research guided by a faculty advisor. Research areas include organic synthesis; organometallic catalysis; enzyme inhibition; X-ray crystallography; computational chemistry; molecular modeling; solid state chemistry; and spectroscopic studies of air pollution.

490 Senior Thesis in Chemistry

An extensive, in-depth, independent research project with faculty guidance. Includes a formal written dissertation and oral presentation. Satisfies the Senior Studies Requirement.

CLASSICAL STUDIES

2005-2006 Committee Members:

Professor of Philosophy Louis G. Lombardi

Associate Professor of German C. Richard Fisher, Chair

Assistant Professor of History Anna Trumbore Jones

Associate Librarian Rita Koller

Associated Faculty Members:

Professor of Philosophy Janet McCracken

Professor of Religion Ronald H. Miller

Professor of Art Ann M. Roberts

Professor of Sociology and Anthropology Ahmad Sudri

Assistant Professor of English Carla Arnell

Assistant Professor of Communications Linda Horwitz

Assistant Professor of English and Theater Richard Pettengill

Associate Professor Emeritus of History Pericles Georges

The liberal arts have their roots in the cultural legacy of ancient Greece and Rome. Western literature, philosophy, history, and drama emerged in these "classical" cultures. Our sensibilities about art and architecture continue to be influenced by forms developed in the ancient world. On the other hand, problems faced by those cultures remain with us; recent work on the role of women and slaves has had much to say not only about the ancients but about us as well. There is still much to be gained through the study of the Greeks and Romans.

CLASSICAL STUDIES MINOR

Lake Forest provides two ways to achieve a minor in Classical Studies. A traditional, on-campus track offers exposure to the literary legacies of Greece and Rome, combined with an on-campus survey of the art of the period. The on-site track includes as a centerpiece the College's unique Program in Greece and Turkey, which explores the art and architectural remains of Greek civilizations from the Bronze Age, through the

Classical Period, and into the Byzantine Era.

As a traveling program, classes are held on sites and in museums, from Agamemnon's citadel at Mycenae, to the acropolis of Periclean Athens, the agora where Socrates engaged in philosophical debates, Apollo's oracle at Delphi, and Justinian's magnificent Ayia Sophia in Istanbul. (See page 42 for course descriptions.)

If you are interested in this minor or if you have questions about it, please contact any member of the program committee.

There is no language requirement for the minor but familiarity with either ancient Greek or Latin is encouraged and is available through tutorials.

On-site focus

Six courses, including:

Participation in the Program in Greece and Turkey:

Greek Civilizations 201 (Ancient Greece: Life, Thought, and the Arts)

Greek Civilizations 202 (Greece in the Bronze Age)

Greek Civilizations 203 (Greece in the Classical-Roman Ages)

Greek Civilizations 204 (Greece in the Byzantine-Medieval Ages)

Another course from the list below may be substituted for one of the on-site courses, with the permission of the Classical Studies program chair.

Plus two additional courses from the following:

Art 210 (Ancient Art)

Classical Studies 275 (Greek Greats)

History 210 (Ancient Greece)

History 211 (Roman History)

Philosophy 290 (History of Western Philosophy: Ancient Greece)

Religion 306 (Roman and Medieval Christianity)

An appropriate tutorial or research project, approved by the Classical Studies program chair

On-campus focus

Six courses, including four courses from the following:

Art 210 (Ancient Art)

Greek Civilizations 201 (Ancient Greece: Life, Thought, and the Arts)

History 210 (Ancient Greece)

History 211 (Roman History)

Literature in Translation 275 (Greek Greats)

Philosophy 290 (History of Western Philosophy: Ancient Greece)

Religion 306 (Roman and Medieval Christianity)

An appropriate tutorial or research project, approved by the Classical Studies program chair

Plus an additional two courses from among those listed above or:

Ancient Greek or Latin (as a tutorial by arrangement)

Religion 203 (The Christian Testament)

Other courses listed below with the approval of the Classical Studies program chair and the instructor, providing the student focuses sufficiently on the Classical period:

English 210 (Ancient and Medieval Literature)

Sociology and Anthropology 216 (Introduction to Archaeology)

Sociology and Anthropology 375 (History of Social Thought)

Theater 230 (Theater History I: Greeks to Shakespeare)

210 Ancient Greece

(Cross-listed as History 210.)

211 Roman History

(Cross-listed as History 211.)

216 Introduction to Archaeology

(Cross-listed as Sociology and Anthropology 216.)

275 Greek Greats

Students will read canonical works at the core of classical Greek civilization and situate the imaginative appropriation of this rich literature in a cultural context that is both historical and contemporary. Students read Homer's epic *Iliad* (selections) and *Odyssey* (in its entirety), three

plays each by the tragedians Aeschylus, Sophocles, and Euripides, two works of the satirical Aristophanes, and examples of lyric poetry ranging from Archaic to Hellenistic times. Immersion in primary sources provides ample historical perspectives as well as critical approaches to issues of our time. The course involves lectures but is principally a seminar.

Ancient Greek drama and theater will be investigated utilizing film and interactive Web-based media and sources. Prerequisites: second-year standing and a Lake Forest College literature course, or permission of the instructor. (Cross-listed as Literature in Translation 275. Meets GEC Cultural Diversity Requirement.)

290 History of Western Philosophy: Ancient Greece

(Cross-listed as Philosophy 290.)

COMMUNICATIONS

Professor Dan LeMabieu, Acting Chair

Associate Professor Mark White

Assistant Professor Linda Horwitz

Assistant Professor David Park

Assistant Professor Rachel Widden

Instructor Leslie Harris

Lecturer Helene DeGross

Communications is one of the oldest pedagogical fields in Western history. Known as rhetoric by the Greeks and Romans, the discipline taught students how to communicate in a public setting. The communications department at Lake Forest College seeks to provide students with a sophisticated understanding of the processes of communications both among individuals and within cultures and societies. Students develop the ability to analyze and master the various forms of communication: oral, written, and visual. They study the role of communication in history and modern society. They prepare themselves for careers in the modern information society.

REQUIREMENTS FOR STUDENTS WHO HAVE DECLARED THE MAJOR ON OR AFTER 9/6/04

The major and minor include Communications and interdisciplinary courses. The major requires nine courses. The minor requires six courses. No more than two courses from a single department outside Communications may count toward the major or the minor. The list of optional courses on the 200 and 300 level changes over time. Each major and minor requires approval of Department Chairperson.

Declaring the major or minor requires:

- Completion of Communications 110

Declaring the major also requires:

- Cumulative grade point average of 2.3 or higher
- Note: There is no minimum GPA requirement to declare the minor.

Eligibility to become an official advisee of Communications faculty requires:

- Status as major or minor

Minimum grade for each class (with the exception of internships) to count toward the major is "C" [2.0]

- Note: Courses taken Credit-D-Fail may not count toward the major or minor.

Course Requirements for the Major

A. Com 110: Introduction to Communications I

B. Two courses from the following courses:

Com 120: Introduction to Communications II

Com 235: Rhetoric and Speech

Com 245: Interpersonal Communications in a Multicultural Society

Com 250: The Western Rhetorical Tradition

Com 255: Rhetorical Criticism

Com 280: African American Communications (cross-listed as African American Studies 280).

Com 281: Theories of Mass Communication

Eng 231: Journalism

Eng 235: Introduction to Creative Writing

Eng 242 or Thr 270: Creative Writing – Playwrighting and Screenplays

Thr 210: From Page to Stage: Communicating through Design

Thr 260: Voice and Diction

C. Two courses from the following courses or from 'B' above:

Art 112: Introduction to Visual Communication

Art 224: History of Prints

Art 232: Studio Art: Photography

Art 242: Introduction to Computer Imaging

Educ 215: Instructional Communication Theory and Practice

His 240: History and Film

His 275: Popular Music and American Society

Mus 227: History of Jazz

Mus 264: History of Rock and Roll

Phl 248: Philosophical Issues in Documentary Film

Phl 255: Philosophy and Film

Phl 260: Aesthetics: Reflections on Art and Beauty

Pol 224: Mass Media and American Politics

S/A 285: Social Structure and Culture through Film

D. One course from the following 300-level Communications courses:

Com 300: Mass Media and Marketing Research

Com 310: Communication Ethics

Com 320: Argumentative Writing and Speaking

Com 330: Advanced Journalism: Magazine Writing

Com 350: Topics in Communications

Com 381: History and Theory of Freedom of Expression

Com 382: Women's Rhetoric and the Feminist Critique

Com 383: New Media and Society

Com 384: The Rhetorical Presidency

E. One course from the following 300-level Interdisciplinary courses or another course from 'D' above:

Art 342: Advanced Computer Imaging

Art 343: Digital Media: Video, Photography and Sound

Bus 336: Marketing Theory: Multinational Enterprises

Eng 330: Advanced Nonfiction Writing

Fre 310: Topics in Linguistics

Fre 333: Exploring French Culture through Film

Fre 334: French Literature through Film

Ger 333: Modern German Film

Psy 325: Persuasion and Truth in Sales Communications

Spa 333: Film and History in Spain

Spa 336: Latin American Film

Spa 380: Fiction, Film, and Society in Latin America

F. Com 390: Internship. Two credits preferred.

G. Com 420 (Senior Seminar) OR a Senior Thesis OR an Independent Study

Course Requirements for the Minor

A. Com 110

B. Three courses from 'B' (preferred) or 'C' above

C. Two courses from 'D' (preferred) or 'E' above

REQUIREMENTS FOR STUDENTS WHO HAVE DECLARED THE MAJOR BEFORE 9/6/04

The major consists of nine required courses. The minor consists of six required courses. No more than two courses from a single outside department may count toward the major or the minor. The list of optional courses on the 200 and 300 levels changes over time. The chairperson of the department will approve all majors and minors.

Communications Major

A. Communications 110: Introduction to Communications

B. One course from each of the following groups: [3 courses total]

Writing

English 231: Introduction to Journalism

English 235: Introduction to Creative Writing

Theater 270 or English 242: Playwrighting

Visual

Art 110: Introduction to the Visual Arts

Art 112: Introduction to Visual Communication

Art 130: Studio Art: Elements of Design

Art 131: Studio Art: Drawing

Art 132: Studio Art: Creative Photography

Theater 210: From Page to Stage: Communicating through Design

Oral

Communications 235: Rhetoric and Speech

Communications 245: Interpersonal Communication

Theater 260: Voice and Diction

C. One course from the following 200-level courses:

Art 224: The History of Prints

Art 232: Studio Art: Advanced Photography

Communications 280: African American Communications

Education 215: Instructional Communication: Theory and Practice

History 240: History and Film

History 275: Popular Music and American Society

Music 225: Introduction to Electronic Music: MIDI Sequencing

Music 227: History of Jazz

Music 264: The History of Rock and Roll

Philosophy 248: Philosophical Issues in Documentary Film

Philosophy 255: Philosophy and Film

Philosophy 260: Aesthetics: Reflections on Art and Beauty

Politics 224: Mass Media and American Politics

Psychology 255: Social Psychology

Sociology and Anthropology 285: Social Structure and Culture through Film

D. One course from the following 300-level courses:

Communications 300: Mass Media and Marketing Research

Communications 310: Communications Ethics

Communications 320: Argumentative Writing and Speaking

Communications 330: Advanced Journalism: Magazine Writing

Communications 350: Topics in Communications

Com 382: Women's Rhetoric and the Feminist Critique

Com 383: New Media and Society

Com 381: History and Theory of Freedom of Expression

Com 384: The Rhetorical Presidency

E. One course from the following 300-level courses or a second course from 'D' above:

Art 341: Introduction to Computer Imaging

Art 342: Advanced Computer Imaging

Business 336: Marketing Theory for Multinational Enterprises

English 330: Advanced Nonfiction Writing

French 310: Topics in Linguistics: Phonetics

French 333: Exploring French Culture through Film

French 334: Exploring French Literature through Film

German 333: Modern German Film

Psychology 325: Persuasion and Truth in Sales and Communications

Spanish 333: Film and History in Spain and Latin America

Spanish 336: Latin American Film

Spanish 380: Fiction, Film, and Society in Latin America

F. Communications 390: Internship. Two credits preferred.

G. Senior Seminar or a Senior Thesis or an Independent Study

Communications Minor

A. Communications 110

B. One course from two of the three groups listed in B above.

C. Same as C above (200 level).

D. Two courses from D, E, F, or G above.

110 Introduction to Communications I

This course introduces students to the theories and principles that define the field of communication, including classical rhetorical theory, semiotics, interpersonal communication, and the history of the media.

120 Introduction to Communications II

This course introduces students to more contemporary and practical concerns that are counterparts to the classical and theoretical concerns raised in Communications 110.

235 Rhetoric and Speech

Preparation and criticism of both formal and informal public speeches, including exposition, narration, description, argumentation, and persuasion.

245 Interpersonal Communication in a Multicultural Society

Perspectives on race, gender, sexuality, and cultural heritage are explored through individual speech presentations and group projects.

250 The Western Rhetorical Tradition

A historical survey of theorizing about the role of public discourse in human affairs from ancient Greece and Rome to the present.

255 Rhetorical Criticism

The analysis, interpretation, and evaluation of persuasive discourse. A writing-intensive course.

280 African American Communications

This course explores what is distinctive about the artistic and strategic communication practices of African Americans, including speeches, sermons, songs, literature, and film. (Cross-listed as African American Studies 280. Meets GEC Cultural Diversity requirement.)

281 Theories of Mass Communication

A survey of 20th and 21st century theories and research perspectives on mass communication.

300 Mass Media/Marketing Research

(Cross-listed as Business 355.)

310 Communication Ethics

(Cross-listed as Philosophy 310.)

320 Argumentative Writing and Speaking

This course examines exemplary texts, both ancient and modern, as a way to foster analytical precision in argumentation.

350 Topics in Communication

Intensive study of selected subjects within the field of communications. Topics vary by semester. (Meets GEC Cultural Diversity Requirement, depending on topic.)

381 History and Theory of Freedom of Expression

This course will apply philosophies of communication to specific debates within the topic of freedom of expression, including debates concerning indecency, obscenity, slander, sedition, violence, and hate speech.

382 Women's Rhetoric and the Feminist Critique

This course looks at how gender affects communication and how communication affects gender. Our focus is both 1) how gender limits who can speak and controls how they speak and what they say as well as 2) how the resulting speech constructs society's understanding of womanhood. (Cross-listed as Women's and Gender Studies 382. Meets GEC Cultural Diversity Requirement.)

383 New Media and Society

A detailed look at grand theoretical perspectives on the Internet and other new media of communication, with a particular focus on the perceived cultural meaning of new media.

384 The Rhetorical Presidency

Examines the rhetorical nature of the office of the President of the United States.

390 Internship

Off-campus professional work experience. One credit acceptable, but two credit internships preferred.

420 Senior Seminar

ECONOMICS AND BUSINESS

Professor Robert A. Baade, Chair
International Trade and Finance.
Macroeconomic Theory. Economics of Sports.

Professor Les R. Dlabay
Mass Media/Marketing Research. Latin American
Global Business. Asian Business Culture and
Trade Relations. Financial Accounting.

Professor Richard F. Dye
Macroeconomic Theory. Public Finance.
Urban Economics.

Professor Carolyn Tuttle
Macroeconomic Theory. Money and Banking.
Economic History. Child Labor in Latin
America. Labor in the American Economy.

Associate Professor Jeffrey O. Sundberg
Environmental and Natural Resource
Economics. Microeconomic Theory. Corporate
Finance. Law and Economics. Finance.

Assistant Professor Ying Huang
Options and Futures. Finance. International
Finance. Capital Budgeting.

Assistant Professor Robert J. Lemke
Microeconomic Theory. Industrial
Organization. Econometrics. Quantitative
Methods. Managerial Economics.

Assistant Professor Allison Roberts
Health Economics. Finance. Labor in the
American Economy. Managerial Economics.
Quantitative Methods.

Instructor Kent Grote
Finance. Investment Analysis. Industrial
Organization.

Instructor Cynthia B. Lucking
Accounting. Finance.

Lecturer Mary Beth Cummings

Lecturer Jill Terzakis

The Department of Economics and Business is the largest department at Lake Forest College. The department offers majors and minors in both economics and business. Students are allowed to have a double major at the College, but they

may not major in both business and economics. Students may also not elect both a major and a minor within the department.

Our economics and business programs are both designed to be challenging, teach critical thinking, and meet the demands of a rapidly changing job market. The major in economics is a strong traditional program with a reputation for rigor, depth, and breadth. The business major is structured to provide an overview of various business operations (accounting, finance, and marketing), with an emphasis on the economic environment of business and on analytical and communication skills. Both majors provide a strong background for business careers and for graduate education in economics (M.A. or Ph.D.), business (M.B.A. or Ph.D.), and law (J.D.). Our majors also provide an excellent preparation for careers in the public and not-for-profit sectors or for professional schools in public administration and public policy.

The teaching and research interests of our faculty are wide and varied. Since just 2000, our faculty have published in the *Journal of Public Economics*, *Journal of Urban Economics*, *National Tax Journal*, *Journal of Sports Economics*, *Economics Letters*, *International Journal of Industrial Organization*, *Journal of Regional Science*, *Oxford Review of Economic Policy*, *Journal of Mental Health Policy and Economics*, *Public Finance Review*, *Journal of Economic Dynamics and Control*, *Social Choice and Welfare*, and many others. We have also contributed several chapters to edited books and have been interviewed by the local, national, and international media such as the *New York Times*, *BBC*, *Wall Street Journal*, *Washington Post*, *Financial Times*, *The Economist*, *Business Week*, and the *Chicago Tribune*.

ECONOMICS MAJOR

The study of economics is concerned with two basic questions faced in any human society: (1) how available resources are to be allocated among productive uses to yield the greatest total product and (2) how the fruits of the productive processes are to be distributed among members of society. Since no universal form of socio-economic organization exists, economics

examines and compares the different ways in which human societies have sought answers to these questions.

The study of economics at Lake Forest College can begin during either the first or second year. The curriculum of the first year includes an introductory course designed for potential majors and those desirous of a single survey course. In addition, lower-level course offerings include a number of problem- or issue-oriented courses. Qualified junior and senior majors are encouraged to engage in independent study projects, both within economics and across disciplinary lines. Economics majors have been admitted to some of the top graduate and professional schools in economics, business administration, public policy, and law. Majors contemplating graduate or professional training are urged to consult with their economics department advisors concerning their selection of courses.

The requirements for the economics major are:

Economics 110 (Principles of Economics) with a grade of C- or better.

Mathematics 110 (Calculus I) with a grade of C- or better, completed by the end of the first year. (Students without strong high school preparation in mathematics may need to complete Mathematics 105 as a prerequisite.) Note that Mathematics 110 will also satisfy one of the breadth requirements for the GEC.

Economics 180 (Quantitative Methods for Economics and Business) with a grade of C- or better. Students who have taken this course will not receive credit for any other basic statistics course, including Mathematics 150. Students who have already taken such a statistics course may be able to count it toward the major if approved by the department.

Economics 210 (Microeconomic Theory) with a grade of C- or better.

Economics 220 (Macroeconomic Theory) with a grade of C- or better.

Three other economics courses, two of which must be at or above the 300 level. Internships do not count as economics elective courses.

During the senior year, an additional economics course designated as Senior Studies (a specially designed course with limited enrollments and preference given to senior majors) or a senior thesis.

ECONOMICS MINOR

Six courses to include the following: 110 (Principles of Economics); 210 (Microeconomic Theory) or 220 (Macroeconomic Theory); four other economic courses with the exclusion of internships.

BUSINESS MAJOR

The business major is designed to provide the student with an overview of the economic environment of business and of the various areas of the business world: accounting, marketing, and finance. The primary intention is to teach students how to think about questions in the business world rather than to provide narrow vocational training.

The requirements for the business major are: Economics 110 (Principles of Economics) with a grade of C- or better.

Mathematics 110 (Calculus I) or Mathematics 160 (Finite Mathematics with Applications) with a grade of C- or better, completed by the end of the first year. Students without strong high school preparation in mathematics may need to complete Mathematics 105 as a prerequisite. Note that either Mathematics 110 or 160 will also satisfy one of the breadth requirements for the GEC.

Business 180 (Quantitative Methods for Economics and Business) with a grade of C- or better. Students who have taken this course will not receive credit for any other basic statistics course, including Mathematics 150. Students who have already taken such a statistics course may be able to count it toward the major if approved by the department.

Business 230 (Financial Accounting) with a grade of C- or better.

Business 237 (Introduction to Finance) with a grade of C- or better.

Economics 210 (Microeconomic Theory).

Economics 220 (Macroeconomic Theory).

Philosophy 203 (Business and Professional Ethics) or Philosophy 325 (Major Ethical Theories).

Three other business courses at or above the 300 level, of which at most two are marketing. Up to two of these courses may be business-related economics courses from the following list: Economics 310, 313, 330, 340, 350, 370, 420, or 430. Internships do not count as business elective courses.

During the senior year, an additional business course designated as Senior Studies (a specially designed course with limited enrollments and preference given to senior majors) or a senior thesis.

BUSINESS MINOR

Six courses to include the following:

Economics 110 (Principles of Economics), Business 230 (Financial Accounting), Business 237 (Introduction to Finance); three other business courses with the exclusion of internships.

ECON 110 Principles of Economics

An introduction to both microeconomics, the theory of consumer and producer behavior, and macroeconomics, the determination of aggregate levels of production, employment, inflation, and growth. Application of economic principles to the analysis of current problems of the U.S. economy.

ECON 180 Quantitative Methods for Economics and Business

Distribution analysis, sampling theory, statistical inference, and regression analysis, with emphasis on the application of statistical techniques using spreadsheet software to analyze economic and business issues. Students who have taken this course will not receive credit for any other basic statistics course, including Mathematics 150. (Cross-listed as Business 180.)

ECON 210 Microeconomic Theory

Application of both theoretical and empirical analysis to consumer demand; to the firm both as producer of goods and as buyer of inputs, in both monopoly and competitive markets; and to public policy issues such as public goods, law and economics, and the environment. Prerequisites: Economics 110 and Mathematics 110 or 160 with grades of C- or better.

ECON 220 Macroeconomic Theory

Analysis of the determinants of aggregate production, prices, interest rates, and employment in macroeconomic models that combine the business, household, government, and financial sectors. Prerequisites: Economics 110 and Mathematics 110 or 160 with grades of C- or better.

ECON 237 Introduction to Finance (Cross-listed as Business 237.)

ECON 240 Urban Economics

Application of economic analysis to current problems in urban and suburban America such as poverty, housing, transportation, growth, and finance. Prerequisite: Economics 110 with a grade of C- or better.

ECON 245 Child Labor in Latin America

Explores the role of child labor in the economies of developing Latin American countries, focusing on the question "Do countries need to use child labor to industrialize?" Historically, industrialized countries have relied heavily on children to work in factories and mines. Today it appears history is repeating itself as developing countries utilize children in the informal sectors. The employment of children in Brazil, Colombia, Peru, Chile, and Argentina will be examined in detail. The economic, political, social/cultural, and technological explanations for child labor will be explored for each country. Prerequisite: Economics 110. (Cross-listed as Latin American Studies 245. Meets GEC Cultural Diversity Requirement.)

ECON 260 Law and Economics

Application of general economics principles to both civil and criminal law. Analysis of how individuals and firms respond to laws, the level of enforcement, and penalty structures. Specific areas covered include tax, product liability, environmental, international, contract, and antitrust laws. Prerequisite: Economics 110.

ECON 270 Latin American Development

Analysis of the political economy and economic development of Latin American countries including Brazil, Mexico, Argentina, and Chile. Examination of current economic problems from historical and political perspectives. Particular attention will be given to the economic strategies of growth and development. Prerequisite: Economics 110 with a grade of C- or better. (Cross-listed as Latin American Studies 270. Meets GEC Cultural Diversity Requirement.)

ECON 310 Industrial Organization

Analysis of the behavior of firms under different industrial structures—competitive, monopolistic, oligopolistic. An evaluation of antitrust policies and other government regulations of industry. Specific topics covered include advertising, auctions, networks, product differentiation, market standards, and vertical and horizontal integrations. Prerequisite: Economics 210 with a grade of C- or better.

ECON 313 Money and Banking

Analysis of bank and nonbank financial institutions. Topics include the S&L crisis, the impact of the 1980 and 1982 deregulation acts, the changing role of the Federal Reserve and the ability to conduct effective monetary policy, and bank asset and liability management. Prerequisite: Economics 220 with a grade of C- or better.

ECON 322 Emerging Markets Analysis

Analysis of emerging markets of East Asia and Latin America, paying particular attention to growth strategies and the impact of market reforms, financial markets development, and foreign capital flows on economic performance of these countries. The course relies on case studies from Asian countries of China, South Korea, Thailand, Singapore, and Hong Kong and Latin American economies of Brazil, Argentina, Mexico, and Chile. Prerequisite: Economics 220 with a grade of C- or better or consent of the instructor. (Cross-listed as Business 322, Asian Studies 322, Latin American Studies 322. Meets GEC Cultural Diversity Requirement.)

ECON 330 Econometrics

Use of statistical methods, especially multiple regression, to test hypotheses based on economic theory. Some use of computer programs. Prerequisites: Economics 180 with a grade of C- or better; Economics 210 or 220.

ECON 340 Environmental and Natural Resource Economics

Examines different economic theories regarding optimal use of renewable and nonrenewable resources, why market responses to pollution are typically unsatisfactory, and optimal pollution control. These theories are then applied to the real world, taking into consideration political and technological constraints. The impact of past and current policy on the environment will be studied, as will the potential impact of proposed legislation. Prerequisite: Economics 210 or permission of the instructor. (Cross-listed as Environmental Studies 340.)

ECON 350 Public Finance

Theory and policy analysis of the effects of government spending and taxation on the allocation and distribution of income. Special attention is given to tax reform proposals and other current policy issues. Prerequisite: Economics 210 with a grade of C- or better.

ECON 360 Health Economics

Examines how economic analysis can be applied to various components of the health care system. Microeconomic theory is used to understand the operation of health care markets and the behavior of participants (consumers, insurers, physicians, and hospitals) in the health care industry. International comparisons and the role of the public sector will be included. Prerequisites: Economics 180 and 210.

ECON 365 Multinational Finance and Emerging Market Economies

Analyzes the interaction between global capital and emerging market economies. It covers basic international financial management and considers topics such as the fundamentals of exchange rate and external accounts, international parity principles, exchange rate and banking crises in emerging markets, exchange rate risk management in emerging markets, country risk, international financing and investment in emerging markets, and global debt financing. Explores case studies related to multinational corporations doing business in emerging markets and analyzes financial crises in East Asia and Latin America. Prerequisites: Junior standing and Economics 237. (Cross-listed as Business 365.)

ECON 370 Managerial Economics

Analyzes the various ways in which microeconomic principles and quantitative tools can be used to aid managers in making sound decisions. Topics include forecasting consumer demand, production and cost analysis, optimal pricing and production decisions, sensitivity analysis, and capital budgeting. Prerequisites: Economics 130 and 210.

ECON 415 Corporate Finance

(Cross-listed as Business 415.)

ECON 420 Labor in the American Economy

Theories are developed on the supply and demand for labor as they determine the labor force participation of men, women, teenagers, and minorities. Issues of discrimination, education, job training, unions, government legislation, and women's work are discussed in the context of contemporary events. Prerequisite: Economics 210. (May be taken by economics and business majors to meet GEC Senior Studies Requirement. Cross-listed as Women's and Gender Studies 420.)

ECON 425 Business and Economic Forecasting

Employs regression techniques, time-series analysis, and business and economic indicators for forecasting economic and business variables. Prerequisites: Economics 110 and 180. (Cross-listed as Business 425. May be taken by economics and business majors to meet GEC Senior Studies Requirement.)

ECON 430 International Trade Theory and Policy

Analysis of elements of economic structure that determine trade flows, theory relating to how trade flows alter economic structure, the free trade versus protectionism argument, and selected topics in international economic integration and development. Prerequisites: Economics 210 and 220; junior or senior standing. (May be taken by economics and business majors to meet GEC Senior Studies Requirement; meets GEC Cultural Diversity Requirement.)

ECON 431 International Finance

Identifies and analyzes fundamentals of international financial theory. Topics include exchange rate determination, balance of payments accounting, and international monetary systems and their evolution. Prerequisites: Economics 210 and 220; junior or senior standing. (Cross-listed as Business 431. May be taken by economics majors to meet GEC Senior Studies Requirement.)

ECON 440 Advanced Macroeconomics

Analysis and comparison of Keynesian, neoKeynesian, neoclassical, monetarist, and rational expectationist perspectives on macroeconomic theory and stabilization policy. Prerequisites: Mathematics 110 and Economics 220; junior or senior standing. (May be taken by economics majors to meet GEC Senior Studies Requirement.)

ECON 470 Economic Development in the Third World

Inquiry into the nature and causes of the economic underdevelopment of Third World countries. (Meets GEC Cultural Diversity Requirement.)

ECON 480 Social Security, Pension, and Retirement

Analyzes social security, pensions, and retirement from three perspectives: the individual, the business firm, and public policy. The course will address a range of issues drawing upon

microeconomic theory, macroeconomic theory, and finance. The impact that the baby boomers' retirement has had on the economy has received much attention in public policy debates. Those debates include widely differing characterizations of the problems and solutions. Students will be expected to develop their own critical sense of these issues. Open to senior business or economics majors or juniors as space allows. Prerequisite: Economics 210. (Cross-listed as Business 480. May be taken by economics and business majors to meet GEC Senior Studies Requirement.)

ECON 481 Economics of Sport

Identifies and analyzes the commercial dimension of sport. Topics will include the market structure of professional and collegiate sport; the competitive balance in sports; pay and performance in sports; the history of facilities construction in sports; the economic impact of mega-sport events; and the economic impact of teams and sports stadiums. Prerequisites: Mathematics 110, Economics 310, and Economics 330. (May be taken by economics and business majors to meet GEC Senior Studies Requirement.)

ECON 487 Risk Management

(Cross-listed as Business 487.)

ECON 489 Globalization and Its Impact on Rich and Poor Countries

Examines the impact of globalization on rich countries (the United States) and poor countries (Mexico, India, and China). An examination of free trade agreements will cast light on the political motives behind these agreements as well as the economic projections made. The economic impact of the creation of free trade zones is explored using both microeconomics and macroeconomics. Statistical evidence will document whether globalization has caused growth in GDP, employment, and income in poor countries. The responsibility of multinational companies in creating sweatshops, worker exploitation, and cultural disintegration are discussed in light of U.S. businesses located in Mexico, India, and China. Prerequisites: Economics 110, 180, 210, and 220. (Cross-listed as Business 489 and Latin American Studies 489. Meets GEC Cultural Diversity Requirement. May be taken by economics and business majors to meet GEC Senior Studies Requirement.)

ECON 490 Internships

(Cross-listed as Business 490.)

ECON 499 Independent Study

Tutorials, research projects, and senior theses are available forms of independent study, with consent of the instructor.

BUSN 180 Quantitative Methods for Economics and Business

(Cross-listed as Economics 180.)

BUSN 230 Financial Accounting

Methods, practices, and concepts underlying the communication of relevant financial information to external parties. Development of the accounting model, measurement processes, data terminology and classification, internal control, interpretation and uses of financial statements. Prerequisites: Economics 110 and Mathematics 110 or 160 with grades of C- or better.

BUSN 237 Introduction to Finance

An overview of financial markets and corporate procedures and the ways they influence the allocation of scarce resources over time and under uncertainty. An introduction to investment theory and corporate finance is provided and specific financial securities and corporate practices are discussed. Prerequisites: Economics 110 and Mathematics 110 or 160 with grades of C- or better. (Cross-listed as Economics 237.)

BUSN 322 Emerging Markets Analysis

(Cross-listed as Economics 322, Asian Studies 322, Latin American Studies 322.)

BUSN 330 Intermediate Accounting

Accounting concepts, principles, and theory with an emphasis on the special problems that arise in applying these concepts to external reporting. Prerequisites: Business 230 with a grade of C- or better; junior standing.

BUSN 331 Managerial Accounting

Use of accounting information for evaluation of planning and control decisions. Topics include budgeting, cost-volume analysis, product costing, and standards for planning, control, and performance measurement. Prerequisite: Business 230 with a grade of C- or better.

BUSN 336 Marketing Theory for Multinational Enterprises

A study of the conceptual framework of marketing and its relationship to society and the global economy. Topics include economic foundations of international marketing, introductory marketing research concepts, consumer behavior models, financial analysis for marketing decision making,

and international marketing concepts. Emphasis will be on the discussion and critical analysis of readings and field research assignments. Prerequisite: junior standing.

BUSN 340 Asian Business Culture and Trade Relations

As China (including Hong Kong), Singapore, South Korea, and Taiwan expand global trade activities and improve their level of economic development, other Asian nations (Cambodia, Laos, Malaysia, Thailand, Vietnam) continue to face economic hardships. This course will address geographic, historic, cultural, economic, and political factors that influence business opportunities, economic development, and quality of life in Asia. An emphasis will be on regional and global trade relations related to health care products and services, infrastructure, food distribution, telecommunications, and education/job training. Instructional experiences will include field research activities involving Chicago-area resources. Prerequisite: junior standing. (Cross-listed as Asian Studies 340. Meets GEC Cultural Diversity Requirement.)

BUSN 350 Capital Budgeting

Study of advanced financial management and the evaluation of domestic and global business investment opportunities. Topics include the discounting of cash flows, foreign market risk analysis, capital asset pricing, and financial leverage decisions. Prerequisites: Economics 180 and Business 237.

BUSN 355 Mass Media/Marketing Research

A study of methods related to media communication, including theoretical foundations and applications of research designs, data collection techniques, and data analysis for quantitative and qualitative investigations. Assignments include presentations of case studies, creation of a research study, and field research exercises and small group activities related to issues faced by communications and marketing researchers. Prerequisites: junior standing and Business 180, or permission of the instructor. (Cross-listed as Communications 300.)

BUSN 365 Multinational Finance and Emerging Market Economics

(Cross-listed as Economics 365.)

BUSN 380 Investment Analysis

The process of selecting among alternative financial assets from the viewpoint of the individual. Emphasizes such topics as the evaluation

of risk and return, security markets and industry developments, regulatory practices, and portfolio theory. Prerequisites: Economics 180 and Business 237.

BUSN 385 Options and Futures

This course introduces the economic functions of options and futures markets, discusses the basic underlying pricing mechanism of options and futures contracts, and provides a working knowledge of these contracts as risk management tools. Prerequisites: Economics 180 and Business 237.

BUSN 415 Corporate Finance

Theoretical and empirical issues in corporate finance are examined from the perspectives of the firm, the shareholders, and public policy-makers. Topics covered include leveraged buy-outs and mergers, dividend policy, techniques used to raise capital, and the impact of the tax system on corporate activity. Prerequisites: Mathematics 110 and Business 237; junior or senior standing. (Cross-listed as Economics 415. May be taken by business majors to meet GEC Senior Studies Requirement.)

BUSN 425 Business and Economic Forecasting

(Cross-listed as Economics 425.)

BUSN 431 International Finance

(Cross-listed as Economics 431.)

BUSN 470 Latin American Global Business

Emphasizes analytic activities and case problems for corporate and entrepreneurial organizations operating or considering operations in Latin America. Economic theories, statistical tests, accounting records, financial analysis, and marketing concepts will be used to investigate business situations. Prerequisites: Economics 210 and 220, Business 230 and 237. (May be taken by business and international relations majors to meet GEC Senior Studies Requirement. Meets GEC Cultural Diversity Requirement if not used for GEC Senior Studies Requirement. Cross-listed as Latin American Studies 470.)

BUSN 480 Social Security, Pension, and Retirement

(Cross-listed as Economics 480.)

BUSN 487 Risk Management

Provides a broad-based survey of the fundamental risks faced by financial institutions and other firms. These include interest rate risk, market risk, credit risk, off-balance sheet risk,

technology and operational risk, foreign exchange risk, energy risk, country or sovereign risk, liquidity risk, insolvency risk, model risk, and a myriad of others. Effective management of these risks is central to the performance of any firm. Explores the various techniques used to identify risk, measure risk, and manage risk. The knowledge gained in basic finance, portfolio management, derivatives, business management, economics, and statistics will be put to practical use. (May be taken by business majors to meet GEC Senior Studies Requirement.)

BUSN 489 Globalization and Its Impact on Rich and Poor Countries

(Cross-listed as Economics 489 and Latin American Studies 489.)

BUSN 490 Internships

Provides an opportunity to supplement academic training with work experience in the field of business and economics. Interested students must work with the Career Advancement Center to develop a resume and register with the instructor by the following deadlines: by April 1 for a Fall internship; by November 1 for a Spring internship; and by the week following spring break for a Summer internship. Business and economics internships must be done for two credits. Prerequisites: junior or senior standing; no more than one credit of previous internship experience, and this experience must not be similar to a subsequent internship in terms of skills or knowledge learned or applied; Economics 110 with a grade of C- or better, as well as other designated courses relevant to the specific type of internship (see the instructor for information on the specific course prerequisites for each category of internship). The department will not give credit for internships that do not build directly on prior course work; students on academic probation are ineligible for this program. (Cross-listed as Economics 490.)

EDUCATION

Professor Louis Lombardi
Philosophy of Education.

Associate Professor Dawn Abt-Perkins, Chair
Secondary Education.

Assistant Professor Rachel Ragland
Secondary Education.

Assistant Professor Shelley Sherman
Elementary Education.

Assistant Professor Ursula Richetts
Elementary Education.

Lecturer Harlan Goldberg
Mathematics.

Lecturer Barbara Harvey
Foreign Language Methods.

Lecturer Catherine Sardo Weidner
History of Education.

The mission of Lake Forest College's teacher education programs is to provide a developmental program of study that enables undergraduates to become effective teachers in today's highly demanding classrooms. Since the majority of our teacher education candidates are of traditional undergraduate age, we are committed to an appropriately-paced and structured sequence of courses and field experiences that provide multiple opportunities for students to demonstrate their instructional skills, intellectual strengths, and personal commitments. Lake Forest College's teacher education programs thus provide opportunities for each teacher education candidate to grow into the role of teacher. Faculty and cooperating teachers provide ongoing and personalized assessment, mentorship, and advising. Our ultimate goal is to ensure that the young adults who come to us with a dream to teach become responsible professionals who are confident in their classrooms, deeply knowledgeable about subject matter, responsive to their students, and committed to their own growth as lifelong learners.

The belief of the education department is that the best preparation for any teaching career—elementary or high school—is a broad and liberal education. All candidates for teaching

certificates are required to take courses throughout the divisions of the College and to complete another academic major in addition to an education major. Lake Forest College is entitled by the state to prepare students for certification in elementary schools (grades K-9) and high schools (grades 6-12). Currently, Lake Forest College has certification programs at the secondary level in mathematics, English, history, politics, chemistry, biology, physics, Spanish, and French only. Middle school designations are incorporated in the secondary program of study, and middle school electives are offered in the elementary program.

In 2003-2004, all 14 Lake Forest College students recommended for certification had a 100% passing rate on all state certification exams. Lake Forest College has a 14-week student teaching program, requiring a minimum of 600 classroom hours. The student teacher/supervising faculty ratio never exceeds 7 to 1.

Students who are particularly interested in urban education may participate in the Urban Education Program of the Associated Colleges of the Midwest (ACM). ACM coordinates many offerings for students in nearby Chicago, including a program leading to bilingual or English as a Second Language certification at either the elementary or secondary level. For descriptions of courses, please see Urban Education Program in Undergraduate Curriculum.

Students who wish to complete a teacher education program at any teaching level must complete the requirements for admission to a certification program.

The department sponsors a chapter of Kappa Delta Pi, an international honor society in education, and a student chapter of the National Education Association.

ELEMENTARY AND SECONDARY TEACHER CERTIFICATION PROGRAMS

General Information: the sequential steps leading to Teacher Certification, Elementary (K-9) or High School (6-12).

All students in the teacher education program fulfill four sets of requirements to graduate with a recommendation for certification:

1. General education courses for graduation from Lake Forest College that include courses in the humanities, natural and social sciences, courses in cultural diversity, and courses in communication skills, with a particular emphasis on writing skills.
2. A full major course of study in the Department of Education.
3. A full major course of study in the content area of certification (secondary) or any content major in the college (elementary).
4. Additional courses as necessary to meet Content Area Standards in broad fields.

Stages of the Teacher Education Program at Lake Forest College

1. *Becoming an Education Major:*

Students who have a 2.5 GPA at Lake Forest College or, in the case of transfer students, have transcripts which have been evaluated by the Chair of the Education Department and who have declared a major in a department other than Education, may approach a member of the Education Department faculty to declare an education major. At this time, a tentative four-year course of study to meet program requirements will be constructed and students will be informed about necessary state certification exams and other program requirements, including portfolio requirements.

Students must agree to allow Lake Forest College to conduct a criminal history check for school security purposes. Students must successfully pass such a check to maintain the education major. Declaring an education major is necessary before students can register for Education 210, Observing the Schooling Process, the introductory course in the education major.

2. *Becoming a Teacher Candidate: Entering a Teacher Education Program*

Students who have successfully completed or are in the process of successfully completing with a B- or better coursework in Education 210 can apply for entrance to a teacher education program. Students need to submit the following at the time of interviewing for program entrance:

A. A transcript with a 2.75 GPA at Lake Forest College.

B. A transcript indicating a B- or better in Education 210 or the average of Education 210 and History 270 or Philosophy 220 combined.

C. A portfolio of artifacts demonstrating the Identifying Characteristics of a Lake Forest College Educated Teacher.

D. Evidence that he/she has adhered to the Lake Forest College Statement of Respect and Responsibility and have not violated any college policies in ways that call into question the candidate's readiness for teaching as outlined in the Identifying Characteristics of a Lake Forest College Educated Teacher. This can be demonstrated through (1) Academic advisor's evaluation form, (2) Dean of Students evaluation form, and (3) Education 210 instructor's positive recommendation.

E. Evidence of passing the Illinois State Board of Education's Basic Skills Exam.

F. A content-area portfolio demonstrating successful and sufficient progress in a content-area major (for secondary program candidates) or content areas (for elementary program candidates).

In addition to the above, students must successfully pass an interview with members of the Department Faculty and elected student members of the Education Advisory Council. At the interview, students will be assessed on (1) seriousness of purpose/commitment, (2) oral communication skills, (3) academic skills including flexibility, maturity, and independence, (4) relevant experiences with targeted age group. The Department Chair will invite majors to interview based on readiness for program entry. Readiness indicators include grade point average, performance in Lake Forest College courses required for education majors, and demonstrations of responsibility on campus, in the classroom, in field experiences, and in advising situations.

To maintain teacher education program candidacy, students must continue to sustain the above requirements. Students will be exited from the program and will need to reapply if not all of the above requirements are sustained or if evidence is obtained that brings into question the candidate's readiness for teaching as articulated in the Identifying Characteristics of a Lake Forest College Educated Teacher.

Students must become candidates before they can enter the internship courses (Education 304; Education 315) in any of the teacher education programs.

3. *Becoming a Student Teacher: Application for Student Teaching*

Teacher candidates who successfully complete (with a B- or better) internship and methods coursework (all 300 and 400 level courses) may apply for a student teaching placement. This application process must be completed within the first three weeks of the semester prior to the requested student teaching placement.

The following evidence must be presented by the Education Department advisor to the Education Advisory Council:

- a. Fieldwork supervisor recommendations for continuation in certification program upon completion of internship.
- b. Teacher candidate self-assessment to prepare remainder of content-area and professional portfolio to demonstrate competencies in meeting program standards.
- c. Evidence of completion of content-area or second major course of study.
- d. A transcript with a 2.75 GPA.
- e. Passing score on content-area or elementary exam given by the Illinois State Board of Education.

The Education Advisory Council can ask for additional evidence such as recommendations from course instructors, cooperating teachers, college personnel, or additional portfolio artifacts.

Following approval by the EAC, candidates will meet with the Coordinator of Field Experiences for further instructions on the placement process.

4. *Becoming a Licensed Teacher: Application for Recommendation for Certification*

The Certification Officer will recommend student teachers for certification when the following is completed:

- a. Application for License, including declaring citizenship and no felony charges,
- b. Successful assessment of portfolio presented to Exit Assessment Committee of the Education Advisory Council,
- c. Passing grade in student teaching,
- d. Fieldwork supervisor's report of successful performance and completion of Illinois State

Board of Education's Content Area Standards in Student Teaching,

e. Passing the Assessment of Professional Teaching exam given by the Illinois State Board of Education.

For more details on course sequences and developmental checkpoints, see the Education Department Policies and Procedures Handbook and the Developmental Portfolio Handbook at </academics/programs/educ/handbooks.asp> and the Education Major Planning Sheets at [/academics/programs/educ/plan_sheets.asp](/academics/programs/educ/plan_sheets.asp)

Academic Grievances for Teacher Education Students

Teacher education candidates have the same academic rights and responsibilities as all Lake Forest College students. There are, however, specific situations in the teacher education program when decisions may be cause for student grievances. These situations include the following:

- admission to or dismissal from the teacher education program, a clinical experience, or student teaching
- evaluation of the candidate's performance in courses, clinical experiences, or student teaching
- recommendation for state certification or for employment

Students who wish to appeal any of these teacher education matters should first confer with the chairperson of the Education Department. Appeals must be made in writing to the Education Advisory Council through the chairperson of the Education Department. Students may have personal, academic, or legal support in hearings concerning teacher education matters. The case may be further appealed to the Academic Appeals Board and, finally, to the President of the College.

104 Elementary Mathematics from an Advanced Standpoint

This course presents an overview, for a sophisticated audience, of several topics from elementary mathematics. The course stresses three themes: mathematics in the liberal arts, mathematics from a historical perspective, and mathematics as a problem-solving activity. Topics to be covered include numeration systems, non-base-10 representations, and elementary number theory including primes and factorizations, rationals as

terminating and repeating decimals, irrationals, simple probability experiments, elementary set theory, and mathematical reasoning. (Cross-listed as Math 104.)

126 Concepts of Health Education (Offered in the Physical Education Department)

Concepts of health, physical education, and physical well-being with particular focus on the teaching of each concept. The course includes physical fitness, health, and sport-related activities geared toward teaching both basic skills and team dynamics. Red Cross, CPR, and first aid will be taught for certification. Required course for elementary education majors and ideal for those interested in coaching careers, one-half course credit. (This course does not carry graduation credit but will be recorded on the student's academic record and may be taken in addition to the regular course load. No tuition fee for this course is charged to full-time students paying the comprehensive tuition for the semester).

209 Learning About the Living World

This course will examine selected topics in life science and earth science such as the human body and its functioning, ecology, ecosystems, weather, the water cycle, and erosion. Designed primarily to provide elementary education majors with the necessary background for teaching in K-8 schools, the course is appropriate for other students interested in strengthening their knowledge and confidence in investigating fundamental concepts and ideas in science. Students will participate in lectures, discussion, student presentations and projects, and laboratory activities. Two 50-minute class hours per week plus one two-hour session for laboratory, demonstrations, or field work. Does not satisfy requirements for the Biology major. (Cross-listed as Biology 209.)

210 Observing the Schooling Process

An introduction to the teaching-learning process from elementary through high school. Participants observe, analyze, and discuss a variety of educational environments, including classrooms with exceptional students and classrooms in multicultural settings. Major focus on developing competencies in educational library research and writing skills. (Limited to education majors who have obtained a minimum GPA of 2.5 at Lake Forest College. Meets GEC First-Year Writing Requirement.)

215 Instructional Communication Theory and Practice

This course applies socio-linguistic theory to the understanding of learning in academic settings. Based on the premise that knowledge is socially constructed, race, gender, class, and ethnicity are considered social markers that shape the meanings and the values assigned to instructional messages. Students research communication practices in their classrooms, apply cultural theories in their analyses, and practice methods and strategies toward becoming more effective communicators. (Meets GEC Cultural Diversity Requirement.)

220 Philosophy of Education

(Cross-listed as Philosophy 220.)

232 The Teaching of Writing

Introduces students to theories of writing development with the intention of learning to teach others how to improve their writing skills and strategies. (Cross-listed as English 232.)

270 History of Education in American Society and Thought

(Cross-listed as History 270.)

303 Reading in the Elementary School

Places emphasis on theories of language acquisition and on characteristics of language development as they relate to teaching reading and the language arts. Includes alternative approaches to reading and language arts instruction including whole language and strategies for teaching students with exceptional needs, especially the learning disabled. This course must be taken concurrently with Education 304. Prerequisites: Education 210 and certification candidate status.

304 Elementary Fieldwork and Seminar

Half-day internship in the elementary school. Elementary certification candidates complete 125 hours of supervised classroom observation and participation. Placements are arranged by the Education Department and supervised by faculty within the Education Department on a biweekly basis. Placement in a multicultural setting is required. This course must be taken concurrently with Education 303. Prerequisites: Education 210 and certification candidate status. (Meets GEC Cultural Diversity Requirement.)

306 Teaching Adolescent Students

This course emphasizes the importance of developing special skills, competencies, and

understanding for teaching middle school students. It includes middle-grade philosophy, curriculum, instruction, and methods; design and development of middle-grade lessons and programs; assessment coordination and referral of students to health and social services; and observation and participation in middle school classrooms. Prerequisites: Education 303 and 304.

311, 411 Advanced Fieldwork (Offered Less Frequently)

Students who have completed 210 and wish to have additional experience of a different nature in school settings may apply for independent study in schools. Research on some special aspect of schooling is often required. This course is graded only on a Credit/D/Fail basis.

312 Integrating the Arts in the Learning Process

This course focuses on the integration of the fine arts in the elementary school curriculum. Students will learn how to meaningfully incorporate the visual arts, drama, music, and dance across the natural sciences, social sciences, and humanities in K-8 classrooms to enrich the learning process.

313 Reading in the Content Areas

Multiple approaches to the teaching of reading, characteristics of language development and its relation to intellectual development in the disciplines, and the application of instructional models to the teaching of writing and reading in the content areas, including teaching exceptional students, especially the learning disabled. This course must be taken concurrently with Education 315. Prerequisites: Education 210 and teacher certification candidate status.

314 Inclusive Learning Environments

Emphasis on approaches and methodology that establish an inclusive classroom environment including strategies for curriculum and management modification for students with exceptionalities. Topics include identification of various exceptionalities (e.g., learning disabilities, mental retardation, physical disabilities, etc.) that affect students and the structuring of their learning environments; the role of the special educator in relation to the regular classroom teacher; federal and state legislation that governs special education and the role of the regular classroom teacher; observation and analysis of students with exceptionalities in various learning environments; multicultural and linguistic differences as related to special educa-

tion. Limited to juniors and seniors who plan to complete certification. Prerequisite: Education 303/304 or 313/315 or permission of the department chairperson.

315 Middle School Fieldwork and Seminar

Half-day internship in the middle and junior high school. Secondary certification candidates complete 125 hours of supervised classroom observation and participation. Placements are arranged by the Education Department and supervised by faculty within the Education Department on a biweekly basis. Placement at a multicultural site is required. Prerequisite: Acceptance for certification candidacy. (Meets GEC Cultural Diversity Requirement.)

415 Special Studies in Education (Offered Less Frequently)

Advanced research in the process of schooling and teaching. May be an independent project or an advanced internship. Available only to juniors and seniors. Can be taken for one or two credits depending on the scope of the project and with approval of Department Chair.

416 Curriculum and Instruction in the Elementary School: Content-Area Literacy and Social Studies

Seminar focusing on curriculum and instructional planning for elementary teaching. Includes theoretical and philosophical frameworks for curriculum design, instructional approaches, and assessment. Also stresses principles of establishing various learning environments for student engagement in learning and curriculum integration and how curricula are organized for children at differing developmental levels with various backgrounds in school literacy environments. Includes content-area reading theories, strategies, approaches to the organization of social studies curricula and instruction, and integration of the fine arts. Prerequisite: Education 303/304 with a grade of B- or better; co-requisite: Education 417.

417 Curriculum and Instruction in the Elementary Schools: Math and Science

Seminar focusing on curriculum and instructional planning for elementary teaching in math and science and how math and science curricula are organized for children at differing developmental levels and with various backgrounds. Includes theoretical and philosophical frameworks for curriculum design, instructional approaches, and assessment in math and science. Also stresses principles of and practice for using various technological teaching tools. This course has

substantial fieldwork experiences in science, math, and technology instruction. Prerequisite: Education 303/304 with a grade of B- or better; co-requisite Education 416.

418 Elementary Student Teaching and Seminar

Full-day supervised teaching for 14-15 weeks in a cooperating school and a weekly seminar. This course is graded only on a Credit/D/Fail basis. Prerequisite: Education 416/417 with a grade of B- or better.

419 Secondary Curriculum and Instructional Design

Seminar focuses on the practical use of educational theory in the secondary classroom by investigating and applying knowledge of curriculum design, learning theory, lesson and course planning, evaluation, integration of classroom technology, and management. Students will conduct research on teaching theory, present general lesson design demonstrations, and analyze unit structures and resources. Prerequisite: Education 313/315 with a grade of B- or better; co-requisite Education 420.

420 Discipline-Specific Secondary Curriculum and Instructional Design

Seminar focusing on approaches and methodology in the teaching of the content area of certification. Students will explore instructional theories central to their teaching discipline, subject matter-specific ways of constructing knowledge, and specific methods of inquiry and assessment for learning in a particular subject field. Students will conduct research on an area of study, present content-area demonstrations, lectures, and activities, and construct an electronic portfolio of resources for teaching in their disciplines. In addition, each student will be assigned a clinical placement in a high school for observation hours and consultation with a field-based faculty mentor in connection with the class. Prerequisite: Education 313/315 with a grade of B- or better; co-requisite Education 419.

421 Secondary Student Teaching and Seminar

Full-day supervised teaching for 14-15 weeks in a cooperating school and a weekly seminar. This course is graded on a Credit/D/Fail basis. Prerequisites: Education 419 and Education 420 with a grade of B- or better.

ENGLISH

Professor Richard Mallette
English Literature. The Renaissance.

Associate Professor Robert Archambeau
English Literature. Nineteenth-Century Literature. Writing Poetry.

Associate Professor Judy Massey Dozier, Chair
African American Literature. Gender Studies. Nineteenth-Century American Literature.

Assistant Professor Davis Schneiderman
Writing. Twentieth- and Twenty-First-Century Literature. Postmodernism.

Lecturer Bernice E. Gallagher
Director of Writing Programs.

Lecturer Tracy McCabe
Women's Studies. Writing.

Lecturer Ted Schaefer
Composition. Journalism.

The Department of English offers courses central to liberal arts education, not only for English majors but also for other students who wish to enrich their understanding of literature and language and to develop their skills as readers and writers. These are skills essential to leading constructive and imaginative lives. They also provide preparation for careers in law, teaching, publishing, advertising, communications, business—for any work that requires the ability to read, to write, and to think well. The department provides a range of courses for all students in the College. Writing courses include English

100, 231, 235, 242, 330, 332, 360, and 361 (some writing courses require the submission of a writing sample to the instructor). Literature courses designed for first-year students include English 110 (designed for first-year students and prospective majors) and many 200-level courses. With the exception of 100 and First-Year Studies, all English courses are open to upperclass students of all majors.

ENGLISH MAJOR

The department has designed a curriculum for English majors that reflects our commitment to the study of literature as well as writing. Hence we offer two areas of concentration: a literature track and a writing track. Both are grounded in a study of literary tradition. All majors learn how to read and interpret complex texts, how to relate one text to another and to a tradition, and how to read texts within historical and multicultural contexts. We offer literature courses organized in various ways, focusing on historical periods, single authors, literary types, thematic issues, multicultural literatures, and gender issues. Majors who choose the writing track elect to focus on either imaginative or nonfiction writing.

After choosing either a literature track or a writing track, students continue to diversify and deepen their study in advanced courses appropriate to the track.

Literature Track Requirements

Classics of Literature Sequence (to be taken in chronological order): English 210, 211, and 212.

Two period courses from English 300, 301, 302, 303, 304, 305, 306, 307, 308, 316, 331, 341, 342, 345, 351, 400, 401, 402, and 403.

One course from English 204, 216, 220, 221, or a third course from the second list above.

English 450.

At least two electives to complete a nine-course minimum for the major.

Writing Track Requirements

Classics of Literature Sequence (to be taken in chronological order): English 210, 211, and 212.

Two courses from English 204, 216, 217, 218, 220, 221, 230, 253, 300, 301, 302, 303, 304, 305, 306, 307, 308, 316, 331, 341, 342, 345, 351, 400, 401, 402, and 403.

The Writing Courses

For imaginative writers: 235; then 360, 361, or 242; and 440.

For nonfiction writers: 235; then 330 or 332; and 440.

At least one elective to complete a nine-course minimum for the major.

First-year students considering an English major are advised to take English 110 or 210. Once a major has been declared, the student will consult with a departmental advisor and work out an appropriate study program. Majors in the literature track who plan to do graduate work in literary studies should consult with their advisors and orient their programs toward the period courses and have a reading knowledge of at least one modern foreign language, preferably French or German. Special studies courses in which topics may vary from year to year may be taken more than once, but majors may count them only once toward the nine-course minimum for the major.

Students declaring the English major will be required to pass a qualifying examination within two semesters of declaring. The examination will involve defining 25 terms descriptive of literary form. These 25 will be drawn from a list of 75 that the department distributes in all its courses. All required 200-level courses in writing and literature will involve discussion of these formal terms. Except in extraordinary circumstances, students will have two chances to pass the exam.

ENGLISH MINOR

Classics of Literature Sequence: 210, 211, and 212, to be taken in chronological order.

Two courses from 300, 301, 302, 303, 304, 305, 306, 307, 330, 331, 341, 342, 345, 351, 360, 361, 400, 401, 402, and 403.

One course at 200 or above, to complete a six-course minimum for the minor.

SENIOR RULE

The following rule applies to all seniors majoring or minoring in English: No written work

submitted for any course offered within the English department shall be considered acceptable unless it is free of errors in grammar, punctuation, spelling, and usage.

100 English Composition

Designed for first-year students and other students (upon consultation with the director of writing programs) to achieve effective expository and argumentative prose. Frequent papers will develop basic writing and research skills. (Does not apply toward the major. Not open to upperclass students. Does not meet GEC Humanities Requirement.)

101 Writing Center Tutorial

An expository writing course for students identified by the director of writing programs. (Does not apply toward the major. Not open to upperclass students. Does not meet GEC Humanities Requirement.)

110 Introduction to Literary Studies

Designed to introduce prospective majors to English studies. Primarily for first-year students but also for others who wish to acquire useful skills as readers and writers by developing critical abilities in studying literature. (Does not apply toward the major. Meets GEC First-Year Writing Requirement.)

203 American Literature I: Early American Literary Culture (Offered Less Frequently)

The origins and growth of the American literary imagination from its beginnings in Puritan documents through major works of the early Romantics.

204 Nineteenth-Century American Literature

Works of representative writers: Poe, Hawthorne, Melville, Thoreau, Emerson, Whitman, Dickinson, and Twain. Topics of discussion include Emerson's influence on American culture, developments in American literary form, and themes of American community and nature.

205 Twentieth-Century American Literature

Works of representative writers. Topics of discussion include American identity and the "American dream," developments in literary form, and the social and political values of modern literature.

206 American Nature Writing

An historically organized survey of the various rhetorics through which nature has been under-

stood by Americans from the Puritans to contemporary writers: the Calvinist fallen landscape, the rational continent of the American Enlightenment, conservation and "wise use," and preservation and "biodiversity." (Cross-listed as Environmental Studies 206.)

210 Ancient and Medieval Literature

The origins of Western literary tradition traced through such classic figures as Homer, Virgil, and Dante. A survey of major English literary texts, culminating in Chaucer. (Meets GEC First-Year Writing Requirement.)

211 English Literature I: The Renaissance and Eighteenth Century

The continuation of the Classics of Literature Sequence, focusing on such major figures as Shakespeare, Milton, Swift, and Pope seen against the developments and traditions of the two periods. English 210, 211, and 212 are to be taken in sequence, unless under exceptional circumstances.

212 English Literature II: The Nineteenth and Early Twentieth Centuries

The third in the Classics of Literature Sequence, from the Romantics through Modernism, seen against the developments and traditions of the last two centuries. English 210, 211, and 212 are to be taken in sequence, unless under exceptional circumstances.

215 Myth and Literature

An examination of the ways in which literature derives from, alters, and creates myth. Readings drawn from the Bible, classical mythology, Arthurian legend, and medieval and modern literature.

216 African American Literature I

A study of slave narratives and contemporary revisions. Includes works by Equiano, Douglass, Delaney, Jacobs, Morrison, Johnson, and Williams. (Cross-listed as African American Studies 216. Meets GEC Cultural Diversity Requirement.)

217 African American Literature II

An examination of narrative attempts before, during, and after the Harlem Renaissance to move from imposed stereotypes toward more accurate representations of African American experiences. Includes works by Chesnutt, Du Bois, Hurston, Larsen, Hughes, Toomer, Baldwin, and Walker. (Cross-listed as African American Studies 217. Meets GEC Cultural Diversity Requirement.)

218 Blues Women in African American Literature

An analysis of the representation of "blues women" and the music in writings by African Americans. Authors include Larsen, Hurston, Morrison, Wilson, Jones, and Walker. (Cross-listed as African American Studies 218 and Women's and Gender Studies 218. Meets GEC Cultural Diversity Requirement.)

220 Shakespeare

Selected plays to show Shakespeare's artistic development; intensive analysis of major plays. Students who have taken English 221 or Religion 221 may not take 220. (Cross-listed as Theater 236.)

221 Shakespeare and Religion

A team-taught, interdisciplinary examination of a number of Shakespeare's plays that center on religious themes, values, discourses of faith, and representations of belief. The course will also focus on the moral and spiritual issues that religious thought has brought to bear on Shakespeare. Attention will focus on those plays in which Shakespeare most variously dramatizes religious questions. Students who have taken English 220 or Theater 236 may not take 221. (Cross-listed as Religion 221.)

223 Literary Types and Traditions: Multicultural Literature

An examination of literary works by writers from American minority groups and from the post-colonial world. The course explores how these writers negotiate between cosmopolitanism and a sense of rootedness in particular communities. (Meets GEC Cultural Diversity Requirement.)

224 Special Studies: Literature of the Vietnam War

This course examines the Vietnam War as refracted through various literary genres. The readings for the course include Graham Greene's *The Quiet American*, Tim O'Brien's *The Things They Carried*, and Truong Nhu Tang's *Vietcong Memoir*.

224 Special Studies: British Detective Fiction

In this course we will read a few Victorian novels —by Charlotte Bronte, Wilkie Collins, and Charles Dickens—that focus (as much as what Henry James called "loose baggy monster(s)" can focus) on a secret, mystery, or crime. They all have characters who function as detective figures, villains, victims, and suspects. The date and place of the first "real" detective story is often debated,

but discovering these "facts" will not be the goal of the course. Instead, we will look at what was happening to the form at this specific time and place.

225 Women and Literature

A study of how gender has affected the production and reception of literature. Emphasis on women writing in English between 1800 and the present. Attention paid to the representation of women in writings by men. Writers covered may include Austen, Brontë, Dickinson, Woolf, Plath, and more recent authors. (Cross-listed as Women's and Gender Studies 225. Meets GEC Cultural Diversity Requirement.)

230 Theater History I: Greeks to Shakespeare

(Cross-listed as Theater 230.)

231 Introduction to Journalism

A course in news reporting and writing for newspapers, magazines, and broadcast media. With workbook exercises and writing assignments, students handle many kinds of journalistic story, ranging from interviews to sports and speeches and investigative reporting. Intended for English and communications majors.

232 The Teaching of Writing

(Cross-listed as Education 232.)

233 Theater History IV: Circus to Performance Art

(Cross-listed as Theater 233 and Art 227.)

234 Theater History II: Moliere to Ibsen

(Cross-listed as Theater 231.)

235 Introduction to Creative Writing

A beginning course in the art of writing fiction, poetry, and nonfiction prose. Literary analysis will be combined with creative assignments. Group discussions and individual conferences.

236 Theater History VI: Musical Theater

(Cross-listed as Theater 235 and Music 235.)

237 Theater History III: Shaw to Kushner

(Cross-listed as Theater 232.)

242 Playwrighting

(Cross-listed as Theater 270.)

245 Dramatic Criticism

(Cross-listed as Theater 245.)

250 Contemporary Literature

This course will examine literary texts that address questions of ideology and the marketplace, and it will include diverse multicultural literary perspectives.

251 Postcolonial Literatures

A course exploring themes in the literatures of Africa, India, the Caribbean, and the Islamic world from the end of colonialism to the present day. Topics include postcolonial "writing back" to the literature of empire; nativism; ethnocentrism and the search for an authentic postcolonial voice; cultural hybridity; and the literature of migration and exile. (Meets GEC Cultural Diversity Requirement.)

252 Introduction to Women's and Gender Studies

(Cross-listed as Women's and Gender Studies 252. Meets GEC Cultural Diversity Requirement.)

253 Modern Irish Writers

A course in Irish fiction, poetry, and drama of the twentieth century, including works by Joyce, Beckett, Yeats, and Synge. We will explore questions of nationalism, language, and modernism in Irish literature and will consider the works in historical contexts.

300 Medieval Studies: The Chaucerian and Arthurian Traditions

This course will consider two overlapping traditions of medieval narrative, and it will vary in its emphasis year by year: on the one hand, Arthurian myth from chronicle history to courtly romance; on the other, Chaucerian narrative, including *Troilus and Criseyde*. Readings will explore the continental roots of the English works. This course will also consider the lives and works of medieval women. Prerequisite: English 210.

301 The Renaissance

A study of early modern genres, including works by Parr, Sidney, Spenser, Shakespeare, Donne, and Wroth. Prerequisites: English 210 and 211.

302 John Donne and His Contemporaries

Literature of the earlier seventeenth century with close study of works by Donne, Herbert, Jonson, Burton, Browne, and others in the baroque tradition. Prerequisites: English 210 and 211.

303 The Age of Satire: The Pope-Swift Circle (Offered Less Frequently)

Principal neoclassical writers, including the Restoration dramatists and Dryden; the Augustans; Johnson, Fielding, and Sheridan.

304 The Romantic Period

Key works, both poetry and prose, of Blake, Wordsworth, Coleridge, Lamb, Byron, Shelley, and Keats. Exploration of themes and ideas of a revolutionary era. Prerequisite: English 212.

305 Victorian Literature

Masterpieces of fiction, nonfiction, and poetry by Dickens, Tennyson, Browning, Carlyle, Arnold, Hardy, Wilde, and others. Prerequisite: English 212.

306 The English Novel

Development of the novel; representative works by major figures from Defoe through Conrad. Prerequisite: English 212.

307 Women Writers: Austen, Wharton, Woolf

Detailed study of several novels and other writings by each author. Attention paid to historical context and to feminist theories of literature. (Cross-listed as Women's and Gender Studies 307. Meets GEC Cultural Diversity Requirement.)

308 Renaissance Drama

Who were the other popular playwrights of Shakespeare's day? Have they been overshadowed by the Bard's fame? In this course we will discuss, watch films of, and stage scenes from the vibrant and stage-worthy plays of the late sixteenth and early seventeenth centuries in England, including the witty comedies of Jonson and Dekker, and the horrific tragedies of Kyd, Marlowe, Marston, Middleton, Tourneur, Webster, and Ford. The course will culminate in a discussion of the film *Shakespeare in Love*, which portrays playwrights, actors, managers, and other historical figures of the English Renaissance. (Cross-listed as Theater 308.)

310 Introduction to the African Novel in English

A study of the political concerns that motivate a group of African writers and an investigation of the way formal strategies and techniques derived from African cultural traditions shape a hybrid with imported European forms. Readings include Chinua Achebe's *Things Fall Apart*, Buchi Emecheta's *The Joys of Motherhood*, Ayi Kwei Armah's *The Beautiful Ones Are Not Yet Born*,

Ngugi wa Thiong'o's *Devil on the Cross*, Mariama Ba's *So Long a Letter*. (Cross-listed as African American Studies 310. Meets GEC Cultural Diversity Requirement.)

316 Voices of Reform: Nineteenth-Century African American Writings

A study of African American literature and theory published immediately before and following the Civil War. Readings will focus on identity (re)formation, social order, morality, Northern neo-slavery, institution building, women's rights. Authors will include Booker T. Washington, Ida B. Wells-Barnett, Anna Julia Cooper, Harriet Wilson, Frances E.W. Harper, William Wells Brown, Sojourner Truth, Charles Chesnut, and Frederick Douglass. English 216 is the prerequisite for first-year students and sophomores; no prerequisite for juniors and seniors. (Meets GEC Cultural Diversity Requirement.)

321 Modern Fiction

An exploration of modern fiction as it developed in the late nineteenth and twentieth centuries, including such writers as Dostoevsky, Joyce, Lawrence, Kafka, and Hemingway. Prerequisite: any 200-level literature course.

322 Modern Poetry

Major figures in English and American poetry of the twentieth century. Prerequisite: any 200-level literature course.

325 Black Literature of the 1960s

A study of the literature produced by participants in the Black Arts and Civil Rights movements. Authors may include Amiri Baraka, Malcolm X, Martin Luther King Jr., Haki Madhubuti, Sonia Sanchez, Assata Shakur, Eldridge Cleaver, Gil Scott-Heron, and Angela Davis, among others. Prerequisite: English 217 or permission of the instructor. (Cross-listed as African American Studies 325. Meets GEC Cultural Diversity Requirement.)

326 Interdisciplinary Studies: Postmodernism

An interdisciplinary study of postmodernism as a literary and cultural phenomenon that redefines both local and global communities. The course will investigate aesthetic production during the post-WWII period by American and world writers and artists, with an additional focus on the theoretical basis of postmodernism. (Meets GEC Cultural Diversity Requirement.)

330 Advanced Nonfiction Writing

Emphasis on writing the personal essay and other kinds of creative nonfiction, i.e., film reviews, travel writing, and descriptive writing. Students will complete at least one lengthy writing project of their own devising. Workshop, group discussion, and conferences.
Prerequisite: English 235.

331 The Enlightenment

Readings and discussions of the central ideas of Europe in the eighteenth century, with emphasis on Britain and France. Topics include the social and political context of the Enlightenment, the impact of science, and the development of notions of tolerance, freedom, and rationality.
Prerequisite: English 211. (Cross-listed as History 331.)

332 Creative Nonfiction Writing: Environmental Writing

This is a course in creative nonfiction with a particular focus on writing about the environment. Students will explore different approaches to the environmental essay, including adventure narrative, personal reflection, and natural history. We will also use the immediate surroundings of the Chicago area as an environment for our writing. Prerequisite: English 235 or a lower-level Environmental Studies course. (Cross-listed as Environmental Studies 332.)

340 Theater Criticism

(Cross-listed as Theater 340.)

341 Romanticism: Revolutions in Self and Society

The Romantic Era (ca. 1780–ca. 1830) is often considered to be a period of revolution in politics, culture, and society. This course examines the evolving relationship of self and society through five decades of European history. Discussions will center on major figures and events of the Romantic period in English, France, and Germany.

342 History and Literature: Crises in England, 1485–1660

An interdisciplinary opportunity to investigate one seminal era. Topics include the “lost” world of early modern family and social life; the English Reformation; the aristocracy and the rise of the gentry; Renaissance heroism and “self-fashioning”; women’s lives and literature; early modern biography and lyric subjectivity; Tudor and Stuart monarchy; the causes of the English Civil War; and the emergence of the scientific world-view. Prerequisite: either one English or one

history course at the 200 level or above. (Cross-listed as History 342.)

345 Neglected American Novels of the Nineteenth Century

A seminar on nineteenth-century novels not usually covered in typical surveys of the century. Course material will include novels by neglected writers such as Harold Fredric and Lydia Maria Child, along with some less-known works by major figures such as Melville and Stowe.
Prerequisite: English 204.

351 Junior Colloquium: American Women Writers of the Gilded Age: 1865–1914

This course examines the social practices, the economic/political environment, and the religious beliefs of the late nineteenth century. It shows how culture, history, and gender influenced women authors and their audiences. Authors include Alcott, Chopin, Gilman, Wharton, and others. (Cross-listed as Women’s and Gender Studies 351. Meets GEC Cultural Diversity Requirement. Prerequisite: English 204.)

353 Environmental Justice

The environmental justice movement examines how poverty and racism play out ecologically and politically: in the location of toxic waste dumps and polluting factories, in the migration of people across national borders, and in the assertion of land and water rights. This course will explore these issues through literary and environmental-studies texts that challenge the traditional parameters of nature writing. Prerequisite: one course at the 200-level in either English or Environmental Studies. (Cross-listed as Environmental Studies 353.)

360 Creative Writing: Fiction

An intermediate course in the craft of the short story. Group discussions and individual conferences. Prerequisite: English 235.

361 Creative Writing: Poetry

An intermediate course in the craft of poetry. Group discussions and individual conferences. Prerequisite: English 235.

362 On-Site Study at Victory Gardens Theater

(Cross-listed as Theater 362.)

365 Women in Theater

(Cross-listed as Theater 337. Meets GEC Cultural Diversity Requirement.)

370 Advanced Playwriting

(Cross-listed as Theater 370.)

380 Violence in Theater: Shakespeare to Tarantino

(Cross-listed as Theater 380.)

385 Activism in Theater: Gay, Lesbian, Transgender Voices

(Cross-listed as Theater 338 and Women’s and Gender Studies 338. Meets GEC Cultural Diversity Requirement.)

400 Herman Melville

An advanced seminar examining Melville’s fiction and poetry in the context of nineteenth-century American culture. Readings will include *Typee*, *Moby Dick*, *Israel Potter*, and “Battle Pieces.” Prerequisites: English 204 and significant progress in the Classics of Literature Sequence.

401 John Milton

An intensive study of the poetry of Milton, with extended attention to *Paradise Lost*. Emphasis on the classical and Judeo-Christian context of Renaissance culture. Prerequisites: English 210 and 211.

402 Geoffrey Chaucer

An advanced course including study of *The Canterbury Tales*. Emphasis on Chaucer’s earlier masterpiece *Troilus and Criseyde* as well as his dream-vision poems. Prerequisite: English 210.

403 Emily Dickinson

An advanced seminar on the poetry and letters of Emily Dickinson. Emphases on the cultural context of Dickinson’s work and its critical reception. Prerequisite: English 204. (Cross-listed as Women’s and Gender Studies 403.)

440 Advanced Writing Seminar/Tutorial

An advanced course in which each student completes a Senior Writing Project: a portfolio of work in poetry, fiction, drama, or nonfiction prose. Group discussion and individual conferences. Intended for senior majors in the writing track. Prerequisites: (a) English 235; and (b) English 242, 330, 360, or 361. (Meets GEC Senior Studies Requirement.)

450 Theory of Literature

Important critical modes and approaches to literature; an integrating experience for the senior major. (Meets GEC Senior Studies Requirement.)

ENVIRONMENTAL STUDIES

2005-2006 Committee Members:

Associate Professor of English Benjamin Goluboff, Chair

Associate Professor of Art Karen Lebergott

Assistant Professor of Biology Caleb Gordon

Assistant Professor of Philosophy Rui Zhu

Associated Faculty:

Professor of Mathematics Steven P. Galovich

Associate Professor of Biology Anne Houde

Associate Professor of Economics and Business Jeffrey Sundberg

Assistant Professor of English James Barilla

Assistant Professor of Chemistry Lori Del Negro

Lecturer in Religion Herbert Bronstein

Lecturer in Environmental Studies Julia Fiske

Lecturer in Environmental Studies Rudy Maglio

Lecturer in Biology Lynn Westley

Lecturer in Biology and Environmental Studies Raymond Wiggers

Environmental Studies is an interdisciplinary program that looks at the environment in many different ways. The environment can be studied as the set of natural systems that determines the health of the planet, or as the variety of ways humans have influenced the environment around them. The program values the perspectives of many different disciplines from the natural sciences, social sciences, and humanities. Its majors learn a variety of ways to address environmental issues and the value of using an interdisciplinary approach to these topics. However, students are encouraged to build a set of disciplinary skills in addition to the broader exposure required by the major.

ENVIRONMENTAL STUDIES MAJOR

(No minor is currently available.)

Mathematics 150 (Introduction to Probability and Statistics) or Economics 180 (Quantitative Methods for Economics and Business); Chemistry 110 (General Chemistry I); Biology 220 (Ecology and Evolution); Environmental Studies 280 (Interdisciplinary Approaches to Environmental Issues).

One of the following:

Environmental Studies 210 (Environmental Ethics); Environmental Studies 212 (Multicultural Approaches to the Environment); or Environmental Studies 240 (Religious Perspectives on Environmental Issues).

One of the following:

Economics 210 (Microeconomic Theory); or any politics course at the 200 level or above.

Students are strongly encouraged to take the introductory biology sequence that leads to Biology 220 and to take Chemistry 111. Additional chemistry courses are also strongly recommended. These courses are prerequisites for many of the upper-level science courses in which environmental studies majors are often interested, and they are also considered desirable, often even required, for many internships and career opportunities.

Additional requirements:

Four elective courses from the lists of elective courses below; at least one must be from each group, and at least two must be 300-level or above.

Environmental Studies 480 or other course work appropriate for completion of the Senior Studies Requirement.

Students are urged to consult carefully with their advisors to design a program of study that best meets their interests and needs. Students are also encouraged to consider a research project, off-campus program, or internship as a way to further their studies. An internship cannot replace an elective course, but is in many cases an excellent complement to the student's course work. Students electing to major in environmental studies must choose a member of the

Environmental Studies Program Committee for academic advising.

Elective courses in each division include the following:

Group 1 (Natural Sciences)

Environmental Studies 370, 375, 380, 384

Biology: 221 (Cellular and Molecular Biology); 340 (Animal Physiology); 342 (Developmental Biology); 344 (Animal Behavior); 384 (Plant Biology); 389 (Evolution)

Chemistry: 220 (Organic Chemistry I); 221 (Organic Chemistry II); 300 (Biochemistry)

Group 2 (Humanities and Social Sciences)

Art 322 (Sight, Site, Insight)

Environmental Studies 206, 271, 320, 321, 332, 340, 353, 361

History 263 (American Cities)

110 Our Dynamic Planet

This survey of the earth sciences provides an introduction to our planet's geology, physical geography, soils, biological zones, and climates. Specific topics include a look at the 4.6-billion-year history of Earth; plate tectonics and the motion of continents. We will learn to read the landscape with the help of maps and the Global Positioning System and discuss the formation and classification of minerals, rocks, and fossils. Lectures, discussions, two required field trips. Three hours a week. No prerequisites. Not applicable toward major or minor. (Meets GEC Natural and Mathematical Sciences Requirement.)

120 Introduction to Oceanography

This course is an introductory study of the ocean and how it works, the nature of the sea bottom, causes and effects of currents and tides, animal and plant life in the sea. An important goal is to understand the implications of human impact on the marine environment, water quality, and pollution problems in estuaries, wetlands, and open ocean. The influence of geo-politics and geo-economics on the ocean environment will be addressed. (Meets GEC Natural and Mathematical Sciences Requirement.)

206 American Nature Writing

(Cross-listed as English 206.)

210 Environmental Ethics

(Cross-listed as Philosophy 210.)

212 Multicultural Approaches to the Environment

(Cross-listed as Philosophy 212. Meets GEC Cultural Diversity Requirement.)

240 Religious Perspectives on Environmental Issues

(Cross-listed as Religion 240. Meets GEC Cultural Diversity Requirement.)

271 Technology and Human Values

(Cross-listed as Sociology and Anthropology 271. Meets GEC Cultural Diversity Requirement.)

280 Interdisciplinary Approaches to Environmental Issues: The Flora of North America

This seminar will examine the plant communities of North America and how human attitudes toward those communities have varied. It will cover such topics as invasive plants, American horticulture and landscape design, Midwestern plant communities such as prairie, savannah, woodland, and peatland, and plants in American literature and history. Readings will be drawn from a variety of fields in the liberal arts. Prerequisite: 3 courses that count toward the Environmental Studies major, or completion of two such courses and concurrent registration with a third course. This course does not meet any GEC requirement. The topic of this seminar changes frequently.

310 Conservation Medicine

This course examines the relationship between human health, animal health, and the environment. It covers basic epidemiologic and public health principles in the context of environmental health. Topics to be covered include: emerging viruses in Asia and why the agricultural system promotes the production of zoonosis (pathogens jumping from animals to humans), West Nile Virus, the effect of global warming on species distribution, and how weather patterns affect water currents and thus cholera outbreaks.

320 Landscape and Representation

(Cross-listed as Art 320.)

321 U.S. Energy and Environmental Policy

(Cross-listed as Politics 321.)

332 Environmental Writing

(Cross-listed as English 332.)

340 Environmental and Natural Resource Economics

(Cross-listed as Economics 340.)

353 Literature and Environmental Justice

(Cross-listed as English 353.)

361 Environmental Law

This course will explore basic issues of law and policy involved in the consumption, conservation, and regulation of natural resources. In particular, we will consider how various competing public and private interests in the use and protection of the environment affect legislative, administrative, and judicial decision making. Topics to be discussed include: agency management of environmental risk; civil suits as a means of environmental law enforcement; wilderness and the use of public land; takings and other private property rights concerns; federalism and the environment. Among other statutes, we will examine the National Environmental Policy Act, the Clean Air Act, the Wilderness Act, the Endangered Species Act, and the Toxic Substances Control Act.

370 Ecology

(Cross-listed as Biology 370.)

375 Conservation Biology

(Cross-listed at Biology 375.)

380 Tropical Ecology and Conservation

(Cross-listed as Biology 380 and Latin American Studies 381.)

384 Plant Biology

(Cross-listed as Biology 384.)

480 Senior Seminar: Scientific, Economic, and Institutional Challenges of Alternative Energy

Alternative energy is a topic widely debated by environmental organizations, businesses, governments, NGOs, and, increasingly, individuals. The prospects for alternative energy have generated increasing interest as issues of climate change and energy security become more significant. This course is based around two sets of student research projects: in the first half of the course, students will investigate a range of alternative energy technologies for capacity, cost, popularity, and environmental, social, and political footprint; in the second half of the course, students will propose a series of strategies for implementation of alternative energy in various sectors of energy use and prioritize them for feasibility and impact. Class sessions

will be spent in discussion of readings, guest lectures, and student presentations and the course will culminate in a juried presentation of class results to a panel of faculty and experts, as well as to the campus community. Prerequisite: Environmental Studies major with senior standing. Senior non-majors may enroll with permission of the instructor. The topic of this seminar changes frequently.

490 Internships

Off-campus experience supervised by a faculty member.

499 Independent Study

Tutorials, research projects, and senior theses are available forms of independent study, with permission of an instructor.

FIRST-YEAR STUDIES

2005-2006 Committee Members:*Dean of Students Beth Tyler**Professor of Mathematics DeJuran Richardson, Chair**Associate Professor of Mathematics Craig D. Knuckles**Lecturer in Religion Catherine Benton**Associate Librarian Rebecca Miller*

Though diverse in subject matter, First-Year Studies courses share several aims. First, they are small in size in order to encourage discussion and interaction. Second, First-Year Studies courses are intense and challenging, stressing critical thinking and writing along with the development of good work habits and academic skills. (Note: All First-Year Studies courses satisfy the First-Year Writing Requirement; see the section titled Undergraduate Curriculum.) Finally, in these courses, the instructor serves as the student's academic advisor.

102 Physics I Laboratory

Kinematics and Newton's laws of motion, conservation principles, gravitation, oscillations and waves, thermodynamics. Physics 110 uses algebra and trigonometry, and meets for three lectures and one laboratory per week for one course credit. Physics 120 has Mathematics 110 (Calculus I) as a corequisite, and meets for three lectures and one laboratory per week for one course credit. (Cross-listed as Physics 110, 120.)

105 Music in Chicago

Chicago has played a critical role in the history of American music, especially the blues and jazz. The city's musical life has been enriched by the contributions of immigrants from around the world. Chicago also has a vivid history of classical music performance through such organizations as the Chicago Symphony Orchestra, the Lyric Opera, and the Ravinia Festival. Using Chicago's rich musical culture as a backdrop, this course enhances critical listening skills, unlocking the secrets of rhythm, melody, harmony, timbre, and form through in-class work and attendance at concerts in Chicago and on campus.

106 Medical Mysteries: Neuroscience in Chicago

This course is designed to excite beginning students about how neuroscience, one of science's most active research fields, connects human society, using Chicago as a local example. Knowing how our brains work is one of the final frontiers for scientific exploration. Neurological and psychiatric illnesses are fast becoming the major twenty-first-century health concern of the United States. Students will explore basic biology of the human nervous system and investigate how brain dysfunction causes devastating, mysterious medical illnesses. Students will debate ethical dilemmas that face society as scientists race toward solving such mysteries and will experiment using brain cells, dissect real human brains, and organize a campus-wide "brain awareness" week. The course meets for two lectures and one 2-hour laboratory per week. Additionally, three Chicago trips are planned. Those with natural science, psychology, and pre-health interests may be particularly interested in the course. High school biology and chemistry are required prerequisites.

107 Emerging World Diseases

In this age of antibiotics and vaccines, why do millions die each year from infectious diseases worldwide? With new viruses and pathogens continually emerging, can we ever hope to win the battle? This course will address the biological mechanism of infectious disease and the socioeconomic and ecological factors that influence the outbreak of disease in various world populations. Emerging (e.g. SARS, Ebola, West Nile) and re-emerging (e.g. tuberculosis) diseases will be studied, as well as other major threats to global public health (e.g. malaria, anthrax). The course meets for two lectures and one 2-hour laboratory per week. High school biology and chemistry are required prerequisites.

108 Nature in Chicago

Unbeknownst to many of its residents, Chicago is located at a great ecological transition zone, on the boundary between the Great Lakes and the Great Plains, between forests and prairies, and on the southernmost edge of the Wisconsin ice sheet's advance during the last ice age. All contribute to an impressive

array of different ecosystem types that can be found within "Chicagoland." Most of the three-hour, once-per-week meetings of this course will be spent in the field exploring this ecological diversity as we discuss the species diversity, basic ecology, recent anthropogenic changes, and ongoing efforts toward the conservation and restoration of various types of ecosystems in the Chicago region.

113 The History and Science of Sailing

For centuries, humankind has been drawn to the sea. History is rich with famous sailors, shipwrecks, and tales of exploration, navigation, and survival. The science is equally rich, encompassing Newton's laws, Bernoulli's principle, vectors, 3D triangulation, and more. This course will investigate both, by reading novels and articles on the subject, visiting the Adler Planetarium in Chicago, and sailing on Lake Michigan. Students will be expected to write a number of papers, participate in classroom discussions, pull lines, and take a turn at the wheel.

115 General Chemistry Laboratory and Chicago's Water

This course is a special laboratory section of General Chemistry (Chemistry 110) that focuses on the fundamentals of chemistry and the ways scientists think and make decisions. Knowledge and problem-solving skills developed in this course are essential to the further study of chemistry, biology, and environmental issues. The laboratory experience correlates closely with lecture topics. Laboratory experiments emphasize chemical reactions, spectroscopy, gas chromatography, computational chemistry, and molecular modeling. In addition, this special laboratory section will address issues of water quality, availability, and equity through experiences in the Chicago metropolitan area and through laboratory exercises. Co-requisite: enrollment in a Chemistry 110 lecture section.

116 General Chemistry Laboratory and Medicine

This course is a special laboratory section of General Chemistry (Chemistry 110) that focuses on the fundamentals of chemistry and the ways scientists think and make decisions. Knowledge and problem-solving skills developed in this course are essential to the further study of chemistry, biology, and medicine. The laboratory experience correlates closely with lecture topics. Laboratory experiments emphasize chemical reactions, spectroscopy, gas chromatography, computational chemistry, and molecular model-

ing. Co-requisite: enrollment in a Chemistry 110 lecture section.

125 Chicago in the Global Economy: A Cross-Cultural Perspective

With more than 130 consulates and foreign trade offices, and headquarters of many international companies, Chicago provides an excellent opportunity for assessing potential benefits and concerns of global business activities. Course emphasis will be on the influence of Chicago-based businesses, trade organizations, and government agencies on economic development and improved quality of life around the world. Chicago resources will provide speakers, visits, research sites, and reference materials. Visits to cultural centers, museums, and retail establishments will enhance awareness of varied cultures. Instructional activities will include team projects, interviews, and field observations to address issues related to influences of international trade activities for emerging markets.

128 Robots and Brains: Fantasies and Facts

Will computers ever become conscious? Will there ever be robots with the degree of sentience described in science fiction stories or shown in films? These questions naturally evoke those regarding what it means to be a human being. How, with the workings of the human brain, does the human mind emerge? In what ways is our brain different from, and the same as, the brains of other animals? How are such "wet brains" different from, and similar to, the "dry brains" of computers? Readings will include introductory materials on the brain and the mind, science fiction stories on robots (including two science fiction classics, Karl Capek's 1920 R.U.R., from which the word "robot" originated, and Isaac Asimov's 1940-50's collection of philosophically provocative stories, *I Robot*). Occasional laboratory experiences will include computer simulations, introductory lessons programming in LabVIEW (a system designed for communication with instruments in science and industry, including robotics), a demonstration in the behavioral neuroscience lab, and – if there is interest among students – construction of a LEGO MindStorms robot or other kit.

129 Introduction to Psychology (Laboratory)

In the Introduction to Psychology Laboratory, we actively explore psychology as a scientific discipline. Through a combination of prepared exercises, where we repeat some of the classic experiments in psychology, and independent research projects, where students test their own hypotheses, the Laboratory takes a hands-on

approach to the study of human behavior. Students who register for the Laboratory must also enroll in one of the Introduction to Psychology lecture sections. (Cross-listed as Psychology 110.)

137 Human Body: Social Use and Control

This course investigates the relationship between the personal body and the larger society. How does society make use of the body? What social forces are in competition with the individual for control of this resource? What are the limits that society places on our understanding of our own bodies? How might the individual use his or her body as means of social communication? Can the body elicit social change?

140 Poverty and Discrimination

The gap between the rich and the poor continues to widen in the United States. What can be done to eliminate this poverty? This course explores the causes and consequences of poverty in the world with an emphasis in the United States. The method of exploration will be highly interactive (as in a seminar) and will involve considerable participation on the part of the student. We will begin by developing a workable definition of "the poor" by drawing upon economics, sociological, psychological, and historical analysis. We will then use this definition to identify the underclass in today's society and describe the changes in the composition (gender, age, race, and marital status) of the underclass since The Great Depression.

To better understand the plight of the poor we will regularly participate in volunteer community programs (soup kitchen or homeless shelter) and keep a journal of our experiences and reflections. Once we understand who "the poor" are we will develop and critique the explanations given for why people are poor, the intergenerational transmission of poverty, welfare dependency, and discrimination. In particular, the existence of discrimination (both racial and gender discrimination) in our educational system and within the labor market will be evaluated.

The course will conclude with an analysis of the impact of welfare reforms and employment policies instituted by the federal government. We will evaluate their success and shed some light on questions like: Why haven't our welfare programs worked? Should the federal government or states have the power to distribute tax money and run food, housing, and training programs?

141 World Politics and the War on Terrorism

The course uses central principles and concepts of politics (e.g., liberalism, security, power, sovereignty, law, just war, etc.) to study terrorism and world politics. In the tradition of the liberal arts, the course commences with an historical overview of terrorism, beginning with the French Revolution and continuing through 9/11 and subsequent events. This historical approach to the changing political circumstances and meanings of terrorism worldwide pays particular attention to the religious roots of modern terrorism in the three Abrahamic religions of Christianity, Islam, and Judaism. The course also considers Osama bin Laden's war on America, Jews, and apostates and the organization, strategies, and activities of radical Islamist and other terrorist networks. It also studies the impact of America's war on terrorism on world politics, including the doctrine of "preemptive war" and the proliferation of weapons of mass destruction, the laws of war and war crimes, and the global effort against terrorism. Through individual and group projects, students undertake original research on terrorism in the fields of the natural sciences, humanities, and social sciences. The course especially welcomes voices and perspectives on terrorism that transcend nationality, religion, and ideology.

151 Introduction to Philosophy: War and the Challenge of Pacifism

We will explore the moral dilemmas associated with war, using materials from a variety of sources and disciplines, including traditional philosophy, literature, and film. We will engage in the philosophical task of questioning what is often unquestioned, whether war can have a moral sanction. Given the September 11 attacks, there is a powerful consensus that the "war against terror" is just. Yet the actions of terrorists might equally be described as criminal rather than warlike. We do often hear our goals described in terms of "bringing criminals to justice," which evokes images of law rather than war. These issues raise the more general and philosophical questions concerning how the killing in war can ever be justified. There is a long and honored tradition in Western thought that seeks to elaborate the conditions that make fighting a war just. There is an equally long, if less mainstream, tradition that contends war is by its very nature immoral. We will sort through various positions on war, relating our theoretical discussions to current events. For Fall 2005, this course will include several trips to relevant sites in the Chicago area.

154 Understanding Language

Taking our ability to communicate for granted, we rarely ask: "What is language?" This course aims to create an awareness of language as a system of systems, which, although finite in its rules, is able to produce an infinite number of grammatical sentences. Once this system's phonological, morphological, and syntactic components are understood, we will apply this understanding to the correlations between language and culture, language and literature, and language and the dictionary. This course also considers concepts of creativity, metaphors, and allusion in language.

156 Love in Literature and Society

The concept of love, basic to human nature, has been treated in literature from time immemorial. This course examines that treatment from classical antiquity to today. Some of the works to be read are Leo Buscaglia's *Love*, Shakespeare's *Romeo and Juliet*, Gottfried of Strassburg's *Tristan And Isolde*, Zora Neale Hurston's *Their Eyes Were Watching God*, and Plato's *The Symposium*. Starting with popular modern works, the course will then focus on the masterpieces, including Shakespeare's immortal and seminal drama as well as a German classic of the Middle Ages.

158 "What Makes Great History?"

This course is an in-depth exploration of a handful of great works by modern historians, with a view to understanding history as a discipline when at its best. What kinds of questions are these historians interested in asking? Why do they choose to ask those questions, and how do they ask them? What means do they use to develop and present answers? How are differences in style of historical presentation related to differences in substance? To consider these and related questions, classic works by such historians as Edward Gibbon, Jacob Burckhardt, Frederick Jackson Turner, and Carl Becker will be discussed, along with recent books by Natalie Zemon Davis and Jonathan Spence. Their letters, methodological essays, autobiographical statements, or critics' assessments will be explored and will illuminate aspects of our study including visits to collections at the Art Institute and the Newberry Library in Chicago.

162 Religions of Asia in Chicago

An introduction to three Asian religious traditions as they are practiced in the Chicago area: Hinduism, Daoism, and Buddhism. We will read the primary foundational texts of the three traditions, along with contemporary essays and literature that reflect the practice of these tradi-

tions in the United States and Asia. The structure of the class includes discussions, readings, and written work as well as visits to the Art Institute, a Hindu temple, Chinese Temple, and Zen Buddhist Center so that students can meet people who practice these traditions.

168 Literature of the Vietnam War

The American War in Vietnam has been chronicled in conventional histories, memoirs, and oral histories, as well as in a variety of genres of imaginative literature. This course will provide students with an understanding of the war's historical conditions, as well as the ways in which that history has been refracted through a variety of literary forms. What is the real war? What authority can imaginative writers claim in telling truths about the conflict? In what ways do writers' ideological orientations condition their accounts of Vietnam? The readings for the course include Graham Greene's *The Quiet American*, Tim O'Brien's *The Things They Carried*, Bobby Ann Mason's *In Country*, and Truong Nhu Tang's *Vietcong Memoir*.

169 Cultural Contributions of Chicago's Latino Communities

This course will examine the impact of immigrant groups from Spanish-speaking countries on Chicago's culture. Particular emphasis will be on visual arts, literature, and film. Visits to the Mexican Fine Arts Museum, Pilsen, and Little Village to see murals and meet artists and to the Chicago Latino Cultural Center at Columbia College will be included. Students will report back on their own field studies and excursions with a partner to cultural events and places where Chicago's Spanish-speaking community gathers, such as music clubs, churches, groceries, and restaurants.

170 Writing Chicago

Chicago has been the breeding ground of some of America's greatest literature. In this course, we will read the classics of Chicago literature, including both works by such luminaries as Saul Bellow, Nelson Algren, Richard Wright, and Carl Sandburg and works by Chicago's current writers. In addition to studying these authors, we will write our own creative works about the city, based on frequent trips to the city itself. On these journeys we will visit some of the famous sites of Chicago's literary heritage and come to know the city as a physical, social, and historical space. This knowledge will fuel our creative efforts.

172 Women, Power, and Representation in the Renaissance

In the late medieval ages, women were relegated by convention and religious authority to a subordinate position to men. Yet some women overcame these strictures and made profound contributions to the cultural efflorescence known as the Renaissance. This course will explore some of the ways women in the Renaissance overcame the obstacles placed before them to create works of art and to manipulate the culture of their time. Among the topics we will consider are the role of the image in constructing Renaissance notions of women; the manipulation of traditional images of power by women rulers to support their claims to sovereignty; the genres of writing most available to women in the Renaissance, with a special emphasis on the epistolary genre; women's access to art making and patronage activities, in the secular world and in the convent; and strategies by which women influenced the style and messages of works of art.

184 Collage and Culture in Chicago

Collage, the practice of assembling works of art, music, literature, or film out of the debris and the cast-off bits of other realms of endeavor (or cutting up and re-assembling different types of media to form finished pieces), has been the most ubiquitous, consistently upsetting, and defining (art) practice of the twentieth and twenty-first centuries. In this class we will examine significant and defining moments in the history of this method of working, focusing on its contribution to artistic thought and practice within Cubism, Dada and Surrealism, Pop and Fluxus, and the multi-media sampling bonanzas of the contemporary arena. We will focus on artwork produced in Chicago and its substantial connection to these movements, by visiting work archived at Chicago institutions, such as the Art Institute, the Museum of Contemporary Art, and the Museum of Contemporary Photography, as well as sites of contemporary production, such as the Experimental Sound Studio. We will examine archives of local collectors when possible, period films, musical recordings, and texts by artists, curators, and scholars, analyzing how this practice evolved from the compositional and conceptual issues surrounding the violation of illusory, perspectival space to the commodity critiques and transgressive samplings of the present.

185 Personal Lives Observed, Renaissance to Enlightenment

Historical consideration of a series of personal lives, across the four centuries before 1800, using materials that permit close-up observation, such as the 'microhistory,' the diary or journal, and the autobiography. Emphasis on continuity and change in life priorities and outlook during these centuries, use of available materials for understanding the nature and meaning of lives in the past, and the value of individual lives for larger historical understanding. Case studies include Florentine businessmen around 1400 revealed in their diaries, the relationship portrayed by the letters of a sixteenth-century German couple, the divergent lives of Galileo and his daughter, the Protestant experience on display in the papers of a seventeenth-century London artisan, James Boswell's journal of his remarkable life in London in 1762-63, and Benjamin Franklin's autobiographical account.

186 Chicago as History

This course, combining classroom sessions with field studies in Chicago, explores several key episodes in the history of Chicago. Among them: displacement of Native Americans; emergence as a national transportation center; industrialization; population diversity; the great fire of 1871; labor conflicts; the race riot of 1919; metropolitan expansion; and globalization.

187 World War II: The European Experience

This course examines the European aspect of World War II. We begin with the origins: the flawed peace settlement after World War I; the rise of Nazism in Germany; Hitler's expansion into East Central Europe in 1938-39. Then we look at the war itself, from the 1939 Blitzkrieg against Poland to the fall of Berlin in 1945, including the huge German-Russian conflict, the Holocaust, and movements of collaboration and resistance. Lastly, we explore how the intensifying conflict among the Allies influenced the postwar settlement and led to the Cold War.

188 Intercultural Awareness and Dialogue

In a multicultural society, discussion about issues of conflict and community are necessary in order to facilitate understanding between social/cultural groups. In this intercultural experience, students will: participate in semi-structured face-to-face meetings with students from other social identity groups; visit and experience various ethnic neighborhoods in Chicago; discuss relevant reading material and explore their own and the other students' experiences in various social, environmental, and institutional contexts; exam-

ine narratives and historical, psychological, and sociological materials that address each group's experience within a U.S. context; participate in exercises that will be debriefed in class and in learning journals; and learn about pertinent issues facing students on campus and in society. The goal of the course is to create an experience in which students engage in open and constructive dialogue, learning, and exploration concerning issues of intergroup relations, conflict, and community.

FOREIGN LANGUAGES AND LITERATURES

Professor Jean-Luc Garneau

Linguistics. Littérature Québécoise. French Literature of the Twentieth Century. Translation.

Professor David George

Spanish Language. Latin American Studies. Portuguese Language. Theater. Translation.

Professor Cynthia T. Hahn

French Language. Francophone Literature of Quebec, Africa, and Lebanon. French Literature of the Nineteenth and Twentieth Centuries. Translation. Business French. French film.

Associate Professor Lois Barr, Chair

Spanish Language. Latin American Literature. Peninsular Literature.

Associate Professor C. Richard Fisher

Goethezeit. Modern German Literature. Literary Genres. Epic Literature. Comparative Studies.

Associate Professor Clayton Gray Jr.

German Language. Medieval, Nineteenth- and Twentieth-Century German Literature. Comparative Literature. Russian and Italian Language.

Associate Professor George L. Speros

Spanish Language. Peninsular Spanish Literature and History. Contemporary Spanish Politics.

Assistant Professor Brigitte Debord

French Language and Literature. Theater of the Absurd. Translation. Sartrean Existentialism.

Assistant Professor Gizella Meneses

Spanish Grammar. Latin American and Andean Literature. Latin American/Latino Studies. Colonial Studies.

Lecturer Fadel Abdallah

Tutorials, Arabic language.

Lecturer Veronika Grenader

Tutorials, Russian language.

Lecturer Clara Herrera

Spanish Language.

Lecturer Eiko Ichinose

Japanese Language.

Lecturer Huichun (Amy) Liang

Chinese Language.

Lecturer Armando Melgar

Spanish Language.

The Department of Foreign Languages and Literatures offers course work in Chinese, French, German, Japanese, and Spanish as well as occasional courses in Italian and Portuguese, and tutorials in Arabic and Russian. Students are expected to gain well-rounded knowledge of the literature, cultural history, and civilization represented by their chosen language as well as fluency in the skills of speaking, listening, reading, and writing in the language. It is further expected that students will learn to relate this knowledge and these skills to other studies in the liberal arts curriculum. In addition to advanced-level courses in literature, language, and culture taught in the target language, courses are offered in French, German, and Spanish literature in translation. Courses in linguistics, civilization, and film are also available in English.

Advanced students may participate in local internships as available to those studying French, German, or Spanish. Students of French and Spanish may also apply to the College's international internship/study-abroad programs in Paris, France, and Santiago, Chile. Students of Chinese may apply to the College's Beijing Program of Asian Studies in the People's Republic of China. Associated Colleges of the Midwest programs provide an opportunity for study in Hong Kong, Tokyo, and Costa Rica. Please consult Internships and other Off-Campus Study Opportunities for details. Further information is available from the Coordinator of Study-Abroad Programs.

Donnelley and Lee Library includes rooms with Internet access for special instruction and language-related projects. Among the audiovisual materials available are an extensive foreign language film collection, beginning, intermediate, and advanced language tapes, and recorded music, drama, and poetry. Phi Sigma Iota, the Foreign Languages Honor Society, and clubs

such as Latinos Unidos, French Club, Asian Interest Group, and International Student Organization sponsor extracurricular activities and *Collage*, a magazine of student writing in the foreign languages. Students may apply to work as a departmental assistant or newsletter editor, peer teacher, or, with sufficient proficiency, work as a language tutor. Students may also apply for a Forester Scholarship in Foreign Languages.

Placement

Entering students desiring to continue with a language studied at another institution, or with other prior foreign language training or experience, will be advised for self-placement at the appropriate level to continue language study. Each year of secondary school study is assumed to be the equivalent of one semester at the college level. A student presenting, for example, two years of secondary school language credit may be expected to resume language study with the first semester course at the intermediate level (210).

Please note: Completion of courses in a given order is essential for language study, especially at the 100-200 level. Students, first-year in particular, should be ready to begin or resume their language study in the fall semester, or they may lose a full year of study. A student must receive a grade of C or better in 212 or 220, or have the instructor's permission, in order to take courses numbered 300 or above. Some 300- and 400-level courses have prerequisites at the 300 level. Please consult the instructor or departmental chairperson.

The Department of Foreign Languages and Literatures strongly encourages all students who wish to undertake a major or minor course of study in any language to participate in a study-abroad program in an appropriate country. Students considering study abroad should begin language study as early as possible, preferably in their first semester at Lake Forest College. This is crucial to ensure that students attain the high level of proficiency required by most programs by the time students apply for study abroad, usually prior to the junior year. The Lake Forest College international internship/study-abroad programs in Paris and Santiago require students to have completed two years plus one semester of language study before going abroad. The Beijing Program suggests at least one year of Mandarin Chinese. The ACM programs in Hong Kong, Tokyo, and Costa Rica require at least two years of language training. We strongly recommend taking either French 312

or 320 for the Paris program and Spanish 312 or 320 for the Santiago program. Moreover, the ACM programs in Costa Rica and Japan are highly competitive, and experience has shown that acceptance into these programs, as well as the programs of other institutions with international bases, is more likely the greater the student's preparation in the language and culture of the destination country.

In addition to preparing themselves linguistically, students should structure their course of study in ways that best prepare them for international experience. Students wishing to pursue an internship in a foreign country are expected to have extensive background in the field in which the internship will be carried out. As a consequence, some students choose to major or minor both in a language and in another field such as history, politics, international relations, economics, and so on. Students who opt for a dual major must consult with academic advisors from both departments or programs in order to ensure a realistic, balanced, and meaningful course of studies. Other majors may also require or recommend language study or study abroad.

Programs offered by Lake Forest College, affiliated ACM colleges, and many other institutions enable students to study languages and cultures in numerous countries on five continents. The most successful and beneficial study-abroad experiences are those for which the student has planned well and laid a strong foundation of language and culture study at the College. For further information, visit Jan Miller, the coordinator of off-campus programs, or talk to the departmental chairperson or other departmental faculty.

FOREIGN LANGUAGES AND LITERATURES MAJORS

A major may be obtained in French or Spanish. Courses in Spanish may apply to the major in Latin American Studies. Coursework in Japanese or Chinese language may apply to the major in Asian Studies. Students are required to take a minimum of eight courses in the field of the major language, with credit given for one course on the 200 level and seven courses on the 300 and 400 levels. One of these seven courses must satisfy the senior studies requirement, such as a designated senior seminar or independent study project, such as a thesis. Students should consult with academic advisors to ensure that their major programs present a balance of courses in culture, advanced or specialized language study, and literature. A grade of C or better is required for credit in all major courses.

French

Majors have the option of replacing two courses with selections from the linguistics program, Foreign Civilization 300 (French 330), Foreign Civilization 333 (French 333), Foreign Civilization 334 (French 334) or Foreign Civilization 400, or French literature in translation. The Paris internship program offers four credits applicable to the major. The two credits for internship work may also be applied to another major, when approved by the major department.

German

A student interested in pursuing German studies beyond the German minor should consider the Independent Scholar program. See the description of the Independent Scholar program for procedures. Students wishing to pursue this option are encouraged to consult with members of the German faculty and the chair of the Independent Scholar program.

Spanish

Majors have the option of replacing two courses with selections from the linguistics program, as well as Foreign Civilization, Latin American Studies, and Literature in Translation courses taught by the Spanish program faculty. The Santiago internship program offers four credits applicable to the major. The two credits for internship work may also be applied to another major, when approved by the major department.

FOREIGN LANGUAGES AND LITERATURES MINORS

French

Prerequisite: French 110 and 112. Six courses required, generally distributed among offerings in language, literature, and culture. French 210 and 212 (or 220, waiver on basis of placement); French 312; plus one of the following: (a) a semester abroad in a French-speaking environment in a combination of three to four courses with a possible internship component (three credits given for study abroad at the discretion of the chairperson, with a qualifying exam if deemed advisable, or three credits from the Paris internship program) or (b) three courses from any French 300 or 400 level. One course in English from offerings listed for the major (such as French 330/Foreign Civilization 300, French 333/Foreign Civilization 333, French 334/ Foreign Civilization 334, or French Literature in Translation) may count toward the requirement. A grade of C or better is required for credit in all minor courses.

German

Prerequisite: German 110 and 112. Six courses required, generally distributed among offerings in language, literature, and culture. German 210, 212; two courses from 220, 311, 312, 410; two courses from 300, 350, 360, 370, 380, 400 or 240, 250, 260, 333. (German 300 is a prerequisite for 350, 360, 370, 380, 400.) One course in English from offerings listed here (such as German 240, 250, 260, 333) may count toward the requirement. Students are strongly encouraged to complete at least one semester of study in Germany. Up to three credits are given for study abroad at the discretion of the chairperson, with a qualifying exam if deemed advisable. A fourth credit may be given on the basis of course work abroad and an essay in German summarizing the student's studies, to be submitted to a member of the German faculty. A grade of C or better is required for credit in all minor courses.

Spanish

Prerequisite: Spanish 110 and 112. Six courses required, generally distributed among offerings in language, literature, and culture. Spanish 210 and 212 (or 220, waiver on basis of placement). Electives include one course in English as well as course work and/or internship abroad. A grade of C or better is required for credit in all minor courses.

CHIN 110 Beginning Chinese I

This course is an introduction to the forms of spoken Chinese. Most of the fundamental structures are covered in Chinese 110 and 112, together with writing practice. 112 is a continuation of 110. Lab work is an integral part of the sequence.

CHIN 112 Beginning Chinese II

This course is an introduction to the forms of spoken Chinese. Most of the fundamental structures are covered in Chinese 110 and 112, together with writing practice. 112 is a continuation of 110. Lab work is an integral part of the sequence.

CHIN 210 Intermediate Chinese

This course will continue the fundamentals of Chinese conversation begun in the first-year series, Chinese 110 and 112, and continue work on reading and writing the language. Extensive oral practice and conversation exercises are stressed. Classes will be supplemented with laboratory exercises and daily written work. There are regular quizzes, a midterm, and a final exam, all with a written and an oral component.

CHIN 212 Advanced Intermediate Chinese

This is the second course in intermediate Chinese. It focuses on further developments of the four language skills to support sustained oral and written performance at the intermediate level to prepare students for third year Chinese study. The focus will be on oral expression with expanding vocabulary, enhancing understanding of grammar, and introducing more complex structures and texts. Approximately 300 new characters and 100 grammar points will be covered in the course.

FRCV 300 France and the French-Speaking World

This colloquium is taught in English and will cover a variety of topics. Its purpose is to familiarize students with the civilization, culture, history, politics, and society in France and in the French-speaking world. Prerequisite: sophomore standing. (Cross-listed as French 330. Meets GEC Cultural Diversity Requirement.)

FRCV 333 Exploring French Culture through Film

This course examines contemporary French cultural perceptions through a variety of cinematic examples taken from French films. Cultural analysis will include discussions of French history, literature, politics, geography, and music. In addition, the topic of "remaking culture" through film is addressed, as the current wave of cinematic remakes invites cross-cultural comparisons between the United States and France. The course will examine major French directors and their cinematic portrayals of the French, as well as documentaries and filmed interviews, and will analyze the "authenticity" of the portrait they produce of French society. Prerequisite: sophomore standing. (Cross-listed as French 333. Meets GEC Cultural Diversity Requirement.)

FRCV 334 Exploring French Literature through Film

This course will examine French literary works, both historical and contemporary, through a variety of cinematic examples taken from French films. This course will compare the expression of theme, character, and plot structure in written literature (plays and narratives) and in corresponding cinematic adaptations. The course will also address whether the author's literary style is reflected in or displaced by the cinematic style of French "auteurs" (film directors) studied. The question of translation across genres (literature to film), across language and culture (example of American remakes), and across history (a historical period depicted in a modern cinematic era)

will also be discussed. This course is taught in English. (Cross-listed as French 334. Meets GEC Cultural Diversity Requirement.)

FRCV 400 Seminar on French Society and Culture

(Paris, France) This course will combine classroom study with visits to cultural, political, educational, and economic institutions. It is organized along thematic lines to deal with such topics as the French political tradition, education in modern France, the French economy in the European Economic Community, religion in France, and the Parisian metropolis. (Offered only in Paris. Meets GEC Cultural Diversity Requirement.)

FRCV 410 Chile in the Twentieth Century

(Santiago, Chile) This course, offered in Spanish at the Universidad Diego Portales for participants in the Lake Forest College program, will explore the principal themes of Chilean development during the twentieth century in three settings: (1) Chile from the end of the nineteenth century to the beginning of the twentieth century; (2) Chile from 1950 to 1973; (3) current problems and perspectives. Topics to be covered include history, literature, economics, the move from rural to urban society, crisis in Chilean democracy and the military government (1973-88), consolidation of democracy in Chile from a Southern Cone perspective, and the role of women in Chilean society and politics. (Cross-listed as Spanish 410. Meets GEC Cultural Diversity Requirement.)

FREN 110 Beginning French I

French 110 is designed to develop the student's ability to aurally comprehend, speak, read, and write basic controlled patterns of the French language. French 112 is a continuation of 110 and culminates in readings, class discussions, and free composition to provide facility with the spoken and written language and insight into its structure. Prerequisite for French 112: placement recommendation or a grade of C or better in French 110.

FREN 112 Beginning French II

French 110 is designed to develop the student's ability to aurally comprehend, speak, read, and write basic controlled patterns of the French language. French 112 is a continuation of 110 and culminates in readings, class discussions, and free composition to provide facility with the spoken and written language and insight into its structure. Prerequisite for French 112:

placement recommendation or a grade of C or better in French 110.

FREN 210 Intermediate French: Cultural Emphasis

A course designed to afford the student a systematic review of all the basic elements of French grammar, implemented with culture-based readings and exercises, with a view to preparing the student for more sophisticated courses in language, literature, and culture. Classroom work supplemented by laboratory exercises. Prerequisite: French 112 or the equivalent of one year of college French and placement recommendation.

FREN 212 Advanced Intermediate French: Literary Emphasis

A course designed to initiate the student to critical reading and thematic discussion of selected works of French fiction and expository prose. This course includes a strong emphasis on writing; a review of grammar topics, vocabulary building, and the organization and presentation of ideas in written form in French will be emphasized through a variety of writing assignments related to the literature studied. Prerequisite: French 210 or placement recommendation.

FREN 220 Conversation and Composition

Oral work for the student already possessing a working knowledge of French grammar. This course is designed to improve the linguistic competence of the student on several levels: practical necessities, social situations, and exchange of ideas. Sketches, exposés, dialogues, and discussions will constitute the bulk of classroom activities.

FREN 250 French Literature in Translation: Québec Literature (Offered Less Frequently)

This course will provide students with an overview of Québec literature in the twentieth century (poetry, prose, drama to include such well-established writers as Roy, Carrier, Thériault, Hébert). The literature will provide a forum for discussion of the history, current political events, and the questions of language, cultural association, and national identity in Québec. Both French and English copies of the texts will be available so that students may read course material in either language. (Cross-listed as Literature in Translation 201. Meets GEC Cultural Diversity Requirement.)

FREN 265 French Literature in Translation: Camus: Philosopher of the Absurd

A study of Camus's philosophy of the absurd as presented in his writings from the individualistic revolt of *The Stranger* to the collective revolt expressed in *The Plague*. We will also address Camus's view of the conscience of modern humanity in *The Fall*. The evolution of Camus's style will be studied in the six short stories presented in *Exile and the Kingdom*. (Cross-listed as Literature in Translation 265. Meets GEC Cultural Diversity Requirement.)

FREN 300 Introduction to Reading Literature in French

This course is designed to prepare students for serious reading and analysis of literary texts in French. It is an introduction to the concepts of literary criticism and explication de texte and will familiarize the student with the vocabulary of literary analysis. The texts are chosen from the three major literary genres: poetry, prose, and drama. All lectures, discussions, and assignments are in French. Prerequisite: French 212. (Meets GEC Cultural Diversity Requirement.)

FREN 301 Medieval to Romantic

A topical survey of major French writers and literary movements from the medieval to the Romantic period. Readings may be chosen to focus attention on a particular theme or problem linking different periods and styles. Among the authors studied: Villon, Rabelais, Montaigne, Pascal, Descartes, Voltaire, Diderot, Rousseau. Prerequisite: French 212. (Meets GEC Cultural Diversity Requirement.)

FREN 302 Modern Period

A study of the literary movements and figures that have characterized the nineteenth and twentieth centuries, an age of individualism, industrialism, and the Great Wars, with a special emphasis on particular themes or problems. Prerequisite: French 212. (Meets GEC Cultural Diversity Requirement.)

FREN 305 Introduction to French Culture

Study of the language through an introduction to French culture. The course aims at familiarizing students with the history, current trends, and mentality of the French while enriching their understanding of the language. Prerequisite: French 212. (Meets GEC Cultural Diversity Requirement.)

CHIN 212 Advanced Intermediate Chinese

This is the second course in intermediate Chinese. It focuses on further developments of the four language skills to support sustained oral and written performance at the intermediate level to prepare students for third year Chinese study. The focus will be on oral expression with expanding vocabulary, enhancing understanding of grammar, and introducing more complex structures and texts. Approximately 300 new characters and 100 grammar points will be covered in the course.

FRCV 300 France and the French-Speaking World

This colloquium is taught in English and will cover a variety of topics. Its purpose is to familiarize students with the civilization, culture, history, politics, and society in France and in the French-speaking world. Prerequisite: sophomore standing. (Cross-listed as French 330. Meets GEC Cultural Diversity Requirement.)

FRCV 333 Exploring French Culture through Film

This course examines contemporary French cultural perceptions through a variety of cinematic examples taken from French films. Cultural analysis will include discussions of French history, literature, politics, geography, and music. In addition, the topic of "remaking culture" through film is addressed, as the current wave of cinematic remakes invites cross-cultural comparisons between the United States and France. The course will examine major French directors and their cinematic portrayals of the French, as well as documentaries and filmed interviews, and will analyze the "authenticity" of the portrait they produce of French society. Prerequisite: sophomore standing. (Cross-listed as French 333. Meets GEC Cultural Diversity Requirement.)

FRCV 334 Exploring French Literature through Film

This course will examine French literary works, both historical and contemporary, through a variety of cinematic examples taken from French films. This course will compare the expression of theme, character, and plot structure in written literature (plays and narratives) and in corresponding cinematic adaptations. The course will also address whether the author's literary style is reflected in or displaced by the cinematic style of French "auteurs" (film directors) studied. The question of translation across genres (literature to film), across language and culture (example of American remakes), and across history (a historical period depicted in a modern cinematic era)

will also be discussed. This course is taught in English. (Cross-listed as French 334. Meets GEC Cultural Diversity Requirement.)

FRCV 400 Seminar on French Society and Culture

(Paris, France) This course will combine classroom study with visits to cultural, political, educational, and economic institutions. It is organized along thematic lines to deal with such topics as the French political tradition, education in modern France, the French economy in the European Economic Community, religion in France, and the Parisian metropolis. (Offered only in Paris. Meets GEC Cultural Diversity Requirement.)

FRCV 410 Chile in the Twentieth Century

(Santiago, Chile) This course, offered in Spanish at the Universidad Diego Portales for participants in the Lake Forest College program, will explore the principal themes of Chilean development during the twentieth century in three settings: (1) Chile from the end of the nineteenth century to the beginning of the twentieth century; (2) Chile from 1950 to 1973; (3) current problems and perspectives. Topics to be covered include history, literature, economics, the move from rural to urban society, crisis in Chilean democracy and the military government (1973-88), consolidation of democracy in Chile from a Southern Cone perspective, and the role of women in Chilean society and politics. (Cross-listed as Spanish 410. Meets GEC Cultural Diversity Requirement.)

FREN 110 Beginning French I

French 110 is designed to develop the student's ability to aurally comprehend, speak, read, and write basic controlled patterns of the French language. French 112 is a continuation of 110 and culminates in readings, class discussions, and free composition to provide facility with the spoken and written language and insight into its structure. Prerequisite for French 112: placement recommendation or a grade of C or better in French 110.

FREN 112 Beginning French II

French 110 is designed to develop the student's ability to aurally comprehend, speak, read, and write basic controlled patterns of the French language. French 112 is a continuation of 110 and culminates in readings, class discussions, and free composition to provide facility with the spoken and written language and insight into its structure. Prerequisite for French 112:

placement recommendation or a grade of C or better in French 110.

FREN 210 Intermediate French: Cultural Emphasis

A course designed to afford the student a systematic review of all the basic elements of French grammar, implemented with culture-based readings and exercises, with a view to preparing the student for more sophisticated courses in language, literature, and culture. Classroom work supplemented by laboratory exercises. Prerequisite: French 112 or the equivalent of one year of college French and placement recommendation.

FREN 212 Advanced Intermediate French: Literary Emphasis

A course designed to initiate the student to critical reading and thematic discussion of selected works of French fiction and expository prose. This course includes a strong emphasis on writing; a review of grammar topics, vocabulary building, and the organization and presentation of ideas in written form in French will be emphasized through a variety of writing assignments related to the literature studied. Prerequisite: French 210 or placement recommendation.

FREN 220 Conversation and Composition

Oral work for the student already possessing a working knowledge of French grammar. This course is designed to improve the linguistic competence of the student on several levels: practical necessities, social situations, and exchange of ideas. Sketches, exposés, dialogues, and discussions will constitute the bulk of classroom activities.

FREN 250 French Literature in Translation: Québec Literature (Offered Less Frequently)

This course will provide students with an overview of Québec literature in the twentieth century (poetry, prose, drama) to include such well-established writers as Roy, Carrier, Thériault, Hébert). The literature will provide a forum for discussion of the history, current political events, and the questions of language, cultural association, and national identity in Québec. Both French and English copies of the texts will be available so that students may read course material in either language. (Cross-listed as Literature in Translation 201. Meets GEC Cultural Diversity Requirement.)

FREN 265 French Literature in Translation: Camus: Philosopher of the Absurd

A study of Camus's philosophy of the absurd as presented in his writings from the individualistic revolt of *The Stranger* to the collective revolt expressed in *The Plague*. We will also address Camus's view of the conscience of modern humanity in *The Fall*. The evolution of Camus's style will be studied in the six short stories presented in *Exile and the Kingdom*. (Cross-listed as Literature in Translation 265. Meets GEC Cultural Diversity Requirement.)

FREN 300 Introduction to Reading Literature in French

This course is designed to prepare students for serious reading and analysis of literary texts in French. It is an introduction to the concepts of literary criticism and explication de texte and will familiarize the student with the vocabulary of literary analysis. The texts are chosen from the three major literary genres: poetry, prose, and drama. All lectures, discussions, and assignments are in French. Prerequisite: French 212. (Meets GEC Cultural Diversity Requirement.)

FREN 301 Medieval to Romantic

A topical survey of major French writers and literary movements from the medieval to the Romantic period. Readings may be chosen to focus attention on a particular theme or problem linking different periods and styles. Among the authors studied: Villon, Rabelais, Montaigne, Pascal, Descartes, Voltaire, Diderot, Rousseau. Prerequisite: French 212. (Meets GEC Cultural Diversity Requirement.)

FREN 302 Modern Period

A study of the literary movements and figures that have characterized the nineteenth and twentieth centuries, an age of individualism, industrialism, and the Great Wars, with a special emphasis on particular themes or problems. Prerequisite: French 212. (Meets GEC Cultural Diversity Requirement.)

FREN 305 Introduction to French Culture

Study of the language through an introduction to French culture. The course aims at familiarizing students with the history, current trends, and mentality of the French while enriching their understanding of the language. Prerequisite: French 212. (Meets GEC Cultural Diversity Requirement.)

FREN 310 Topics in Linguistics: Phonetics

This course will cover such topics as phonetics, morphology, syntax, lexicology, and semantics. It introduces these systems in their application to the French language. Prerequisite: French 212 or 220. (Meets GEC Cultural Diversity Requirement.)

FREN 311 Grammar, Syntax, and Style

Preparation for graded writing exercises and free composition through study of sentence structure. Complete review of grammar. Translation and study of excerpts of different writing styles from accomplished French encourages development of appropriateness in choice of words and sense of style. Prerequisite: French 212. (Meets GEC Cultural Diversity Requirement.)

FREN 312 Oral Proficiency

Oral and written work for students who have already reached an intermediate level of competency in oral and written expression. This course will deal with familiar and formal French. Vocabulary and idioms are taught in a conversational context. Students familiarize themselves with the expressive gestures used by the French and the colloquial expressions that accompany them. Prerequisite: French 212. (Meets GEC Cultural Diversity Requirement.)

FREN 315 Technical and Literary Translation

An introduction to the theories and practice of translation from French to English and English to French. Students familiarize themselves with vocabulary used in newspaper and magazine articles on current topics of interest (politics, the economy, etc.), in advertising, in cartoons, and in selected poetry and prose. The arts of interpreting and dubbing or subtitling will also be explored. Prerequisite: French 311 or permission of the instructor. (Meets GEC Cultural Diversity Requirement.)

FREN 320 French for International Affairs

This course offers a basic grasp of the political, economic, and social systems of contemporary France. It provides an understanding of cultural differences and similarities and prepares students to follow and discuss French affairs intelligently. It includes concurrent emphasis on vocabulary building, conversation practice, and acquisition of expressions and idioms necessary for doing business in France. Particularly recommended for students who are thinking of careers in economics, business, politics, and international

relations. Prerequisite: French 212. (Meets GEC Cultural Diversity Requirement.)

FREN 330 France and the French-speaking World

This colloquium is taught in English and will cover a variety of topics. Its purpose is to familiarize students with the civilization, culture, history, politics, and society in France and in the French-speaking world. Prerequisite: sophomore standing. (Cross-listed as Foreign Civilization 300. Meets GEC Cultural Diversity Requirement.)

FREN 333 Exploring French Culture through Film

This course examines contemporary French cultural perceptions through a variety of cinematic examples taken from French films. Cultural analysis will include discussions of French history, literature, politics, geography, and music. In addition, the topic of "remaking culture" through film is addressed, as the current wave of cinematic remakes invites cross-cultural comparisons between the United States and France. The course will examine major French directors and their cinematic portrayals of the French, as well as documentaries and filmed interviews, and will analyze the "authenticity" of the portrait they produce of French society. Prerequisite: sophomore standing. (Cross-listed as Foreign Civilization 333. Meets GEC Cultural Diversity Requirement.)

FREN 334 Exploring French Literature through Film

This course will examine French literary works, both historical and contemporary, through a variety of cinematic examples taken from French films. This course will compare the expression of theme, character, and plot structure in written literature (plays and narratives) and in corresponding cinematic adaptations. The course will also address whether the author's literary style is reflected in or displaced by the cinematic style of French "auteurs" (film directors) studied. The question of translation across genres (literature to film), across language and culture (example of American remakes), and across history (a historical period depicted in a modern cinematic era) will also be discussed. This course is taught in English. (Cross-listed as Foreign Civilization 334. Meets GEC Cultural Diversity Requirement.)

FREN 340 Advanced French for International Affairs

(Paris, France) An intensive conversation, composition, and vocabulary-building course. Offered in Paris for students participating in our international internship program. After the first four weeks, the course will concentrate on problems of communication students encounter on the job. (Meets GEC Cultural Diversity Requirement.)

FREN 350 French Theater

A close reading and discussion of several plays designed to give a clear sense of the development and richness of French theater. Emphasis is placed on literary history, aesthetics, and special questions in dramatic theory. May be repeated for credit. Prerequisite: French 212. (Meets GEC Cultural Diversity Requirement.)

FREN 355 Play Production in French (Offered Less Frequently)

The course comprises the staging of scenes from French plays. No theatrical experience of any kind is necessary to participate. The course consists of intensive practice in French diction, rehearsals to create group unity and confidence, readings in French and/or Québécois drama or comedy, and the staging of scenes at the end of the semester. The course provides intensive practice in all phases of spoken French and insights into the literature and culture of the French-speaking world. Prerequisite: One 300- or 400-level French course. (Meets GEC Cultural Diversity Requirement.)

FREN 370 French Poetry

An analysis of works representative of crucial moments in the history of French poetry. The essentials of French versification are stressed, as well as the distinctive character of the various forms within the genre. May be repeated for credit. Prerequisite: One 300-level course in French. (Meets GEC Cultural Diversity Requirement. May be taken by French majors to meet GEC Senior Studies Requirement.)

FREN 390 Internship

On-site training in spoken and written French at businesses or other organizations in Paris, France, or in Chicago. Students have been assigned to such organizations as the French government tourist office, The Alliance Française, and the Services Culturels Français in Chicago. (Meets GEC Cultural Diversity Requirement.)

FREN 400 Special Studies: Québec Literature (Offered Less Frequently)

This course will provide an overview of the development of Québec literature in French during the twentieth century. Reading selections include poetry, prose, and drama. Literary themes such as provincial independence, the status of the French language, and the changing Québec mentality are addressed. Prerequisite: One 300-level course in French. (Meets GEC Cultural Diversity Requirement.)

FREN 401 Special Studies: The Role of Women in African Literature of French Expression (Offered Less Frequently)

This course will address various roles (social, symbolic, historical) with which the women of Africa have been associated in twentieth-century Arab and Black African poetry and prose (in French) by both women and men. Critical texts explaining cultural attitudes and practices supplement the literature. Prerequisite: one 300-level course in French. (Cross-listed as African American Studies 401 and Women's and Gender Studies 401. Meets GEC Cultural Diversity Requirement.)

FREN 410 Creative Composition and Stylistics

Analysis of style in selected French writers. Stylistic analysis of translations. Intensive work in creative original composition of prose, poetry, and drama. Prerequisite: French 311, 315, or consent of the instructor. (Meets GEC Cultural Diversity Requirement.)

FREN 415 Dialects and Dialectology-Provençal, Québécois, Créole (Offered Less Frequently)

An introduction to the study of dialects and dialectology. Starting with a knowledge of standard French, students will learn how to read dialectal texts and study phonological, lexical, and syntactic variations. Prerequisite: Linguistics 101. (Meets GEC Cultural Diversity Requirement.)

FREN 430 French Authors (Offered Less Frequently)

The work of selected French writers, studied in depth. Prerequisite: One 300-level course in French. (Meets GEC Cultural Diversity Requirement.)

FREN 460 French Narrative

Reading and discussion with a view to increasing appreciation of several related novels, works of shorter fiction, or essays. The works are

selected for their value as turning points in the understanding of the art of prose fiction and as examples of a particular stage in the development of that art. May be repeated for credit. Prerequisite: One 300-level course in French. (May be taken by French majors to meet GEC Senior Studies Requirement.)

FREN 480 Senior Seminar: Translation, Textual Analysis, Cultural Studies

The capstone course for the French major will provide an intensive investigation of the three areas of translation, textual analysis, and cultural studies applied to individualized student research projects and seminar exercises. Prerequisite: junior standing, French major.

FREN 490 Internship

On-site training in spoken and written French at businesses or other organizations in Paris, France, or in Chicago. Students have been assigned to such organizations as the French government tourist office, The Alliance Française, and the Services Culturels Français in Chicago. (Meets GEC Cultural Diversity Requirement.)

FREN 494 Senior Thesis

The thesis allows students to do in-depth research and to develop an original thesis on a topic in French literature, literatures of the French-speaking world, French civilization, or linguistics. (Offered as required.)

GERM 110 Beginning German I

Intensive training in the aural comprehension, speaking, reading, and writing of German, combined with an introduction to the culture of the German-speaking countries. The two-semester sequence provides a basic active command of the patterns and essential vocabulary for conversation and writing, while developing the student's ability to read text passages with accurate comprehension. Prerequisite for German 112: placement recommendation or a grade of C or better in German 110.

GERM 112 Beginning German II

Intensive training in the aural comprehension, speaking, reading, and writing of German, combined with an introduction to the culture of the German-speaking countries. The two-semester sequence provides a basic active command of the patterns and essential vocabulary for conversation and writing, while developing the student's ability to read text passages with accurate comprehension. Prerequisite for German 112: placement recommendation or a grade of C or better in German 110.

GERM 210 Intermediate German

Practice in reading contemporary fiction and expository prose to develop reading ease and accurate comprehension beyond the elementary level. Classroom discussions and guided compositions, review of grammar topics, lab exercises. Prerequisite: German 112 or the equivalent of one year of college German and placement recommendation.

GERM 212 Advanced Intermediate German

Additional practice in reading contemporary fiction and expository prose. Classroom discussions, further review of grammar topics as needed. Prerequisite: German 210 or the equivalent.

GERM 220 Conversation and Composition

Practice in guided and free conversation on a variety of subjects in order to increase the student's competency in the spoken language. Compositions ranging from personal biographies to analyses of film, opera, and current affairs hone the student's skills in writing German. Regular study of idioms and vocabulary, supported by an intensive review of grammar patterns. Textual and visual resources include videos, magazines, and the Internet.

GERM 240 German Literature in Translation: Modern Masters of German Literature

The identity crisis of early twentieth-century Europe reflected in the works of such German writers as Hesse, Kafka, and Mann. Study of selected works (including *Steppenwolf*, *The Trial*, *Death in Venice*) and their relationship to contemporary trends in Central European culture. All readings, assignments, discussions, and papers are in English. (Cross-listed as Literature in Translation 203. Meets GEC Cultural Diversity Requirement.)

GERM 250 German Literature in Translation: The German Novel

Development of the German novel; representative works by Goethe, Fontane, Mann, Hesse, Kafka, Böll, Grass, Walser. Readings and discussion in English. No knowledge of German required. (Cross-listed as Literature in Translation 208. Meets GEC Cultural Diversity Requirement.)

GERM 260 German Literature in Translation: The German Novella

In German literature the novella constitutes a distinct form of literary art. Its development will be traced from Romanticism to contemporary literature, from E. T. A. Hoffman to Günter

Grass. (Cross-listed as Literature in Translation 207. Meets GEC Cultural Diversity Requirement.)

GERM 300 Introduction to German Literature

Introduction to literary forms and methods of analysis and interpretation of German literature. Reading and discussion of poems from the medieval era to the present time, origin and development of the German drama, and analysis and interpretation of the German narrative. Major movements, themes, and types in German literature of the last three centuries. Readings and discussions in German of selected texts will increase fluency, build vocabulary, and introduce students to literary criticism in German. Prerequisite: German 220 or consent of the instructor. This course or equivalent is a prerequisite for all literature courses in German. (Meets GEC Cultural Diversity Requirement.)

GERM 305 Culture of the German-Speaking Countries (Offered Less Frequently)

The culture, life, and letters of the Federal Republic of Germany, the former German Democratic Republic, Austria, and Switzerland in the context of the geography and history of Central Europe. Reading selections, musical recordings, films, and other visual materials. (Meets GEC Cultural Diversity Requirement.)

GERM 311 Advanced Grammar and Translation

Study of grammatical structures as preparation for writing in a sophisticated style. Methods and techniques of translation and practice in translating from English into German and from German into English. Prerequisite: German 212 or 220 or consent of the instructor. (Meets GEC Cultural Diversity Requirement.)

GERM 312 Oral Proficiency

Intensive practice in directed and free conversation on various subjects that reflect the interests of the participants. Concentrated study of idioms, everyday spoken German, and selected grammatical patterns and paradigms needed for oral proficiency. Discussions, debates, dialogues, and sketches constitute essential parts of the course; equally diverse supporting materials will be drawn from newspapers, magazines, and films. Prerequisite: German 220 or equivalent or consent of the instructor. (Meets GEC Cultural Diversity Requirement.)

GERM 315 Technical Translation

An introduction to the theories of translation. Students familiarize themselves with the vocabulary of technical texts dealing with business, law, politics, art, literary criticism, mathematics, and philosophy. Prerequisite: German 212 or equivalent. (Meets GEC Cultural Diversity Requirement.)

GERM 320 German for International Affairs

An introduction to the specialized vocabulary and styles that are peculiar to the conversational and written German of international affairs. Vocabulary building, practice in conversation, and acquisition of expressions and idioms necessary to handle oneself competently in everyday transcultural contacts. Particularly recommended to students whose career goals are economics, business, politics, and international relations. (Meets GEC Cultural Diversity Requirement.)

GERM 333 Modern German Film

A study of German film from its inception to the close of the 20th century, from the perspectives of political and cultural history as well as specifically cinematic aesthetics. The course will deal with films (subtitled in English) by such noted filmmakers as Rainer Werner Fassbinder, Werner Herzog, and Wim Wenders. Readings, lectures, and discussions in English. No previous film course is required. Those majoring in German may take the course for credit in German by writing papers in German. (Meets GEC Cultural Diversity Requirement.)

GERM 350 The Modern German Theater (Offered Less Frequently)

Works by leading playwrights in the context of changing styles and trends in stage production, from naturalism to the present decade: Hauptmann, Wedekind, Schnitzler, Hofmannsthal, Kaiser, Brecht, Dürrenmatt, Handke, and others. (Meets GEC Cultural Diversity Requirement.)

GERM 360 German Literature I: Eighteenth Century: Enlightenment, Storm and Stress, Classicism

The first of the three-term sequence in the German tradition, in which such major figures as Lessing, Goethe, and Schiller are studied. (Meets GEC Cultural Diversity Requirement.)

GERM 370 German Literature II: Nineteenth Century: Romanticism, Realism, Naturalism, Impressionism

Further study of the German tradition through the nineteenth century from the Romantic era to Modernism, including such writers as Heine, Fontane, Hauptmann, and Schnitzler. (Meets GEC Cultural Diversity Requirement.)

GERM 380 German Literature III: Twentieth Century: Expressionism to the Present

The last of the sequence, focusing on the twentieth century with special emphasis on literary development in the Federal Republic of Germany, the former Democratic Republic of Germany, Austria, and Switzerland. (Meets GEC Cultural Diversity Requirement.)

GERM 390 Internship

On-site training in spoken and written German. Students have been assigned to such organizations as the German government's tourist office and the German Chamber of Commerce, located in Chicago. (Meets GEC Cultural Diversity Requirement.)

GERM 400 Special Studies

One author, theme, movement, or group of works in German literature studied in depth. (Offered as required. Meets GEC Cultural Diversity Requirement.)

GERM 410 Creative Composition and Stylistics

Practice in writing and revision of expository prose. Free composition, stylistic analysis, exercises in translation. The format is flexible and will be adjusted to serve the goals of enrolled students. (Meets GEC Cultural Diversity Requirement.)

GERM 490 Internship

On-site training in spoken and written German. Students have been assigned to such organizations as the German government's tourist office and the German Chamber of Commerce, located in Chicago. (Meets GEC Cultural Diversity Requirement.)

ITAL 110 Beginning Italian I

Italian 110 and 112 are intended to develop listening, reading, writing, and speaking skills on an introductory Italian level as well as expose students to Italian culture. The two-semester sequence also provides them with the opportunity to perfect their pronunciation by laboratory work and to build vocabulary by the use of

readings. Successful completion of the sequence provides a solid foundation for further study of the language or a basis for its use in other fields. Prerequisite for Italian 112: Italian 110 or permission of the instructor.

ITAL 112 Beginning Italian II

Italian 110 and 112 are intended to develop listening, reading, writing, and speaking skills on an introductory Italian level as well as expose students to Italian culture. The two-semester sequence also provides them with the opportunity to perfect their pronunciation by laboratory work and to build vocabulary by the use of readings. Successful completion of the sequence provides a solid foundation for further study of the language or a basis for its use in other fields. Prerequisite for Italian 112: Italian 110 or permission of the instructor.

ITAL 120 Parliamo Italiano: Italian Conversation

Designed for students with minimal (one year) or no previous knowledge of Italian. In this intensive three-week course, we will strive to maximize your oral proficiency using a "full immersion" approach, including drills of model sentences and word patterns. We will focus on the acquisition of basic verbal communication skills (i.e., oral fluency, correct pronunciation, listening comprehension) and on cultural aspects that will promote understanding and appreciation of Italian culture. (Taught only in the summer.)

ITAL 210 Intermediate Italian

Italian 210 provides a review and additional practice of the four basic skills begun in first-year Italian, viz. reading, writing, listening, and speaking with lab exercises. In addition, it will include extratextual readings such as poetry and prose (including newspapers and magazines). There will also be particular emphasis on conversation and composition. Prerequisite: Italian 112 or equivalent.

JAPN 110 Beginning Japanese I

An introduction to the form of spoken Japanese along with Japanese customs and culture.

Most of the fundamental structures are covered in Japanese 110 and 112, together with writing practice in the hiragana and the katakana syllabaries. 112 is a continuation of 110. Lab work is an integral part of the sequence.

JAPN 112 Beginning Japanese II

An introduction to the form of spoken Japanese along with Japanese customs and culture.

Most of the fundamental structures are covered in Japanese 110 and 112, together with writing practice in the hiragana and the katakana syllabaries and some basic kanji. 112 is a continuation of 110. Lab work is an integral part of the sequence. Prerequisite: Japanese 110 or consent of the instructor.

JAPN 210 Intermediate Japanese

This course will continue the fundamentals of Japanese conversation begun in the first-year series, Japanese 110 and 112, and continue work on reading and writing the language. Extensive oral practice and conversation exercises are stressed. Classes will be supplemented with work in the language laboratory and daily written work. There are weekly quizzes, a midterm, and a final, all with both a written and an oral component. Prerequisite: Japanese 112 or consent of instructor.

JAPN 212 Advanced Intermediate Japanese

A continuation of the Japanese language fundamentals begun in Japanese 110, 112, and 210. Extensive practice in oral expression and increasingly stronger emphasis on reading and writing, with an extensive use of audio and video materials. There are weekly quizzes, a midterm, and a final, all with both a written and an oral component. Prerequisite: Japanese 210 or consent of the instructor.

LING 101 Descriptive Linguistics

Principles and techniques of descriptive linguistics as seen through different schools of linguistics, from structuralism to modern transformational and stratificational theories. Taught in English.

LING 109 Common Ancestry: The Evolution of Europe's Languages

Once upon a time almost all of the languages of Modern Europe—English, German, French, Greek, Russian, etc.—were a single language family. How did they come to be so different today? Factors such as historical events and social change have played a considerable role, but it is the very nature of language itself to change. We will look at some basic principles of linguistics, consider in broad outline the history of Europe, and call on the experiences of New World immigrants to examine and help illustrate how languages evolve. No knowledge of any foreign language is necessary.

LING 201 Linguistics and Literature

A consideration of the major linguistic theories and their implications and relations to literary criticism. Special emphasis on applications to literary criticism of transformational grammar, stratificational grammar, and tagmemics. Discussion and critical appraisal of the value of such approaches to literary analysis. Taught in English.

LITR 201 French Literature in Translation: Québec Literature

(Cross-listed as French 250. Meets GEC Cultural Diversity Requirement.)

LITR 203 German Literature in Translation: Modern Masters of German Literature

(Cross-listed as German 240. Meets GEC Cultural Diversity Requirement.)

LITR 207 German Literature in Translation: The German Novella

(Cross-listed as German 260. Meets GEC Cultural Diversity Requirement.)

LITR 208 German Literature in Translation: The German Novel

(Cross-listed as German 250. Meets GEC Cultural Diversity Requirement.)

LITR 209 Brazilian Literature in Translation

(Cross-listed as Latin American Studies 209 and Spanish 339. Meets GEC Cultural Diversity Requirement.)

LITR 210 Don Quijote and Imperial Spain

This course will study Cervantes's comic masterpiece in English translation. Focus will be on Cervantes's art, on analytical perspectives, and on historical background. Comparisons will be made with reinterpretations of Don Quijote, such as films and drawings. (Meets GEC Cultural Diversity Requirement.)

LITR 265 French Literature in Translation: Camus: Philosopher of the Absurd

(Cross-listed as French 265. Meets GEC Cultural Diversity Requirement.)

LITR 275 Greek Greats

(Cross-listed as Classical Studies 275. Meets GEC Cultural Diversity requirement.)

SPAN 110 Beginning Spanish I

Spanish 110 is designed to develop the student's ability to listen to, speak, read, and write basic controlled patterns of the Spanish language.

Spanish 112 is a continuation of 110 and culminates in graduated readings, class discussions, and free composition to provide facility with the spoken and written language and insight into its structure and the mores of Spanish-speaking cultures. Lab work is an integral part of the series. Prerequisite for Spanish 112: placement recommendation or a grade of C or better in Spanish 110.

SPAN 112 Beginning Spanish II

Spanish 110 is designed to develop the student's ability to listen to, speak, read, and write basic controlled patterns of the Spanish language. Spanish 112 is a continuation of 110 and culminates in graduated readings, class discussions, and free composition to provide facility with the spoken and written language and insight into its structure and the mores of Spanish-speaking cultures. Lab work is an integral part of the series. Prerequisite for Spanish 112: placement recommendation or a grade of C or better in Spanish 110.

SPAN 210 Intermediate Spanish

Practice in reading contemporary fiction, expository prose, drama, and poetry. Classroom discussions, guided and free compositions, review of grammar, lab exercises. Prerequisite: Spanish 112 or placement at the 210 level.

SPAN 212 Advanced Intermediate Spanish

Practice in reading contemporary fiction and expository prose, drama, and poetry to develop reading ease and accurate comprehension beyond the elementary and intermediate levels. Classroom discussion and guided compositions, review of grammar topics, and vocabulary building. Prerequisite: Spanish 210 or placement at the 212 level.

SPAN 220 Conversation and Composition

A course designed to afford the student who has completed the intermediate sequence or the exceptional student who wishes to advance at a more rapid pace with additional and intensive practice in conversational and writing skills. The students will be exposed to the contemporary language as it appears in a variety of mediums, from colloquial slang to formal, academic usage, in both written and oral discussions, essays, and creative projects. Prerequisite: completion of the 210/212 sequence or placement on the 212 level or higher, with permission of the instructor.

SPAN 300 Introduction to Reading Literature in Spanish

The purpose of this course is to prepare the student for serious reading and analysis of literary texts in Spanish. The course will be an introduction to the concepts of literary criticism and the vocabulary of literary analysis. The course will introduce students to various methodologies, including close reading of texts and sociological and psychological approaches. Texts will be chosen from the three major literary genres: poetry, prose fiction, and drama. It is strongly recommended that students take either Spanish 300 or 305 before going on to literature or culture courses in the 300-400 range. Prerequisite: Spanish 212 or 220. (Meets GEC Cultural Diversity Requirement.)

SPAN 304 Cocina y Cultura

Cocina y Cultura (Food and Culture) is an immersion type conversation course that meets four hours a week, including lunch hour on Fridays. The students will read etiquette manuals and fiction about food and investigate issues of food distribution and social class in Spanish-speaking countries around the world. The students will be responsible for preparing meals and researching authentic recipes. The students will visit a local Hispanic market, work in a Spanish-speaking soup kitchen and visit two ethnic restaurants such as a Guatemalan or Peruvian restaurant and a Spanish restaurant. Students will sign a pledge to speak only in Spanish when in class, preparing goods, and traveling to and from fieldwork. (Cross-listed as Latin American Studies 304. Meets GEC Cultural Diversity Requirement.)

SPAN 305 The Civilization of Spain

This course is an introduction to the history, art, music, literature, and customs of Spain. Course conducted in Spanish. Prerequisite: Spanish 300 or placement recommendation. (Cross-listed as Latin American Studies 305. Meets GEC Cultural Diversity Requirement.)

SPAN 306 Introduction to Latin American Culture

This course will be taught in Spanish. It is designed to provide an introductory overview of Latin America's development focusing on its cultural manifestations through time. Films, music, and art will supplement readings for a better understanding of the cultural heterogeneity of Latin America, its past, and its present reality. (Cross-listed as Latin American Studies 306. Meets GEC Cultural Diversity Requirement.)

SPAN 310 Creative Writing in Spanish

Intensive work in creative original compositions of prose, poetry, and drama. Analysis of style in selected Hispanic writers. Prerequisite: a Spanish course from the 300 or 400 level or permission of the instructor. (Meets GEC Cultural Diversity Requirement.)

SPAN 311 Advanced Grammar

This course reviews grammar, orthography, syntax, and style through graded compositions, free compositions, grammar exercises, and translation. Students will study various types of expository writing to see the grammatical constructions in context and develop a wider vocabulary and a sense of style. Prerequisite: Spanish 212 or placement exam. (Meets GEC Cultural Diversity Requirement.)

SPAN 312 Oral Proficiency

Intensive practice and free conversation and composition on a wide range of topics reflecting the needs and interests of the participants. Concentrated study of vocabulary, idioms, and selected grammar patterns and paradigms needed for oral proficiency. Activities include drills, discussions based on readings, debates, dialogues, and sketches. Supporting materials will be drawn from Latin American and Peninsular short stories, films, magazines, and newspapers. Prerequisite: Spanish 212, 220, or placement exam. (Meets GEC Cultural Diversity Requirement.)

SPAN 313 Advanced Composition

In this course the student will learn appropriate written Spanish for different purposes: personal and business correspondence, narrative fiction, journalism, etc. Students will participate actively by doing exercises, discussing the style of readings, writing translations and compositions of different types. Prerequisite: Spanish 212 or placement exam. (Meets GEC Cultural Diversity Requirement.)

SPAN 315 Translation

An introduction to the theory and practice of translation. Students will familiarize themselves with the vocabulary of texts dealing with politics, art, literary criticism, and philosophy. Texts will be translated from Spanish to English and from English to Spanish. Please note: This is not a Spanish conversation course. Classes are conducted in Spanish and English. Prerequisite: Spanish 212, 220, or placement recommendation. (Meets GEC Cultural Diversity Requirement.)

SPAN 317 Portuguese for Spanish Speakers

Utilizing Spanish as the base language, the course will focus on the Portuguese of Brazil, Latin America's largest and most populous country. The course will provide a foundation in the basic skills of reading, writing, understanding, and speaking Portuguese and will include many aspects of Brazilian culture: music, films, magazines, current events, and literature. Prerequisite: a 300-level Spanish course. (Cross-listed as Latin American Studies 317. Meets GEC Cultural Diversity Requirement.)

SPAN 320 Spanish for International Affairs

An introduction to the specialized vocabulary, styles, and concepts that characterize conversational and written Spanish for international affairs. Attention is focused on familiarizing the student with current issues in business, banking, law, microeconomics, medicine, politics, and human rights. Vocabulary building, conversation practice, listening comprehension, and acquisition of idioms necessary for transcultural contacts are also stressed. Readings are drawn from magazines, newspapers, and journals, with special emphasis on materials from the Internet. Particularly recommended to students who are considering careers in economics, business, politics, and international relations. Prerequisite: Spanish 212, 220, or placement recommendation. (Cross-listed as Latin American Studies 320. Meets GEC Cultural Diversity Requirement.)

SPAN 325 Hispanic Cultures in the U.S.

This course is taught in Spanish. It is designed to familiarize students with the cultural phenomena produced in the United States by the presence of two major Hispanic groups: Mexican Americans (20.6 million) and Puerto Ricans (3.4 million). The course will examine the historical, political, and cultural development of the Mexican American/Chicano and the Puerto Rican/Boricua Hispanic heritage. The main objective is to provide the students with an overall social and literary understanding and to recognize the cultural contribution made by these two important Hispanic groups. Topics such as neo-colonialism, popular culture, national identity, gender representation in art and literature, religious syncretism, and economic impact on the workforce will be explored. Literary texts by outstanding Chicano and Boricua authors will be included. (Cross-listed as Latin American Studies 325. Meets GEC Cultural Diversity Requirement.)

SPAN 330 Survey of Peninsular Literature

A panoramic view of Spanish literature with special emphasis on distinctive features of significant literary movements and periods. Lectures on the history of literature. Readings and discussion on selections from representative literary texts. Prerequisite: Spanish 212, 220, or placement recommendation. (Meets GEC Cultural Diversity Requirement.)

SPAN 333 Film and History in Spain and Latin America

Taught in English. The course examines the ways in which the media and popular culture shape the public perception of significant events and political movements in Spain and Latin America. Possible topics are suggested by polemical issues that have also been the subject of a large body of film and fiction, such as the Spanish Civil War, the legacy of Perón, and Castro and Cuba. The basic format will be lecture/discussion. Readings will include fiction, speeches, and periodical press of the time as well as historical studies. Assignments will include short essays, oral presentations, and a final research paper. The course will be taught in English, but those speaking Spanish may use materials in that language for their papers and presentations. The course offers students the chance to form a critical perspective on popular communications media. (Counts toward the Spanish major and minor. Cross-listed as Latin American Studies 333. Meets GEC Cultural Diversity Requirement.)

SPAN 335 Survey of Latin American Literature

The development of Latin American letters from the nineteenth-century movements of independence to the contemporary period. Readings will include novels, short stories, poetry, plays, and essays. Prerequisite: Spanish 212, 220, or placement recommendation. (Cross-listed as Latin American Studies 335. Meets GEC Cultural Diversity Requirement.)

SPAN 336 Latin American Film

Taught in English. An interdisciplinary study of Latin American film, from multiple perspectives: artistic, historical, political, and socio-economic. This course will highlight the artistic achievements of Latin American filmmakers from Argentina, Brazil, Chile, and Mexico. We will use selected readings from original works for films that are based on fiction. A number of films have been Academy Award nominees or winners. Further readings will include a history of Latin American cinema, movie reviews, and interviews with

directors. The course will scrutinize the links among cultural phenomena, socio-political events, and the art of filmmaking. Films will be treated as complex aesthetic objects whose language does not merely photograph socio-historical reality but transfigures it. Classes will be based mainly on discussion interspersed with occasional lectures. The course will be conducted in English, but students may choose to read texts and/or write papers in Spanish or Portuguese. (Cross-listed as Latin American Studies 336. Meets GEC Cultural Diversity Requirement.)

SPAN 337 The Latin American World

Taught in English. A study of native peoples of the American Indian civilizations from multiple perspectives: historical, political, sociological, and literary. Course materials include readings and lectures on a wide variety of topics, discussions, films, videos, slides, and music. Students with a knowledge of Spanish and/or Portuguese may work with bilingual materials. May count toward the Spanish major. (Cross-listed as Latin American Studies 302. Meets GEC Cultural Diversity Requirement.)

SPAN 339 Brazilian Literature in Translation

Taught in English. A study of selected Brazilian authors from various literary movements and periods. Special consideration will be given to the historical and cultural contexts in which their works were written. Comparisons will be made with the literature of other Latin American countries. Students with a knowledge of Portuguese may work with bilingual materials. An extra hour will be arranged for students interested in practicing their Portuguese. (Cross-listed as Latin American Studies 209 and Literature in Translation 209. Meets GEC Cultural Diversity Requirement.)

SPAN 340 Advanced Spanish for International Affairs

(Santiago, Chile) This course is designed to complement the students' internship assignments in Chilean national and multinational firms and corporations, government agencies, and cultural institutions. Intensive vocabulary building, composition, conversation practice, and acquisition of expressions and idioms necessary to handle the day-to-day internship assignments. Classroom instruction augmented by practical on-site application. Course is offered only in Santiago, Chile, by faculty at the Universidad Diego Portales, especially for participants in the Lake Forest College program. (Meets GEC Cultural Diversity Requirement.)

SPAN 350 Modern Latin American Narrative in Translation

During the twentieth century, the narrative fiction of Latin America exploded onto the international literary scene. This course focuses on the precursors of the so-called "boom" writers (Jorge Luis Borges, Graciliano Ramos) and the boom's major writers (Julio Cortázar, Gabriel García Márquez, Juan Rulfo, Carlos Fuentes, Jorge Amado), as well as its more recent figures (Isabel Allende, Clarice Lispector, Laura Esquivel, Manuel Puig), who take us into the twenty-first century. The course includes film adaptations of Latin American fiction. Special consideration is given to the aesthetic and historical contexts of these authors and their works. Students with a knowledge of Spanish or Portuguese may work with bilingual materials if they so choose. (Cross-listed as Latin American Studies 350. Meets GEC Cultural Diversity Requirement.)

SPAN 360 Peninsular Narrative

Reading, analysis, and discussion of selected narrative works of Peninsular Spanish authors; historical and aesthetic considerations of the texts will be stressed. The course is designed to impart to the student a sense of the development of Spanish prose fiction and of recurring and characteristic themes. The student will become acquainted with outstanding authors and works of the Golden Age and the nineteenth and twentieth centuries. Prerequisite: Spanish 212, 220, or placement exam. (Meets GEC Cultural Diversity Requirement.)

SPAN 365 Latin American Narrative

The study of representative naturalist, neo-realist, and magic-realist writers. The student will read novels and short stories by outstanding writers such as Gallegos, Borges, Fuentes, García Márquez, and Vargas Llosa. Prose works will be considered in a socio-historical context. Prerequisite: Spanish 212, 220, or placement exam. (Cross-listed as Latin American Studies 365. Meets GEC Cultural Diversity Requirement.)

SPAN 367 Latin America: A Creative Approach

Taught in English, this course is based on Latin American topics, viewed from interdisciplinary perspectives and involving various historical periods and regions. Examples are the voyage of Columbus, Sor Juana and colonial Mexico, independence movements in South America, Brazil and the abolition of slavery, and the

painting of Frida Kahlo and Diego Rivera. Student work is mostly creative, nontraditional; original poems and stories, short videos, news-casts of historical events, mock trials. (Cross-listed as Latin American Studies 367. Meets GEC Cultural Diversity Requirement.)

SPAN 370 Hispanic Poetry

The study of masterworks of Latin American and Peninsular poetry. The student will read, analyze, and compare poems from several periods: Medieval, Golden Age, Romantic, Symbolist, Modernist, Surrealist, and Contemporary. Prerequisite: Spanish 212, 220, or placement recommendation. (Cross-listed as Latin American Studies 370. Meets GEC Cultural Diversity Requirement.)

SPAN 380 Fiction, Film, and Society in Latin America

This course is an interdisciplinary study of Latin American societies, focusing on literary and cinematic production from multiple perspectives: artistic, historical, political, and socio-economic. The seminar will highlight the magisterial artistic achievements of Latin American novelists and the film adaptations of their novels. It will scrutinize the links between socio-political events and artistic production. Seminar materials will include readings, lectures, discussions, film, and video. The seminar will be conducted in English but students may choose to read texts and/or write papers in Spanish or Portuguese. (Cross-listed as Latin American Studies 380. Meets GEC Cultural Diversity Requirement.)

SPAN 390 Internship

On-site training in spoken and written Spanish at businesses or other organizations in Santiago, Chile, and in Chicago. (Meets GEC Cultural Diversity Requirement.)

SPAN 400 Special Studies: Women's Voices in Latin America

An author, thinker, movement, or group of works studied in depth. All work in Spanish. This course will examine the role of women in Hispanic culture. Important figures such as La Malinche, Sor Juana Inés de la Cruz, and Eva Perón as well as the fiction, poetry, and films of Rosario Castellanos, Clarice Lispector, Gabriela Mistral, Isabel Allende, Rigoberta Menchú, María Luisa Bember, and Alicia Steinberg will be studied. Prerequisite: a 300-level Spanish course. (Cross-listed as Latin

American Studies 400 and Women's and Gender Studies 400. Meets GEC Cultural Diversity Requirement.)

SPAN 410 Chile in the Twentieth Century
(Santiago, Chile) This course, offered in Spanish at the Universidad Diego Portales for participants in the Lake Forest College program, will explore the principal themes of Chilean development during the twentieth century in three settings: (1) Chile from the end of the nineteenth century to the beginning of the twentieth century; (2) Chile from 1950 to 1973; (3) current problems and perspectives. Topics to be covered include: history, literature, economics, the move from rural to urban society, crisis in Chilean democracy and the military government (1973-88), consolidation of democracy in Chile from a Southern Cone perspective, and the role of women in Chilean society and politics. (Cross-listed as Foreign Civilization 410. Meets GEC Cultural Diversity Requirement.)

SPAN 420 Peninsular Culture and Civilization

Intensive study of selected topics on the history, politics, and culture of Peninsular Spanish civilization. Attention will be focused on the development and evolution of Spanish civilization within the greater European context as well as on particular political and social issues in contemporary Spain. Supporting materials will be drawn from a variety of sources: readings in history, politics, and sociology; the visual arts; music; and literature. Prerequisite: a 300-level Spanish course. (Meets GEC Cultural Diversity Requirement.)

SPAN 425 Latin American Culture and Civilization

A study of Latin American societies from multiple perspectives: historical, political, economic, and artistic. Course materials will include readings and lectures on a wide variety of topics, discussions, films, video, slides, and music. Prerequisite: a 300-level Spanish course. (Cross-listed as Latin American Studies 425. Meets GEC Cultural Diversity Requirement.)

SPAN 480 Senior Seminar: Literature and History in the Hispanic World

The seminar will examine the interrelationships of major literary works and key historical moments in the history of Spain and Latin America. Examples are Don Quijote and the Imperial Age, the stories of García Márquez

and "La Violencia" in Colombia, the fiction of Fuentes and the Mexican Revolution. May be taken by juniors for senior seminar credit; may be taken by sophomores, but not for senior seminar credit. (Cross-listed as Latin American Studies 480. Meets GEC Cultural Diversity Requirement.)

SPAN 490 Internship

On-site training in spoken and written Spanish at businesses or other organizations in Santiago, Chile, and in Chicago. (Meets GEC Cultural Diversity Requirement.)

SPAN 494 Senior Thesis

Given for students who wish to graduate with honors. The thesis allows students to do in-depth research and to develop an original thesis on a topic in Hispanic literature or civilization. (Offered as required.)

Associate Professor Emeritus Pericles B. Georges
Ancient and Medieval History.

History is the collective memory of society. It informs us of the intense human struggles that shaped our past and thereby enriches our understanding of the present. A society that forgets its past is like an individual suffering from amnesia; both lack identity, purpose, and direction. Yet the complexities of the past cannot be reduced to simple rules for the present. History reveals a diversity of human experience that is worth pondering for its own sake. A respect for this diversity has long been the mark of an educated individual and a civilized society.

HISTORY MAJOR

The major in history consists of nine course credits. Students enroll in 110 (World Civilizations to 1650), preferably as first-year students, and complete one of the following two-course sequences: 120 and 121 (United States); 200 and 201 (East Asia); 210 and 211 (Greece and Rome); 211 and 204 (Rome and Medieval); or 212 and 213 (Europe). Juniors take 300 (Theory and Methods). To complete the major, students enroll in four other courses, at least two of which must be at the 300 level or above, and take either 420 (Senior Seminar) or an independent study research project, such as a senior thesis.

HISTORY MINOR

The history minor consists of six courses, two of which must be on or above the 300 level. History 300 is encouraged but not required for the minor.

110 World Civilizations to 1650

Origins and development of civilization from 3000 BCE to 1650 CE. Emphasis on Western civilization from its Judaic and Greco-Roman foundations through the Reformation, also with discussions of Islam, China, and India. (Meets GEC Cultural Diversity Requirement.)

120 Foundations of the American Republic

The origins of American society and the development of the United States from an underdeveloped new nation into a powerful national entity. Emphasis on the reading and analysis of documentary materials. (Meets GEC First-Year Writing Requirement.)

121 Modern America

America's response to industrialism and its changing role in foreign affairs. Emphasis on the techniques of research and paper writing. (Meets GEC First-Year Writing Requirement.)

200 Origins of East Asia

Introduction to the great civilizations of China and Japan, with emphasis on development of their fundamental characteristics. Highlights both shared traditions and significant differences between the two countries. (Cross-listed as

Asian Studies 200. Meets GEC Cultural Diversity Requirement.)

201 Modern East Asia

Study of China, Japan, and Korea as each moved toward modern nationhood over the last 200 years. Attention to the difficulties each has confronted, including Japan's vision of empire shattered by World War II, China's civil war, and Korea's transformation through foreign interventions. (Cross-listed as Asian Studies 201. Meets GEC Cultural Diversity Requirement.)

204 Medieval History

Western European society from the end of Roman rule to the eve of the Renaissance. Intellectual, material, and institutional developments, with emphasis on the creation of a continually progressive and creative civilization from unlikely roots in late Roman society and Germanic tribal chiefdoms.

205 Sub-Saharan Africa

Survey from earliest times to the present. Topics and themes include trade and state-building in precolonial Africa, European conquest and African resistance to colonialism, and independence and the postcolonial era. (Meets GEC Cultural Diversity Requirement.)

208 The European Renaissance, Reformation, and Scientific Revolution

The breakdown of the medieval synthesis under the tensions of intellectual audacity, individual spirituality, and the progress of the scientific attitude to nature. Italian and Northern humanism, Luther and the end of Christian unity, voyages of discovery, and Europe's capture of world commerce driven by technological innovation by land and sea.

210 Ancient Greece

Greek civilization from the first awakening of reason in Homeric poetry and early philosophy to the spread throughout the Mediterranean world of a civilization of headlong, revolutionary innovation in every department of life and thought. Key episodes of the intellectual, political, and military history of the Greeks examined through examples of their literature and thought. (Cross-listed as Classical Studies 210.)

211 Roman History

Roman civilization studied as the evolution from a predatory conquest state led by a military aristocracy to a world empire that enforced univer-

sal peace and preserved Classical civilization under a sacred monarchy, whose breakdown gave birth to Christian Europe and the papacy in the West and Byzantium in the East. (Cross-listed as Classical Studies 211.)

212 Europe from the Old Regime to the Modern Era

Socio-economic, political, and intellectual and cultural development of Europe from 1715 to 1890. The crisis of the old order in the age of the Enlightenment and the French Revolution. Industrialization, democratization, and modernization in the nineteenth century. The emergence of nation-states, consumer societies, and modern ideologies.

213 Europe in the Twentieth Century

European politics, culture, and society from 1890 to 1990. The course pursues three major themes: the origins of the modern era from 1890 to 1918; the rise of the authoritarian state from 1917 to 1945; and the Cold War from the 1940s to the collapse of the Soviet Union.

214 History of Russia

Survey of the political, social, and intellectual history of Russia, from the early medieval period to the post-Soviet era. Emphasis on the people and the state, efforts at modernization from above (particularly those of Peter the Great and Stalin), revolutionary ideas and movements, the disintegration of the Communist system and the Soviet empire, and the difficulties faced by Russia and other post-Soviet states. (Meets GEC Cultural Diversity Requirement.)

221 British History to 1688

The history of Britain from Roman times to the Revolution of 1688. Topics include Roman Britain, Anglo-Saxon England, the Norman invasion, the development of English political institutions, the consolidation of monarchy under the Tudors, the growth of English literature and culture, and the social and political struggles of the seventeenth century.

222 Modern British History

The history of Britain since 1688. Topics include aristocracy and society in the eighteenth century, the Industrial Revolution, Liberalism and Conservatism in nineteenth-century politics, the consolidation of British culture, the rise of the welfare state, and contemporary British life.

230 History of Science

An overview of the history of science from ancient to modern times. Explores the philosophical question, "What is Science?" Introduces the ideas of major figures within the history of science, such as Aristotle, Galileo, Newton, Darwin, and Einstein, as well as general developments in the physical and biological sciences. Examines how these ideas were influenced within their own historical context by both internal (scientific) and external (cultural, religious, sociological, psychological) factors, and how these ideas are central to our world today.

231 Western Thought: Renaissance to Scientific Revolution

Survey of Western intellectual history ca. 1400-1700, emphasizing Italian and northern humanism, the Protestant Reformation and its consequences, the European encounter with other civilizations, and the first scientific revolution, with attention to American thought in the seventeenth century. Major ideas about religion, nature and science, human nature, society and its governance and analysis, and history.

233 Eastern Europe in the Twentieth Century

Exploration of key developments in the region during the twentieth century: the impact on the region of World War I and the peace settlement, economic and political difficulties in the interwar period, World War II, postwar Soviet domination, and the emergence of greater diversity after Stalin's death. Examination of how the collapse of the Soviet empire led to ethnic tensions and conflict, widely divergent efforts at reform, and efforts to reintegrate the region into the European system. (Meets GEC Cultural Diversity Requirement.)

235 World War II: The European Experience

Origins of the European war; Hitler's reorganization of East Central Europe in 1938-39; the war itself, from the 1939 Blitzkrieg against Poland to the fall of Berlin in 1945; the peace settlement and its failures; the onset of the Cold War.

240 History and Film

An exploration of history on film and film as history. After a discussion of recent methodologies, both in history and film studies, the course examines historical epics, documentaries, propaganda, literary adaptations, and biographies. The course also studies films that reveal important assumptions about their day.

245 Foods, Diets, and Cultures

Explores history of food production and consumption, with focus on the United States. Emphasizes broad themes: production of food, from farm to factory and in the kitchen; the role food has played in shaping gender, racial, and ethnic identities in society; food and environmental development; and the relationship of food to political, cultural, and economic power. (Cross-listed as Women's and Gender Studies 245.)

248 Crusade and Holy War in Medieval Europe

Medieval Europe experienced widespread debate about the use of violence by Christians. The course considers early definitions of Just War and the attempts by the church to control violence around the year 1000. Detailed examination of the origin of the idea of crusade and the history of the First Crusade (1095-99) from Christian, Jewish, Greek, and Muslim perspectives. Examines the later medieval phenomenon of crusade against other Christians.

250 The American Civil War

The origins of the war in the antagonistic development of the free North and slave South; Lincoln and the Republican Party; Black activity in the North and South; the war; the transforming and gendered aspects of fighting the war; Reconstruction; the impact of the war on American development.

254 African American History

A survey of African American history from the sixteenth century to the present, with attention to important themes and events: the African heritage; slavery and the response to bondage; emancipation and reconstruction; African American society under Jim Crow; the northern migrations and the making of the urban ghettos; African American debates on freedom and models of Black leadership in the twentieth century; aspects of contemporary African American America. (Cross-listed as African American Studies 254. Meets GEC Cultural Diversity Requirement.)

255 African American Autobiography

An examination of the African American experience through an exploration of autobiographies, including works by Frederick Douglass, Booker T. Washington, W. E. B. DuBois, Richard Wright, Anne Moody, and Malcolm X. (Cross-listed as African American Studies 255. Meets GEC Cultural Diversity Requirement.)

256 Race and Racism in America

An examination of race and racism as subjects of controversy in American history from the interdisciplinary perspective of American Studies. How did the experience of slavery shape American attitudes toward race? What was the legacy of slavery in the postemancipation years? How has our political and judicial system dealt with race and racism?

257 History of Mexico

This course broadly surveys Mexican history from the pre-Conquest period to the Chiapas revolt in 1994. The meaning of progress, the sacred and indigenous culture, imperialism's impact, and popular mobilization are among its recurring themes. (Cross-listed as Latin American Studies 257. Meets GEC Cultural Diversity Requirement.)

258 History of Sport

The evolution of sport in modern society, in its cultural, social, and economic dimensions. Largely focused on the American experience, but some attention to sport elsewhere in the world. Emphasis on 1850 to the present.

263 American Cities

The changing functions, scale, and quality of urban society from the seventeenth century to the present. A historical framework for studying modern American metropolitan problems. Some fieldwork in Chicago.

265 American Diplomacy

Survey of the evolving role of the United States in world affairs since 1890. Emphasis is on domestic origins of foreign policy and the American role in Asia.

270 History of Education in American Society and Thought

Historical role of education in American society; education as a panacea and as a practical solution; schooling vs. education. Emphasis is on the twentieth century. (Cross-listed as Education 270.)

271 Women in Modern History: Europe and America

This course examines women's lives, activities, and cultures in the United States and Europe from the late eighteenth century to the present. Among the issues examined are birth control; equality vs. difference (the essentialism debate); race and class; and gender as an analytical concept. (Cross-listed as Women's and Gender Studies 271. Meets GEC Cultural Diversity Requirement.)

274 Topics in Asian Studies: Global Engagement in Contemporary China

(Cross-listed as Asian Studies 274 and Philosophy 274. Meets GEC Cultural Diversity Requirement.)

275 Popular Music and American Society

The origins and evolution of rock and roll and its permutations from Delta blues and country music to rap and "riot grrrl"; the intertwining of race, sexuality, gender, and class in this commercial art form.

282 Modern China

Relying as much as possible on Chinese texts (in translation), this course will examine such topics as China's response to Western imperialism in the nineteenth century; the 1911 Revolution; the May Fourth Movement; the birth of the People's Republic of China; the Cultural Revolution; and the Democracy Movement of the 1980s. (Cross-listed as Asian Studies 287. Meets GEC Cultural Diversity Requirement.)

286 Modern Japan

From the founding of the last shogunate, the Tokugawa, in 1603 to its present status as the economic giant among the nations of the Pacific. Attention to the achievements as well as the undeniable sufferings and costs incurred during Japan's drive toward great power. (Cross-listed as Asian Studies 286. Meets GEC Cultural Diversity Requirement.)

288 War and Revolution in Asia: China, Korea, Vietnam

Throughout the twentieth century Asian countries experienced periods of prolonged warfare and revolutionary upheaval. Why is it that wars in Asia have had such a profound impact on U.S. society? What is the relationship between war and revolution in China, Korea, and Vietnam? What impact did war have on Chinese, Korean, and Vietnamese society and how can we best characterize the wars of each region? We will use a variety of sources, including books and films, in the class. (Cross-listed as Asian Studies 288. Meets GEC Cultural Diversity Requirement.)

300 Theory and Methods

How can we know what actually happened in the past? This course examines the bases of historical knowledge and interpretation, and studies methods used for understanding and writing about the past. Emphases include the use of documentary evidence, the analysis of

conflicting historical interpretations, and the use of the Web as a research tool. Prerequisite: an introductory history course. Required of all history majors.

304 Roman and Medieval Christianity

This course will consider topics in the history of Christianity from its origins to the fifteenth century, including the lives of Christ and Paul; the influence of Roman, Germanic, and Celtic religion on early Christianity; doctrinal disputes and heresy; monasticism; the cult of saints; conflicts of church and state; mysticism; reform movements. The course will include regular consideration of medieval Christian art, including images in painting, sculpture, and manuscripts. (Cross-listed as Religion 306. Meets GEC Cultural Diversity Requirement.)

305 Men, Women, and the Other in Medieval Europe

Medieval men and women discussed many of the same questions about identity that we do: What makes an individual unique? How does group affiliation affect identity? What is the relationship between identity and change? This course considers the following topics: medieval conceptions of the individual in autobiographical texts; how medieval Europeans defined their own identity by persecuting the "other," including Jews and lepers; and what medieval people thought about how change affects identity, in texts such as werewolf stories and alchemy manuals. (Cross-listed as Women's and Gender Studies 305.)

307 Topics in East Asian History: China's Cultural Revolution

This course examines the origins and development of the Chinese Cultural Revolution, which lasted from 1966 to 1976. Initiated by Mao Zedong, the Cultural Revolution was responsible for the most severe setback and the heaviest losses suffered by the Chinese state and people since the founding of the People's Republic of China in 1949. (Cross-listed as Asian Studies 307. Meets GEC Cultural Diversity Requirement.)

309 Problems in Modern Chinese History: Film and Reality

What are the enduring problems of modern China? How have different Chinese governments confronted them? We will study twentieth-century transformations in Chinese society, politics, and culture on the mainland and Taiwan in the light of modern Chinese and international history through film and discus-

sion of the major issues addressed by Western scholarship. Basic topics to be covered include Sino-Western relations; tradition and modernization; peasant rebellions; revolution and reforms; religion; culture and society; modern science; and intellectuals and the state. (Cross-listed as Asian Studies 309. Meets GEC Cultural Diversity Requirement.)

310 East Asia and the West

This course explores the complex and evolving interrelationships among Eastern and Western cultures. It focuses on how various traditions and discourses encounter, resist, assimilate, and transform outside global influences. The course is strongly interdisciplinary and includes history, politics, philosophy, film, and opera. Prerequisite: History 110 or permission of instructor. (Cross-listed as Asian Studies 310. Meets GEC Cultural Diversity Requirement.)

312 Medieval Politics and Governance

This seminar examines the methods, structures, and strategies of medieval politics and governance in Western Europe from ca. 860 to ca. 1500. The primary focus will be on the creation and governance of centralized polities. The course will also examine local and town governance. Topics include theories of kinship, role of kinship, rise of administration, feudalism, seigneurialism, ritual, and horizontal ties (e.g., communes, affinities, guilds).

314 Charlemagne and His World (700-900 AD)

Since his death, Charlemagne has remained one of the most revered and evocative figures of the early Middle Ages. He and his family built a formidable empire, revolutionized thinking about kingship and government, and presided over reforms in religion, scholarship, and art. This course considers the achievements of the Carolingian period, the consequences of the collapse of their power, and the development of the legend of Charlemagne.

315 Rise and Fall of Soviet Russia

The end of the tsarist empire, the revolutions of 1917, development of Soviet society and institutions under Lenin, Stalin, and Khrushchev, the aging of the Soviet system under Brezhnev, the failure of Gorbachev's efforts at reform, the disintegration of the Soviet empire, and the demise of the USSR in 1991. Emphasis on political and social conflicts, ideological debates, and cultural developments. Prerequisite: History 213 or 214 or permission of the instructor. (Meets GEC Cultural Diversity Requirement.)

325 Science, Religion, and Modernity

Western science from the late Middle Ages to 1900, explored through the lens of its developing relationship with religion and connection to modernity. Themes of the course involve the laws of nature, measurement, scientific methods, promotional and oversight organizations, and materialism. Case studies include Roger Bacon's science, Galileo's travels, Francis Bacon's vision, physico-theology, Newton versus Leibniz, Enlightenment scientific societies, physiological psychology around 1750, Genesis and geology, the reception of Darwin, and the warfare between science and religion.

331 The Enlightenment

Readings and discussions of the central ideas of Europe in the eighteenth century, with emphasis on Britain and France. Topics include the social and political context of the Enlightenment, the impact of science, and the development of notions of tolerance, freedom, and rationality. (Cross-listed as English 331.)

332 European Romanticism

Intellectual and social origins of Romanticism, with emphasis on Germany and England; impact of the French Revolution; individualism in poetry and art; and the rise of historicism. Works discussed will include those by Goethe, Wordsworth, Keats, Hugo, Constable, and Schlegel.

335 Twentieth-Century British Culture

British culture since 1900. Topics include the impact of World War I; the Bloomsbury circle; documentary writing and film; working-class realism in the 1950s; youth culture; the New Left; postimperial culture; and postmodernism.

342 History and Literature: Tudor-Stuart England, 1485-1660

An interdisciplinary opportunity to investigate one seminal era. Topics include the "lost" world of early modern family and social life; the English Reformation; the aristocracy and the rise of the gentry; Renaissance heroism and "self-fashioning"; women's lives and literature; early modern biography and lyric subjectivity; Tudor and Stuart monarchy; the causes of the English Civil War; and the emergence of the scientific worldview. Prerequisite: either one English or one history course at the 200 level or above. (Cross-listed as English 342.)

343 Literature and Society in Russia

Aspects of the social and intellectual history of tsarist and Soviet Russia through the prism of nineteenth- and twentieth-century fiction, mostly novels. Readings will include major works by such authors as Pushkin, Turgenev, Dostoevsky, Tolstoy, Chekhov, Gorky, Pasternak, Akhmatova, Babel, Kataev, Bulgakov, Solzhenitsyn, Yevtushenko, and Tolstoy. Films will also be used. (Cross-listed as Women's and Gender Studies 343. Meets GEC Cultural Diversity Requirement.)

347 Topics in Gender and History

A seminar that examines in depth one aspect of gender and history. Topics vary from year to year. (Cross-listed as Women's and Gender Studies 347. Meets GEC Cultural Diversity Requirement.)

348 Public History: Museums and Exhibitions

History is an academic discipline but it also has a public face. "Public history," through museum exhibitions, historical sites, the Internet, and other venues, is a growing career field. Students in this class will learn the communication tools necessary to produce an engaging and intellectually sound exhibit, including the techniques of oral history. The class will develop a concept, research in local archives, write label copy, and design and install an exhibit. We may use audio, video, photography, and the web to tell our story. The exhibition will be presented in the Sonnenschein Gallery or a local history museum, such as the Lake County Museum. The course will include field studies to Chicago-area history museums. Prerequisite: Junior or senior standing, or permission of the instructor.

349 The Lake Forest College Campus as Cultural Landscape

(Cross-listed as Art 349.)

355 American Social History

Conducted as a seminar. Topics include family, class, gender, race, ethnicity, and work. Prerequisite: History 120 or 121, or permission of the instructor.

360 Colonial America

Origins of European colonialism; Indian-European relations; Puritanism and society in New England; slavery and politics in Virginia; English imperial regulations; the Glorious Revolution; and the Great Awakening. Prerequisite: History 120.

361 Advanced Topics in African American History: The Modern American Civil Rights Movement

This course focuses on the origins, development, and accomplishments of the civil rights movement in post-World War II America. Particular emphasis will be given to the differences between the struggle for black equality in the south and its northern counterpart. Taught in a seminar format, the class will be both reading- and writing-intensive. Course readings and paper assignments are designed to help students develop a comparative analytical framework and to illuminate the following lines of inquiry: What caused and what sustained the civil rights movement? What changes took place within the movement over time, particularly at the level of leadership? What underlay the radicalization of the movement and what were the consequences? To what extent did the civil rights movement succeed and how do we measure that success today? Finally, how did the black civil rights movement inspire other groups and minorities in American society to organize? (Cross-listed as African American Studies 361. Meets GEC Cultural Diversity Requirement.)

365 American Thought

An examination of major currents of American thought with special emphasis on the ways Americans have thought about their relationship with their environment: Puritanism, Jefferson and nature, Emerson and Thoreau's romanticism, Darwinism, and the modern environmental movement. Prerequisites: History 120, 121, an introductory course in American literature, or permission of the instructor.

420 Senior Seminar: Contemporary History

Selected advanced topics in history, with attention to the methods and problems of historical research. Each student will write a major research paper. Required of all history majors in their junior or senior year except those doing independent study research projects. Open to nonmajors with appropriate preparation and permission of the instructor. The seminar for 2005-2006 addresses topics in American and world history since 1945. It will examine multiple sets of concerns: (1) the study of newly-available print and digital sources that enhance our knowledge of the past; (2) the study, on a more selective basis, of specific aspects of the post-1945 history; and (3) the development of an historical consciousness to examine the remembered past.

HONORS SEMINAR

Professor of History David Spadafora

SOPHOMORE HONORS SEMINAR

On occasion an interdisciplinary honors seminar is taught on the sophomore level. Students read classics of Western thought and related materials. They share responsibility with the instructor for generating the topics for discussion at class meetings. Enrollment is limited to 15 students and requires permission of the instructor.

250 Human Possibility and Limitation

How much control does humankind have in determining events and their consequences? What forces are beyond one's control? The seminar will use readings from Homer, Sophocles, Augustine, Dante, Shakespeare, Darwin, Marx, Freud, and Beckett.

251 Heroism: Tragedy and Transgression

Many of our notions of the hero are still derived from early epic literature, which presents a paradox: The hero is most truly himself when he dies; the perfect fulfillment of heroism is death. While heroes are found not only in battle, cultures both ancient and modern seem reluctant to acknowledge a pure heroism: The hero is frequently a problematic and ambivalent figure, raising fundamental questions of morality and mortality. What is a hero, in different cultures and in different times? Why are heroes so closely linked to tragedy? How do the concepts of limitation, transgression, and flaw play a role in defining the heroic? These are some of the questions pursued in readings from all literary genres and in examining the discourse of such forms as opera and film. The seminar analyzes major works of Homer, Shakespeare, Goethe, Melville, and Dostoevsky, but it also engages nontraditional aspects of heroism such as female tragic figures, the anti-hero, and forms of resistance to political oppression. A study of film and detective fiction will provide an opportunity to trace the metamorphosis of heroism in popular as well as "serious" culture.

Affirmation of feminist, multicultural, ethnic, and other creative (and controversial) perspectives is encouraged. The seminar strives to create productive, self-directed dialogue among students and includes student presentations as well as student-led discussions.

252 Perfecting Humanity

Are human beings and humankind perfectible? If not, why not? If so, in what ways, by what means, and with what consequences? Influential attempts, especially during the last five centuries, to address these and related questions are explored through examination of major Western works from several genres and disciplinary points of view. Principle figures planned for consideration include Pico della Mirandola, Shakespeare, Hobbes, Rousseau, Mary Shelley, Marx, Freud, and Arendt.

JUNIOR HONORS SEMINAR

A seminar in the creative process is designed for students at the junior level.

365 In the Belly of the Beast: The Reality of Work in the Big City

The seminar strives to make students better acquainted with the multiplicity and complexity of work as they think about careers by providing an experience of urban life, work contexts, social issues, and great thinking on the subject of work within the framework of first-hand contact with major professions and institutions in their everyday functioning. It seeks to promote the academic study of professions on the part of students who are earnestly career oriented and intellectually prepared to think about problems of work in a personal-professional but also political-societal context. From various perspectives the seminar will provide in-depth insight into what the (nonacademic) professions really do and how they go about doing it. Questions about the reality of work might include professional principles, goals, objectives, and ethos; sense of community and mission; variety and diversity; equal opportunity, affirmative action, and race and gender equality issues; workplace dynamics, overt or subtle discrimination; hierarchies; common ground and conflict; and self-image concerning the role of the profession in social, political, local, and national life. Students participate in 10 to 12 intensive visits to institutions and work sites in Chicago that typify, in dialectical terms, the workplaces, problems and issues, scope, and employment practices of the profession under scrutiny. They also engage in 10 to 12 workshops centering on the professions, to be held on campus, utilizing guest speakers as well as faculty

resources for lectures, demonstrations, and discussions on pertinent issues. The professions and fields covered include law, primary education, medicine, major media, print media, government, food services, finance, public relations, art and commerce, public interest, and technology.

SENIOR HONORS SEMINAR

An honors seminar designed for seniors who wish to undertake a serious integrating and culminating course.

450 The Eighteenth Century: The Birth of a New Worldview

This seminar will study the eighteenth century, for it is with this century that our modern world comes into being; it is the watershed between the Medieval-Renaissance world and what has become our own. The new scientific climate established by the work of Sir Isaac Newton in the context of the political and economic upheavals at the end of the seventeenth century led to the emerging worldview of a rising middle class. This view was challenged by a generation of great writer-satirists who held fast to old values, and then was reinterpreted by a generation of Romantic writers. The age culminated in the great revolutions in America and France and the modern world had been born. Readings will include such authors as Pope, Newton, Swift, Descartes, and Voltaire.

455 Patterns in Nature

From the meander of a river to the branchings of tree and vein, from the soap bubble to the perfect spiral of the nautilus shell, from the articulate gestures of a cellist's hand to the snowflake, our world abounds with exquisite and intricate patterns. This course explores the variety of patterns found in nature, the purposes, if any, that those patterns serve, and the principles and mechanisms upon which natural science calls to explain them. While much of early science sought explanations of patterns in models, plans, and blueprints, modern science acknowledges that such solutions merely relocate the problem rather than solve it. We'll explore how solutions now abound in some sciences but in others are conspicuous in their absence. Ideally, the seminar will draw two types of participants, senior science majors who represent their disciplines and those interested in understanding patterns.

INDEPENDENT SCHOLAR

2005-2006 Committee Members:

Professor of History David Spadafora

Associate Professor of Computer Science Joseph Hummel, Chair

INDEPENDENT SCHOLAR MAJOR

(No minor is currently available.)

The Independent Scholar program allows students to enroll in the program by developing an academic major of their own, culminating in a thesis or a creative project working closely with a faculty advisor. This major is compatible with a student's pursuit of a second major as well. Students with a high GPA are invited to apply and submit a detailed presentation of their case for admission into the program at the end of their sophomore year. The Independent Scholar program takes place during the junior and senior years. The Independent Scholar Committee determines admission.

INTERNATIONAL RELATIONS

2005-2006 Committee Members:

Professor of Economics Robert A. Baade

Professor of Business Les R. Dlabay

Professor of Politics Ghada H. Talbami, Chair

Associate Professor of History Carol Gayle

Assistant Professor of Politics James J. Marquardt

A student majoring in international relations is concerned with the approaches by various disciplines—politics, history, economics, sociology, and psychology—to problems that are global in scope, e.g., war and peace, development and underdevelopment, imperialism and national self-determination. The student will be prepared for positions in international affairs in the federal and state governments, and positions with international institutions, such as the specialized agencies of the United Nations and various international businesses. The major is a base for social service positions at the national and international levels, e.g., the Peace Corps and church groups. Majors often go on to graduate school in political science, law, or business administration.

INTERNATIONAL RELATIONS MAJOR

A major in international relations must take a core set of courses that will form a firm basis from which to study advanced areas in depth. The core courses will acquaint the student with concepts such as the balance of power, the development of the nation-state system in Europe, non-Western history, basic models of human societies, and basic economic principles. Students must maintain a C average in courses taken in the major.

The required core courses are:

Economics 110 (Principles of Economics); Sociology and Anthropology 110 (Introduction to Sociology and Anthropology); History 212 (Europe from the Old Regime to the Modern Era) or History 213 (Europe in the Twentieth Century); Politics 340 (World Politics); International Relations 480 (Senior Seminar). The Senior requirement can also be met by a senior thesis or a research project as approved

by the department chair. The completion of a foreign language through the 305 or 320 level is also required for students whose primary language is English.

Students must take two courses from a specifically comparative perspective to become familiar with differences and similarities among different states and societies. The two courses may be selected from the following or from any other comparative courses deemed suitable by the chairperson: Economics 270 (Latin American Development); Politics 210 (Politics of Western Europe and the European Union); Politics 212 (Politics of the Third World); Politics 216 (The Politics of the Middle East); Politics 217 (African Politics); Politics 219 (The Politics of Latin America); Politics 310 (State and Nation Building); Politics 318-01 (Women in the Third World).

A student must also take four electives that will enable him or her to focus interest on a series of interrelated topics in preparation for the seminar. These four courses or independent studies or internships are to be chosen in consultation with the chairperson.

INTERNATIONAL RELATIONS MINOR

Eight courses are required from the following: four foreign language courses; two core courses and two comparative courses that are normally required for the major; or two foreign language courses and four core courses and two comparative courses that are normally required for the major.

Politics 110: Introduction to Politics

Politics 214: Politics of South Africa

274 Topics in Asian Studies: Global Engagement in Contemporary China
(Cross-listed as Asian Studies 274, History 274, and Philosophy 274.)

345 Topics in International Relations: Arms Proliferation and Control

This course introduces students to the main arguments and concepts in international relations regarding the proliferation and control of weapons of mass destruction. It studies the theory of arms proliferation and control, focusing on why states want these weapons, why they have sought to regulate them, and how proliferation affects international security. It also surveys recent case studies of arms proliferation and control, including the U.S.-Russian nuclear deterrence regime and new challenges to it, nuclear proliferation in South Asia, Northeast Asia, and the Middle East, and recent developments in the area of biological and chemical weapons.

348 International Organization & Law
(Cross-listed as Politics 348.)**480 Senior Seminar: America and the Twenty-First-Century World**

What are America's core national interests? What are the principal threats to these interests? What role should America play in the world? These questions of grand strategy have taken on new importance in recent years. During the Cold War, the United States pursued a strategy of containment, which sought to limit the power and influence of the Soviet Union. While containment may have hastened the demise of the Soviet Union, the end of the Cold War also put an end to containment as a viable grand strategy. As a result, since the early 1990s policy makers and policy analysts have sought to reorient grand strategy in ways that reflect the fundamental changes underway in the international system. Particular attention is given to the similarities and differences in the grand strategies of the Clinton and George W. Bush administrations, which address issues such as international institutions, the use of force and military spending, democracy promotion, the world economy, and the global environment.

INTERNSHIPS AND PRACTICUMS

For information on Internships and Practicums see Undergraduate Curriculum.

LATIN AMERICAN STUDIES

2005-2006 Committee Members:

Professor of Business Les R. Dlabay

Professor of Spanish David George

Professor of Economics Carolyn Tuttle, Chair

Associate Professor of Spanish Lois B. Barr

Associated Faculty:

Professor of Philosophy Louis G. Lombardi

Professor of Art Ann M. Roberts

Professor of History Steven J. Rosswurm

Professor of Politics W. Rand Smith

Associate Professor of Music Rami Levin

Assistant Professor of Biology Caleb Gordon

Assistant Professor of Spanish Gizella Meneses

The region of Latin America, which encompasses Mexico, Central America, South America, and the Hispanic Caribbean, has grown enormously in economic and cultural importance in the United States. Immigration, trade, travel, literary production, and popular culture—these are just a few of the ways in which Latin America is affecting the lives of Americans. By providing both a major and a minor, the Latin American Studies Program enables students to prepare for careers involving this vital region.

THE LATIN AMERICAN STUDIES MAJOR

The major consists of a minimum of 10 credits: four core courses, five electives, and Senior Studies. Students must take a senior seminar or do a senior thesis or senior research project. In addition to the 10 credits, there is also a language proficiency requirement. In designing their majors, students should consult with members of the Latin American Studies Committee.

Core Courses

Students must take four core courses, two courses from A. Arts and Humanities and two courses from B. History and Social Sciences listed below.

A. Arts and Humanities

Art 226, Music 281, Philosophy 272, any course

in Spanish, Foreign Civilization, or Literature in Translation on Latin America.

B. History and Social Sciences

Economics 245, Economics 270, Business 470, History 257, Politics 219, any course in Sociology and Anthropology on Latin America.

Electives

In addition to the four core courses, students must take five other Latin American Studies credits, two of which must be at the 300 or 400 level. These credits can include Latin American Studies courses (see list following), foreign programs, and other alternatives.

Foreign Programs

Course credit gained through participation in study programs in Latin America may be used to fulfill part of the electives requirement. All such credit must be approved in advance by the Latin American Studies Committee. Students are encouraged to participate in Lake Forest College's Fall semester International Internship Program in Santiago, Chile, which provides a professional internship experience, intensive language instruction, and a cultural and historical introduction to Chile. The committee also recommends the two Costa Rica programs sponsored by the Associated Colleges of the Midwest. All credits earned on foreign programs will count at the 300 or 400 level.

Other Alternatives

A maximum of two credits may be obtained through tutorials, research projects, creative projects, and domestic internships.

Senior Studies

Students must complete a Senior Seminar (Latin American Studies 480), a senior thesis, or a senior research project.

Language Proficiency

Students must demonstrate language proficiency in Spanish or Portuguese. This requirement may be met through examination or by completing a Spanish or Portuguese course at the 300 or 400 level.

THE LATIN AMERICAN STUDIES MINOR

The minor in Latin American Studies consists of seven credits to be taken from the following list, which is grouped into courses, foreign programs, and other alternatives. At least two credits must be from the list of arts and humanities courses and at least two credits from the list of history and social sciences courses. These two credits must be from different departments. Otherwise, students may take any combination of courses, foreign programs, and other alternatives. In designing their minors, students should consult with members of the Latin American Studies Committee.

Courses

A. Arts and Humanities

Art 226, Music 281, Philosophy 272, any course in Spanish, Foreign Civilization, or Literature in Translation on Latin America.

B. History and Social Sciences

Economics 245, Economics 270, Business 470, History 257, Politics 219, any course in Sociology and Anthropology on Latin America.

Other courses: See list that follows.

Foreign Programs

Course credit gained through participation in study programs in Latin America may be used to fulfill part of the electives requirement. All such credit must be approved in advance by the Latin American Studies Committee. Students are encouraged to participate in Lake Forest College's Fall semester International Internship Program in Santiago, Chile, which provides a professional internship experience, intensive language instruction, and a cultural and historical introduction to Chile. The committee also recommends the two Costa Rica programs sponsored by the Associated Colleges of the Midwest. All credits earned on foreign programs will count at the 300 or 400 level.

Other Alternatives

A maximum of two credits may be obtained through tutorials, research projects, creative projects, and domestic internships.

Courses Offered Regularly in Latin American Studies

(Consult departmental listings for descriptions.)

Art 226

(Colonial Latin American Art)

Biology/Environmental Studies 380
(Tropical Ecology and Conservation)

Business 470

(Latin American Global Business)

Economics 245

(Child Labor in Latin America)

Economics 270

(Latin American Development)

Economics/Business 322

(Emerging Markets Analysis)

Economics/Business 489

(Globalization and its Impact on Rich and Poor Countries)

History 257

(History of Mexico)

Music 281

(Latin American Music)

Philosophy 272

(Currents in Latin American Thought)

Politics 219

(The Politics of Latin America)

Sociology and Anthropology 231

(Histories and Cultures of Latin America)

Sociology and Anthropology 242

(Maya Cultures and Histories)

Sociology and Anthropology 243

(Andes Cultures and Histories)

Sociology and Anthropology 272

(Popular Culture in Latin America)

Spanish 304

(Cocina y cultura)

Spanish 305

(The Civilization of Spain)

Spanish 306

(Introduction to Latin American Culture)

Spanish 317

(Portuguese for Spanish Speakers)

Spanish 320

(Spanish for International Affairs)

Spanish 325

(Hispanic Cultures in the United States)

Spanish 333

(Film and History in Spain and Latin America)

Spanish 335

(Survey of Latin American Literature)

Spanish 336

(Latin American Film)

Spanish 337 (Latin American Studies 302)
(The Latin American World)

Spanish 339 (Latin American Studies 209)
(Brazilian Literature in Translation)

Spanish 350
(Modern Latin American Narrative in Translation)

Spanish 365
(Latin American Narrative)

Spanish 367
(Latin America: A Creative Approach)

Spanish 370
(Hispanic Poetry)

Spanish 380
(Fiction, Film, and Society in Latin America)

Spanish/Women's and Gender Studies 400
(Special Studies: Women's Voices in Latin America)

Spanish 425
(Latin American Culture and Civilization)

Spanish 480
(Senior Seminar in Spanish in years when the topic is pertinent to Latin American Studies)

420 Latin American Identities

A study of the diverse ethnic and religious groups in Latin America today. The course will focus on the cultural contributions of indigenous groups, the African American peoples, nineteenth-century waves of immigration from Europe and Asia. Sources will include testimonial works, fiction, journalistic essays, and documentary and feature films. Students will present reports, write a research paper, and discuss readings and films. Prerequisite: permission of the instructor. (Meets GEC Cultural Diversity Requirement.)

MATHEMATICS AND COMPUTER SCIENCE

Professor Steven Galovich
Number Theory.

Professor Robert Holliday
Computer Science. Combinatorics.

Professor Edward Packel
Functional Analysis. Applications of Mathematics to the Behavioral and Social Sciences. Computer Science.

Professor DeJuran Richardson
Statistics. Biostatistics.

Professor David Yuen, Chair
Modular Forms. Algebraic Geometry. Riemann Surfaces. Computer Science.

Associate Professor Craig Knuckles
Control Theory and Optimization. Functional Analysis. Computer Science.

Associate Professor Joe Hummel
Computer Science: Programming Languages, Compilers, Computer Architecture, Software Design.

Associate Professor Jill Van Newenhizen
Social Choice Theory. Functional Analysis.

Instructor Ruthane Bopp
Algebra. Real Analysis.

Lecturer Marvin Doubet
Mathematics and Computer Science.

Concepts and techniques of mathematics and computer science play a vital role in an ever-increasing number of human activities. The curriculum and other activities of the Department of Mathematics and Computer Science are designed to acknowledge this fact. The department offers a major in mathematics and a major in computer science.

Admission to any course in the department requires a grade of C- or better in all prerequisite courses.

MATHEMATICS MAJOR

The mathematics major combines conceptual and theoretical ideas with computational techniques and applications of mathematics. When appropriate, courses use technology and the department's computer laboratory to facilitate exploration and understanding in a cooperative setting. Majors are prepared to pursue careers that emphasize applications of mathematics, careers in teaching, and graduate study in mathematics.

The minimum requirements for all students majoring in mathematics are satisfactory completion of the following:

Mathematics 110, 111, 210, 230, 231, 311, 330, and Computer Science 112 (or the Honors sequence, Mathematics 115, 116, instead of Mathematics 110, 111).

One of the following sequences:

- (1) Mathematics 331 and another mathematics course numbered 300 or above; or
- (2) Mathematics 350, 351.

The senior studies course or senior thesis in mathematics.

In addition, one course from the following is required: Physics 120, Philosophy 265, Economics 330, or any Computer Science course numbered 212 or above.

Internship credit may not be counted toward the major.

Most majors who plan careers in mathematics elect more than the minimum number of courses that are required. A reading knowledge of a foreign language is strongly recommended for students who plan to attend graduate school.

MATHEMATICS MINOR

Requirements include the following: Mathematics 110, 111, 210, 230, and either Mathematics 214 or 231; one mathematics course numbered 300 or above; Computer Science 112.

The department encourages students interested in the actuarial profession to prepare for the examinations administered by the Society of Actuaries for certification as an Associate or

Fellow in that professional organization. Students interested in the actuarial profession should elect Mathematics 110, 111 (or 115, 116), 210, 230, and 231 along with Mathematics 314, 350, 351.

COMPUTER SCIENCE MAJOR

The Computer Science major is designed to prepare students, within a liberal arts setting, for careers or graduate work in the field of computer science. The curriculum emphasizes core fundamentals, object-oriented programming and design, Web-centric computing, and important application domains as well as theoretical results. Instruction takes advantage of a wide range of computer technology to facilitate learning and exploration. The departmental labs are fully-networked, providing Windows, Macintosh, and Linux computing environments. Students interested in the major are strongly encouraged to begin their studies during their first year.

The minimum requirements for the major in Computer Science are as follows:

Successful completion of Mathematics 110 and 230, as well as Computer Science 112, 212, 213, 217, 318, 336, and 417.

The senior seminar (Computer Science 488 or 489) or senior thesis in Computer Science.

Successful completion of two additional courses in Computer Science from the following list: 214 and any course numbered 300 or above. Internship credit may not be counted toward the major.

Recommended (but not required) are the following: Mathematics 111, 150 (or 350 and 351 for a stronger theoretical background), 231, 314, and 375; Philosophy 265. Students interested in attending graduate school in computer science are strongly encouraged to take Computer Science 434 and 461.

COMPUTER SCIENCE MINOR

The minor in Computer Science requires the student to successfully complete Mathematics 110 and 230 as well as Computer Science 112, 212, 213, 217, and one of 312, 318, or 336.

MATH 103 The Nature of Mathematics

Intended for students with primary interests in the humanities and social sciences. The course uses set theory, logic, and language as a founda-

tion for studying a variety of topics central to the development of modern mathematics. Emphasizing the central role of language in mathematics, the course shows that mathematics is about communication of ideas. Topics will be explored through experimentation with computers where appropriate using games, puzzles, and group projects as well as lectures and discussions. Additional topics include codes and basic geometry. The course will focus on the interplay of different ideas.

MATH 104 Elementary Mathematics from an Advanced Standpoint

(Cross-listed as Education 104.)

MATH 105 Elementary Functions

Properties of functions with emphasis on polynomial, exponential, logarithmic, and trigonometric functions. Analytic geometry. (Does not meet GEC Natural and Mathematical Sciences Requirement.)

MATH 110 Calculus I

The calculus of functions of one variable. Limits, continuity, differentiation, and applications; a brief introduction to integration. Prerequisite: 3.5 years of high school mathematics (to include trigonometry) or Mathematics 105.

MATH 111 Calculus II

The calculus of functions of one variable. Integration, applications of integration, sequences, and series. Prerequisite: Mathematics 110.

MATH 115 Honors Calculus I

Theory and applications of the calculus of functions of one variable. Limits, continuous functions, differentiable functions, the definite integral, and applications. Prerequisite: permission of the instructor.

MATH 116 Honors Calculus II

Continuation of Mathematics 115. Integration and applications, sequences, infinite series. Prerequisite: permission of the instructor.

MATH 150 Introduction to Probability and Statistics

Designed for students in the social and life sciences. Discrete probability theory, distributions, sampling, correlation, and regression, Chi square and other tests of significance. Emphasis on the use of the computer as a tool and on applications to a variety of disciplines. (Not open to students who have taken Economics/Business 180).

MATH 160 Finite Mathematics with Applications

Mathematical topics as needed to build and solve mathematical models of situations in the life, social, and managerial sciences. Topics chosen from basic probability theory; vectors, matrices, and Markov chains; linear programming; mathematics of finance; and game theory.

MATH 195 The Mathematics of Games and Gambling (Offered Less Frequently)

This course introduces and develops some of the important and beautiful "elementary" mathematics needed for rational analysis of various game and gambling activities. Topics treated include permutations and combinations, probability, expectation, the binomial distribution, elementary game theory, power indices, and the gambler's ruin. Social and historical issues related to gambling will also be considered along with a variety of hands-on gaming activities, but the primary emphasis will be on the understanding and application of the mathematics behind these activities.

MATH 198 Mathematics in Civilization (Offered Less Frequently)

Mathematics has played a major role in the development of Western civilization. This course investigates how important mathematical subjects such as algebra and geometry arose out of such diverse activities as science, commerce, and art. Our approach will be historical, and our journey will take us from the development of number systems in the ancient Middle East nearly 4,000 years ago to the use of non-Euclidean geometry to describe the universe in the twentieth century.

Selected topics from affine, Euclidean, non-Euclidean, projective, and differential geometry. Prerequisite: Mathematics 230 or permission of the instructor.

MATH 210 Multivariable Calculus

Partial differentiation, the algebra and calculus of vectors, curves and their parameterization, multiple integration, Stokes's and Green's theorem, and applications. Prerequisite: Mathematics 111.

MATH 211 Mathematics of Chaos (Offered Less Frequently)

A study of nonlinear dynamical systems, including iteration of functions, attracting and repelling periodic orbits, bifurcation, the period doubling route to chaos, complex dynamics, fractals, and Mandelbrot and Julia sets. Real-world implications and applications of chaos. Can meet the requirements for a 300-level-or-above mathe-

matics course on completion of an additional project approved by the instructor. Prerequisite: Mathematics 111.

MATH 214 Differential Equations

Differential equation models, analytic solution techniques, qualitative solution concepts, and computer visualization for single equations and systems. Applications of differential equations. Prerequisite: Mathematics 210 or permission of the instructor.

MATH 230 Introduction to Abstract and Discrete Mathematics

Topics covered include logic and proofs, set theory, relations, cardinal numbers, countable and uncountable sets, permutations and combinations, graph theory, and group theory. Prerequisite: Mathematics 110.

MATH 231 Linear Algebra

Vector spaces, linear independence, linear transformations, matrices, determinants, and applications to geometry. Prerequisite: Mathematics 230 or permission of the instructor.

MATH 260 History of Mathematics (Offered Less Frequently)

A survey of the important concepts of mathematics from the time of the Babylonians to the present. Emphasis will be on the evolution of mathematical ideas and the contributions of the most prominent individuals associated with the development of mathematics. Prerequisite: Mathematics 111 or permission of the instructor.

MATH 310 Complex Analysis

Study of functions of one complex variable. Analytic functions, complex integration, Cauchy's theorem, complex power series, and special functions. Applications to other areas of mathematics and to mathematical physics. Prerequisites: Mathematics 210 and 230 or permission of the instructor.

MATH 311 Introduction to Real Analysis

A rigorous course covering the following introductory real analysis topics: axioms for the real numbers, sequences, boundedness, limits, monotone functions, continuity, uniform continuity, Cauchy criterion for convergence, cluster points, compactness, differentiability, integration, and infinite series. Prerequisites: Mathematics 210 and 230.

**MATH 314 Numerical Analysis
(Offered Less Frequently)**

Linear and polynomial interpolation, finite differences, matrix methods. Solution of equations and systems of equations. Numerical differentiation, integration, and solutions of differential equations. Algorithms and computer applications. Prerequisites: Mathematics 111, 231, and Computer Science 112. (Cross-listed as Computer Science 314.)

**MATH 320 Mathematical Methods
(Offered Less Frequently)**

(Cross-listed as Physics 320.)

MATH 323 Cryptography

(Cross-listed as Computer Science 323.)

MATH 329 Number Theory

Mathematical induction, divisibility properties of integers, prime numbers, and congruences. Prerequisite: Mathematics 230 or permission of the instructor.

MATH 330 Modern Algebra I

A study of algebraic structures with emphasis on groups, rings, and fields. Prerequisite: Mathematics 230.

MATH 331 Modern Algebra II

Additional topics in modern or linear algebra such as field extensions, Galois Theory, group conjugacy, modules, eigenvalue theory, dual spaces, and unitary spaces. Prerequisite: Mathematics 330 or permission of the instructor.

**MATH 340 Geometry
(Offered Less Frequently)**

Selected topics from affine, Euclidean, non-Euclidean, projective, and differential geometry. Prerequisite: Mathematics 230 or permission of the instructor.

MATH 350 Mathematical Probability

Discrete and continuous probability. Distributions, the law of large numbers, the central limit theorem, random variables, and generating functions. Prerequisites: Mathematics 210 and 230 or permission of the instructor.

MATH 351 Mathematical Statistics

A mathematical study of such topics as estimation of parameters, confidence intervals and tests of hypotheses, decision theory, regression, analysis of variance, and nonparametric methods. Prerequisite: Mathematics 350.

**MATH 360 Mathematical Modeling and
Computer Simulation (Offered Less
Frequently)**

(Cross-listed as Computer Science 360.)

**MATH 365 Algebraic Coding Theory (Offered
Less Frequently)**

A study of the algebraic structure of codes designed to transmit messages through a noisy channel in an efficient and relatively error-free fashion. Topics include finite-dimensional vector spaces over a finite field and the connection between coding theory and areas such as geometry, combinatorics, and number theory. Prerequisite: Mathematics 231 or permission of the instructor. (Cross-listed as Computer Science 365.)

MATH 375 Combinatorics and Graph Theory

Enumeration techniques with emphasis on permutations and combinations, generating functions, recurrence relations, inclusion and exclusion, and the pigeonhole principle. Graph theory with emphasis on trees, circuits, cut sets, planar graphs, chromatic numbers, and transportation networks. Additional topics from designs with emphasis on Latin squares, finite projective and affine geometries, block designs, and design of experiments. Prerequisite: Mathematics 230. (Cross-listed as Computer Science 375.)

**MATH 410 Topology
(Offered Less Frequently)**

Point set topology. Such topics as topological spaces, separation axioms, covering properties, metrization, convergence and completeness, and homotopy theory. Prerequisite: Mathematics 230.

**MATH 411 Topics in Modern Analysis
(Offered Less Frequently)**

Introductory notions of functional analysis. Banach spaces, integration and measure, Hilbert spaces, and commutative Banach algebras.

MATH 434 Theory of Computation

(Cross-listed as Computer Science 434.)

MATH 499 Great Theorems of Mathematics

Seminar course to introduce students to various masterpieces in the development of mathematics. Some of the most historically important proofs and ingenious logical arguments from mathematics will be presented and discussed. An emphasis will be placed on the interconnectedness among various subject areas within

mathematics. Prerequisite: permission of the instructor. (Meets GEC Senior Studies Requirement.)

CSCI 107 Interactive Programming Web

A broad exploration of the technologies associated with Web programming for those who do not plan to pursue further course work in computer science. Assumes no prior programming experience. Topics include Internet history and its basic architecture, managing an account on a Web server, HTML markup (text, images, links), design issues (HTML tables vs. HTML Frames), use of style sheets (CSS), introduction to the client-server model, HTML forms, JavaScript control structures, the document object model (DOM), and using JavaScript to manipulate the DOM and process HTML forms. Please note: This is a general audience course intended for those who have limited computer background; this course does not count toward the major or minor in Computer Science or Mathematics. Prerequisite: General familiarity with computer files and folders, word processing, and surfing the Web with a browser.

**CSCI 112 Introduction to Object-Oriented
Programming**

Introduction to modern object-oriented programming and design, using Java. The goal is to see problem solving in a new light, namely using objects. Topics include the basic building blocks of problem solving (sequence, selection, repetition), followed by classes, objects, data structures and algorithms. A prior knowledge of computer programming is not required, although a strong background in Mathematics or Logic is recommended. Students may receive credit for this course based on the AP computer science exam (Java version).

CSCI 212 Computer Science I

Introduction to computer science, using Java. Basic data structures, algorithms, and algorithm analysis. Topics include dynamic memory allocation, dynamic arrays, lists, sorting, searching, and the application of advanced object-oriented design to data structures and algorithms. Prerequisite: Computer Science 112.

**CSCI 213 Introduction to Computer
Architecture**

Computer architecture, modern CPU design, memory layout, assembly language programming, addressing techniques, input/output techniques, and interfacing with high-level languages. Prerequisite: Computer Science 112.

CSCI 214 Principles of Digital Logic

Basic logic, digital electronics, microcomputer architecture, and interfacing, with hands-on laboratory activity. Prerequisite: Computer Science 213.

CSCI 217 Computer Science II

Continuation of Computer Science I, using Java. Emphasis on advanced data structures and algorithms. Topics include linked data structures, trees, graphs, recursion, algorithms, and algorithm analysis. Prerequisite: Computer Science 212.

CSCI 260 Symbolic Logic

An introduction to propositional and predicate logic. Topics include formal semantics, translation, natural deduction, quantification theory, and completeness. The relevance of logic to computer theory and artificial intelligence is stressed. (Cross-listed as Philosophy 265.)

CSCI 312 Client-Server Web Applications

An in-depth study of building Web applications using the client-server model. Topics include an overview of HTML and HTML forms for collecting user data, client-server interaction, CGI programming, storage and manipulation of server data using databases, and returning dynamic content to the client. Preprocessed HTML documents with PHP or Java Server Pages and Web session control with cookies and other useful objects. Additional topics may include the distributed object framework, XML for data extensibility, and an overview of Microsoft's Active Server Pages (ASP) and .NET platform for distributed Web applications. Prerequisite: Computer Science 212.

**CSCI 314 Numerical Analysis
(Offered Less Frequently)**

(Cross-listed as Mathematics 314.)

CSCI 318 Programming Languages

A study of different programming languages and their paradigms (or styles). Topics include imperative vs. functional vs. event-driven vs. declarative programming, typing, memory organization, scope, and lifetime management. Lab exercises focus on programming in the various paradigms; students can expect to program in languages like ML, Visual Basic, and SQL. Prerequisite: Computer Science 212.

CSCI 323 Cryptography

An introduction to cryptography and cryptanalysis, the making of codes and the breaking of codes. History and basic concepts. Classical ciphers and attacks on classical ciphers. One-time Pad. Modern ciphers including DES, AES. Public key ciphers including RSA and Diffie-Hellman. Digital signatures. Additional topics may include Elliptic Curve systems, knapsack systems, and other cryptographic systems. Prerequisites: Mathematics 230 and Computer Science 212, or permission of the instructor. (Cross-listed as Mathematics 323.)

CSCI 336 Operating Systems and Systems Programming

An introduction to modern operating systems and their most important features. Topics include multiprocessing, virtual memory, multithreading, concurrency, I/O, networking, security, and distributed computing. Students construct a major component of an operating system in C or C++. Prerequisites: Computer Science 212 and 213.

CSCI 360 Mathematical Modeling and Computer Simulation (Offered Less Frequently)

Introduction to the process and techniques of modeling actual situations using mathematical methods and computer simulation. Topics may include optimization, dynamical systems, axiom systems, queuing theory, and introduction of a simulation language. Team projects and reports. Prerequisites: Mathematics 111, Computer Science 212, and some additional sophistication in at least one of the following: mathematics, computer science, or applying mathematics in a field of interest. (Cross-listed as Mathematics 360.)

CSCI 365 Algebraic Coding Theory (Offered Less Frequently)

(Cross-listed as Mathematics 365.)

CSCI 375 Combinatorics and Graph Theory

(Cross-listed as Mathematics 375.)

CSCI 417 Algorithms and Algorithm Analysis

The study of algorithms and their mathematical analysis. Divide-and-conquer, greedy, brute-force, dynamic programming, backtracking, advanced tree and graph algorithms, big-O notation, case and amortized analysis. Prerequisites: Mathematics 230 and Computer Science 217.

CSCI 425 Artificial Intelligence

An introduction to AI via topics including tree and graph searches, min-max methods, alpha-

beta pruning, heuristics, backtracking, natural language processing, and computer vision. Prerequisite: Computer Science 217.

CSCI 427 Introduction to Database Systems

An in-depth study of proper methods of design for database systems, with an emphasis on the relational model. Topics include relational design, query languages, and transactional processing. Lab exercises focus on GUI-driven, SQL-based access as well as modern, multi-tier styles of design. Prerequisite: Computer Science 217.

CSCI 434 Theory of Computation

Fundamental conceptual, theoretical, and philosophical ideas from computer science. Formal languages, finite state automata, and Kleene's theorem. Formal grammars, pushdown automata, and context-free languages. Turing machines, computability, and Church's thesis. Decidability, unsolvability, and NP-completeness. Prerequisite: Mathematics 230. (Cross-listed as Mathematics 434.)

CSCI 461 Compiler Design

An introduction to the design and construction of compilers for modern programming languages. Topics include grammars, formal language definition, abstract syntax trees, symbol tables, syntax and semantic checking, code generation, and optimization. Students construct a modern compiler for an object-oriented programming language. Prerequisites: Mathematics 230 and Computer Science 213 and 217.

CSCI 488 Senior Seminar in Computer Science

A seminar-like discussion of software engineering, object-oriented design, and large-scale software development. Students will practice modern software engineering as well as read and present papers concerning the subject. Prerequisites: Computer Science 217, 318, and permission of the instructor. (Meets GEC Senior Studies Requirement.)

CSCI 489 Advanced Topics in Computer Science

Special topics and projects in computer science, including but not limited to distributed systems, secure computing, Web development, user-interface design, and software engineering. Prerequisites: Computer Science 217, 318, and permission of the instructor. (Meets GEC Senior Studies Requirement.)

METROPOLITAN STUDIES

Professor of Politics Paul B. Fischer, Chair

METROPOLITAN STUDIES MINOR

(No major is currently available.)

An interdisciplinary minor in metropolitan studies allows the student to examine, from a variety of perspectives, the development and impact of urbanization in the great metropolitan regions (comprising larger inner cities and suburban communities) in which a majority of the world's population now lives.

The core courses in Metropolitan Studies are:

Economics 240
(Urban Economics)

History 263
(American Cities)

Politics 223
(Urban and Suburban Politics)

A student must complete two of the core courses listed above, plus four additional courses among those listed below: (Note: the third core course may be counted as an elective.)

Economics 340 (Environmental and Natural Resource Economics)

Economics 350 (Public Finance)

History 256/Politics 328 (if topic is Race and Racism in America)

An independent study research project (approved by one of the program advisors)

Any of the following forms of applied study count as two metropolitan studies electives:

ACM Urban Studies Term in Chicago

ACM Urban Education Program

An internship (approved by one of the program advisors)

MUSIC

Associate Professor Rami Y. Levin
Theory. Composition. Latin American Music.

Associate Professor Donald Meyer, Chair
Music History. Electronic Music. Theory.
Music Appreciation. American Music.

Assistant Professor Kirk-Evan Billet
Theory. Composition. World Music. Music
History. Chorus.

Instructor David Amrein
Theory. Music Appreciation. Chamber
Orchestra.

Lecturer and Teaching Associate Deborah Knowles
Percussion. Band. Percussion Ensemble. Music
Appreciation.

Lecturer and Teaching Associate Mitch Paliga
Saxophone. Jazz Ensemble. History of Jazz.

Teaching Associate Sally Bowers
Flute.

Teaching Associate Erica Anderson
Oboe.

Teaching Associate Barbara Drapcho
Clarinet.

Teaching Associate Collin Anderson
Bassoon.

Teaching Associate Jeremiah Frederick
French horn.

Teaching Associate Eric Yates
Trumpet.

Teaching Associate William Walsh
Trombone/Euphonium/Tuba.

Teaching Associate Amy Cutler
Violin.

Teaching Associate Ron Arden
Viola.

Teaching Associate Robin Hasenpflug
Cello.

Teaching Associate Jim Cox
Bass.

Teaching Associate Alison Attar
Harp.

Teaching Associate Jesse Langen
Guitar.

Teaching Associate Soo Young Lee
Piano.

Teaching Associate Chris White
Jazz Piano.

Teaching Associate Kathleen Van De Graaff
Voice.

The department offers courses in theory and composition, music history, and performance. Several courses are designed specifically for students with little or no prior musical experience (104, 150, 217, 219, 227, 264, 265). The department has an electronic and recording studio equipped with analog and digital (MIDI) equipment.

The department sponsors a range of performance activities. The Lake Forest College Chorus is the main choral group, with advanced singers invited to join the smaller Forester Singers. Instrumental musicians may participate in the Chamber Orchestra, Jazz Ensemble, Concert Band, Flute Choir, and Percussion Ensemble. The department also encourages student ensembles such as other chamber groups and rock groups. Students may study applied music through private lessons in piano, voice, or other instruments. These may be done on a credit or noncredit basis. The fees for noncredit lessons are listed in this catalog in Undergraduate Tuition and Expenses. Practice rooms with pianos are available for student use. A series of master classes each year gives students the opportunity to play for and receive feedback from professional instrumentalists in an informal lesson.

The location of the College among the North Shore suburbs of Chicago provides unusual opportunities for students to hear great performing organizations, such as the Chicago Symphony Orchestra, the Lyric Opera, the Lake Forest Symphony, and numerous performing artists.

In addition, Lake Forest Lyrica, a series of chamber music concerts performed by some of Chicago's finest musicians, is held on the campus in Lily Reid Holt Memorial Chapel and is free to students. Students may also participate in the North Suburban Symphony, a local community orchestra.

MUSIC MAJOR

The major consists of the following courses:

Three semesters of music theory: 151, 250, and 251, one semester of musicianship: 160

Three courses in music history: 360, 361, and one course from 217, 219, 227, or 281.

One year in an ensemble (107, 108, 109, 110). Ensembles earn one quarter-credit each semester. Two years of private lessons for credit on the same instrument (or voice) (111, 112, 211, and 212). Private lessons earn one half-credit each semester.

One elective music course (excluding any First-Year Studies course, 104, and 150).

Senior Seminar

Additional Requirements

To graduate with a major in music, students are required to have a minimum grade of C in all music courses. Students may elect to take a proficiency exam in basic sight-singing and dictation to substitute for Music 160.

Students majoring in music are also required to pass a piano proficiency exam by the end of their junior year. The department encourages anyone considering a music major to take this exam as early as possible because students who do not pass the exam must take two semesters of piano lessons. These lessons may count as the course credit in music performance (a credit that is required of all majors), as the elective course for the major, or as an additional course beyond the requirements for the major.

MUSIC MINOR

The minor is designed for students with an interest in music who do not want the intense concentration of a major. The requirements provide students with a working knowledge of elementary music theory and a background in music history. A total of six courses is required to include the following: two sequential courses in music theory from Music 150, 151, 250, and

251; two courses in music history, of which at least one course must be from Music 360 or 361 and the other from Music 217, 227, 262, 264, or 265; one year in music performance from Music 111, 112, 211, 212, 311, 312, 411, 412, 107, 108, 109, or 110; one elective with the exclusion of Music 104, and any First-Year Studies course.

104 Perspectives on Music

An introduction to various facets of music through guided listening to selected masterpieces of Western music as well as exposure to folk music, popular music, and non-Western music. No previous knowledge is needed. Intended for non-majors.

107 Concert Band

The Band performs marches, overtures, waltzes, and suites by such composers as Vaughan Williams, Holst, Sousa, and others. The ensemble is open to all students. Students may participate in this ensemble for credit, earning a quarter credit each semester. There is no overload charge for up to 4.5 credits earned, and students may repeat the course as many times as they choose during their college years. This course is graded Credit/D/F.

108 Chamber Orchestra

The Chamber Orchestra is an ensemble devoted to the performance of Baroque, Classical, Romantic, and twentieth-century repertoire. The group performs two concerts each semester. The Chamber Orchestra is open to all qualified members of the College community. Auditions will be held early in the fall. Students may participate in this ensemble for credit, earning a quarter credit each semester. There is no overload charge for up to 4.5 credits earned, and students may repeat the course as many times as they choose during their college years. This course is graded Credit/D/F.

109 College Chorus

The Chorus performs repertoire ranging from motets to musical theater and from Medieval to jazz, as well as music of the world's various cultures and traditions. Membership in the chorus is open to all students by audition. Two performances are given each semester. Students may participate in this ensemble for credit, earning a quarter credit each semester. There is no overload charge for up to 4.5 credits earned, and students may repeat the course as many times as they choose during their college years. This course is graded Credit/D/F.

110 Jazz Ensemble

The Jazz Ensemble performs music from big band classics and contemporary repertoire. The ensemble is open to all students by audition. Students may participate in this ensemble for credit, earning a quarter credit each semester. There is no overload charge for up to 4.5 credits earned, and students may repeat the course as many times as they choose during their college years. This course is graded Credit/D/F.

111 Applied Music

Private instruction in piano, organ, orchestral instruments, and voice. For noncredit weekly lessons of one-half, three-fourths, or one hour, an additional fee is charged. See Undergraduate Tuition and Expenses for details. For credit, the student must either have Music 150 as a pre- or co-requisite or obtain consent of the chairperson of the department; the student must satisfactorily complete at least twelve weekly one-hour lessons and participate in two workshops and one recital each semester. A half credit is earned after each semester. This course is graded on a letter-grade basis. Following are the sections available by instrument:

- 01 Piano
- 02 Jazz piano
- 03 Guitar
- 04 Voice
- 05 Flute
- 06 Oboe
- 07 Clarinet
- 08 Bassoon
- 09 Saxophone
- 10 French Horn
- 11 Trumpet
- 12 Low Brass
- 13 Percussion
- 14 Violin
- 15 Viola
- 16 Cello
- 17 Bass
- 18 Miscellaneous

112 Applied Music

Continuation of Music 111.

120 Songwriting (Offered Less Frequently)

How to write songs. Emphasis on popular forms in the styles of the 1960s to the present, including pop, rock, folk, Broadway, and others. Covers text, setting, forms, harmony, instrumentation, arranging, studio techniques, and performance. Prerequisite: Music 150 or consent of the instructor.

150 Fundamentals of Music

Introduction to elements and basic principles of tonal music: notation, intervals, scales, rhythm, meter, melody, and harmony. Emphasis on listening and creative work. No prerequisite, but some musical experience is helpful.

151 Music Theory I

Basic elements of tonal harmony including triads, seventh chords, figured bass, harmonic progression, voice leading, and four-part writing. Prerequisite: Music 150 or consent of the instructor.

160 Musicianship

This course is dedicated to the development of practical skills important for a musician, including sight-singing, melodic and rhythmic dictation, and ear training. Aural and written exercises as well as creative projects will be incorporated. Music majors may substitute this course for the aural-skills proficiency exams with a grade of C or higher. Prerequisite: Music 150.

211 Applied Music

Continuation of applied music study. Prerequisite: Music 112.

212 Applied Music

Continuation of Music 211.

217 World Music Survey

Survey of music of the world's peoples: music in the cultures of Africa, Asia, and Latin America; the social and cultural roles of music. No prerequisite. (Meets GEC Cultural Diversity Requirement.)

219 African American Music (Offered Less Frequently)

This course covers the history of African American music from the days of slavery through the contemporary period. Styles to be covered will include spirituals, minstrel music, the blues, jazz, rhythm and blues, soul, gospel, and hip-hop. The course will also include a discussion of social and political issues that have influenced the history of African American music and the African American experience. No prerequisite.

(Cross-listed as African American Studies 219. Meets GEC Cultural Diversity Requirement.)

225 Introduction to Electronic Music: MIDI Sequencing

Designed to foster creative work in the College's recording/electronic music studio, the course deals first with the history of electronic music (Futurism, musique concrete, early analog analysis) and then with studio techniques, using both analog and digital equipment, microphones, tape recorders, mixing, digital synthesis, and a creative project. Two regular sessions and one laboratory each week. Co-requisite: Music 150.

227 History of Jazz

Principal styles of representative jazz musicians; the roots (including blues and ragtime); jazz in New Orleans and Chicago; and big band, swing, bop, and fusion. No prerequisite. (Meets GEC Cultural Diversity Requirement.)

235 Musical Theater (Offered Less Frequently)

(Cross-listed as English 236 and Theater 235.)

250 Music Theory II: Tonal Analysis

A continuation of the study of harmony, including modulation, chromatic harmony, and counterpoint. Prerequisite: Music 151 or consent of the instructor.

251 Form and Tonal Analysis

Study of the principal forms in Western art music including binary and ternary forms, sonata, theme and variation, and rondo. This course covers analysis of tonal masterworks of the eighteenth and nineteenth centuries, including music of J. S. Bach, Mozart, Beethoven, Schubert, and Brahms, applying the knowledge gained in the study of tonal harmony. Prerequisite: Music 250.

262 Great Composers

This course explores the lives of some of the great composers of the Western classical music tradition, including (but not limited to) Mozart, Beethoven, Tchaikovsky, Wagner, Copland, and Stravinsky. The composers' works will be examined in the context of their times as well as in the overall scheme of music history. Prerequisite: Music 104 or 150 or consent of the instructor.

264 The History of Rock and Roll

This course covers the history of rock music from its origins in the blues and American country music to the diverse rock styles heard today. Analysis of performances and compositional styles of several familiar rock stars is included.

Social and political influences will be addressed, but the focus will be on the music itself. No prerequisite.

265 American Music

Music in the United States from the time of the pilgrims to the present day. The course includes art music, folk music, religious music, and jazz. Prerequisite: Any music class or consent of the instructor.

281 Latin American Music

Various topics studying popular music of Latin America. No prerequisite. (Cross-listed as Latin American Studies 281. Meets GEC Cultural Diversity Requirement.)

311 Applied Music

Continuation of applied music study. Prerequisite: Music 212.

312 Applied Music

Continuation of Music 311.

325 Advanced Electronic Music

A continuation of Music 225. More independent work and hard disk recording. Prerequisite: Music 225.

360 Music History I: From Chant to Bach

An introduction to the music of the Middle Ages, Renaissance, and Baroque periods. Composers emphasized include Machaut, Josquin, Palestrina, Lassus, Monteverdi, Schütz, Purcell, A. Scarlatti, Handel, and Bach. Music 360 and 361 may be taken out of order. Prerequisite: Music 104 or 150 or consent of the instructor.

361 Music History II: From Classical to Contemporary

Representative composers and compositions from the Classical and Romantic periods will be discussed, including Mozart, Beethoven, Haydn, Tchaikovsky, Brahms, and Wagner. The many trends and styles of music of the twentieth century will be covered, including Impressionism, Expressionism, Neo-Classicism, Minimalism, and Indeterminacy. Composers will include Debussy, Ravel, Schoenberg, Reich, and Cage. Music 360 and 361 may be taken out of order. Prerequisite: Music 104 or 150 or consent of the instructor.

411 Applied Music

Continuation of applied music study. Prerequisite: Music 312.

412 Applied Music

Continuation of Music 411.

**420 Advanced Composition
(Offered Less Frequently)**

Independent work.

480 Senior Seminar

This course covers analysis of twentieth-century music, composition, and conducting. As part of the conducting component, students will have the opportunity to conduct a rehearsal of the Lake Forest College Chorus or Chamber Orchestra. Other special topics may also be included.

PHILOSOPHY

Professor Abba Lessing

Existentialism. Hegel. Philosophy and Literature. Philosophy in Film.

Professor Louis G. Lombardi, Chair

Ethics. Political Philosophy. Greek Thought.

Professor Janet McCracken

Aesthetics. History of Philosophy. Gender Studies.

Assistant Professor Steve Tammelleo

Metaphysics. Social and Political Philosophy. Latin American Thought.

Assistant Professor Rui Zhu

Asian and Comparative Philosophy. Plato. Philosophy of Mind.

Lecturer Bonnie Salomon

Medical Ethics.

Philosophy is the founding discipline of the Western intellectual tradition. It remains at the center of the liberal arts, spreading its branches throughout the curriculum in threatening as well as supporting ways. Philosophy continues to be a gadfly, upsetting the complacency that often sets in when underlying assumptions are not questioned. Challenges to modernity, post-modernism, traditional gender roles, cultural biases, and established public policy all have important philosophical roots.

The philosophy curriculum at Lake Forest College highlights the discipline's central and critical role. We focus on:

Exploring the Immense Range of Philosophical Concerns: Philosophical questions emerge in all facets of human life. We seek not to isolate philosophy but to highlight the ways human beings are inevitably led to ask the fundamental questions with which philosophers struggle.

Stressing the Practical Value of Philosophical Inquiry: Philosophy is not mere idle speculation but serious inquiry into issues that matter in our professional, public, and personal lives.

Developing Critical Thinking Skills:

Philosophy is both a subject and a way of thinking, a critical reflection on our most important judgments and human experiences.

Cultivating an International Outlook:

Philosophical reflection occurs in different ways in different cultures. We seek to provide students with some understanding of this range of styles by offering opportunities to study Asian as well as Western philosophy. Our international focus is evident through our involvement with the College's Program in Greece and Turkey. Further, we take advantage of the international cultural atmosphere in Chicago as well as the natural attractions of the area.

Fostering Creativity: Philosophical investigations require not simply that students learn a body of information but that they assess and build on that knowledge and ultimately develop their own insights and arguments. Philosophy majors are expected to design their own research project as the culminating experience for the major.

Except where prerequisites are listed, philosophy courses are open to all students, though first-year students should begin with a 100-level course or courses numbered below 220. Students may enroll for credit in only one section of Philosophy 110.

PHILOSOPHY MAJOR

Philosophy majors are expected to have a strong grounding in Western philosophical traditions and to explore their own philosophical interests, for example, in Asian thought, in gender issues, in law and ethics, or in literature and the arts. Nine courses are required for a major, including Philosophy 116 (or symbolic logic), 290, 291, 292, 305, and 325, culminating with a research project or senior thesis which will include an informal symposium consisting of one or two meetings in which seniors will share with each other and the department their progress on their senior projects (Philosophy 490 or 495). Internships do not count toward the major requirements.

PHILOSOPHY MINOR

Six courses including two courses from Philosophy 270, 275, 290, 291, and 292. One course or independent project at the 300 level or above. Most 300-level courses require one or two philosophy prerequisites.

110-2 Introduction to Philosophy: Reason and the Irrational

The confrontation and dialogue between rationality and the powers of desire, will, spontaneity, and freedom. Discussion will focus on readings from Plato, Descartes, Spinoza, Nietzsche, Kafka, Sartre, and Buber. (Meets GEC First-Year Writing Requirement.)

110-3 Introduction to Philosophy: Paths of Inquiry

Examination of fundamental issues concerning human existence as addressed by representative thinkers from these traditions and periods: classical Greek, classical Chinese, modern rationalist, modern existentialist, and contemporary continental philosophy. (Meets GEC First-Year Writing Requirement.)

110-4 Introduction to Philosophy: Asian Thought

Introduction, through representative Asian thinkers from India, China, and Japan, to fundamental philosophical issues such as the nature and meaning of human existence, what true happiness is, and what is real. (Meets GEC First-Year Writing Requirement.)

110-5 Introduction to Philosophy: War and the Challenge of Pacifism

The course will focus on the evolution of Western thinking about war, from the first musings about war among the Greeks, through the emergence of the Just War tradition in the Medieval era, through early modern and twentieth-century warfare, to the emerging twenty-first-century war on terrorism. The more contemporary discussions will focus on wars involving the United States. The goal will be to examine the strengths of claims for a moral sanction for war in contrast to arguments for a pacifist rejection of the morality of war. (Meets GEC First-Year Writing Requirement.)

110-6 Introduction to Philosophy: Classical Questions

Examination of perennial philosophical issues, such as questions about the nature of reality and how we can know it, discussions of human nature, the meaning of life, and our moral responsibilities.

(Meets GEC First-Year Writing Requirement.)

110-7 Introduction to Philosophy: Political Philosophy

By tracing the development of political philosophy from its roots in Greek philosophy through the social contract tradition to modern liberalism and critiques of colonialism, this course will examine a number of questions central to political philosophy. What is the state? What model of government is best? What is the nature of political rights? How do governments gain legitimate authority? Readings will include Socrates, Plato, Locke, Mill, Marx, Martin Luther King Jr., Rawls, Nozick, Chomsky, Churchill, and Galeano.

110-8 Introduction to Philosophy: Labor, Property, and Value

The long-running MasterCard ad campaign claims that "There are some things money can't buy: For everything else there's MasterCard," implying that certain meaningful experiences are "priceless," and that paying for them is degrading. But it also implies that everything else in life can be bought and sold. What do these notions of price and pricelessness imply about our conceptions of human worth? Readings may include: Aristotle, Locke, Smith, Marx, Veblen, Weber, and Baudrillard.

116 Logic and Styles of Argument

Focus on the "rhyme and reason" of language. Examination of the reasons arguments are constructed in the ways they are. Investigation of informal, Aristotelian, and propositional logics, with readings from magazine articles, advertisements, and classical philosophers. (Meets GEC First-Year Writing Requirement.)

200 Philosophy and Gender

An investigation of whether and to what extent men and women think and behave differently and how such differences do or ought to change our theories of human existence and human good. A comparison of classical, modern, and postmodern treatments of the effect of gender on love, knowledge, and obligation. Reading may include Sappho, Plato, Aristotle, Hobbes, Rousseau, Mary Shelley, Freud, Mead, de Beauvoir, Irigaray, and Gilligan. (Cross-listed as Women's and Gender Studies 200. Meets GEC Cultural Diversity Requirement.)

203 Business and Professional Ethics

Analysis and evaluation of ethical problems in business and the professions. Attention will be given to the moral foundations for and limits on business activities, the idea of professional responsibility, and the relationship between professional and business obligations and general moral obligations. (Not recommended for first-year students.)

205 Medical Ethics

The course will investigate the three primary strands of medical ethics: (1) issues of professional responsibility, such as confidentiality and informed consent, (2) moral dilemmas that arise in the course of treatment, such as decisions about euthanasia, and (3) public policy matters, such as universal health care.

210 Environmental Ethics

Examination of relationships between human beings and nature, drawing on literature, religion, and natural science as well as philosophy. What views have shaped our current perceptions, concerns, uses, and misuses of the natural world? What creative alternatives can we discover? How can these be applied to the practical problems of environmental ethics? (Cross-listed as Environmental Studies 210.)

212 Multicultural Approaches to the Environment

The central theme of this course is Humans and Nature. We will examine various motifs in the creation myths from different cultures, the images of man and woman, the theme of primeval flood or its absence, the alienation of humans from nature, and the beliefs (e.g., Chinese numerology) in the synchronicity between human affairs and natural events. We will search for answers to the following typical questions: What is the definition of environment? What is and ought to be the relation between humans and nature? What count as "environmental issues" and what are their possible solutions? (Cross-listed as Environmental Studies 212. Meets GEC Cultural Diversity Requirement.)

220 Philosophy of Education

Survey of significant theories of education, introduction to philosophical analysis of educational concepts, and development of analytical skills applicable to clarifying and resolving pedagogical and policy issues. (Cross-listed as Education 220.)

225 Philosophy of Science (Offered Less Frequently)

Examination of issues such as the nature of scientific knowledge, what counts as a "true" scientific theory, the basis of observation, and empirical knowledge. Consideration of ethical issues generated by scientific practice, the politics of technology, and current work on the sociology of scientific knowledge.

230 Philosophy and Literature

The question of meaning in and of literature. The philosophical study of works by Aeschylus, Euripides, Chekhov, Dostoevsky, Kafka, Nabakov, Philip Roth, and Milan Kundera as well as the poetry of Dylan Thomas and Wallace Stevens. Critical theories of Nietzsche, Roland Barthes, and Jacques Derrida are used. (Not recommended for first-year students.)

240 Philosophy of Law

Survey of some main philosophical theories about the nature and justification of law, with intensive examination of several key philosophical problems as they arise in workings of the American legal system. Readings drawn from law and philosophy. (Not recommended for first-year students.)

248 Philosophical Issues in Documentary Film

A case history approach using the documentary films of Frederick Wiseman, Claude Lanzmann, Erroll Morris, and others that investigates epistemic, moral, and aesthetic issues concerning the truth-value, ethical intent, and artistic significance of documentary film.

250 Philosophy of Religion

This course is an introduction to the philosophy of religion. Particular emphasis is placed on the role of religious experience, ritual, prayer, and sacred books in articulating the idea of God. Course includes a philosophical encounter with mysticism as well as the more traditional metaphysical formulations of the divine, in both the West and East. The critical concern of a variety of rational skepticisms will also be examined.

255 Philosophy and Film

This course explores the philosophical content of contemporary European, Asian, and American movies with special emphasis on metaphysical, ethical, and aesthetic ideas developed and visually presented by recognized filmmakers including Ingmar Bergman, Akira Kurosawa, Satyajit Ray, Luis Buñuel, François Truffaut, DeSica,

Erich Rohmer, Fellini, and Antonioni, and special emphasis on Krzysztof Kieslowski. Prerequisite: Philosophy 110 or permission of the instructor.

260 Aesthetics: Reflections on Art and Beauty

A consideration of the nature and purpose of art and aesthetic judgment through the theories of Plato, Aristotle, Kant, Hegel, Freud, and members of the Frankfurt School. Artworks in different media and historical periods will be used as occasions for reflection.

265 Symbolic Logic

(Cross-listed as Computer Science 260.)

270 American Philosophy: Principles and Pragmatism

American philosophy has a rich and diverse history. With the sometimes conflicting commitments to principles and pragmatism as a focus, the course will investigate topics such as (1) early debates over American political institutions: human rights and democracy versus aristocratic leanings to ensure good government; (2) eighteenth-century idealism (e.g., Royce) and transcendentalism (focusing on moral principle, as reflected in Emerson and Thoreau); (3) American pragmatism in its various forms (Pierce, James, and Dewey); (4) Whitehead and process philosophy; and (5) contemporary manifestations (e.g., human rights, environmental concerns, technology, and struggles with diversity).

272 Currents in Latin American Thought

Taking a historical perspective, the course will examine important themes in Latin American thought such as philosophical anthropology (race, the nature of the human being, and Latin American character), the study of values (subjectivism versus objectivism), and debates about philosophy and history (universalist versus culturalist approaches, free will versus determinist outlooks). (Cross-listed as Latin American Studies 272. Meets GEC Cultural Diversity Requirement.)

274 Topics in Asian Studies: Global Engagement in Contemporary China

(Cross-listed as Asian Studies 274 and History 274. Meets GEC Cultural Diversity Requirement.)

275 Chinese Ethics: Ancient Chinese Moral Thinking

This course offers a focused historical narrative of the development of Chinese moral thinking. It shows, at its early phase, how a particular moral philosopher's thinking (such as Mencius and Xun-zi) is largely determined by his thinking on human nature. However, in later periods, particularly after the importation of Buddhism, the debates on human nature are replaced by an intense cognitive and metaphysical interest in the human mind. Moral cultivation begins to focus less on following moral rules but more on cultivating the mind. The effect of this nature-mind shift on Chinese moral thinking is both historically profound and theoretically surprising. Readings: Confucius, Mencius, Xun-zi, Lao zi, Zhuang zi, Zhang Zai, Chen Brothers, Zhu Xi and D. T. Suzuki. (Meets GEC Cultural Diversity Requirement.)

280 Dialogue

Examination of special topics not offered in regular courses.

282 Visions of the Family: East and West

Using materials from a variety of sources and disciplines, including philosophy, religious studies, history, feminist works, literature, and films, the course will ask students to explore and compare together the various visions of the family, and, through this, acquire knowledge of the different outlooks of human lives between the Eastern "family-world" dichotomy and Western "individual-society" dichotomy. The approach of the course will be comparative and historical, focusing on the contextual, practical, and conceptual differences between the Confucian and Daoist views of the family, and their Western counterparts. The goal will be to help students to establish for themselves a general context in which they can not only examine the East-West differences in general, but the complicated relationship between the family and individuals in particular. (Cross-listed as Asian Studies 282, Sociology and Anthropology 282, and Women's and Gender Studies 282. Meets GEC Cultural Diversity Requirement.)

285 Topics in Japanese Thought

The course focuses on the Japanese understanding of nature, life, and history. We will focus on the ideas of fragility, impermanence, and beauty. Students will learn the central ideas of Zen Buddhism. Topics to be covered may include artistic representations in Noh plays, Tea ceremonies, and the Samurai culture. Prerequisite:

any course in Asian thought or permission of the instructor. (Cross-listed as Religion 223 and Asian Studies 275. Meets GEC Cultural Diversity Requirement.)

290 History of Western Philosophy: Ancient Greece

The nature of reality, knowledge, goodness, and beauty traced from the pre-Socratics through Plato and Aristotle. Some attention will be given to questions of philosophical style and to the transition to the medieval period. (Cross-listed as Classical Studies 290.)

291 History of Western Philosophy: Seventeenth and Eighteenth Centuries

Seventeenth- and eighteenth-century European philosophers, with a primary focus on epistemology and metaphysics. Readings may include Descartes, Spinoza, Locke, Hume, and Kant. Prerequisite: Philosophy 110, 290, or consent of the instructor.

292 History of Western Philosophy: Hegel and the Nineteenth Century

Idealism, romanticism, existentialism, vitalism, and pragmatism. Intensive readings in Hegel, Kierkegaard, Nietzsche, Bergson, James, Husserl, and Freud. Prerequisites: Philosophy 110, 290, and/or 291, or consent of the instructor.

303 Gender and Character

(Offered Less Frequently)

Studies of the effects of either femininity or masculinity on moral and aesthetic choices. Several philosophers of character, morality, and psychology, e.g., Aristotle, Nietzsche, Freud, MacIntyre, and Gilligan, will be examined in conjunction with various works of fiction and film. Prerequisite: One philosophy course or permission of the instructor. (Cross-listed as Women's and Gender Studies 303. Meets GEC Cultural Diversity Requirement.)

305 Comparative Philosophy: East and West

Comparative investigation of Eastern and Western philosophical sources; elucidation and critical examination of fundamental presuppositions, unique conceptual formulations, and alternative approaches to general philosophical issues. Prerequisite: One Western philosophy course and one Asian area course, or consent of the instructor. (Cross-listed as Asian Studies 305. Meets GEC Cultural Diversity Requirement.)

307 Political Thought: Ancient to Renaissance Theory

Western political thought from the Greeks through the Middle Ages.

308 Political Thought: Renaissance to Contemporary Theory

Selected political philosophies from the sixteenth century to the present.

310 Communication Ethics

Examination of the ethical components at the heart of human communication. Discussions of practical issues, such as free speech, advertising, and privacy, will be based on theoretical investigations of both communication and ethics. Prerequisite: One course in philosophy or permission of the instructor. (Cross-listed as Communications 310.)

320 Twentieth Century: Phenomenology, Existentialism, Structuralism, and Deconstruction

Twentieth-century continental philosophy, moving from the primacy of lived existence to the problematics of texts. Readings in Husserl, Sartre, Merleau-Ponty, Buber, Barthes, Derrida, Levinas, Irigaray, and Leotard. Prerequisite: Two philosophy courses.

322 Religious Existentialism

(Cross-listed as Religion 322.)

325 Major Ethical Theories

Investigation of principal Western theories of ethics. Issues include the foundation of morality in reason or sentiments, the fundamental principles of morality, the relationship of morality to character, and the demands of morality on human action. Readings from philosophers such as Aristotle, Mill, Kant, Noddings, and MacIntyre. Prerequisite: Two philosophy courses.

355 Analytic Philosophy

This course will provide students with a background in the analytic tradition, the philosophical outlook that has dominated Anglo-American schools for much of the twentieth century. Readings may include authors: Frege, Moore, Russell, Ayer, Wittgenstein, Strawson, Grice, Austin, Davidson, Kripke, Ryle, Quine, and Searle. Prerequisite: Philosophy 292 is strongly recommended.

360 Identity and Dreams

In this course we will explore philosophical issues of personal identity arising particularly from the phenomenon of dreaming. We will focus on the issue of how different dream interpreting techniques help give rise to different perceptions of personhood and one's relation to the world at large. We will read the Bible, Herodotus, Plato, Descartes, Hobbes, Locke, Freud, Jung, and some ancient Chinese documents. (Meets GEC Cultural Diversity Requirement.)

**410 Major Philosophers
(Offered Less Frequently)**

Detailed investigation of works by a great philosopher. Seminar designed for students with a background in philosophy. May be repeated for credit. Prerequisite: Three philosophy courses or two such courses and permission of the instructor.

**420 Topics in Philosophy
(Offered Less Frequently)**

Seminar designed for students with a background in philosophy. May be repeated for credit. Prerequisite: Three philosophy courses or two such courses and permission of the instructor.

490 Senior Symposium and Research Project

Independent research plus discussions of that research in meetings of seniors and faculty. (Students undertaking a research project over two semesters would register for regular research project credit in the semester without the symposium.) Open to senior majors and others with permission of the department chair.

495 Senior Symposium and Thesis

Senior thesis project plus discussions of that research in meetings of seniors and faculty. (Students writing a thesis over two semesters would register for regular thesis credit in the semester without the symposium.) Open to senior majors.

PHYSICS

Professor Michael M. Kash, Chair
Atomic Physics. Quantum Optics. Lasers.

Associate Professor R. Scott Schappe
Atomic Physics. Atomic Collisions.

Assistant Professor Nathan Mueggenburg
Non-equilibrium Systems. Granular Materials.

Lecturer Marilyn Bell
Astronomy. Computational Methods.

Professor Emeritus Bailey Donnally
Atomic Structure. Atomic Collisions.
Electronics. Photography.

Professor Emeritus Tung H. Jeong
Coherent Optics. Holography. Photonics.
Laser Applications.

Physics is an important, basic part of our knowledge of the natural world. The study of physics provides insight into the development of modern culture because the practical applications of physics change the way we live and the concepts of physics help shape contemporary ideas about the cosmos and our place in it.

Physics embraces the full range of physical dimensions in space and time, from the smallest subatomic particles to the universe, from the slow drift of the continents to the speed of light, from absolute zero to stellar temperatures, from low-frequency radio waves to gamma rays. Those with curiosity about natural processes will want to understand the physical laws that govern them.

Discoveries in physics touch our daily lives. Consider the impact of electric power, radio, transistors, lasers, and nuclear energy. A responsible citizen must strive to understand the fundamental concepts of physics in order to make wise decisions about science and society.

The department offers courses that meet interests of a wide range of students, from majors who plan for a professional career in physics to artists who want to make holograms. Besides a well-stocked collection of all the standard equipment for teaching, our laboratories are unusually well equipped with lasers and optical instruments, all available for undergraduate use. The staffed machine shop helps the department

create and maintain this and other equipment. Students are encouraged to work with individual faculty members in research. Research projects, which may be undertaken for course credit, give many of our majors practical laboratory experience that goes well beyond what can be learned in standard courses.

All science and mathematics majors will benefit from the elementary courses, Physics 120 and 121, or their noncalculus alternatives, Physics 110 and 111. Advanced work in physics is also appropriate for many students in addition to those who will become professional physicists. Students planning to enter the science-teaching profession are advised to take courses beyond the introductory level in order to deepen their understanding of the subject and because the department has a tradition of excellence in physics instruction through the use of demonstrations. Those interested in electrical or mechanical engineering should major in physics as part of the dual-degree program in engineering described in the section titled Undergraduate Curriculum. Premedical students should consider majoring in physics. Students contemplating a career in industry, technical sales, or patent law will also benefit from a physics major. Anyone desiring to explore the natural world with emphasis on physical concepts rather than on mathematics should consider the series of offerings 106–109, which are designed especially for nonscientists.

PHYSICS MAJOR

The minimum major requirement of nine physics courses must include 120, 121, 210, 230, 250, 310, 420, and 480, plus one additional course numbered above 200. Exceptions to this rule may be made by the department chairperson in special cases, such as a late decision to major in physics.

Physics majors must also take Mathematics 110, 111 and 210, which are prerequisites to required courses.

Students intending to pursue graduate studies or other careers in physics are advised to enroll in more than the nine courses required for the major. Tutorials may be undertaken in subjects not listed among the course offerings. Exposure

to other sciences, especially Chemistry 110 and 111 and more advanced mathematics, especially Mathematics 214 and Computer Science 112, is strongly encouraged.

PHYSICS MINOR

The minor consists of 120, 121, 210, and 250 plus one additional course numbered above 200. Exceptions to this rule may be made by the department chairperson in special cases.

Physics minors must also take Mathematics 110, 111 and 210, which are prerequisites to required courses.

106 Light, Sound, and the World of Waves

The behavior of waves, including water, sound, radio, and light. Optics of lenses and mirrors. Lasers and holography. Musical instruments. Three hours of lecture per week; no laboratory.

107 Chance, Fate, and Physical Law

The development of ideas about causality, space, and time and the three revolutions that have changed these concepts: Newton's classical mechanics, Einstein's theory of relativity, and Heisenberg's uncertainty relation. The first two support, whereas the third undermines, the belief that every event is determined to be the way it is by a rigid network of cause and effect. Three hours of lecture per week; no laboratory.

109 Astronomy and Cosmology

The solar system and planetary motion, the nature and evolution of stars, star clusters, and galaxies, and the structure and origin of the universe. Three hours of lecture and two hours of laboratory per week.

110 Introductory Physics I

The first half of elementary physics without calculus. Kinematics and Newton's laws of motion for translations and rotations. Conservation principles of energy, momentum, and angular momentum. Oscillations and waves. Three hours of lecture and one laboratory per week. Uses algebra and trigonometry. (Credit may not be earned in both Physics 110 and 120. Cross-listed as First-Year Studies 102.)

111 Introductory Physics II

The second half of elementary physics without calculus. Charge and electric fields; current and magnetic fields. Flux and potential. Circuit elements. Electromagnetic waves. Geometric and wave optics. Three hours of lecture and one

laboratory per week. Prerequisite: Physics 110. (Credit may not be earned in both Physics 111 and 121.)

120 General Physics I

The first half of elementary physics using calculus. This is the most appropriate first course for students majoring in the physical sciences. Kinematics and Newton's laws of motion for translations and rotations. Conservation principles for energy, momentum, and angular momentum. Oscillations and waves. Three hours of lecture and one laboratory per week. Prerequisite or corequisite: Mathematics 110. (Credit may not be earned in both Physics 120 and 110. Cross-listed as First-Year Studies 102.)

121 General Physics II

The second half of elementary physics using calculus. This is the most appropriate second course for students majoring in the physical sciences. Charge and electric fields; current and magnetic fields. Flux and potential. Circuit elements. Electromagnetic waves. Geometric and wave optics. Three hours of lecture and one laboratory per week. Prerequisite: Physics 120. Prerequisite or corequisite: Mathematics 111. (Credit may not be earned in both Physics 121 and 111.)

210 Modern Physics

Introduction to the special theory of relativity and the elements of quantum theory. Theoretical and experimental investigations of atomic, nuclear, and particle physics. Atomic spectra, X-ray spectra, Compton scattering, nuclear counting techniques, half-life measurements, and neutron activation. Three hours of lecture and one laboratory per week. Prerequisites: Physics 121 (or 111) and Mathematics 111 or permission of the instructor.

230 Thermodynamics

The fundamental ideas of temperature, heat, entropy, and equilibrium; the laws of thermodynamics. Macroscopic, phenomenological approach to thermodynamics, followed by the microscopic, statistical description. Kinetic theory. Applications to gases, solids, and chemical systems. Four hours of lecture per week. Prerequisites: Physics 210 and Mathematics 111 or permission of the instructor. (Offered in alternate years.)

240 Electronics

Methods of circuit analysis. Transistors, diodes, integrated circuits, and their application in electronic circuits. Amplifiers, oscillators, logic circuits, and computing circuits. Electronic instruments and measurements. Three hours of lecture and one laboratory per week. Prerequisites: Physics 121 (or 111) and Mathematics 111 or permission of the instructor. (Offered in alternate years.)

250 Analytical Mechanics

The study of classical mechanics using mathematics at an intermediate level. Mechanics of single particles, systems of particles, gravity and planetary motion, rigid bodies, vibrations, and non-inertial reference frames. Four hours of lecture per week. Prerequisite: Physics 120 (or 110) and Mathematics 210.

260 Optics

Geometric and wave optics at an intermediate level. Topics include interference, diffraction, scattering, polarization, and absorption. Matrix methods. Applications of lasers. Three hours of lecture and one laboratory per week. Prerequisite: Physics 121 (or 111) and Mathematics 111. (Offered in alternate years.)

310 Electricity and Magnetism I

Electrostatics and magnetostatics. Specific problems involve the electric fields and potentials from constant arrangements of charge, the behavior of dielectric materials, the magnetic fields from steady currents, and the nature of magnetic materials. Four hours of lecture per week. Prerequisites: Physics 121 (or 111), 250, and Mathematics 210. (Offered in alternate years.)

311 Electricity and Magnetism II

Electrodynamics: the transport of energy and momentum by electromagnetic fields. The complete forms of Maxwell's equations are used to describe electromagnetic waves in vacuum and in linear or conducting materials, and to calculate the energy radiated from accelerating charges. An advanced treatment of the Special Theory of Relativity may be a concluding topic. Three hours of lecture and one laboratory per week. Prerequisite: Physics 310 and Mathematics 210. (Offered in alternate years.)

320 Mathematical Methods

Applied mathematics for scientists. Topics typically include series approximations to functions, matrices and eigenvectors, vector analysis, special functions, ordinary and partial differential

equations, orthogonal polynomials, asymptotic techniques, boundary value problems, and numerical methods. Four hours of lecture per week. Prerequisites: Physics 121 (or 111) and Mathematics 210. May be taken as a tutorial. (Cross-listed as Mathematics 320.)

410 Advanced Analytical Mechanics

Emphasis on using generalized coordinates and the Principle of Least Action. Newtonian, Lagrangian, Hamiltonian, and Hamilton-Jacobi formulations of mechanics. Four hours of lecture per week. Prerequisites: Physics 250 and Mathematics 210. May be taken as a tutorial.

420 Quantum Mechanics I

Formal development of the quantum theory. The theory is applied to simple systems for which exact solutions are known. These include single-electron atoms, harmonic oscillators, and systems with intrinsic spin. Four hours of lecture per week. Prerequisites: Physics 210 and 250 and Mathematics 210. (Offered in alternate years.)

421 Quantum Mechanics II

Applications of the quantum theory. Approximation methods, such as perturbation theory, variational techniques, and numerical methods allow the quantum theory to be used for complex systems. Examples are multi-electron atoms, atoms in external electromagnetic fields, molecules, and solids. Four hours of lecture per week. Prerequisites: Physics 420 and Mathematics 210. (Offered in alternate years.)

480 Experimental Methods

Seminar on techniques that illustrate principles and methods of contemporary physics. Typical experiments are subatomic resonance (NMR and ESR), X-ray phenomena (Moseley's Law, etc.), optical pumping, determination of band gaps in semiconductors, shot noise, Johnson noise, spectroscopy of atoms and molecules, and laser spectroscopy. Students write formal reports and present seminar talks about experiments. Two seminars and one laboratory per week. Prerequisites: Physics 420 and Mathematics 210. (Meets GEC Senior Studies Requirement. Offered in alternate years.)

POLITICS

Professor Paul B. Fischer

Local and Regional Studies. American Politics. Politics and Race.

Professor W. Rand Smith

Comparative Politics (Europe, Latin America). Political Economy.

Professor Gbada Hasbem Talbami

Third World Politics. Women's Studies.

Associate Professor Siobhan Moroney, Chair

Political Theory. American Politics.

Associate Professor Paul S. Orogun

Comparative Politics. Africa.

Assistant Professor Rachel DeMotts

Politics.

Assistant Professor James Marquardt

International Relations. American Politics.

Lecturer Debra Homer Levis

American Politics and Law.

Lecturer Jed Stone

The Legal System.

The study of politics seeks to understand the phenomenon of human governance and addresses power and authority, legislatures and courts, sovereignty and status, war and peace, and ideologies and the public welfare. It can be studied through the history of peasant rebellions and municipal elections and discussions of justice and equality. It intersects with culture, history, and economics. Research may be conducted by interview and on the Internet, with the techniques of statistics and simulation and with the aid of bibliographies and CD-ROM. One can experience politics by living abroad, participating in campaigns, or working as an intern.

The courses in the department are designed to permit both majors and non-majors to study these themes and methods of politics.

Note: Politics 110 and 120 are not sequential and may be taken in any order. Either course is the normal prerequisite for further courses in the relevant area of American politics or comparative politics, but this may be waived with the permission of the instructor of an advanced course.

POLITICS MAJOR

The major in the department consists of a minimum of eight courses:

Two introductory courses 110 and 120. Under unusual circumstances an upper-level course may be substituted for an introductory course.

Six advanced courses. The advanced courses must include at least three at the 300 level or higher, and one from each of the five subfields of politics in the following fashion:

American politics (220, 221, 222, 223, 224, or 226).

Comparative politics (210, 212, 216, 217, or 219).

International relations (240, 245, or 340).

Political theory (353, 354, 355, 356, or 357).

Public law (360 or 365).

One senior studies requirement (470, 480, 490, or 491).

In order to graduate with a degree in politics, a student must attain a minimum 2.0 GPA in the major. The department encourages study beyond the required courses, especially at the 300 level and in courses arranged as individual tutorials, independent research, internships, and senior theses.

POLITICS MINOR

The department offers a minor with these requirements:

Six courses including 110, 120, and one course at the 300 level. Students must maintain a 2.0 GPA in the minor.

110 Introduction to Politics

Basic concepts in political science; selected political systems outside of the United States; some reading in political theory; and topics in

international relations. Note: Politics 110 is not a prerequisite for Politics 120. (Meets GEC First-Year Writing Requirement.)

120 Introduction to American Politics

Origins of the American political system, basic institutions, political parties and interest groups, and evolution of constitutional interpretation.

210 Politics of Western Europe and the European Union

Analysis of the political institutions and public policies of selected Western European nations as well as of the European Union.

212 Politics of the Third World

This course will highlight special topics relating to Third World nations, e.g., delayed industrialization; the lingering impact of colonialism; power and authority in nonindustrial countries; and recent democratization trends. (Meets GEC Cultural Diversity Requirement.)

214 The Politics of South Africa

This course examines the historical, socio-cultural, economic, and political evolution of the Republic of South Africa. Students will learn about the nature, dynamics, and transformation of South Africa from the precolonial period and the era of apartheid to the emergence of black majority rule in the modern multiracial, democratic South Africa. The course analyzes the nature of the economy, race and ethnic relations, liberation theology, the armed struggle, and the democratization process. In addition, the course reviews the role and interrelationships of South Africa to its neighboring African states and the foreign policy of South Africa toward the United States and other major powers in the international system. (Cross-listed as African American Studies 214. Meets GEC Cultural Diversity Requirement.)

215 Asian Politics

This course will discuss contemporary political systems in India, China, and Japan with due consideration of major historical influences such as imperialism and war. (Cross-listed as Asian Studies 215. Meets GEC Cultural Diversity Requirement.)

216 The Politics of the Middle East

Study will focus on issues of modernization; the nature of Middle East governments; the past and present impact of religion on the region's culture and socio-political system; the Arab-Israeli conflict and its implications for world peace; and the impact of oil on the economy and regime stability in the Persian Gulf region. (Meets GEC Cultural Diversity Requirement.)

217 African Politics

A survey of the geography, social and political history, and postindependent politics of Black Africa. (Cross-listed as African American Studies 217. Meets GEC Cultural Diversity Requirement.)

219 The Politics of Latin America

An introduction to politics and social change in Latin America. Study will focus on several Latin American countries and on special topics such as human rights, religion, the military, land reform, women, and population policy. (Cross-listed as Latin American Studies 219. Meets GEC Cultural Diversity Requirement.)

220 Political Parties

American parties, pressure groups, and electoral problems.

221 The Presidency

An analysis of the executive in national government. There will be special emphasis on recent elections.

222 Congress

The U.S. Congress is studied with respect to representational styles, institutional roles and organization, and electoral trends.

223 Urban and Suburban Politics

Problems of political and social organization in central cities and suburbs. Topics include local political parties, machines, mayors and city managers, and differences between big-city and suburban politics.

224 Mass Media and American Politics

An analysis of the influence of the mass media on American political institutions and American attitudes. Topics include First Amendment issues, political campaigns, political movements, public opinion, advertising, and entertainment.

226 The Judiciary

This is an examination of the federal court system, focusing on the United States Supreme Court. Students will study the constitutional beginnings of the federal judicial branch and its position vis a vis the two other branches of government. We will examine the history of the United States Supreme Court, the politics of presidential appointment of judges, selected case law over the course of the Court's history and its impact, personalities on the Court and the Court's decision-making process.

240 American Foreign Policy

U.S. foreign policy at the end of and after the Cold War, with reference to fundamental principles, perennial forces, and the lessons of history.

242 Islamic Fundamentalism: Revival or Revolution?

This course examines the theoretical roots of Islamic fundamentalism, demonstrating differences between this and classic Islam. The fundamentalists' definition of Islamic government and their reformulation of the concepts of community, the Jihad, gender, Islamic economics, and relations with the West will be surveyed. (Meets GEC Cultural Diversity Requirement.)

245 The Essentials of World Politics (Offered Less Frequently)

The course surveys contending theoretical approaches to the study of world politics. It considers the role of the international system, nation-states, and individuals and other non-state actors and their impact on political outcomes in recent years. The course also explores contemporary issues in world politics related to war and peace, economic prosperity and deprivation, international governance, the global environment, and human rights.

260 Law and the Political System

Interrelations between law and the political system in the United States: the Constitution, legislation, administrative regulation, judicial decision; courts in politics; federalism; vigilante law. Prerequisite: Politics 120 or sophomore standing.

290, 291 Tutorial

To be arranged individually with an appropriate faculty member.

310 State and Nation-Building

This seminar focuses on the nature, dynamics, and strategies of state and nation-building

processes within the modern international state system. Students will examine the mechanisms utilized to forge and facilitate national consciousness among the fragile, developing post-colonial states of Africa and other Third World countries. Dominant theoretical paradigms and empirical case studies that focus on the salient differences among nation-states, nations in search of states, and states in search of nations will be discussed. Other subjects include the role and relevance of nationalist ideology in our modern world and the causes, mechanisms, and consequences of ethnic conflicts and separatist movements in both developing countries and advanced industrialized states.

318 Topics in Comparative Politics

Topics such as "Women in the Third World," "The Politics of Jerusalem," and "Crime and Punishment." (Cross-listed as Women's and Gender Studies 318. Meets GEC Cultural Diversity Requirement.)

321 U.S. Energy and Environmental Policy

Examination of policy processes surrounding energy and environmental regulation. Topics include production and use of energy resources (oil, gas, coal, nuclear, and renewable energy); foreign policy implications of energy supplies; environmental problems related to energy use and economic development (e.g., ozone layer depletion, carbon dioxide buildup); and American attitudes toward nature and the environment. (Cross-listed as Environmental Studies 321.)

328 Topics in American Politics

Seminar examining selected topics on political issues, institutions, or problems such as race and criminal justice. (Meets GEC Cultural Diversity Requirement, depending on topic.)

339 Comparative Nationalism

An examination of the ethnoterritorial, linguistic, and religious bases for nationhood and statehood in multicultural states, with an emphasis on contemporary crises in Africa, Asia, Latin America, and Europe. (Meets GEC Cultural Diversity Requirement.)

340 World Politics

Continuity and change in international relations; consideration of the causes of war and the conditions of peace. Examination of balance-of-power systems and collective security. Consideration of theories of international political economy. (Meets GEC Cultural Diversity Requirement.)

345 Topics in International Relations: Arms Proliferation and Control

This course introduces students to the main arguments and concepts in international relations regarding the proliferation and control of weapons of mass destruction. It studies the theory of arms proliferation and control, focusing on why states want these weapons, why they have sought to regulate them, and how proliferation affects international security. It also surveys recent case studies of arms proliferation and control, including the U.S.-Russian nuclear deterrence regime and new challenges to it, nuclear proliferation in South Asia, Northeast Asia, and the Middle East, and recent developments in the area of biological and chemical weapons. (Meets GEC Cultural Diversity Requirement.)

348 International Organization & Law

This course covers the history of international law since the Peace of Westphalia emphasizing core legal concepts such as sovereignty and nonintervention and a study of the role of the United Nations in world politics with brief surveys of the European Union, OAS, and OAU. The course will combine lectures and class discussion as well as preparations for those students who will be participating in the College's Model United Nations Program.

353 Topics in Political Theory**354 Critics of Democracy**

Modern political thought is based on ideas of equality, individuality and individual liberty, private property, and an overall idea of progress. These ideas developed especially in the thinking of Locke, Smith, and Mill. But as modernism grew, so did its critics. This course will establish some basic theories of modernism through readings in the liberal tradition and then study its opposition through the writings of Burke, Rousseau, Tocqueville, Marx, Nietzsche, Freud, Marcuse, and Arendt as well as contemporary anti- and postmodernists.

355 Family Structure and Political Theory

An examination of traditional political theory looking to questions of sexuality, child-rearing, marriage, and family construction and how these crucial issues affect political organization. (Cross-listed as Women's and Gender Studies 355. Meets GEC Cultural Diversity Requirement.)

356 Educating Kings and Citizens

Societies and their philosophers have been devoting attention to what and how and by whom

children and young adults should be taught since Plato wrote the *Republic* over 2,000 years ago. Today's debates over feminism, traditionalism, ethnocentrism, religion, etc., in education merely echo what has come before. Past thinkers asked two essential questions: Which members of society should be educated and what do they need to know? Readings include those by Plato, Aristotle, Machiavelli, Locke, Rousseau, Dubois, Washington, Dewey, and others.

357 Justice and the Law

Political societies must make all manner of judgments about what is just. We must distribute goods, determine crimes, give punishments, and create legislative districts, all with an eye to some idea of justice. Is justice fairness? Proportional? Equitable? Different political and legal theorists have approached these questions differently. Using both traditional political theory texts and contemporary legal theory, we will explore questions of justice and the law and whether justice can be found within the law or is external to it. Readings include those by Plato, Aquinas, Hobbes, Locke, Thoreau, Mill, King, Rawls, Gunier, and contemporary legal theorists.

360 American Constitutional Law

A study through Supreme Court cases of major themes in American constitutional law from 1789 to the present.

365 Civil Liberties

Problems in civil liberties and civil rights, relating law to political culture. U.S. Supreme Court cases, materials from other countries, and selected theoretical works. Focus is on the Bill of Rights and the 14th Amendment.

390, 391 Independent Research

To be arranged individually with an appropriate faculty member.

395, 396 Internship in Politics

Relates theory to practice by placing students in governmental agencies, community interest groups, and other political environments. (Two course credits.)

470 Senior Research Project**480 Senior Seminar****490, 491 Senior Thesis**

To be arranged individually with a faculty supervisor.

PSYCHOLOGY

Professor Robert B. Glassman, Chair
Brain Science (Neuroscience). Learning and Memory. Evolutionary Theory. General Psychology. Philosophy of Science. Science, Secularism, and Religion.

Professor R. Sergio Guglielmi
Medical and Health Psychology. Clinical Psychology. Cognitive-Behavioral Therapy. Psychophysiology. Personality.

Professor David L. Krantz
History and Systems of Psychology. Theories of Sanity and Insanity. Social Psychology of Science. Cross-Cultural Psychology.

Associate Professor Nancy Brekke
Social Psychology. Psychology and Law. Research Methods and Statistics. Social Cognition. Prejudice.

Associate Professor Naomi Wentworth
Developmental Psychology. Aging. Motivation. Brain Function in Attention. Mathematical Psychology.

Assistant Professor Matthew R. Kelley
Cognitive Psychology. Learning and Memory. Research Methods and Statistics.

Lecturer Kathryn Dobrmann
Developmental Psychology. Human Sexuality. Public Health. Psychology of Gender. Environmental Psychology.

Psychology is both a natural science and a social science. Through empirical investigation, psychologists seek to understand the building blocks of behavior at all levels, from neural networks and sensory systems to more integrated dimensions, such as personality, life span development, psychopathology, and social interaction.

The Department of Psychology offers courses, laboratory experiences, internships, and research opportunities in a variety of subdisciplines within psychology. The department also supports a chapter of Psi Chi, the national honor society in psychology. The curriculum promotes broad understanding with depth. We begin with the fundamentals; in their first course, students learn how to approach psychological issues from a scientific perspective and start to master the

major theories, principles, methods, and findings of psychology. As students progress through the major, they delve into specific psychological topics more deeply and learn how to apply what they have learned. Psychology majors at all levels are taught to read and critically evaluate psychological literature, carry out research, and write scientifically.

The curriculum provides majors with the background they need to pursue graduate study in psychology and related disciplines (e.g., social work). The major also helps students prepare for jobs in other fields. Psychological knowledge contributes to successful careers in business and corporate work, government and community service, communications, education, and many health professions, including medicine. Moreover, the analytical, quantitative, and communication skills gained in psychology courses will serve students well wherever life takes them after college.

PSYCHOLOGY MAJOR

To graduate with a major in psychology, a student must: (a) complete nine courses (as specified below), each with a grade of C- or better, (b) take a comprehensive major exam in the senior year (described below), and (c) earn at least a C average (2.0) in all psychology courses selected to fulfill the major course requirements outlined below.

Psychology 110. A basic course that introduces the student to the major findings, ideas, and subdisciplines of psychology.

Psychology 221 & 222 (Research Methods and Statistics I and II). A basic course sequence covering the fundamental research methods and statistics used in psychological research.

Two of the following four courses: Psychology 255, 350, 375, 330. These courses provide a foundation for understanding the social nature of human beings.

Two of the following four courses: Psychology 310, 320, 360, 370. These courses cover fundamental behavioral processes in perception, learning, cognition, and brain function.

One 400-level psychology course. Each student must complete at least one senior-level integrative course (senior seminar) or senior thesis.

One elective. Any course offered by the psychology department will satisfy this elective requirement.

Senior Majors' Exam

In the senior year, each major is required to take a comprehensive major exam. Its purpose is to provide an additional source of feedback to the Department of Psychology and to the individual student about the educational experience in psychology. Graduation with a major in psychology requires taking the exam at the scheduled time. Individual and group scores are reviewed annually by psychology department faculty for use in program evaluation. Each graduating senior receives an individual score report for self-evaluation.

PSYCHOLOGY MINOR

To graduate with a minor in psychology, a student must: (a) complete six courses (as specified below), each with a grade of C- or better, and (b) earn at least a C average (2.0) in all psychology courses selected to fulfill the minor requirements outlined below.

Psychology 110. A basic course that introduces the student to the major findings, ideas, and subdisciplines of psychology.

Psychology 221 & 222 (Research Methods and Statistics I and II). A basic course sequence covering the fundamental research methods and statistics used in psychological research.

One of the following four courses: Psychology 255, 350, 375, and 330. These courses provide a foundation for understanding the social nature of human beings.

One of the following four courses: Psychology 310, 320, 360, and 370. These courses cover fundamental behavioral processes in perception, learning, cognition, and brain function.

One elective. Any course offered by the psychology department will satisfy this elective requirement.

Curricular Planning

In addition to these requirements, the department asks students to consider the following issues:

Science and Mathematics. Success in psychology is enhanced by substantial exposure to scientific and quantitative material. Therefore, psychology

majors (especially those considering graduate work) are encouraged to take courses in other sciences and in mathematics.

Research. Psychology majors—especially those considering graduate study in psychology—are strongly encouraged to seek out additional research experiences. On-campus research opportunities include assisting a faculty member with his or her research, developing a research project in collaboration with a faculty member, and designing an independent project and conducting it under faculty supervision. Course credit may be granted for student-designed or collaborative research under the heading of a research project or senior thesis. Such projects sometimes result in student-faculty coauthored publications. Off-campus research opportunities are made available to students through an applied research course, Psychological Research in Community Settings (Psychology 321), and through research internships.

Internships. An additional set of valuable opportunities consists of off-campus internships in social service agencies, hospitals, and other applied educational, organizational, or legal settings. These experiences allow counseling, teaching, and other skills to be cultivated in preparation for later professional training and/or employment. Students' practical experiences are put into perspective in weekly seminar discussions on campus with a faculty member and other students who are completing internships that semester. All such internships in psychology are done within the framework of the practicum course, Psychology 380.

Career Preparation. Some psychology courses are especially helpful for those considering specific types of careers. Psychology 325 and Psychology 345 will help students prepare for careers in business or other organizations. Psychology 210, Psychology 318, and Psychology 320 are of special interest to those pursuing careers in education. Psychology 430 is of particular value to pre-law students, while pre-med students will benefit from taking Psychology 310, Psychology 370, and Psychology 450.

110 Introduction to Psychology

This course provides a broad, general introduction to the field of psychology, the scientific study of behavior. Topics surveyed include scientific methodology, biological bases of behavior, sensation and perception, states of consciousness, learning, thinking, memory,

motivation and emotion, development, personality, stress and health, psychological disorders and psychotherapy, social interaction, and diversity. Satisfactory completion of Psychology 110 is a prerequisite for most advanced courses in psychology, which generally cover in greater depth and breadth the topics you will encounter in this course. Three lectures and one laboratory per week. (Cross-listed as First-Year Studies 129. Meets GEC First-Year Writing Requirement.)

195 Cross-Cultural Psychology

The subtle transaction between culture and behavior will be explored cross-culturally through the following topics: psychotherapy, a person's sense of self-control versus situational control of one's own behavior, need for achievement, stages in moral development, and management styles in work environments. Comparisons will emphasize data from the United States and Japan. (Meets GEC Cultural Diversity Requirement.)

205 Stereotypes, Prejudice, and Discrimination

An examination of psychological approaches to the problems of prejudice and discrimination. Topics covered include the prevalence of prejudice in American society, theoretical perspectives on the causes of prejudice, the psychological processes underlying different forms of prejudice (e.g., racism, sexism, ageism, homophobia, and ethnocentrism), and methods of combating prejudice and encouraging acceptance of diversity. Such topics will be explored through examination of classic and contemporary research. (Meets GEC Cultural Diversity Requirement.)

210 Developmental Psychology: Childhood and Adolescence

An examination of the principles of development with an emphasis on interpretation of empirical studies and theories. We stress the ongoing interplay of biological and environmental forces as influences on development; place development in a broad context of culture, class, and history; view children and adolescents as active shapers of their environment; emphasize both continuity and the capacity for change; and consider implications of developmental psychology for educators, practitioners, parents and policymakers. Prerequisite: Psychology 110. (Cross-listed as Women's and Gender Studies 210.)

211 Adulthood and Aging

Examination of developmental processes associated with adulthood, maturity, and aging.

Examination of evidence for continued development throughout the life span. Evidence from a variety of sources is used in examining the person in terms of physical, psychological, social, and cultural influences on development. Prerequisite: Psychology 110. (Cross-listed as Women's and Gender Studies 211.)

215 Environmental Psychology

Environmental psychology is the discipline concerned with interactions and relationships between people and their environments (including built, natural, and social environments). In this course we apply psychological methods and theories to a variety of issues and behaviors, considering such topics as landscape preference, wayfinding, weather, noise, natural disasters, territoriality, crowding, and the design of residential and work environments. We also explore images of nature, wilderness, home, and place, as well as the impact of these images on behavior. The course is grounded in empirical work, and incorporates observations and experiences in the local environment. No prerequisite.

216 Sanity, "Madness," and Society

Mental illness is not only a disorder of the mind but a social issue as well. Societal stresses contribute to the onset of many of these illnesses and reduce the likelihood of overcoming the problem. How stigma, public policy, and social stressors relate to the development and continuance of mental illness will be explored through lectures, readings, and field experiences in a variety of mental health settings. No prerequisite.

221, 222 Research Methods and Statistics I and II

An introduction to the basic research methods and statistical techniques used in psychology. In the first semester, the primary focus will be on descriptive and relational methods (e.g., naturalistic observation, surveys, correlational designs) and descriptive statistics. In the second semester the primary focus will be on controlled experiments and inferential statistics. The course sequence includes a required laboratory component in which students gain hands-on experience using statistical software to analyze psychological data. Prerequisite for 221: Psychology 110 with a grade of at least C-. Prerequisite for 222: Psychology 221 with a grade of at least C-. These two courses must be taken in sequence.

255 Social Psychology

Survey of the major topics of inquiry in social psychology: attitudes, social cognition, attribution, social norms and roles, conformity, social

influence, persuasion, group dynamics, aggression, altruism, interpersonal attraction, stereotyping and prejudice, and conflict and peacemaking. Emphasis on applying social psychological principles to real-world phenomena as well as understanding basic research. Prerequisite: Psychology 110.

310 Sensation and Perception

As you go through your day, you are constantly sensing and perceiving: You feel the warmth of the hot shower on your skin, you smell the aroma of the coffee in your cup, you taste the disagreeable tartness of your orange juice after brushing your teeth, you see the bright colors of the spring day on your way to class, you hear the words of your instructor and you organize them into coherent ideas. This course explores the anatomy and physiology of the sensory systems and the way in which the raw sensory signals become organized into meaningful perceptions. Prerequisite: Psychology 222 with a grade of at least C-.

318 Psychology Applied to Education

Principles of psychology as applied to the teaching-learning situation. Emphases include the socio-emotional contexts of education and the identification and characteristics of students with special needs, including those with learning disabilities. Open to underclassmen, but preference is given to juniors and seniors. Prerequisite: Psychology 210 with a grade of at least C- or permission of the instructor.

320 Learning and Memory

This course broadly surveys the fundamentals of learning and memory while emphasizing selected issues. Topics include Pavlovian and instrumental conditioning (including generalization, discrimination, and the nature of reward), the different kinds of human memory, and the fascinating puzzle of why the capacity of short-term memory is limited to only about seven items. We consider evolutionary theory and the origins of the diverse innate foundations of human learning and memory. As part of this, human behaviors are compared with behaviors of other animals in regard to complexity, adaptiveness, innate responsiveness to patterns, sensitive periods in development, "ritualized" expression of emotions, and other inborn aspects of behavior. Brief laboratories in animal and human behavior are included. Prerequisite: Psychology 222 with a grade of at least C-.

321 Psychological Research in Community Settings

Psychological research takes place in a wide variety of community settings including local schools, museums, and social service agencies. In this course, you will put your knowledge of research methods and statistics into practice by working on a research project in a community setting. Students can join one of several projects that are already underway, or they can initiate a new project in consultation with the instructor. Prerequisites: Psychology 222 with a grade of at least C- and permission of the instructor.

325 Persuasion and Truth in Sales and Communications

This course, designed largely for juniors and seniors who are looking forward to careers, emphasizes interrelations between academic and practical realms. What do basic principles of psychology suggest in regard to marketing, personal salesmanship, and stock market prices? In what ways is our knowledge of human psychology deepened by studying our consumer society? Readings include empirical journal articles as well as historical and current books. Discussions, independent projects, papers, examinations, and a strong emphasis on informed oral participation by students. Alumni mentors in sales professions visit at regular intervals, giving descriptions of their industries and careers. Prerequisites: sophomore standing and Psychology 221 with a grade of at least C-, or comparable preparation, from courses in other departments, in understanding and summarizing scientific journal articles.

330 Motivation and Emotion (Offered Less Frequently)

The broad range of motivations and emotions is studied including the relative contributions of learning, genetics, and critical periods in development. How and why did motivations and emotions evolve, and what are their bases in brain systems, hormones, and other aspects of physiology? Which of our motivations involve accurate regulations to a "set point" (such as body temperature and weight) and which do not? How does the great subtlety of human emotional expression develop? Includes consideration of competency, security, creativity, frustration, aggression, love, sexuality, and values. Prerequisite: Psychology 221 with a grade of at least C-.

340 Psychology of Women and Men

An exploration of the behaviors and experiences of women and men. We consider how gender is represented in psychological theory and research

as well as in popular psychology. We also analyze gender as a verb: how being female or male is translated into living as woman or man. Topics include images of women and men across culture and time, health and sexuality, and work and family issues. Prerequisites: Psychology 110 and sophomore standing. (Meets GEC Cultural Diversity Requirement.)

345 Organizational and Industrial Psychology

The human side of management; why people work; increasing workers' motivation; enhancing the productivity of work groups; interpersonal relations in work settings; effective leadership in organizations. Prerequisite: Psychology 221 with a grade of at least C-.

350 Abnormal Psychology

Intended to acquaint students with the biological, emotional, behavioral, and cognitive foundations of psychopathology. Issues of classification, description, etiology, and treatment of abnormal behavior are examined from the point of view of contemporary empirically based perspectives. Specifically, these issues are considered in the context of a variety of psychopathological manifestations, including anxiety, eating, schizophrenic, mood, personality, addictive, and sexual disorders. Prerequisite: Psychology 221 with a grade of at least C-.

360 Cognitive Psychology

Surveys the history, philosophy, and research surrounding selected issues in cognitive psychology, including perception, attention, memory, language, imagery, reasoning, problem-solving, and decision-making. Students will learn what is currently known about these topics, the problems facing researchers, and how researchers go about solving these problems. They also will be given the opportunity to experience cognitive psychology research first-hand, as they participate in classic experiments and learn to analyze, interpret, and write up their results. Prerequisite: Psychology 222 with a grade of at least C-.

370 Neuroscience and Behavior

How do the brain's neurons, synapses, and electrical and chemical activities participate in psychological processes? What are the neural foundations of human perception, motivation and emotion, learning, memory, movement, and consciousness? Discussion of the modes of action of antidepressants, other psychotherapeutic drugs, and drugs of abuse. In what ways are functions localized in the brain, and how is it

possible for recovery from brain damage to take place? Laboratory sessions include experiments in brain foundations of sensation, movement, emotion, and learning in animals, demonstration of human brain waves, comparison of brains with computers, and basic exercises in computerized data acquisition and analysis. Prerequisite: a college course in mathematics or natural science approved by the instructor (such as the core introductory courses in biology or chemistry) or Psychology 221 with a grade of at least C-.

375 Personality

This course offers a general introduction to the study of personality. It surveys the major theoretical perspectives and research issues in the field of personality psychology. In particular, the contributions made by psychodynamic, humanistic, trait, and cognitive-behavioral theories to the study of personality development, personality assessment, and personality change will be reviewed. Students will be encouraged to examine critically the diversity of those theoretical formulations, their basic assumptions, and the research evidence available to support them. The area of personality assessment will receive particular attention. Test construction and relevant psychometric issues will be examined during lectures, class discussions, and paper assignments. Prerequisite: Psychology 221 with a grade of at least C-.

380 Practicum: Internships in Psychology

Supervised practice in applying psychological principles in research, organizational, and service settings outside the College. A wide array of placements is available, including mental health facilities, social service agencies, corporate and military environments, school counseling programs, and non-profit organizations; we work with students to adapt internships to their individual interests and goals. Students should initiate plans, in collaboration with the instructor, during the semester preceding the internship. All internships in psychology are done within this course and include an accompanying on-campus seminar. Open to junior and senior psychology majors with permission of the instructor. (Because the practicum experience varies, students may be permitted to repeat.)

410 History and Systems of Psychology

An examination of major theoretical trends throughout the history of psychology, with particular emphasis on such paradigmatic questions as reductionism, nativism vs. empiricism, and unification and constructivism. The question of how to situate classic texts will be explored by

reading a significant work in the history of psychology. Prerequisite: Psychology 222 with a grade of at least C- or senior standing in another major or permission of the instructor. Preference in registration to graduating seniors majoring in psychology.

420 Learning and Evolution of Human Behavior

New perspectives emerge when we think about psychology in terms of biological evolution. What is the focus of human adaptations: The individual? One's family? One's group? Your so-called "selfish genes"? How did the human brain, its mental capacities and emotions, evolve? In what ways are we the same as, and different from, other species? In what ways is your life story the product of the history of human societies and of the longer history of biological evolution? Readings in empirical and theoretical scientific journals and interdisciplinary perspectives, with an emphasis on student papers, oral presentations, and discussion. Prerequisite: Psychology 222 with a grade of at least C- or advanced standing in another major, with permission of the instructor. Preference in registration to graduating seniors majoring in psychology.

430 Psychology and Law

An examination of psychological research, theory, and practice. Sample topics include: psychological testing in education and employment; clinical assessments of insanity, competence, and dangerousness; eyewitness testimony; polygraphs and lie detection; psychological profiling; the psychology of false confessions; psychologists as trial consultants; jury decision making; capital punishment; and discrimination in the legal system. As we survey the field we will consider how psychology can help the law and how studying the law enriches psychology. Prerequisite: Psychology 222 with a grade of at least C- or advanced standing in another major, with permission of the instructor. Preference in registration to graduating seniors majoring in psychology.

440 Clinical Psychology (Offered Less Frequently)

This course is designed to help prepare students for graduate school in clinical psychology or for employment in clinical settings by providing instruction and practicum apprentice experience in the diagnosis and remediation of individual, child, marriage, family, and community problems. Prerequisites: Psychology 222 with a grade of at least C- and Psychology 330, 350, or 375. Preference in registration to graduating seniors majoring in psychology.

450 Health Psychology

This course explores a variety of research and clinical issues in health psychology. Representative topics include the role of behavior in health and disease, the neurobiology of emotion, the major stress-related and behavior-related disorders (e.g., coronary heart disease, cancer, headaches, AIDS), prevention strategies, and psychologically based treatment approaches. Our primary focus will be a methodological and conceptual analysis of the health psychology literature, which we will consider from a scientific perspective. An understanding of these issues, however, should help you become a more critical consumer of health information and health advice offered by the media, and may inspire you to make positive changes in your own health-related behavior and lifestyle. Prerequisite: Psychology 222 with a grade of at least C- or advanced standing in another major, with permission of the instructor. Preference in registration to graduating seniors majoring in psychology.

460 Psychology of Language (Offered Less Frequently)

Every major theoretical approach to human behavior has attempted to explain how humans learn and use language. Information-processing theories and computer models of the mind have had an impact on ancient questions concerning verbal behavior. Topics covered include philosophy of language, history of psycholinguistics, the influence of context, common ground and world knowledge in language understanding, lexical processing and lexical ambiguity, syntactic processing, inferences in discourse processing, speech acts, pragmatics, figurative language, conceptual metaphors, and poetic metaphors. Readings include original journal articles and manuscripts in preparation that illustrate the "cutting edge" controversies in contemporary psycholinguistics. Prerequisite: Psychology 222 with a grade of at least C- or advanced standing in another major, with permission of the instructor. Preference in registration to graduating seniors majoring in psychology.

480 General Senior Seminar (Offered Less Frequently)

Contemporary issues in a broad range of topics will be examined via discussion between psychology faculty and invited students. Among the areas discussed will be personality, learning, social psychology, and developmental psychology. Prerequisite: Senior standing; by invitation.

RELIGION

Professor Ronald H. Miller, Chair
Comparative Religion. Biblical Theology.
Jewish-Christian Dialogue.

Lecturer Catherine Benton
History of Religions. Asian Religion. Cross-
Cultural Studies.

Lecturer Herbert Bronstein
Comparative Religion. Judaic Studies.

The Department of Religion serves to introduce students to the great spiritual traditions of the world: Judaism, Christianity, Islam, Hinduism, Buddhism, and Daoism. There are also courses on the ancient religions of Greece and Rome and on the religions of indigenous peoples. Some of the courses also explore the connections between religion and other disciplines: art, anthropology, environmental studies, history, literature, music, and philosophy.

Through the academic study of the world's great spiritual traditions students discuss religious issues in an atmosphere of free and serious inquiry, with a concern for the application of scholarly methods. The very nature of religious inquiry is such that deep human issues are dealt with on a regular basis: the nature of ultimate reality, free will, the meaning of myths, the nature of mysticism, the function of prayer and religious ritual, and the exploration of diverse paths of spiritual growth.

RELIGION MINOR

(No major is currently available.)

Students interested in the subject of religion are encouraged to consider the minor in religion, which consists of six courses, two of which must be Religion 217 and 218, and one of which must be a 300-level course. In addition to the regularly offered courses listed below, tutorials are offered in biblical Hebrew, Greek, Latin, and other areas of student interest.

115 Religious Approaches to Existence

This course focuses on the nature of religion and religious experience, the ways of knowing that characterize religion, and how various tra-

ditions define a religious life. Readings include specific examples of historical traditions—Thomas Merton's *Seven Storey Mountain*, Black Elk's teachings in Raymond DeMallie's *The Sixth Grandfather*, Chan Khong's *Learning True Love*, and Malidoma Patrice Some's *Of Water and the Spirit*. (Meets GEC First-Year Writing and Cultural Diversity Requirements.)

200 Religious Values in Cultural Perspective

This course focuses on several fundamental religious questions such as the nature of evil, the meaning of suffering, concepts of the transcendent, and how various traditions define a religious life. Readings include religious autobiographical writings from Judaism, Hinduism, a Native American community, Buddhism, and a shamanic tradition. (Meets GEC Cultural Diversity Requirement.)

202 The Hebrew Bible

This course entails close examination of the three divisions of the Hebrew Bible: the Torah, the Prophets, and the Writings. Attention will be given to the historical significance of the texts, their cultural background, and their theological implications. This course is partially funded by a gift from the Jewish Chautauqua Society.

203 The Christian Testament

Students will explore the four genres of writing found in the 27 books of the Christian Testament: gospel, letter, apocalypse, and historical narrative. Attention will be given to the historical background of the period; the religious, political, and cultural currents of the first-century world; and both the theological and spiritual significance of the text.

206 Western Christianity

Discussion will center on primary theological sources representative of the early Latin fathers, the Middle Ages, and the Reformation as well as the modern and postmodern periods. Authors studied will range from Augustine to Thomas Merton.

207 Religion in Contemporary America

A study of current developments in American religion with focused discussion on the new religious right, the liberation left, alternative

religions, trends within Judaism, Catholicism after Vatican II, and New Age spirituality. (Meets GEC Cultural Diversity Requirement.)

210 Topics in Comparative Religion

This course will explore a topic common to both Asian religions and the religions of the Middle East. Examples of such topics are mysticism, prayer, social ethic, the concept of the self, and teaching on death and the afterlife. This course is partially funded by a gift from the Herbert and Abra Portes Fund. (Meets GEC Cultural Diversity Requirement.)

215 Judaism: The Inner Design

The course will structurally investigate concepts, myths, and metaphors of ancient and modern Judaism, its coherent design, and by way of comparison with other religions such issues as "this worldly/other worldly," motive and deed, mythical self-transcendence, and the contributions of Judaism to human spirituality. This course is partially funded by a gift from the Jewish Chautauqua Society.

216 Judaic Tradition: Master Texts

An overview of the Jewish tradition from the period of the Hebrew Bible to the present day, through examination of great Jewish religious texts with concern for the changing historical contexts from which they have emerged. This course is partially funded by a gift from the Jewish Chautauqua Society.

217 Religions of Asia

An introduction to the religious traditions of Hinduism, Buddhism, and Daoism. Focusing on their historical development as well as their belief structures, we will read ancient, classical, and modern texts, discussing the responses of the traditions to such issues as the nature of the universe and the place and purpose of human beings within the universe. (Cross-listed as Asian Studies 217. Meets GEC Cultural Diversity Requirement. This course is required for a religion minor.)

218 Religions of the Middle East

An introduction to Judaism, Orthodox Christianity, and Islam. Students examine the interconnected histories, scriptures, and beliefs of these influential religious traditions of the Middle East. Students read primary scriptural texts as well as later theological and mystical works. (Meets GEC First-Year Writing and Cultural Diversity Requirements. This course is required for a religion minor.)

221 Shakespeare and Religion

(Cross-listed as English 221)

223 Topics of Japanese Thought

(Cross-listed as Philosophy 285 and Asian Studies 275. Meets GEC Cultural Diversity Requirement.)

240 Religious Perspectives on Environmental Issues

The current environmental crises rest on a layer of philosophical and religious assumptions that are currently being challenged. Are human beings the center of the universe? Is humankind's mandate to dominate nature? Does nature belong to human beings or do human beings belong to nature? This course will address the relationship of the divine and the human sphere of nature from various religious perspectives. Contemporary Judaic, Christian, and Islamic ecological visions and action programs will be considered. In addition, the course will include religious views and practices of certain native cultures of North and South America, the Australian aborigines, and African tribes as well as ecological perspectives derived from South and East Asian religious cultures. (Cross-listed as Environmental Studies 240. Meets GEC Cultural Diversity Requirement.)

242 Religions of Indigenous Peoples

Our increased awareness of global community has given rise to a new interest in the religions of indigenous peoples. This course will explore the religious heritage of Native Americans, Africans, and Australian aborigines and other indigenous peoples. (Meets GEC Cultural Diversity Requirement.)

250 Introduction to Islam

This course examines the history of Islam, the teachings of different philosophical schools, and the literature of Islamic societies. The roots of the religious tradition as well as its development in different cultural contexts will be examined. Students will read texts drawn from Middle Eastern, Asian, European, and North American Muslim sources. (Cross-listed as Asian Studies 250. Meets GEC Cultural Diversity Requirement.)

255 Islam and the West

The relationship of Islam and the Western World can be understood in terms of a "conflict of civilizations." This course will explore the history and implications of these two opposing models. The focus of discussion will be not

only on the past but also on the present and future possibilities for interaction between the Muslim world and the West. This course is partially funded by a gift from the Islamic Cultural Center in Northbrook, Illinois. (Meets GEC Cultural Diversity Requirement.)

275 Female Religious Images in the West

Individual religious traditions have incorporated female images and ideals in different ways as goddesses, priestesses, and saints. The objective of this course is to examine ways in which the divine has been expressed in specifically female forms, as well as to examine the characteristics of female religious experience. Specific figures include Inanna, the central goddess figure of ancient Sumer; Eve and Sarah from the Hebrew Bible; Mary and female monastics from the Christian tradition; and contemporary Jewish, Christian, and Muslim women actively participating in their traditions. (Cross-listed as Women's and Gender Studies 275. Meets GEC Cultural Diversity Requirement.)

276 Female Religious Images in Asia

Goddess figures in India, China, and Japan are studied in this class along with the roles of human women in particular Asian religious traditions. This class explores the experiences of Buddhist nuns, Hindu and Muslim female saints, traditional healers, and shamans. Readings are drawn from religious texts, myths, and short stories from specific Asian cultures. (Cross-listed as Asian Studies 276 and Women's and Gender Studies 276. Meets GEC Cultural Diversity Requirement.)

278 Introduction to Buddhism

An introduction to the origins of Buddhism in India as well as to the major cultural and historical influences on the spread of Buddhism throughout Asia, particularly in India, Sri Lanka, Myanmar, Thailand, Tibet, China, and Japan. The course will examine various forms of Buddhist practice including devotion, ethics, sangha membership, meditation, rituals, and festivals. (Cross-listed as Asian Studies 278. Meets GEC Cultural Diversity Requirement.)

279 Hinduism and Narrative

Stories are one of the oldest and most effective means of communicating religious values while being one of the least threatening ways of questioning religious ideals. This course examines the teachings of worldview and ethic embedded in the story literature, as well as the ways that narrative functions as shaper of attitude and behavior within the Indian religious tradition. Texts range from philosophical speculation about the nature of the universe to the story of a king who loses his wife to a 10-headed demon. No previous knowledge of Hinduism is necessary. (Cross-listed as Asian Studies 279. Meets GEC Cultural Diversity Requirement.)

306 Greek and Roman Religion

(Cross-listed as History 304. Meets GEC Cultural Diversity Requirement.)

312 In Search of the Historical Jesus

Close examination of various portraits of Jesus: in the four gospels of the Christian Testament, in early noncanonical gospels, in recent appraisals of Jesus in scholarly works, in literature, and in film. Primary focus on the perennial attempt to reconstruct the historical Jesus. Prerequisite: Religion 201, 202, or 203 or consent of the instructor.

321 Jewish-Christian Conversations

Beginning with relevant passages in the Christian Testament literature, the class discussion will move to patristic literature and then to discussion in the medieval and modern periods of European history. Our primary focus will be on the forms of dialogue emerging in Europe and North America after World War I and continuing into our contemporary world. Prerequisite: any course in religion, junior standing, or consent of the instructor.

322 Religious Existentialism

An epoch of European philosophy and religious thought culminated in the great system developed by Hegel. In its wake came a literature of protest, beginning with the Danish philosopher and religious thinker Søren Kierkegaard and moving through a later generation of European intellectuals who came to maturity between the two world wars. Included are Jewish voices such as Martin Buber and Franz Rosenzweig as well as Christian writers such as Paul Tillich and Gabriel Marcel. Readings include texts by these religious existentialists. Prerequisite: any course in religion, junior standing, or consent of the instructor. (Cross-listed as Philosophy 322.)

390 Sociology of Religion

(Cross-listed as Sociology and Anthropology 390.)

SOCIOLOGY AND ANTHROPOLOGY

Professor Ahmad Sadri, Chair

Social Theory. Political Sociology. Sociology of Religion. Sociology of Film. Sociology of Intellectuals.

Assistant Professor Jeffrey Bass

Political Anthropology. Psychological Anthropology. Latin America. Linguistics.

Assistant Professor Shawn Bender

Popular Culture. Japan. Music. Sexuality.

Assistant Professor David Boden

Cultural Sociology. Law and Social Policy. Research Methods. Community and Identity.

Assistant Professor Marc Moskowitz

Cultural Anthropology. Chinese and Japanese Society. Sexuality, Religion and Political Economy.

Lecturer Kurt Ham

Cultural Anthropology. African Cultures and History. Technology.

Although sociology and anthropology arose from two traditions, they are engaged in a common endeavor. Studies in the department are directed toward the discovery of general principles that help explain similarities and contrasts in human social behavior. To this end, work in the department centers on the comparative analysis of human societies. We emphasize study of both modern and premodern societies, including issues of contemporary social policy.

Introduction to Sociology and Anthropology (Sociology and Anthropology 110) serves as the prerequisite for most higher-level courses. Courses at the 100 level are designed for first- and second-year students. Juniors and seniors are admitted without prerequisite to most 200-level courses with consent of the instructor.

SOCIOLOGY AND ANTHROPOLOGY MAJOR

Majors complete a minimum of nine courses in the department. A grade of C- or better must be earned in all courses counted toward the major. The specific requirements are:

Sociology and Anthropology 110, 210, 361, 310, 320, and either 480 (Senior Seminar) or a thesis.

Majors planning graduate studies in sociology, anthropology, social service, or social policy are urged to take courses in foreign languages, mathematics, computer science, and statistics.

The department takes special interest in encouraging senior thesis work leading to the degree with honors in the major.

SOCIOLOGY AND ANTHROPOLOGY MINOR

Six courses required, to include the following: Sociology and Anthropology 110; either 361 or 210; and four additional electives, at least one of which must be at the 300 or 400 level.

110 Introduction to Sociology and Anthropology

An inquiry into the social (group rather than individual) bases of human practices and human life: an unfamiliar but revealing perspective on the familiar world. Limited to first- and second-year students.

112 Chicago and Sociology

Classic, early, and contemporary studies of Chicago supplemented by visits to the neighborhoods examined in these investigations.

116 Self and Social Interaction

This seminar focuses on social interaction by gauging the nature of action when in the presence of others. The students will gain a critical distance from their social surroundings by framing and studying what they often take for granted. Students will design and conduct their own experiments.

170 Contemporary Social Issues (Offered Less Frequently)

How do social conditions and trends come to be identified as "problems"? What are the implications of defining something (or some group) as a "problem"? This course examines recognized social issues including colonialism, social inequality, race, racism and poverty, alienation, and technological advances that are altering the occupational structure of our society.

201 Ancient Greece: Life, Thought, and the Arts

See Program in Greece and Turkey under Undergraduate Curriculum for course description. (Cross-listed as Classical Studies and Greek Civilizations 201. Meets GEC Cultural Diversity Requirement.)

202 Greece in the Bronze Age

See Program in Greece and Turkey under Undergraduate Curriculum for course description. Offered only in Greece and Turkey. (Cross-listed as Art 202, Classical Studies 202, and Greek Civilizations 202. Meets GEC Cultural Diversity Requirement.)

203 Greece in the Classical-Roman Ages

See Program in Greece and Turkey under Undergraduate Curriculum for course description. Offered only in Greece and Turkey. (Cross-listed as Art 203, Classical Studies 203, and Greek Civilizations 203. Meets GEC Cultural Diversity Requirement.)

204 Greece in the Byzantine-Medieval Ages

See Program in Greece and Turkey under Undergraduate Curriculum for course description. Offered only in Greece and Turkey. (Cross-listed as Art 204, Classical Studies 204, and Greek Civilizations 204. Meets GEC Cultural Diversity Requirement.)

210 Principles of Social Organization

This course examines patterns that occur in human interaction—at both micro and macro scales. Focus is placed upon a process understanding of society. Topics include the generation of a shared reality, production of culture, types of relationships and their key features, predictable patterns of organization and their internal dynamics, as well as social universals such as conflict, change, and resource allocation. Prerequisite: Sociology and Anthropology 110. Enrollment priority given to departmental majors and minors. (Meets GEC Cultural Diversity Requirement.)

211 Ethnography: Cultures and Texts

This course explores ethnography as the textual representation of cultures and cultural communities and the use of ethnography in cultural anthropology as the privileged mode of communication, investigation, knowing, and representing cultural realities. Ethnographies studied include those produced in different national traditions, those created in different historical moments, and those describing distinct "cultures"

across the globe and human history. Ethnography is understood to occur in a variety of media, including visual and performative texts.

Prerequisite: Sociology and Anthropology 110 or any anthropology course. (Meets GEC Cultural Diversity Requirement.)

212 Introduction to Chinese Culture and Society

This course, designed for students with little knowledge of China, explores the recent past and evolving present of Chinese social roles, values, and quality of life. (Cross-listed as Asian Studies 212. Meets GEC Cultural Diversity Requirement.)

215 Introduction to Japanese Thought and Society

This course will serve as an introduction to Japanese thought and society. This will include an historical overview, modern-day culture, and an examination of Japan's interactions with neighboring countries, both in the past and today. The course will provide a wide range of topics including economy, family, religious practice, and cultural changes that have occurred in the process of modernization. (Cross-listed as Asian Studies 215. Meets GEC Cultural Diversity Requirement.)

216 Introduction to Archaeology

This course aims to familiarize students with one of the sub-fields of the discipline of anthropology: archaeology. As an offering that will require students to frequently travel to the Field Museum and gain access to more than 30,000,000 archaeological and anthropological objects, this course will offer hands-on training in theories and practice of the discipline of archaeology as well as the arts related to archives of anthropological collections. Lectures, seminar discussions and lab work on the premises of the Field Museum will be the main pedagogical tools in this course. (Cross-listed as Classical Studies 216.)

217 Sociology of Work (Offered Less Frequently)

The meaning of work, with emphasis on sociological concepts such as stratification, power, quality of life, and organization in the social world. Focus will be both on cross-cultural comparisons of the social definition of work and on the organization of work in the United States including types of occupations, power distribution within occupations, and changes in the workforce. Participant-observer studies will

provide comparisons of the work worlds of pink-, blue-, and white-collar workers. Prerequisite: Sociology and Anthropology 110. (Meets GEC Cultural Diversity Requirement.)

220 Sociology of Sport (Offered Less Frequently)

Sport will be analyzed as a distinctive social institution that serves to teach and reinforce social norms and values. Topics to be covered include gender roles/stereotypes and sports, the relationship of sports and class inequality and racism, sports and militarism, exploitation of athletes, and cross-cultural analysis of the role of sports in selected societies including Brazil, Japan, and Africa. Prerequisite: Sociology and Anthropology 110.

221 Peoples and Cultures of Modern Africa (Offered Less Frequently)

Introduction to contemporary rural and urban society in sub-Saharan Africa, drawing on materials from all major regions of the subcontinent. Particular emphasis will be on problems of rural development, rural-urban migration, and structural changes of economic, political, and social formations in the various new nations. (Meets GEC Cultural Diversity Requirement.)

231 Histories and Cultures of Latin America

This course introduces students to modern historical, ethnohistorical, and anthropological approaches to the indigenous populations of Latin America. The course will focus on the conflict and crisis that have characterized the relationship between the native inhabitants of the New World and the Old World immigrants and their descendants whose presence has forever changed the Americas. This conflict, and the cultures that emerged from it, will be traced both historically (starting with the "conquest") and regionally, focusing on four distinct areas: central Mexico; Guatemala and Chiapas; the Andes; and the Amazon. (Cross-listed as Latin American Studies 231. Meets GEC Cultural Diversity Requirement.)

240 Deviance

How society defines deviants—its outcasts and outsiders—and how the people so defined respond to this categorization; the nature of normal and abnormal, legal and illegal. Do these categories have absolute moral meaning, or do they always depend on the particular society and era in which they are defined? Topics to be addressed include stigma and stereotyping, cross-cultural variations in gender roles, the status of the inmate, deviance

as blocked opportunity, and the political mobilization of outsiders. Prerequisite: Sociology and Anthropology 110. (Meets GEC Cultural Diversity Requirement.)

242 Maya Cultures and Histories

Survey of the Maya peoples and cultures of North and Central America. The main goal is to develop an extensive and critical understanding about contemporary Maya. Themes include their multiple and heterogeneous cultures, communities, and histories; political organizations and relations to other communities; economic structure and positions within encompassing economies of regional, national, and international scope; cultural survival; religious pluralisms and ritual. (Cross-listed as Latin American Studies 242. Meets GEC Cultural Diversity Requirement.)

243 Andes Cultures and Histories

This course is designed to introduce students to the Andes as a culture region, with particular attention to the histories and cultures of the indigenous peoples of the Andes. As such the course will focus on the cultures of the highland peoples of Peru. (Cross-listed as Latin American Studies 243. Meets GEC Cultural Diversity Requirement.)

253 Family and Kinship

This course focuses on family and kinship in cross-cultural perspective. We will look at families in their social and cultural context and ask what relationships exist between family forms, practices, and values and the economic system, political organization, religions, and cultures of the larger community. We will also ask what the sources of love and support, as well as conflict and tension, are within families and among kin, and we will question why family forms and ideal family types change over time. (Cross-listed as Women's and Gender Studies 253. Meets GEC Cultural Diversity Requirement.)

271 Technology and Human Values

Conditions and processes of industrialization in the Western world; problems related to economic development in emerging nations; impact of industry on lifeways of modern humans. Prerequisite: Sociology and Anthropology 110. (Cross-listed as Environmental Studies 271. Meets GEC Cultural Diversity Requirement.)

272 Popular Culture in Latin America

This course is designed to familiarize students with the study of "popular culture" in Latin

America. We will begin by examining the meaning of the term "popular culture"—what does it include? What does it exclude? We will then look at a number of studies by anthropologists of Latin American popular cultural forms, attending to the social uses of comic books, sports, television, music, dance, movies, etc., in the project of defining, politicizing, or depoliticizing Latin American identities. (Cross-listed as Latin American Studies 272. Meets GEC Cultural Diversity Requirement.)

280 Gender, Culture, and Society

Theories concerning the acquisition of sex-typed behavior; social and biological influences on the roles of males and females in the twentieth-century United States as well as in other cultures. Feminist and anti-feminist perspectives. Images of future lifestyles and implications for social policy. Prerequisite: Sociology and Anthropology 110. (Cross-listed as Women's and Gender Studies 280. Meets GEC Cultural Diversity Requirement.)

281 Gender Issues in China and Taiwan

We will cover a wide range of gender issues in Chinese culture in both mainland China and Taiwan. The course will begin by addressing roles of women and men in traditional China, trace changes in women's and men's roles in the 1970s and 1980s, and conclude by looking at gender issues in the 1990s and beyond. The class will consist of lectures and discussions, supplemented with films. (Cross-listed as Asian Studies 281 and Women's and Gender Studies 281. Meets GEC Cultural Diversity Requirement.)

282 Visions of the Family: East and West

(Cross-listed as Asian Studies 282, Philosophy 282, and Women's and Gender Studies 282. Meets GEC Cultural Diversity Requirement.)

285 Social Structure and Culture through Film

This course combines a historical survey of narrative films and an overview of international schools of filmmaking and couches them in a sociological framework. The questions of treatment of the other (races and nations), totalitarianism, revolution, militarism, deviance, various views of human nature, and utopias and dystopias portrayed in science fiction movies will be addressed. Prerequisite: Sociology and Anthropology 110. Required: an additional weekly lab session for viewing movies. (Meets GEC Cultural Diversity Requirement.)

290 Social Problems and Social Policy

The course tracks the shifting sociological understanding of social problems in the United States and the implications for research and policy. Specifically, emphasis is placed on a balance between theoretical understandings and empirical investigation on topics ranging from family to the environment. Prerequisite: Sociology and Anthropology 110. Enrollment priority given to departmental majors and minors.

302 Sexuality and Society

This course is a cross-cultural examination of perceptions and practices of sex and sexuality. We will begin with a brief overview of some archaeological findings and their implications, after which we will go on to address sexual practices in history and modern times both in the United States and other areas of the world. We will study economic, cultural, political, and religious influences on sexual thought and practice. (Cross-listed as Women's and Gender Studies 302. Meets GEC Cultural Diversity Requirement.)

310 Social Research: Quantitative Design

This course provides an introduction to the relationship between theoretical models and empirical investigations of social action. The quantitative methodologies used by sociologists are investigated and assessed. The focus of the course is selection of a problem for investigation, choice of appropriate methodology, and generation of a final research proposal for later implementation. Recommended for junior year. Prerequisite: Sociology and Anthropology 110. Co-requisite: Sociology and Anthropology 210 with a grade of C- or better.

320 Social Research: Techniques

Application of research skills in carrying out an actual research project. Data analysis techniques including multivariate analysis and social science computer skills using the SPSS program. Prerequisite: Sociology and Anthropology 310 with a grade of C or better.

350 Sociology of Knowledge

This course investigates the patterns whereby social organization shapes both the content and structure of knowledge. The connection between knowledge and society is reciprocal: we will observe how a new religious message, scientific insight, or technological development alters the social order. The sociology of knowledge also involves the investigation of consciousness and belief. We will investigate the relationships between mental phenomena and social organi-

zation—how, for example, "false consciousness" is constructed in relations of exploitation and how ideologies and stereotypes shape what is perceived.

352 Race, Love, and Conquest (Offered Less Frequently)

This course will explore the connections among race, gender, sex, and class through the idea of love. We will examine how love, between the cross-categories of race, class, sex, and age, is fraught with ambivalence and danger. Through postcolonial and feminist theories, we will learn about power relationships that support and solidify power hierarchies and represent the naturalness of certain Euro-, male-, and bourgeois-centric desires and domination. We are concerned with both love stories and stories of tabooed love that result in failures, affairs, and insinuated love. We will discuss how ideologies of love are used to effect certain kinds of relationships within colonial and postcolonial power dynamics. Prerequisite: Sociology and Anthropology 110. (Meets GEC Cultural Diversity Requirement.)

361 Cultural Anthropology

An introduction to cultural and social anthropology that integrates theoretical rationales with ethnographic accounts of societies in various parts of the world. Explores major trends in the history of the discipline through selected topics including the concepts of society and culture, racial theories, ethnographic method, structural/functional analyses of socio-religious, socio-political, and socio-economic systems, and the role of anthropology in social activism. Prerequisite: Sociology and Anthropology 110 for freshmen and sophomores. (Meets GEC Cultural Diversity Requirement.)

370 Social Inequality (Offered Less Frequently)

A comparative study of various forms of social inequality. Analysis of inequality (e.g., sex, age, education, competence, wealth, power) in different forms of social organization from small, intimate groups to large-scale social systems. Theoretical approaches concerning the emergence and persistence of hierarchies. Prerequisite: Sociology and Anthropology 110.

373 Chinese and Japanese Religion in Practice

The religious orthodoxy of Chinese and Japanese religions is even more disparate from their practice than comparable religions in the

West. This course will provide a sociological and anthropological view of the practice of Chinese and Japanese religions in mainland China, Taiwan, and Japan in the past and present. Analyses will include practices of the major Chinese religions (Buddhism, Confucianism, and Daoism), folk religious practices (ancestor worship, sorcery, and appeasing ghosts), and relatively new religious influences such as Islam and various branches of Christianity. (Meets GEC Cultural Diversity Requirement.)

375 History of Social Thought

This course will examine some of the classical sources of social thought both in the East and the West. Texts by Plato, Aristotle, St. Augustine, Aquinas, Alfarabi, Confucius, authors of the Vedas, Machiavelli, Hobbes, and Rousseau will be examined for the seeds of questions that were later to grow into the thicket of sociological problematics. Extensive weekly readings of original sources will be the basis of class discussions. Prerequisite: Sociology and Anthropology 110. (Meets GEC Cultural Diversity Requirement.)

380 Political Sociology

Analysis of political structure and processes in varying types of societies including traditional preindustrial, developing, and modern societies. Theories of Hegel, Lukacs, Spencer, Weber, and Arendt on the evolution of the state and critiques of authoritarian, totalitarian, and democratic political systems. Social bases of the distribution of power and political participation. Prerequisite: Sociology and Anthropology 110.

385 Intellectuals and Society

What is the role of intellectuals and the intelligentsia in the classical, medieval, and modern Occident? What characterizes people of knowledge in these and non-Western civilizations? A cross-cultural comparison of the development of intellectual elites in various arenas including Asia, the Islamic world, and Eastern and Western European and American cultures. Prerequisite: Sociology and Anthropology 110.

390 Sociology of Religion

This seminar starts with major classical theories of sociology of religion including those of secularization and privatization of religion in the modern world. Then we shall examine the relevant events of the past quarter of the century, namely the sudden explosion of politicized and highly public religions in the Western and the non-Western worlds. The existing sociological

literature didn't anticipate the current significance of religion and this tension is expected to generate interesting debates in this seminar. Special attention will be given to a comparative study of public religions in Western countries (e.g., Brazil, Poland, Spain, and the United States) and in the Middle East (Egypt, Iran, Saudi Arabia). (Cross-listed as Religion 390.)

395 Law, Culture, and Society

This course will examine the social organization of legal institutions and the relationship between law and the structure of society. Specifically, the course considers the nature and origins of law from the viewpoint of classical social theorists and anthropological studies of customary law. The course also emphasizes various aspects of the American legal system: the social structure of the legal profession, courts and dispute resolution, law as an instrument of social control, and the relationship between law and social change. (Meets GEC Cultural Diversity Requirement.)

410 Contemporary Social Theory

This seminar is designed as an advanced introduction to the major theoretical developments in contemporary sociological theory. Topics include the Chicago School, the Frankfurt School, Structuralism, Symbolic Interactionism, Deconstructionism, Feminism, and Queer Theory. The contributions of Parson, Merton, Blumer, Goffman, Bourdieu, and Foucault constitute significant areas of discussion.

451 Internship

453 Tutorial

454 Research, Independent Study

480 Senior Seminar: Social Explanation and Theory

Exposition, comparison, and appraisal of major schools of thought in the history of social inquiry; contexts of explanation and problems of systematic theory construction in social science.

Prerequisites: Sociology and Anthropology 110 and 210.

490 Senior Thesis

THEATER

Director of Theater Dennis Mae
Design. Directing. Voice and Diction. Musical Theater. Public Speaking and Rhetoric.

Assistant Professor Richard Pettengill
Theater History. Dramaturgy. Dramatic Literature.

Lecturer Tony Adler
Theater Criticism.

Lecturer Claudia Allen
Playwrighting.

Lecturer Jennifer Lowe
Acting.

Lecturer Maggie Speer
Directing. Advanced Acting.

Scott Miller
Technical Director.

A wide variety of classic, contemporary, and original productions are presented in the Allan Carr Theater in Hixon Hall. This unique and intimate venue for performing arts adapts to proscenium, arena, thrust, and experimental staging configurations. A center for campus theater activity, Hixon Hall provides a home for the Garrick Players' productions, classroom labs, professional shows, and workshops.

The season of productions—open to all students—is managed and staffed by the Garrick Players, a co-curricular student organization under the guidance of the Director of Theater. Experience in all aspects of theater is offered: acting, directing, playwrighting, dramaturgy, design, costuming, lighting, stagecraft, and publicity. Garrick Players adheres to a casting policy irrespective of race, ethnicity, or gender.

Professionally taught workshops such as "Movement," "Stage Combat," and "Audition Techniques" are offered in addition to courses in theater. Creative project credit is available for in-depth, specialized study in directing, playwrighting, dramaturgy, design, stage management, advanced acting projects, etc. Credit is also available through internships with local professional theaters.

In addition, there is a local chapter of Alpha Psi Omega, the national dramatics honorary fraternity. It serves to honor scholastically outstanding students who have shown superior accomplishment in dramatic arts at Lake Forest College.

THEATER MAJOR

The Theater major seeks a balance between analysis, research, theory, and creative skills.

A minimum of ten credits is required for a major. Theater 220 (Acting) is a prerequisite for most other theater courses. Students must take at least four of the core group of courses: Theater 210 (Design), 220 (Acting), 250 (Directing), 255 (Dramaturgy), 270 (Playwrighting). A minimum of two theater history courses is required, and three additional theater electives, at least two of which are from the following: 308, 330, 336, 337, 338, 340, 370 or 380.

First-year students considering a major in theater should take Theater 110 (Origins and Theories of Theater), 120 (Being on Stage), 240 (Theater in Chicago), or First-Year Studies 165 (Chicago Theater Experience) or 181 (Producing Plays at Chicago's Victory Gardens Theater) as an entry-level course. While these courses do not count toward the major, they are an excellent way to get an overview of the discipline.

To satisfy the Seniors Studies requirement, theater majors will either take a senior seminar or prepare a senior thesis. Exceptional students may be permitted to undertake a senior creative project in theater such as playwrighting, direction, dramaturgy or design of a full-length production, or specialized acting projects. A senior creative project or thesis of more than one credit may not replace other requirements.

Performance opportunities are available through the co-curricular group Garrick Players. Participation in Garrick Players productions is encouraged but does not count toward academic credit. Tutorials, creative projects, research projects, and internships may be arranged with a faculty member, but may not replace required courses without the approval of the department chair.

Students planning to focus on a specific concentration should consult with the department chair to plan an effective course of study and consider the following elective course options:

Acting or Directing

THTR 221 and THTR 260

THTR 222 or THTR 225

THTR 224 or THTR 233

THTR 223 or THTR 236

THTR 336, 337, 338, 380

Playwriting or Dramaturgy

THTR 258

THTR 362 and THTR 370

THTR 340, 336, 337, 338

Design (sets, lights, costumes)

Art 130, Art 131, Art 220

THTR 340, 336, 337, 338

Technical Theater Internship

THEATER MINOR

Six courses are required for a minor in theater. At least two courses from the following: 210, 220, 250, 255, or 270.

Up to four additional courses from the following, at least one of which must be at the 300 level: 221, 222, 223, 224, 225, 230, 231, 232, 233, 235, 236, 240, 245, 258, 260, 270, 308, 330, 336, 337, 338, 340, 370, or 380.

THTR 390 Internship in theater is also applicable toward a minor in theater.

Creative project in theater, one credit toward a minor in theater via production participation, to be arranged with a faculty member.

110 Origins and Theories of Theater

This course introduces students to the theoretical underpinnings of the discipline. Theater history and methodology are used to ask such basic questions such as: Why are humans drawn to perform? For sheer enjoyment? To express ideas through performance? Group psychology, ritual, cathartic transformation, celebration, invocation, and other concepts are examined through discussion, readings, and performance experiences. This course focuses on the ability to analyze and interpret works of dramatic literature through written, oral, and visual presentations.

120 Being on Stage

This course explores the many times we are on stage in life: job interviews, business presentations, teaching a class, or even in a court of law. It is also an introduction to a wide variety of performance experiences including lecture, poetry and prose reading, stand-up comedy, improvisation, dance and music, as well as acting. Particular emphasis is on key presentation components of physical comfort and presence, clarity of message or intent, and variety in vocal delivery. Students will attend events in Chicago and on campus in order to learn how to talk and write about being on stage when performing in the theater or in daily life. Numerous explorations and on-stage exercises lead to final projects. This course is ideal for students majoring in the fields of music, communication, education, pre-law, pre-med, or business, as well as beginning or experienced actors.

210 From Page to Stage: Communicating through Design

This course is an introduction to the processes and principles of design. It covers the development of a design concept through script reading and analysis; the discussion and analysis of professional set, costume, lighting, and sound designs; training in basic drafting skills; and lecture information on theater technology and terminology. Several design projects are coupled with text readings and hands-on shop work with both power and hand tools, lighting instruments, and sound and lighting control systems.

220 Acting I: Creating a Character

For beginners and experienced actors alike. This course explores the basic methods of creating and developing realistic characters through truthful explorations of the "self" and the "text." A variety of acting methods are studied and practiced through interpretive and physical exercises, monologues, and scenes. The course work culminates in final scene projects.

Attendance at a number of local and regional performances is required. Writing assignments include analytic response papers on productions attended, in-class exercises, projects, and daily journal entries. This course is a recommended first course in theater studies whether or not the student has studied acting previously and is applicable for students of theater, education, and communication.

221 Acting II: Twentieth-Century Realism

An exploration of acting techniques required in modern and contemporary works from the early twentieth century to the present by authors such as Shaw, O'Neill, Williams, Inge, Miller, Pinter, Albee, Shepard, Churchill, Norman, Wilson, and others.

Scene projects include written script and character analysis, daily journals, and in-depth critiques of self and peer performances. Prerequisites: Theater 220 and 232 or permission of the instructor through a placement test, an interview, and audition.

222 Acting III: Farce and Comedy Techniques

A practical study of comic techniques for modern, classic, and contemporary works. A variety of on-stage projects, film/video viewing, research projects, and field trips to local and regional performances combine to provide a detailed investigation of what makes us laugh and how it is best achieved. Written assignments include papers of analysis, journals, and critiques of in-class and outside performances. Prerequisites: Theater 220 and 230; additionally, 231 and 232 are preferred but not required.

223 Acting IV: Classic Techniques

An actor's buffet of verse and period style roles requiring special techniques and stylistic awareness. Scene work is coupled with research projects, journal assignments, and attendance at a variety of Chicago-area productions. Written analyses and critiques of field trips and in-class presentations fill out the curriculum. Prerequisites: Theater 220 and 260; additionally, 230, 231, and English 220 are preferred but not required.

224 Acting V: Performance Art

An exploration of modern and contemporary performance styles required by works from the early twentieth-century to the present by authors such as Pirandello, Brecht, Rice, Beckett, Ionesco, Genet, Grotowski, Artaud, Mnouchkine, Spaulding Gray, and others. Theories of Realism, Expressionism, Absurdism, and others will be examined in a performance context that includes skills in mime, improvisation, puppetry, dance, and more.

Students will create their own "Performance Art" works as well as reading or performing scripted works by others. Project work is coupled with research projects, journal assignments, and attendance at a variety of Chicago-area productions and exhibitions. Written analyses and

critiques of field trips and in-class presentations fill out the curriculum. This course is applicable for students of theater, art, literature, history, and communication. Prerequisites: Theater 220 or Art 130; Theater 223, 250, and 270 are recommended but not required. (Cross-listed as Art 237.)

225 Acting for the Camera – Film Techniques

This course is an exploration of the acting techniques required in film, television, and other media. Knowledge and understanding of film techniques, vocabulary, and genre styles is accomplished through viewing and analysis of modern and contemporary film works from the early twentieth century to the present by noted authors and filmmakers.

Acting projects center on the performance of scenes, monologues, voice-overs, and commercials. Other projects include written script and character analysis, daily actor journals, and in-depth critiques of self and peer performances. Papers of analysis on films viewed in and out of class and other research projects including adaptation of texts and acting styles for the screen are also required. Prerequisites: Theater 220 and Theater 221 or permission of the instructor through a placement test, an interview, and an audition.

230 Theater History I: Greeks to Shakespeare

History of the theater from its origins in religious ritual of ancient Greece to the productions of Shakespeare's London. Emphasis is placed on acting styles, production techniques, stage and auditorium architecture, and the socio-political milieu that formed the foundation of the theater of each culture and period. (Cross-listed as English 230.)

231 Theater History II: Molière to Ibsen

History of the theater from the comedies of Molière to the beginning of twentieth-century realism in the plays of Ibsen and Chekhov. This course explores the conventions of acting and stagecraft and cultural conditions that influenced each period's theater. (Cross-listed as English 234.)

232 Theater History III: Shaw to Kushner

An exploration of modern and contemporary works from the early twentieth century to the present by authors such as Shaw, Pirandello, O'Neill, Brecht, Inge, Rice, Odets, Wilder, and Miller. Theories of Realism, Expressionism, and others will be examined in context with the

social and cultural events that inspired them. (Cross-listed as English 237.)

233 Theater History IV: Circus to Performance Art

Contemporary performance art has its roots in the earliest performance practices—both narrative and non-narrative—from juggling and circus entertainments in ancient Rome through magic, opera, ballet, mime, and the experimental and environmental theater of the mid-twentieth century. Theories of Futurism, Grotowski's "Poor Theater," Artaud's Theater of Cruelty, and Robert Wilson's Theater of Images, are examined along with Lenny Bruce's stand-up comedy and the "New Vaudeville." Improvisation and the work of performance artists such as Carolee Schneemann, Karen Finley, Pina Bausch, Laurie Anderson, and Eric Bogosian, is also covered. (Cross-listed as Art 227 and English 233.)

235 Theater History VI: Musical Theater

A study of representative musical comedies, operettas, and related works that will provide topics for papers by students. Emphasis will be placed on relationship to political, social, and cultural events. Videotapes of musicals are viewed and discussed. Among works to be discussed are *Show Boat*, *Oklahoma!*, *South Pacific*, *My Fair Lady*, *Hair*, *Jesus Christ Superstar*, *A Little Night Music*, *Sunday in the Park with George*, and others. (Cross-listed as English 236 and Music 235.)

236 Shakespeare

(Cross-listed as English 220.)

240 Theater in Chicago

Investigation and discussion of both classic and modern plays through attending performances at a wide variety of Chicago theaters, ranging from small special-interest companies to the world-famous Goodman and Steppenwolf theaters. Reading and analysis of selected plays is coupled with written critiques and group discussion. Cost of theater tickets is not included in tuition; it will be billed upon enrollment and is not refundable.

245 Dramatic Criticism

Reading and discussion of principles and examples of dramatic criticism, from longer essays in scholarly books, academic journals, and magazines to shorter journalistic play reviews. We will write our own dramatic criticism in response not only to plays on the page, but also to performances on campus and in Chicago theater. (Cross-listed as English 245.)

250 Directing

An introduction to directing for the stage. Students learn the fundamental principles of stage direction through a series of in-class exercises and then apply them to scenes taken from major dramas. Emphasis is on directing projects and production research. Prerequisite: Theater 220.

255 Dramaturgy

An introduction to the role of the dramaturg within the theatrical production process. Includes readings by and about dramaturgs and hands-on experience in the following areas of dramaturgical pursuit: evaluating new scripts; creating a production-specific "protocol" (research compendium); analyzing and preparing a script for rehearsal; serving as an "in-house critic"; collaborating with directors, designers, and actors; creating and running educational programs for school and adult audiences; rehearsal functions and decorum; documentation techniques.

258 Dramatic Theory

Discussion and application of major theories of drama, including Aristotle, Dryden, Stanislavski, Brecht, Artaud, and others. We will apply each theory to appropriate plays from each theorist's time period, plus we will apply all the theories to a selected work in order to come up with a range of theoretically informed producible production concepts for the play.

260 Voice and Diction

Theory and practice of oral communication; voice production and breathing techniques; articulation drills; development of effective delivery and presentation techniques; relaxation and confidence-building exercises; public speaking practice; communication skills for business, the creative arts, and professions.

270 Playwriting

This is a writing-intensive, beginning course in the craft of dramatic writing. Problems of writing for the stage will be studied through reading and analysis of published play scripts, theater attendance, and in-class and out-of-class writing projects. Group discussions and individual conferences are also required. (Cross-listed as English 242.)

308 Renaissance Drama

(Cross-listed as English 308.)

330 Global Theater

Focusing on the variety of cultural groups in the greater Chicago metropolitan community,

this course explores how theater defines and enhances values of the communities examined. Lectures and discussions introduce the history and traditions of theater in selected cultural communities. Evening field trips to attend rehearsals and performances in each community include social/dining experiences; visits to museums, galleries, and houses of worship; meetings, parades, etc. Readings include dramatic and non-dramatic literature and theoretical works in theater, sociology, communication, religion, and other disciplines. Evaluation is based on research projects for each culture group and a final project focusing on the comparative analysis of the works and cultures studied. Prerequisite: At least one course in theater history. (Meets GEC Cultural Diversity Requirement.)

336 African American Theater

African Americans have revolutionized mainstream theater in this country and around the world. Examples of white bigotry, from the inherent racism in the minstrel shows of the 1800s to the indictment of apartheid by Athol Fugard, are counterpoised with the work of black artists celebrating their ethnicity, sometimes in revolutionary forms of expression. This course surveys the work of actors, singers, dancers, playwrights, composers, lyricists, producers, and directors from the African theater of William Henry Brown in 1821 through the collaboration of August Wilson and Lloyd Richards "chronicling black life in the decades of the 20th century." Readings from *Uncle Tom's Cabin* (1852) to *King Hedley II* (2001) are combined with film and video performances and field trips to the Black Ensemble Theater and E.T.A. and other Chicago theaters. Playwrights surveyed will include Richardson, Hughes, Hansberry, Childress, Bullins, Baraka, Fuller, Wilson, Cleage, Shange, and Parks. (Cross-listed as African American Studies 336. Meets GEC Cultural Diversity Requirement.)

337 Women in Theater

This course will examine the involvement of women in the history of theater. Topics covered may include: the medieval plays of Roswitha, strong female characters (acted by men) in Shakespeare, the arrival of actresses on the Restoration stage, the eighteenth-century playwright Aphra Behn, the rise of "star" actresses in the nineteenth century, and such twentieth-century figures as Marsha Norman, Maria Irene Fornes, Beth Henley, Wendy Wasserstein, Caryl Churchill, Timberlake Wertenbaker, Hélène Cixous, and Ntozake Shange. Prerequisite: At least one course in theater history. (Cross-listed

as English 365 and Women's and Gender Studies 337. Meets GEC Cultural Diversity Requirement.)

338 Activism in Theater: Gay, Lesbian, Transgender Voices

This class will study the recent flourishing of gay, lesbian, and transgender voices in theater. We'll look at various styles of activism and performance, from farce to realism, to camp/drag, to "queer" theater. Figures to be discussed include Charles Ludlam, Harvey Fierstein, Larry Kramer, William Hoffmann, Paula Vogel, Paul Rudnick, Tony Kushner, Jane Chambers, and Holly Hughes. Prerequisite: At least one course in theater history. (Cross-listed as English 385 and Women's and Gender Studies 338. Meets GEC Cultural Diversity Requirement.)

340 Theater Criticism

An intensive course on reading and writing brief, journalistic play critiques designed to help theatergoers make informed consumer decisions. Attention to journalistic basics and issues of individual sensibility and taste. Class writings will be considered for campus publications. Prerequisites: At least one of the following: Theater 240, 245, or 258. (Cross-listed as English 340.)

362 On-Site Study at Victory Gardens Theater

In coordination with a Lake Forest College faculty member and the associate artistic director at Victory Gardens Theater, two students per semester will develop plans of individual study at Victory Gardens Theater. For the primary emphasis of the course, the students will be expected to work at Victory Gardens between 10 and 20 hours per week. The Lake Forest College faculty member will oversee all academic facets of the course and will meet regularly with the students at the Lake Forest College campus. Students enrolled in this course will take it as a Credit-D-Fail option.

For application information, interested students should consult with the faculty liaison. (Cross-listed as English 362.)

370 Advanced Playwriting

This is a team-taught course that focuses on the collaboration between director, designers, and playwright in the creation and production of new works for the stage. Projects in writing, script analysis, casting, and presentation of original student works and/or works by professional authors are coupled with the same process for works adapted for the stage by students.

Prerequisite: Theater 270. (Cross-listed as English 370.)

380 Violence in Theater: Shakespeare to Tarantino

Via reading selected works and viewing plays and films, this class will be an intense exploration of the conundrum of why, from the time of Shakespeare to the present day, violence in the arts continues to endure and, indeed, thrive. Prerequisite: Theater 220 and at least one course in theater history. (Cross-listed as English 380.)

390 Internship

Our Chicago connection allows us to offer unique, outstanding internship opportunities at a variety of world-famous theaters. Victory Gardens provides the cornerstone for our internship program, offering paid internships annually in areas of production management, dramaturgy, technical direction and design, artistic direction, advertising, and public relations. Additional opportunities are available at Steppenwolf Theater, Goodman Theater, and Second City. Smaller companies, yet no less well-respected, specializing in specific genres also offer internships. These include Bailiwick Theatre, Black Ensemble Theater, About Face Theater, and Lookingglass Theatre.

Internships must be applied for in the semester prior to enrollment and application includes on-campus interviews with faculty and staff and off-campus interviews with members of the host theater company. Junior class standing and other prerequisites apply based on the nature of the internship and the requirements of the host organization.

492 Senior Project

A well-documented and well-executed senior project completed in the senior year may count as a senior thesis. (See Academic Regulations in the Student Handbook for details.) As with other theses, the final project will be reviewed by a thesis-examining committee consisting of three faculty, at least one from outside the Theater Department. Students are encouraged to consult with members of this committee during the planning and execution of the project.

494 Senior Thesis

WOMEN'S AND GENDER STUDIES

2005-2006 Committee Members:

Associate Professor of Art Karen Lebergott, Chair

Associate Professor of Psychology Naomi Wentworth

Assistant Professor of Music Kirk-Evan Billet

Assistant Professor of Communications Linda Horwitz

Associated Faculty:

Professor of Art Ann Roberts

Professor of Politics Ghada H. Talbami

Associate Professor of English Judy M. Dozier

Associate Professor of Politics Siobhan Moroney

Assistant Professor of Economics Allison Roberts

Lecturer in Religion Catherine Benton

Lecturer in Psychology Kathryn Rindskopf Dobrman

Lecturer in History Mary Mapes

Lecturer in English Tracy McCabe

WOMEN'S AND GENDER STUDIES MINOR

(No major is currently available.)

An interdisciplinary minor may be undertaken. Under the guidance of an advisor in this minor, students will develop a program comprising at least six courses.

Introduction to Women's and Gender Studies (252) is required of all minors; five additional courses will be chosen from a list of approved courses (updated annually) with the following conditions: 1) no more than two courses may come from the same department to ensure that the interdisciplinary character of the minor is maintained; 2) at least one course is taken at 300-level or above. An internship or independent research project may count for one of the courses.

Required Course:

Women's and Gender Studies 252
(Introduction to Women's and Gender Studies)

200-level courses in the program:

English 218
(Blues Women in African American Literature)

English 225
(Women and Literature)

History 245
(Foods, Diets, and Cultures)

History 271
(Women in Modern History: Europe and America)

Philosophy 200
(Philosophy and Gender)

Philosophy 282
(Visions of the Family: East and West)

Psychology 210
(Developmental Psychology: Childhood and Adolescence)

Psychology 211
(Adulthood and Aging)

Religion 275
(Female Religious Images in the West)

Religion 276
(Female Religious Images in Asia)

Sociology and Anthropology 253
(Family and Kinship)

Sociology and Anthropology 280
(Gender, Culture, and Society)

Sociology and Anthropology 281
(Gender Issues in China and Taiwan)

300-level courses (and above)

Art 325
(Women, Art, and Society)

Art 326
(Gender, Identity, and Modern Art)

Communications 382
(Women's Rhetoric and the Feminist Critique)

Economics 420
(Labor in the American Economy)

English 307
(Women Writers: Austen, Wharton, Woolf)

English 351
(Junior Colloquium: American Women Writers of the Gilded Age: 1865-1914)

English 403
(Emily Dickinson)

French 401
(Special Studies: The Role of Women in African Literature of French Expression)

History 305
(European History: Men, Women, and the Other in Medieval History)

History 307
(Topics: Women in Modern East Asia)

History 343
(Literature and Society in Russia)

History 347
(Topics in Gender and History: The Body and Western Civilization)

Philosophy 303
(Gender and Character)

Politics 318
(Topics in Comparative Politics: Women in the Third World)

Politics 355
(Family Structure and Political Theory)

Psychology 340
(Psychology of Women and Men)

Sociology and Anthropology 302
(Sexuality and Society)

Spanish 400
(Women's Voices in Latin America)

252 Introduction to Women's and Gender Studies

This course is an introduction to the field of women's and gender studies with an emphasis on literary texts studied in connection with ideas about gender in other disciplines, including science and social science. (Cross-listed as English 252. Meets GEC Cultural Diversity Requirement.)

President, Lake Forest College Alumni
Association Board

Sarah J. Rowland
Chair, Lake Forest College Women's Board

John N. Popoli
President and CEO, Lake Forest Graduate
School of Management

LIFE TRUSTEES

Clarissa H. Chandler
Lake Forest, Illinois

Wesley M. Dixon, Jr.
The Kinship Corporation

Maurice F. Dunne, Jr.
President, Maurice F. Dunne LTD

Francis C. Farwell II
Partner, William Blair & Company LLC

Russell W. Fisher
Chairman, Biofit Engineered Products

James P. Gorter
Green Bay Management Company

Arthur G. Hailand, Jr.
Director (ret.), Bank One Illinois Corporation

Margaret S. Hart
Lake Forest, Illinois

Betty Jane Hollender '42
Needham, Massachusetts

Laurence R. Lee
Senior Vice President, Administration &
Corporate Secretary (ret.), Abbott Laboratories

Paula P. Lillard
Head of School, Forest Bluff School

Mary Longbrake '35
Vice President (ret.), The Northern Trust
Company

David B. Mathis '60
Chairman, Kemper Insurance Companies

Jean W. Mohr '52
Lake Forest, Illinois

Marian P. Pawlick
Lake Bluff, Illinois

Rhoda A. Pierce '60
Executive Director, Chicagoland Pops
Orchestra

Charlotte H. Simmons
Lake Forest, Illinois

Virginia B. Sonnenschein
House of Travel International, Inc.

Frank L. Spreyer '35
Executive Vice President (ret.), Jewel Food
Stores

Barbara O. Taylor
President (ret.), Excelsior! Foundation

Florence F. Wheeler
Lake Forest, Illinois

THE FACULTY

Stephen D. Schutt (2001)
B.A., Earlham College; M.A., University of
London (England); J.D., University of
Pennsylvania Law School;
President of the College

Faculty Emeriti

Eugene Hotchkiss (1970-1993)
A.B., Dartmouth College; Ph.D., Cornell
University; LL.D., Illinois College; LL.D.,
Lake Forest College; *President, Emeritus*

Kenneth C. Bennett, Jr. (1961-1992)
B.A., University of Wisconsin; M.A.,
University of Illinois; Ph.D., Indiana
University; *Professor of English, Emeritus*

Ann D. Bowen (1952-1986)
Mus.B., Oberlin College; M.A., Columbia
University; Mus.D., Northwestern University;
Professor of Music, Emerita

Lowell A. Carmony (1981-2000)
B.A., Indiana University; M.S., University of
California (Berkeley); Ph.D., Southern Illinois
University; *Professor of Mathematics and
Computer Science, Emeritus*

Dan P. Cole (1965-1994)
A.B., Columbia University; B.D., Union
Theological Seminary; Ph.D., Drew
University; *William R. Brass Professor of Religion,
Emeritus*

Rosemary E. Cowler (1955-1995)
B.A., Douglass College; M.A., Indiana
University; Ph.D., Yale University; *Hotchkiss
Presidential Professor of English, Emerita*

Michael Benet Croydon (1968-1995)
Associate, Royal College of Art (London);
Professor of Art, Emeritus

Esther DeMerritt (1959-1979)
Grinnell College; *Associate Director of
Admissions, Emerita*

Bailey L. Donnally (1961-1995)
B.S., M.S., Auburn University; Ph.D.,
University of Minnesota; *Distinguished Service
Professor of Physics, Emeritus*

Arlene Eskilson (1972-2000)
B.A., M.A., Roosevelt University; Ph.D.,
University of Illinois (Chicago); *Professor of
Sociology and Anthropology, Emerita*

Roger J. Faber (1965-1996)
B.S., Calvin College; Ph.D., Michigan State
University; *Jacob Beidler Professor of Physics,
Emeritus*

Ronald H. Forgas (1958-1993)
B.Sc., M.Sc., McGill University; Ph.D.,
Cornell University; *Professor of Psychology,
Emeritus*

Phylis M. Frankel (1968-2004)
B.S., M.A., Ph.D., Northwestern University;
*Associate Professor of Psychology, and Director and
Staff Member, Counseling Center, Emerita*

Jonathan Fuller Galloway (1966-2002)
B.A., Swarthmore College; Ph.D., Columbia
University; *Irvin L. and Fern D. Young
Presidential Professor of Politics, Emeritus*

Pericles B. Georges (1989-2003)
A.B., University of Illinois (Chicago); M.A.,
Ph.D., University of California (Berkeley);
Associate Professor of History, Emeritus

Frederic A. Giere (1962-1988)
B.A., Luther College; M.S., Syracuse
University; Ph.D., University of New Mexico;
Professor of Biology, Emeritus

Robert Morse Greenfield (1967-2002)
B.A., Occidental College; M.A., Ph.D.,
Columbia University; *Associate Professor of
English, Emeritus*

Gertrude Grisham (1976-1991)
Absolutorium, University of Vienna; M.A.,
Ph.D., Northwestern University; *Director of the
Writing Center and Lecturer, Emerita*

Rosemary D. Hale (1946-1984)
A.B., Mount Holyoke College; M.A., American
University; *James D. Vail Professor of Economics,
Emerita*

Forest W. Hansen (1963-1993)
A.B., Harvard College; M.A., University of
Wisconsin; Ph.D., Johns Hopkins University;
Professor of Philosophy, Emeritus

Ann Louise Hentz (1956-1986)
B.A., University of Rochester; M.A., Ph.D.,
The Ohio State University; *Professor of English,
Emerita*

Tung Hon Jeong (1963-1997)
B.A., Yale College; Ph.D., University of
Minnesota; *Professor of Physics, Emeritus*

Frank E. Kirby (1963-1993)
B.A., Colorado College; Ph.D., Yale
University; *Professor of Music, Emeritus*

Joann Harrington Lee (1950-1951; 1960-1984)
B.A., University of Missouri; M.A. in L.S.,
University of Michigan; *Assistant Librarian,
Emerita*

Charles D. Louch (1957-1989)
B.A., College of Wooster; M.S., Ph.D.,
University of Wisconsin; *Professor of Biology,
Emeritus*

Charles A. Miller (1974-1998)
B.A., Swarthmore College; M.P.A., Ph.D.,
Harvard University; *Professor of Politics,
Emeritus*

William Moskoff (1970-1972; 1983-2002)
B.A., Hunter College; M.A., Ph.D.
(Economics), Certificate, Russian Area Studies,
University of Wisconsin; M.S. (Biological
Sciences), University of Illinois (Chicago); *Betty
Jane Schultz Hollender Professor of Economics and
Biology, Emeritus*

Franz Schulze (1952-1991)
Ph.B., University of Chicago; B.F.A., M.F.A.,
School of the Art Institute of Chicago; *Betty
Jane Schultz Hollender Professor of Art, Emeritus*

Ruth Baker Sharvy (1967-1975)
B.A., University of Wisconsin; *Assistant
Librarian, Emerita*

Ralph L. Shively (1965-1987)
B.S., M.A., Ph.D., University of Michigan;
Professor of Mathematics, Emeritus

Charles S. Smith (1962-1985)
B.A., Western Kentucky State College; M.A.,
State University of Iowa; Ph.D., Indiana
University; *Associate Professor of Mathematics,
Emeritus*

M. Lee Thompson (1962-1997)
B.A., Concordia College; Ph.D., Indiana
University; *Professor of Chemistry, Emeritus*

David Walter Towle (1988-2001)
B.S., M.S., University of New Hampshire;
Ph.D., Dartmouth College; *Foster G. McGaw
Professor of Biology, Emeritus*

Robert James Troyer (1968-1992; 1993-1994)
B.S., Ball State University; M.A., Ph.D.,
Indiana University; *Professor of Mathematics,
Emeritus*

Kenneth L. Weik (1967-2001)
B.S., Northern Illinois University; M.S., Ph.D.,
Southern Illinois University; *Associate Professor
of Biology, Emeritus*

Arthur Zilversmit (1966-1998)
B.A., Cornell University; M.A., Harvard
University; Ph.D., University of California
(Berkeley); *Distinguished Service Professor of
History, Emeritus*

CURRENT FACULTY

Amy Abe (1994-1996; 2000)
B.A., Lake Forest College; M.S., Lake Forest
Graduate School of Management; Ph.D.,
California Institute of Technology;
Lecturer in Chemistry

Dawn M. Abt-Perkins (1993)
B.S., M.S., Ph.D., University of Wisconsin
(Madison); *Associate Professor of Education;
Chair of Education*

Tony Adler (2005)
B.A., Carnegie-Mellon University;
Lecturer in Theater

Edward Ahern (2005)
B.A., University of Illinois; M.B.A., University
of Chicago; *Lecturer in Economics*

Lia Alexopoulos (2001-03; 2005)
B.A., Lake Forest College; M.A., University of
Chicago; *Lecturer in Art*

Claudia Allen (2000)
B.A., M.A., University of Michigan;
Lecturer in Theater

David G. Amrein (2005)
B.A., M.A., University of California (Davis);
Instructor in Music

Robert Archambeau (1996)
B.A., University of Manitoba; M.A., M.F.A.,
Ph.D., University of Notre Dame;
Associate Professor of English

Carla Arnell (2000)
A.B., Augustana College; M.A., Ph.D.,
Northwestern University; *Assistant Professor of
English*

Robert A. Baade (1973)
B.A., University of Wisconsin (Whitewater);
M.A., Ph.D., University of Wisconsin
(Madison); *James D. Vail Professor of Economics;
Chair of Economics and Business*

Cheryl Bachand (2003)
B.A., Clark University; M.S., Northeastern
University; M.S., University of Massachusetts;
Lecturer in Art

James Barilla (2005)
B.A., Macalester College; M.S., The University
of Montana; Ph.D., University of California
(Davis); *Assistant Professor of English*

Lois B. Barr (1996)
B.S., Georgetown University; M.A.,
Middlebury College; Ph.D., University of
Kentucky; *Associate Professor of Spanish; Chair of
Foreign Languages and Literatures*

Jeffrey Bass (2005)
B.A., Sarah Lawrence College; M.A., Ph.D.,
University of California (San Diego);
Assistant Professor of Sociology and Anthropology

Marilyn Bell (1995)
B.A., University of California (Santa Cruz);
M.S., SUNY (Stony Brook); *Systems Manager
of the Library and Information Technology;
Lecturer in Physics*

Theodore R. "T. R." Bell (2004)
B.A., Lake Forest College; *Physical Educator and
Coach; Director of Summer Conferences*

Shawn Bender (2005)
B.A., University of Minnesota; M.A., Ph.D.,
University of California (San Diego);
Assistant Professor of Sociology and Anthropology

Catherine Benton (1987)
B.A., Southern Illinois University; M.I.A.
(International Administration and Cross-cul-
tural Education), School for International
Training; M.A., M.Phil., Ph.D., Columbia
University; *Lecturer in Religion*

Kate Biderbost (2004)
B.F.A., Michigan State University; M.F.A.,
Indiana University; *Lecturer in Art*

Kirk-Evan Billet (2001)
B.Mus., Peabody Conservatory of Music of
Johns Hopkins University; M.Mus., University
of Miami; D.M.A., Manhattan School of
Music; *Assistant Professor of Music*

Karen Blocker (2001)
B.S., M.A., National Louis University;
Certificate in Assistive Technology, California
State University; *Academic Technologist/Manager
of Media Services*

David M. Boden (1996)
B.A., Johns Hopkins University; J.D., College
of William and Mary; M.A., Ph.D.,
Northwestern University; *Assistant Professor of
Sociology and Anthropology*

Nancy Sosna Bohm (2001)
B.A., California State University (Chico);
M.L.S., San Jose State University;
Associate Librarian/Reference Librarian

Ruthane I. Bopp (1960)
B.A., Lake Forest College; M.A., Northwestern
University; *Registrar of the College; Instructor in
Mathematics*

Nancy Brekke (1991)
B.A., Ph.D., University of Minnesota;
Associate Professor of Psychology

Herbert Bronstein (1987)
B.A., M.A., University of Cincinnati; B.H.L.,
M.H.L., D.D., Hebrew Union College;
*Lecturer in Religion; Co-sponsored by the Jewish
Chautauqua Society*

Susanna Calkins (2004)
B.A., La Salle University; M.A., Ph.D., Purdue
University; *Lecturer in History*

Shiwei Chen (1998)
B.A., Yunnan University; M.A., Peking
University; Ph.D., Harvard University;
Associate Professor of History

Jason A. Cody (1995-1996; 1997)
B.A., College of Wooster; Ph.D.,
Northwestern University; *Associate Professor of
Chemistry; Chair of Chemistry*

Cynthia Cole (2003)
B.S., Northwestern University; M.A.,
University of Wisconsin (Madison);
Associate Librarian/Head of Circulation

Chris Conger (1995)
B.S., University of Wisconsin (Madison);
Physical Educator and Coach

James R. Cubit (1996)
B.S., M.A., University of Iowa; *Director of the
Library and Information Technology*

Mary Beth Cummings (2004)
B.A., Loyola University; M.S., University of
Illinois (Urbana); *Lecturer in Economics*

Michael Dau (1966)
B.A., Lake Forest College; *Physical Educator
and Coach*

Shubhik DebBurman (2001)
B.A., Wittenberg University; Ph.D.,
Northwestern University; *Assistant Professor of
Biology*

Brigitte Debord (2000)
B.A., Université de Provence I; M.A.,
University of Arkansas (Fayetteville); Ph.D.,
University of Arkansas; *Assistant Professor of
French*

Lori Del Negro (2003)
B.S., Hartwick College; Ph.D., University of
Colorado; *Assistant Professor of Chemistry*

Rachel DeMotts (2005)
B.A., Marquette University; M.A., Ph.D.,
University of Wisconsin (Madison); *Assistant
Professor of Politics*

Tom Denlinger (1999)
B.A., California State University (Hayward);
M.F.A., The School of the Art Institute of
Chicago; *Assistant Professor of Art*

- Les R. Dlabay (1983)
B.S., University of Illinois (Chicago); M.B.A., DePaul University; Ed.D., Northern Illinois University; *Professor of Business*
- Kathryn Rindskopf Dohrmann (1975-1983; 1985-1988; 1991)
B.S., M.S., Ph.D., Iowa State University; M.P.H., Columbia University; *Lecturer in Psychology*
- Marvin Doubet (2001)
B.S., Illinois State University; M.S., University of South Carolina; *Lecturer in Mathematics*
- Judy M. Dozier (1997)
B.A., University of Illinois (Chicago); M.A., Governors State University; Ph.D., Loyola University (Chicago); *Associate Professor of English; Chair of English*
- Richard F. Dye (1983)
A.B., Kenyon College; M.B.A., Ph.D., University of Michigan; *Ernest A. Johnson Professor of Economics*
- Michael H. Ebner (1974)
B.A., University of Toledo; M.A., Ph.D., University of Virginia; *A. B. Dick Professor of History*
- Elizabeth W. Fischer (1992)
B.A., Lake Forest College; Ph.D., Northwestern University; *Lecturer in Chemistry*
- Paul B. Fischer (1971)
B.A., M.A., City College of New York; Ph.D., University of Massachusetts; *Professor of Politics*
- C. Richard Fisher (1987)
B.A., M.A., Ph.D., University of Chicago; *Associate Professor of German*
- Julia Fiske (2004)
B.A., Williams College; J.D., Loyola University School of Law; M.A., Ph.D., Northwestern University; *Lecturer in Environmental Studies*
- Robert Flot (2005)
B.A., M.A., Eastern Illinois University; *Director of Intercultural Relations; Lecturer in Communications*
- Anthony L. Fritz (1978)
B.S., M.S., University of Wisconsin (Milwaukee); *Physical Educator and Coach*
- Bernice Elizabeth Gallagher (1984-1986; 1990-1992; 1993)
B.A., Barat College; M/LS, Lake Forest College; Ph.D., Northwestern University; *Director of Writing Programs; Lecturer in English*
- Steven P. Galovich (1994)
B.A., B.S., University of California (Davis); Ph.D., Brown University; *Professor of Mathematics*
- Jean-Luc Garneau (1964)
B.A., Université Laval (Québec); M.A., University of Illinois (Chicago); Licence ès Lettres, Université Laval; *Professor of French*
- Carol Gayle (1966)
B.A., Swarthmore College; M.A., Columbia University; *Associate Professor of History; Director of Community Education; Associate Director of the M/LS Program; Chair of History*
- David George (1985)
B.A., M.A., Ph.D., University of Minnesota; *Professor of Spanish*
- Robert B. Glassman (1969)
B.A., Columbia College; Ph.D., University of Pennsylvania; *Professor of Psychology, Chair of Psychology*
- Rebecca Goldberg (2002)
B.A., M.A., Illinois State University; M.B.A., Lake Forest Graduate School of Management; *Lecturer in Art*
- Harlan Goldberg (2002)
B.S., M.S., University of Illinois; *Lecturer in Education*
- Benjamin Goluboff (1986)
B.A., New York University; M.A., Ph.D., University of Pennsylvania; *Associate Professor of English*
- Caleb Gordon (2001)
B.A., Williams College; Ph.D., University of Arizona; *Assistant Professor of Biology*
- Clayton Gray, Jr. (1977)
B.A., Fisk University; M.A., University of Colorado (Boulder); Ph.D., University of California (Berkeley); *Associate Professor of German and Russian*
- Kent R. Grote (1998)
B.A., Doane College; M.A., University of Cincinnati; Ph.D., George Mason University; *Instructor in Economics*
- R. Sergio Guglielmi (1991)
Laurea, University of Rome; Ph.D., University of Minnesota; *Professor of Psychology*
- Cynthia T. Hahn (1990)
B.A., Rosary College; M.A., Purdue University; Ph.D., University of Illinois; *Professor of French*
- Kurt Ham (1991-1999; 2000)
B.A., Lake Forest College; M.A., New School for Social Research; *Lecturer in Sociology and Anthropology*
- Leslie Harris (2004)
B.A., M.A., Northwestern University; *Instructor in Communications*
- Barbara Harvey (2005)
B.A., Dominican University; M.A., National Louis University; *Lecturer in Education*
- Clara Herrera (2004)
B.S., Universidad de los Andes Bogotá, Colombia; M/LS, Lake Forest College; Ph.D., University of Illinois (Chicago); *Lecturer in Spanish*
- Robert L. Holliday (1982)
B.S., University of Missouri (Rolla); M.S., Ph.D., Southern Illinois University; *Professor of Mathematics and Computer Science*
- Linda Horwitz (2003)
B.A., Bates College; M.A., Ph.D., Northwestern University; *Assistant Professor of Communications*
- Anne E. Houde (1992)
A.B., Princeton University; M.S., Ph.D., University of Maryland; *Associate Professor of Biology*
- Ying Huang (2004)
B.A., Wuhan University of Science and Technology; M.A., Ph.D., City University of New York; *Assistant Professor of Economics*
- Joseph Hummel (2000)
B.Sc., Allegheny College; M.Sc., University of Michigan; Ph.D., University of California (Irvine); *Associate Professor of Computer Science*
- Eiko Ichinose (1999)
B.A., Ritsumeikan University; *Lecturer in Japanese*
- Tina M. Johnson (2004)
B.S., Southern Illinois University (Edwardsville); M.A., University of Missouri (St. Louis); *Physical Educator and Coach*
- Anna Trumbore Jones (2003)
B.A., University of Chicago; M.A., M.Phil., Ph.D., Columbia University; *Assistant Professor of History*
- Diane M. Kanney (1995)
B.A., Bluffton College; M.A., Bowling Green State University; *Associate Director of Admissions*
- Eileen Karsten (2001)
B.A., Barat College; M.A., Rosary College Graduate School of Library and Information Science; *Associate Librarian; Head of Technical Services*
- Michael Mason Kash (1988)
B.A., Lake Forest College; Ph.D., Massachusetts Institute of Technology; *Professor of Physics; Chair of Physics*
- Laura J. Kateley (1965)
B.S., University of Detroit; M.S., Michigan State University; *Associate Professor of Chemistry*
- Matthew R. Kelley (2002)
B.S., University of Wisconsin (Parkside); M.S., Ph.D., Purdue University; *Assistant Professor of Psychology*
- Yung Tae Kim (2005)
B.S., Georgia Institute of Technology; M.S., Ph.D., University of Illinois at Urbana (Champaign); *Assistant Professor of Physics*
- Karen E. Kirk (1996)
B.S., University of Delaware; Ph.D., Rutgers University; *Associate Professor of Biology*
- Deborah Knowles (2001)
B.Mus.Ed, M.Mus., Northwestern University; *Lecturer in Music*
- Craig D. Knuckles (1995)
B.S., M.S., Tennessee Technological University; Ph.D., Louisiana State University; *Associate Professor of Mathematics*
- Rita Koller (2002)
B.A., Lake Forest College; M.L.I.S., Dominican University; *Associate Librarian*
- Burton Krain (2004)
B.S., Loyola University; M.S., Ph.D., Illinois Institute of Technology; *Lecturer in Psychology*
- David L. Krantz (1963)
B.A., Brooklyn College; M.S., Ph.D., Northwestern University; *Professor of Psychology*

Marita Labedz-Poll (1998)
B.A., Millikin University; M.S., Eastern Illinois University; *Senior Associate Dean of Students*

Susan Langner (2004)
B.A., Denison University; *Assistant Director of Transfer Admissions*

Arthur Lazar (1980)
M.F.A., Ohio University; *Lecturer in Art*

Karen Lebergott (1996)
B.S., University of Wisconsin (Madison); M.F.A., The School of the Art Institute of Chicago; *Associate Professor of Art*

Dan L. LeMahieu (1974)
B.A., Lawrence University; M.A., Ph.D., Harvard University; *Hotchkiss Presidential Professor of History; Director of the M/LS Program; Chair of Communications*

Robert J. Lemke (2002)
B.A., Saint Olaf College; M.S., Ph.D., University of Wisconsin (Madison); *Assistant Professor of Economics*

Abba Lessing (1965)
B.A., Wesleyan University; M.A., Ph.D., Tulane University; *Professor of Philosophy*

Rami Y. Levin (1994)
B.A., Yale University; M.A., University of California (San Diego); Ph.D., University of Chicago; *Associate Dean of the Faculty; Director of the Center for Chicago Programs; Associate Professor of Music*

David E. Levinson (1992)
B.A., University of Arizona; M.M., Northwestern University; M.S., University of Illinois (Urbana-Champaign); *Systems Librarian/Academic Technology Specialist*

Debra Homer Levis (1996-1997; 1998-1999; 2000)
B.A., J.D., Northwestern University; *Lecturer in Politics*

Huichun (Amy) Liang (2002)
B.A., Zhongshan University; M.A., Governors State University; *Lecturer in Chinese*

Douglas B. Light (2003)
B.A., Colby College; M.S., Ph.D., University of Minnesota; *Professor of Biology; Chair of Biology*

Louis G. Lombardi (1980)
A.B., Brown University; Ph.D., University of Illinois (Urbana); *Professor of Philosophy; Chair of Philosophy*

Jennifer A. Lowe (1999)
B.A., Lake Forest College; M.F.A., DePaul University; *Lecturer in Theater*

Cynthia B. Lucking (1988-2004; 2005)
B.A., Northwestern University; M.S.A., DePaul University; *Instructor in Business*

Dennis Mae (1992)
B.A., B.S., University of Illinois (Chicago); M.A., DePaul University; *Lecturer in Theater; Director of Theater*

Rudy Maglio (2002)
B.S., American Institute of Engineering and Technology; M.S., M.A., Northeastern Illinois University; Ph.D., Northwestern University; *Lecturer in Environmental Studies*

Ann B. Maine (1994)
B.S., Williams College; M.S., Ph.D., University of Rochester; *Lecturer in Biology*

Richard Mallette (1991)
B.A., Boston College; M.A., Ph.D., Harvard University; *Distinguished Service Professor of English*

Mary Mapes (2002)
B.A., M.A., Ph.D., Michigan State University; *Lecturer in History*

James J. Marquardt (2002)
B.A., Villanova University; M.A., Ph.D., University of Chicago; *Assistant Professor of Politics*

William B. Martin (1961)
B.S., Franklin and Marshall College; Ph.D., Northwestern University; *Deane Professor of Biochemical and Biological Sciences; Faculty Marshal*

Tracy McCabe (1998)
A.B., Princeton University; M.A., Ph.D., University of Wisconsin (Madison); *Lecturer in English*

Janet McCracken (1993)
B.A., Vassar College; M.A., Ph.D., University of Texas (Austin); *Provost and Dean of the Faculty; Professor of Philosophy*

Armando Melgar (2004)
B.A., Universidad de San Carlos; M.A., University of Southern California; *Lecturer in Spanish*

Gizella Meneses (2005)
B.A., M.A., Loyola University (Chicago); Ph.D., Arizona State University; *Assistant Professor of Spanish*

Donald C. Meyer (1995)
B.A., University of California (Santa Barbara); M.A., Ph.D., University of California (Davis); *Associate Professor of Music; Chair of Music*

Arthur H. Miller, Jr. (1972)
B.A., Kalamazoo College; M.A. (English), M.A. (Librarianship), University of Chicago; Ph.D., Northwestern University; *Archivist and Librarian for Special Collections*

Rebecca L. Miller (2001)
B.A., Northwest Nazarene University; M.S., University of Illinois; *Associate Librarian*

Ronald H. Miller (1974)
B.A., M.A., Ph.L., S.T.L., St. Louis University; Ph.D., Northwestern University; *William R. Brass Professor of Religion; Chair of Religion; Coordinator of Interfaith Ministry*

Siobhan M. Moroney (1993)
B.A., University of Oklahoma; Ph.D., Rutgers University; *Associate Professor of Politics; Chair of Politics*

Marc L. Moskowitz (2000)
B.A., M.A., Ph.D., University of California (San Diego); *Gustav E. Beerly Jr. Assistant Professor of Sociology and Anthropology*

William G. Motzer, Jr. (1992)
B.A., North Central College; M.B.A., Lake Forest Graduate School of Management; *Vice President for Admissions and Career Services*

Nathan Mueggenburg (2004)
B.A., Illinois Wesleyan University; M.S., Ph.D., University of Chicago; *Assistant Professor of Physics*

Martina Nehrling (2002)
B.F.A., The School of the Art Institute of Chicago; M.F.A., University of Chicago; *Lecturer in Art*

Paul S. Orogun (1995)
B.S., University of Ife, Ile-Ife, Nigeria; M.A., Ph.D., University of California (San Diego); *Associate Professor of Politics*

Edward W. Packel (1971)
B.A., Amherst College; Ph.D., Massachusetts Institute of Technology; *Ernest H. Volwiler Professor of Mathematics*

Mitchell L. Paliga (1999)
B.Mus., Eastern New Mexico University; M.Mus., Northwestern University; *Lecturer in Music*

David W. Park (2003)
B.S., Northwestern University; M.A., Ph.D., University of Pennsylvania; *Assistant Professor of Communications*

Richard Pettengill (2003)
B.A., Bates College; M.A., Ph.D., University of Chicago; *Assistant Professor of English and Theater*

Beth T. Pier (1994)
B.A., St. Norbert College; *Physical Educator and Coach*

Rachel G. Ragland (1996)
B.A., M.S., University of Pennsylvania; Ed.D., Teachers College, Columbia University; *Assistant Professor of Education*

Christopher Reed (1996)
B.A., Amherst College; M. Phil., Ph.D., Yale University; *Professor of Art*

DeJuran Richardson (1986-1991; 1993)
B.A., M.S., Ph.D., Northwestern University; *Associate Dean of the Faculty; Professor of Mathematics; Director of the Learning and Teaching Center*

Ursula Pridgen Ricketts (2005)
B.S., University of Illinois (Chicago); M.A., Governors State University; Ed.D., Loyola University (Chicago); *Assistant Professor of Education*

Eli Robb (2004)
B.A., University of California (Berkeley); M.F.A., School of the Art Institute of Chicago; *Assistant Professor of Art*

Allison A. Roberts (2001)
B.A., Lake Forest College; M.A., Ph.D., Northern Illinois University; *Assistant Professor of Economics*

Ann M. Roberts (1995)
B.A., Johns Hopkins University; M.A., Ph.D., University of Pennsylvania; *Professor of Art; Acting Chair of Art*

Melinda Schmidt Rosenbaum (2005)
B.A., M.A., Ph.D., University of Virginia;
Lecturer in Psychology

Steven J. Rosswurm (1977)
B.A., University of Michigan; M.A., Ph.D.,
Northern Illinois University; *Professor of History*

Ahmad Sadri (1988)
B.A., M.A., Teheran University; M.A., Ph.D.,
New School for Social Research; *Professor of
Sociology and Anthropology; Chair of Sociology and
Anthropology*

Bonnie Salomon (2004)
A.B., Harvard University; M.D., University of
Illinois; *Lecturer in Philosophy*

Voula Saridakis (2002)
B.A., Cornell University; M.S., Ph.D., Virginia
Polytechnic Institute and State University;
Lecturer in History

Ted W. Schaefer (1990)
B.A., M.A., University of Missouri (Columbia);
Lecturer in English

R. Scott Schappe (1996)
B.S., University of Michigan; Ph.D., University
of Wisconsin; *Associate Professor of Physics*

Davis Schneiderman (2001)
B.A., Pennsylvania State University; M.A.,
Ph.D., Binghamton University; *Assistant
Professor of English*

Shelley C. Sherman (1993)
B.A., American University; M.S., Northwestern
University; Ph.D., University of Illinois
(Chicago); *Assistant Professor of Education*

Jacqueline A. Slaats (1986)
B.S., Iowa State University; M.S., University of
Wisconsin (Whitewater); *Director of Athletics;
Physical Educator and Coach*

Nicole Sleiter (2003)
B.S., University of Wisconsin; Ph.D.,
Northwestern University; *Assistant Professor of
Biology*

W. Rand Smith (1977)
B.A., University of North Carolina (Chapel
Hill); M.A., Ph.D., University of Michigan;
*Irvin L. & Fern D. Young Presidential Professor
of Politics*

Diane Snedden (1998)
B.Ph., Northwestern University; Certificate in
Microcomputers, College of Lake County;
Academic Technology Specialist

David Spadafora (1990)
B.A., Williams College; Ph.D., Yale University;
Litt.D., Lake Forest College; *Professor of
History*

Maggie Speer (1999)
Lecturer in Theater

George L. Speros (1963)
B.S., Edinboro State College; M.A.,
Middlebury College; Ph.D., University of
Madrid; *Associate Provost and Associate Dean of
the Faculty; Director of International Studies;
Director of Summer School; Associate Professor of
Spanish*

Corinne L. Stevens (1998)
B.A., Pace University; M.L.I.S., University of
Texas (Austin); *Head of Public Services (LIT)*

Jed H. Stone (1999)
B.A., Lake Forest College; J.D., IIT
Chicago-Kent College of Law; *Lecturer in
Politics*

Jeffrey O. Sundberg (1989)
B.A., Carleton College; M.A., Ph.D., Stanford
University; *Associate Professor of Economics and
Business*

Kristin Sundberg (2002)
B.A., Macalester College; *Director of Transfer
and International Admissions*

Ghada Hashem Talhami (1983)
B.A., Western College for Women; M.S.,
University of Wisconsin (Milwaukee); Ph.D.,
University of Illinois (Chicago); *D.K. Pearsons
Professor of Politics*

Steve Tammelleo (2005)
B.S., Lewis and Clark College; Ph.D.,
University of Memphis; *Assistant Professor of
Philosophy*

Alan Teller (2004)
B.A., City University of New York; *Lecturer in
History*

Jill Terzakis (2004)
B.A., Lake Forest College; M.B.A., DePaul
University (Chicago); *Lecturer in Economics and
Business*

Carolyn Tuttle (1984)
B.A., Boston College; M.A., Ph.D.,
Northwestern University; *Professor of Economics;
Assistant Faculty Marshal*

Beth Tyler (2002)
B.A., University of Illinois (Chicago); M.A.,
University of Chicago; *Dean of Students*

Jill Van Newenhizen (1987)
B.A., Lake Forest College; M.S., Ph.D.,
Northwestern University; *Associate Professor of
Mathematics*

Michael A. Vari (2004)
B.F.A., Northern Illinois University; M.A.,
University of Illinois (Chicago); *Lecturer in Art*

Alexander B. Webster (1999)
B.A., Williams College; M.A., North Carolina
Central University; *Physical Educator and Coach*

Catherine S. Weidner (1999)
B.A., College of William and Mary; M.A., Ph.D.,
Northwestern University; *Lecturer in History*

Naomi Wentworth (1983)
B.A., University of Massachusetts (Amherst);
M.S., Assumption College; Ph.D., University
of Connecticut; *Associate Professor of Psychology*

Melanie Werst (2001)
B.S., University of Minnesota; Ph.D.,
Northwestern University; *Lecturer in Chemistry*

Lynn C. Westley (1992)
B.A., Grinnell College; M.S., Ph.D., University
of Iowa; *Lecturer in Biology*

Christopher Whidden (2005)
B.A., Wake Forest University; M.A., Northern
Illinois; *Lecturer in Politics*

Rachel Whidden (2005)
B.A., M.A., Wake Forest University; Ph.D.,
University of Iowa; *Assistant Professor of
Communications*

Mark B. White (1999)
B.A., M.A., Ph.D., University of California
(Berkeley); *Associate Professor of African
American Studies and Communications*

Raymond Wiggers (2000)
B.S., Purdue University; *Lecturer in Biology and
Environmental Studies*

Dawn C. Wiser (1998)
B.S., Muskingum College; Ph.D., Colorado
State University; *Associate Professor of Chemistry*

Xiaosi Yang (2002)
B.A., Shaanxi Teachers' University; M.A.,
South China Teachers' University; M.A.,
Ph.D., Johns Hopkins University; *Lecturer in
Philosophy; Director of the Asia Center*

David S. Yuen (1995)
B.A., M.S., University of Chicago; Ph.D.,
Princeton University; *Professor of Mathematics;
Chair of Mathematics and Computer Science*

Carisa Zaban (2005)
B.A., University of New Hampshire; *Physical
Educator and Coach*

Rui Zhu (2002)
B.A., M.A., Peking University; Ph.D., Tulane
University; *Assistant Professor of Philosophy*

Dates in parentheses indicate year of original
appointment to the faculty and length of service.
